## cannon－ball，s．

Mil．：Applied generally to all iron projec－
thles fired from smooth-bore ordnance. They consist of aolid and hollow cast-iron ahot, steel or wrought-irou ahot, grape, case, sand shot, common ahells, diaphragm ahropoell shells, improved shrapuell shells, Martin'a ahella, carcasses, light balls (ground and parachute), and amoke balls. Stink balls and poiaoned balls were formerly used hy barbaric nations.
"Like feathor.bed 'twixt costle wall.
Aud hesvy brunt of cannon-ball",
Bufler : Budibras.
Cannon-ball tree:
Bot.: A name given to a South American tree-Couropita guianensis-from the large bize and globular ahape of its truit. It belongs to the order Lecythidacez. The frult is vinotra and pleasant when fresh, but emits au intolerably offensive odour when in a atate of intolerably offensive odour when in a atate of decay. It is known in Cayenne as the "abricot Sauvage," i.e. Wild Apricot. The ahells
are uaed as drinking utemaila; the seeda are are uaed as drinking utenaila: the
eaten by monkeys. (Lindley, \&c.)

## cannon-bone, canon-bonc, 8.

Farriery:

1. The metacarpal bone, between tho knee and fetlock joint of the fore-leg.
2. The metatarsal bone, between the bock and fetlock joint of the bind-leg.

- cannon-bullet, s. A cabnon-ball.
"The Hxt starsare so remote from the earth, that, if - eamron-bullet should come from one of the ifit atara Fhith n suift $n$ motion as it hath whea it to hot ont of the mouth of acannon, it would be tovo00 years in Philoosophy, c. 3 .

## cannon-casting, n. \& s.

A. As adj.: Casting or designed to cast Annon.
B. As subst. : The art or operation of casting cannon. The moulds for brasa cannon are formed by wrapping a long taper rod of wood with a peculiar soft rope, over which is applied a coating of loan, which, as the work proceeds, is dried over a long fire, a templet being applied to form the proper outline. This model is made about one-third longer than the gun is to be. It is next, when dry, black washed, and covered with a shell of loam not less than three inches thick, secured by iron bands, which is also carefully dried. The model ia next removed by withdrawing the taper rod and the rope, and extracting the pieces of loam. The parts for the cascabel and truanions are formed upon wooden models, and then attached to the exterior of the ahell ; bandlea, dolphins, or ormamental figures, are modelled in wax, and placed on the clay model previous to moulding the shell, from which they are melted out before casting. The meltor metal is then admitted to the bottom of the mould through two gates, one on each of the mould through two gates, one on each
aide, or in some similar way. Cannons are side, or in some similar way, Cannons are
made solid, and are then bored by being made made solid, and are then bored by being
to revolve around a drill. (Knight, dc.)

## oannon-clock, $s$.

Ordnance: A cannon with a burning glass over the vent, so as to fire the priming when the aun resches the meridian. Such piece were placed in the Palais Rnyal and in the Luxembourg, at Paris. (Knight.)

## cannon-Iock, s.

Ordnance: A contrivance placed over the touch-hole of a cannon to explode the charge.
cannon-metal, s. The same as GusMETAL (q.v.).
cannon-mouth, \&
Saddlery: A round but long piece of iron, a part of the bit, designed to keep the horse in subjection. [Cañon-eit.]

## cannon-pinion,s.

Horol.: A squared tubular piece, placed on the arbor of the centre-wheel, and adapted to bold the minute-hand.
cannon-proof, s. \&a.
-A. As substantive: il atate of safety from cannon-shot; hence, generelly, safety.
"Il I might stand still ia connomproof, and have King and no King.
B. As adj.: Proot against the attacks of cannon.

## cannon-royal, a.

Ordnance: An old grade of gervice-cannon, 4 inches bore, 66 -pounder; a carthoun.

## cannon-shot.s.

1. A cannon-bail.
"He reckons those for wounds that are made by ballets although it be a oannom-shoc. - Wisoman.
2. The distance to which a ball can be projected from a cannon.

## cannon-stove, s.

Heating npparatus: A cast-lron stove, aomewhat cannon-shaped, the lower portion, or bosh, forming the fire-pot, and the upper a radiating aurface. It has no fiues proper, but the stove-pipe stands apon the top, encircling the thinuble.

* ca-noa, s. [Obsolete form of Canoe (q.v.).] ca-nôe, * ca-noa, can-now, cannowe,s. \& a [Sp, canoa, probably a West Indian or Cariblean word.]
A. As substantive:

1. Originally: A kind of boat in nac among uncivilised nations. It is made elther of the trunk of a tree hollowed out, or of pleces of bark or hide joined together. Some of the larger aize carry sails, but they are generally propelled with paddlea. The North American Indian makes his canoe of cedar-wood covered with sheets of the bark of the white birch sewn together. The Indians of the plains used buffalo-hide. In the wooded regions devold of birch the canoe was a ahaped and hollowed log, which was probably the primeval form thronghout the world. The canoes of the Feejeea are double, of unequal aize, the smaller gerving as an outrigger. Large ones are 100 feet in lenoth. Captain Cook estimeted the naval force of the Saciety Ialanda at 1,700 war-canoss, manned by 68,000 men. (Knioht, dc.)
"In a war against Semirmin they had four thousand
monoxyli or canoes of one plece of timber. mot: On Coins
2. Now: A very little boat, narrow In the heam, propelled by iaddles. It is generally of wood, but may be of galvanised iron, caont

chouc, and aven of paper. An ordinary gentleman's canoe is about 13 feet long, 26 Inches
tate, făt, fare, amidst, whãt, fâll, father; wē, wơt, hëre, camẹl, hẽr, thêre; pine, pit, sire, sir, marine; gō, port,

wida， 12 inches deep，and has a＂comber＂of two inches．The opening in the deek in which the voyager places himself ia 4 feet long and 1 foot 8 inches wide．A canoe or two peisons， sitting face
larger．The lata Mr．John McGregor travelled larger．The late Mr．John McGregor travelled
many thonaand pilles，chiefly in Eastern many thousand piles，chlefly in Eastern waters，in his famous canne nsmed the
Rob Roy．The Royal Canoe Club was founded Rob Roy．
in 1866.

## B．As adj．：（See the compounds）．

canoe－birch，cannoe birch，s．A kind of birch－Betula papyracea．

## canoe－wood，canoe wood，s．A mag－ nolisceous plant－the Tulip－tree（Liriodendron tulipifera）．

can－nóe，vin［Canoe，s．］To row or paddls in canoe．

A．As pr．par．：In the same sense as the
B．As subst．：The act or acience of rowing or paddling s canoe．
cą－nôe＇－ist，s．［Eng．canoe，snd suff．－ist （q．v．）．］One who rows or paddles in a canoe． （American．）
＊can－ois，a．［Canoter．］
 （kanōn）$=$（1）\＆stralght rod or bsr，（2）a rod used in wesving，（3）s rule or level used by masons in building．Metaphorically a rule as for the gudde of conduct．In the ecclesiastical writers the books received as the rule of fsith and practice ；кàm（kanē）or кávm（kannẽ）＝ a reed or cane．］［Cannon．］
A．As substantive：
I．Ordinary Language：
1．A rule，a regulstion，s law．
＂What is it for example，that conetitutes the differ－ ence between A Bction which olnerves all the canona of

（1）Gen．：In the foregoing sense．
（2）Spec．：A rule in ecelesiastical matters．
2．That which is established by rule．［1I． （i） 1 （1）．］
3．A person bound by rule．［II．（i） 2 （1）］
II．Technicaily：
（1．）Ecclesiol．，Ch．Hist．，dc．：
1．Of things：
（1）The ordinancea made by ecclesisstical councils for the regulation of religious inatters． ［Canon－law．］
（a）Gen．：Is the foregoing sease．
＂IBy an anclent canon，those who minuistered at the altars of ood were forbitiden to take nily prort iu the
Infiction of caplital pumisliment．＂Macaulay：Hisl．
． Eng．，ch．xyli．
＊（b）Spec．：The rulea and regulations laid down as the rule of life for those clergy who reside in community．
＊（2）The list or catalogue of saints．
（3）Of the mass：
That part of the Mass which begins after the Sanctus with the prayer Te igitur，and ends，according to some，just before the Pater noster，according to others，just before the consumption of the eleneents．The sime canon is given to this part of the Mass because it contains the fixed rule sccording to which the sacrifice of the New Testament is to be offered．（Addis \＆Arnold．）
2．Of persons：
（a）In the same senae as（2）．
（1）In the Church of Rome：（b）A member of an order of religious persona intermediate betwean the regular monks and the secular clergy．The canons lived together，ste at tha same table，joined in united prayer at stated the ciated in certain chans，besides whith they off－ ciated in certain churches．Chrodegang， Biahop of Metz，sbout the middle of the eightly century，is said to bave instituted the order． At first the membera were called Fratres Dominici（the Lord＇s brethren），but sfterwsrds canons．Lewis the Meek caused rules to be drawn ap for their guidsnce by the Councll of Aix－la－Chaprelle，A．D． 817 ，and inatituted an order of canonesses．Having become corrupt， efforts for their reformation were made by Nicolaua Il．in tha Council at Rome，A．D． 1059．About tha aame time，aome canons

Influenced by Ivo，afterwards Bishop of Chsrtree，renounced privsta property，and became virtusl monks．Hence arose the dis－ tiaction betweeu secular and regular canons， the former obeying the rule of Nicolaus II． and the latter following thst of Ivo．Ivo＇a rule being almost the same that St．Augustine had before introduced in bls ese，the regulsr canons wera often called Canoas uader the rule of St．Augustioe，or simply Canons of St． Augustine．In the twelnth century mutual jeslouay created a long snd bitter controversy between the monks and the canons．An effort wss made in the 17 th century to restore the monsstio sad semi－monsstic orders to their pristine purity，and the Reformed Canons ragular of St．Augustine arooe．Three other ragular ordera were sbolished in 1668 by Pope Clement IX．（Mosheim．）
（2）In the Church of England：A certain dignitary in cathedral churches；s residentlary member of a cathedral chapter．

T．The name Cannon Street in London， having refarence to the esthedral chspter of
St．Paul＇s，is sn indication of the Identity of the two words cannon and canon．
（ti）Biblical Criticism \＆Church History： Thase books of scripture which sre re－ ceived as
guished from the apocryphs．［II．1．］
＂Canon niso denotes those books of Scripture，which are recelved as iuspired and cauousch，ts distinguish books．Thus we say．that．Qeuesia fo part of the sacred canon of the Scripture．＂－Aylife：Panergon Juris
IIt is sla spplied to any one of the canonical epistles（q．v．）．
1．Old Testament Canon：The snclent csnon of the Old Testanent is ordinarily attribnted， on the authority of Jewish Talmudic tradi－ tion，to Ezra（Esdras of the Apocrypha），and the most modern reaearch admits that be at lesst took the first step in the work by lemd－ ing strong public sanction to the Pentateuch， snd giving it increased curreney（Ezra vil．6， 10， 11 ；Neh．viii． $1-8,13-18$ ； 1 Esdr．vili． 3 ， $7,9,19,23$ ；ix． $39,40,42,45,46$ ； 2 Esdr．xiv． $21,22,25,20$ ）．

A great addition to this first canon seems to hava been mada by Nelemiah，of whom it is hava been mads by Nelemiah，of whon it is
said in 2 Mace．ii． 13 ，＂The sane things alao said in 2 Mace．in． 13 ，The sane things alan
were reported in the witigs and commen－ tares of Neemias，and how he，founding a taries of Neemias，and how he，founding s libnary，gathered together the sots of the
kings and the propluets，snd of David，sind the epistles of the kings concerning the holy gifts．＂By these designations prohably were meant the books from Joshua to 2 Kings in－ clusive，the fonr greater and most of the minor prophets，with some of the Psalms．
A third canon seems hinted at ia 2 Mace．ii． 14：＂In like manuer also Jndas gathered to－ gether all those things that were lost by rea－ son，of the war we had，and they rensin witl us．＂By Judas is meant Judas Maccabæins． His canon geems to have added Proverts， this Song of Solomon，Daniel，some of the Psaims，\＆c．，or，speaking broadiy，the books pallms，\＆e．，or，speaking broady，the books Hagiographa．Donhts abont the canonicity of parts of Ezekiel，and the whole of Ee－ clesiastes，Canticles，Estlier，and Proverbs， were not set st rest till a decision in their favour was ohtained from the Jewish Synod of Jabneh，or Jaminia，about A．D．90．Jose－ phns aoon afterwards srbitrarily fixed the Old Testament books at twenty－two，to make them agree in mumber with the letters of the Hebrew alphabet，and the Talmud at twenty－four，le－ cause that is the number of the Greek alpha－ bet．All the thirty－nine books in our modern Bibles found a place，aeparate or combined，in those enumerstions．Jerome slso，like Jose－ phus，made twenty－two，\＆number which the Council of Carthage，A．D． 397 ，much enlarged by takiag in the Apocryphs．［Apocrvpha．］ 2．New Testament Canon：The germ of what sfterwarda became the New Testament canon was in existence when the Second Epistie of Peter was written（2 Pet．jil．15，16）．About A，J）． 144 the＂heretic＂Marcion canne from Pon－ tus to Rome，bringing with him a collection of sacred books，viz．，the Gogpel of St．Luka and tea Pauline epistles，those of Tinothy snd Titus being onitted．According to Dr． Samuel Davidaon，tha idea of an inspired New Testament canon and of a Cxtholje churcli
came into existence together abont 170 A．D． The canon which then grew up consiated of two parts，the Gospel［ro evayriגtoy（to euan－ gelion） and the A postle［o dinócrodos（ho
apostolos） cospels，the lstter the Acta of the Apostles gospels，the lstter the Acta of the Apostles， one of St．Joha，und the Revelation．The canon of Muratori，about the ssme dste， canon of Muratori，about the ssme dste， 3 differa in omitting lupeter and including 2 and 3 Joha，as also Jude．Ireureus，Clement of
Alexandris，and Tertallisn，bsd all their Alexandris，and Tertullisn，bsd all their
separate canons．Origen，sbout A．D．254， separate canons．Origen，sbout A．D．254，
racognised three classes of books－those generally admitted，those not authentic，snd those doubtful．Similsrly Ensebiua，A．D．340， divided the sacrad writings into three ciasses －those generally raceived［онодоүаи⿱㇒日勺иa（ho－ mologoumena）］，those controverted［aville－ yóneva（antilegomena）］，snd those heretical． The canon of the New Testameat，in the form in which we now have it，except that the Apo－ calypse was ignored，was settled by the council of Laodicea，A．D．367，and confirmed by the 14th Council of Carthsge，A．D．307，one of the membera present at which being the celo brated Auguatine．
Canon，\＆c．）
［B1bLe．］
（iii）Law：
1．Eceles．Law：［Canon Law］．
2．English Civil Law：A rule．Used epe－ cially in the expression Canons of inheritance， which are the rules regulating the descent of real property when the nwner or＂＇purchaser＂ diea intestate．The Act of Parliament deter－ mining such cases is 3 and 4，Wm．IV．，c． 100. （Wharton．）
（iv）Music：A apecies of musles］composi－ tion，written according to strict rule（hence the term），in which the different voices take up the same melody，one after another，either at the same or at a different pitch．
＂A centon at the unsan becomes a roumd，if the sequectent hat an cadence he Anarrett．
（v）Printing：A size of type equal to 4 －line

## Canon

bpecimen of canon type．
pica，probably ao called from having been first employed in printing the canons．It is used for posters and handbills．
（vi）Math．：

＊canon bitt，a．That part of the bit which is placed in the horse＇s mouth．

A coonly berson，and could namare fair．
oanon－law，g．The body of ecclesiastical lsw as laid down by the canons．
＇This is inere moral babble，rnd direct
History of the Canon Law：
（1）Before the Reformation：A community， civil or religious，no sooner comes into exiat－ ence than it requires rules for its goveriment， and those first formed require to be modified and developed and sdded to during the whole
period that the community exists．Hence the period that the community exists．Hence the first gerns of the canon law are to be aought
for lin apostolic timea，whilst ita complete for lin apostolic timea，whilst ita complete
development took place at the period when development took place at the period when
the power of the Papacy reached its height． The oldest canons ara cailed Apostolic camone （q．v．）．The canons of the Councils of Nice （A．D．325），Constantinople（A．D．381），Epheaus （A．D．431），and Chalcedon（A．D．451）olitained civil sanction by decree of Justinian．Till the twelfth century the canon law consisted manly of these canons collected，together with the capitularies of Charlemagne and the decrees of the Popes，from Siricius，A．D．398，to Atha－

[^106]nasina IV．，A．D．1154．In A．D． 1114 Ivo，Blahop of Chartres，commenced to collect the decrees made by popea and the cardinals；Gratian，a Benedictine monk，methodiaed the collection， and pnbliahed it in 1150．There followed the Decretals of Gregory IX．，In A．D．1234．［DE cretal．］Next carae the＂Sext＂of Boniface VIII．A．D． 1298 ［SExT］，the Clementines or Constitutiona of Clement V．，A．D． 1308 ［Clementine］，and the Extravagants of John XXII．，A．D．1917．［ExTRAVAOANT．］These， XXII．，A．D．13I7．［ExTravacant．］These， with some more recent＂Extravagants，＂eon atitute the Corpus Juris Canonici（The Body of Canon Law）．Some lawyers graduated in canon and others in civil law，while not a few did to in both．As the fully－developed canon law greatly exalted the ecelesiostical over the civil power，it was never very cordially ac cepted by the English Parlisment，and ther was a national canou law composed of leya tine and provincial constitutions．
（2）Since the Reformation：By 25 Hen．VIII． c． 19 ，repealed by 1 Phil．and Mary，c． 8 ，but re－enacted by 1 Eliz．，c．1，a revision of canon aw was ordered，and only thoae parts of it were left binding whieh were not repugnant to the common or statute law．In the 27 th year of Henry Vlll．，degreea in canon law were aboliahed，not however by Parliament，but by mandate．In 1603，under James I．，certain ordinancea analogoua to canons were enacted by the clergy，but never received the aanction of Parliament．It has therefore been adjudged that where they introduce anything new they are not binding on the iaity．
canon－lawyer，s．One aktlled in or practisiog canon－law．
canon－type，s．［CANON，II．v．］

 Briphes Spacek.
4. Printing (Capital letters). [Capital, s., 4. I. 3.]
capital offence, s. Crime involving capital punishment.
capital punishment, s. The penalty of death.
oup'i-tal, * cap-i-tale, " cap-i-tel, 3. [0. Fr. chapitel, capitel; Sp. \& Port capitel; Lest. capitellum $=\mathrm{a}$ little head; dimin. of caput $=\mathrm{a}$ head.]
A. Ordinary Language:
I. Literally:

1. In the same sense as B. I (q.v.).
2. The head or chief city of any country or kingdom ; the metropolis. [II. 2.]

$$
\begin{aligned}
& \text { "Pondzomonium, the hisb capital } \\
& \text { Of satau," }
\end{aligned}
$$

3. A letter of a larger size than, and of a different form from, those ordivarily used; a capital letter. [B. 6.]

- 4. A heading or chapter of a book; a section [Capitle.]

II. Figuratively:

1. Applled to the political views or opinions, which form, as it were, the capital on which - politician tradea.
2. The fnhabitants of the chiel city of any country.
"The gooeral oplinfor, st leart of the capitat, mopmat cosulay: Hiw. Bng, ch. six.
B. Technically:
I. Arch.: The hemd or upper portion of a colvinn.

3. Fortif.: An imeginary line blsecting the salient angle, formed by the intersection of two projecting linee of parepet, of a fortification.
4. Polit. Econ.: The surplus of individual or national wealth which remains after current necesaitios have been met. It conelsts of what are popularly called eavinge. It is available for the employment of new labour, and if this be done judicionely, it will produce s further purplus, or, in other words the capital will increase. In every wellordered community it tends to do so Indefinitely. Capital end labour mutually require each other, and are not nstural foes bnt natural friends.
ICertain economists regard cepital as "the onm of all wealth resulting from labor, less the actual cost of the laborers' snbsietence"; and thence argue that justice wonld indicate an equitable diatribution of euch eurplus amongat the actual producers thereof, rather than its absorption by the employlng clasa designatad as "capitalists."
5. Commerce, dc:
(1) The stock or fund employed in any trade or mesnufacture.
"Thin accumulated stook of the product of former Political Economy, bk. 1., oh. 15., 11
(2) The fund of a trsding company or corporation. It is generally called capital stock. 5. Distilling: The head of a atill.
6. Printing: A large or upper-case letter.

căp-rI-fo-1I-ā'-c̆e-m, s.pl. [Low Lat. capri-
foli(um); few. pl.suffix -acece.] foli(um); fem. pl.suffix -acea.]
Bot.: A natural onder of plants, the Honeyauckle family. They are gamopetalous calycifloral dicotyledons, and are classed by Lindley in his Cinchonal alliance. They are ahrubs or treea, generally elimbing, and are natives
of the northerd parts of Europe, Asia, and America. The best-known species is the Common Honeysuckle (Lonicera Periclymenum). The Elder, the Guelder Rose, the Laurustinus, and the Snowberry belong to this fanily, in which there are sixteen geners and 230 species known.
căp'-ri-form, a. [Lat. caper = a wild gost; forma $=$ fomn, shape.] Goat-shaped,
sembling a goat in shape or aypearance.

* ca-prig'sĕn-oŭs, a. [Lat. cayer $=$ a wild goat; gigne (pa. ten. genui) $=$ to beget, produce.] Begotten by a goat.
căp-rǐ-mü1'-gid-w, s.pl. [Lat. caprimulgus; fem. pl. suffix -ide.]
Ornith. : The Goatsuckers, or Nightjars, a family of birds akin to the Swallows (Hirundinidx) and the Swifts (Cypselidx), and constituting with them the typical seetion of the tribe Fissirostres. They have large eyes and soft plumake ; the bill is short, depressed, and very broad, with an extremcly wide gape. Tha ears are very large, the wings long and pointed, the legs short. The species are widely spread over the world. There are three sub-fanilies, Caprimulginæ, Podagrinet, aud Steatoruinz (q.v.). [CA Pfimulgus.]
căp-rǐmŭ1-gi'-nw, s. pl. [From Lat. caprimulgus (q.v.), and fem. pl. suff. -ince.]

Ornith.: The typical sub-family of the family Capritnulgidæ ( $\mathrm{q} . \mathrm{Y}$.). They have a very ahort and weak bill, and the middle claw pectinated; the prociae use of the pectinatiou is natter of dispute. For Caprimulgus europeus see Caprimplgus. C. or Antrostomus vociferus is the Whip-poor-Will of North Ancrica, and C. carolinensis the Chuck-Will'swidow, the names iveing innitsted from their notea.
caxp-rímŭl'-ğ̌s, s. [Lat. caper $=$ a wild goat ; mulgeo $=$ to inilk.]

Ornith.: Agenus of birds, the typical one of the family caprimuigidac, and the sub-family Caprimulgine. Onespeeies, Caprimulgus europreus, is found in Britain. It is called the

Goatsucker, from the old and erroneous belie that it sucke goats. Another uame given to it is Night-jar, from a jarring noias, lika that of a rapidly-revolving aplnuing-wheel, made by the birds when aitcing ou trees; their pote is a differeut one when thyiug alout in search of droning-beetias and hotha, on which they principally live, and which they catch on the wing. They hunt about hy night, and the wheel sound, which etrikes up punctually at sumbet, is one of the most nutable oruithological phenomena presented in Epping Forest on summer evenings. There the bird ia called a Night-hawk, as resembling a hawk, or, still better, a gigantic hawk-moth, as it hovers on the wing. Eleewhere it is termed also the Night-churn or Fern Owl.

* căp'-rino, a. [Lat. caprinus = pertaining to a goat ; caper = a wild goat.] Of or pertaining to goats; goat-like.
"Their physlognomy is canine, vulpine, oaprine"-
Bishop (Gauden: Lifo of Bishop Arownrigg, p 2:8 (100 $)$.
c̆ăp'-ríolle, \& [Fr. axpriole.]
Horsemanship: A leap in the air withont advancing, but io which the auimal jerks out its hinder feet.
I A capriole is akin to s cronpade aod a ballotade, but in the former of tuese movements the horse does not shuw his ahoes, which he does in a capriole, and in the latter of them le duea not jerk out his hinder feet.
+ căp'-ri-pĕd, a. [Lat. capra = a goat; pes (geuit. pedis) $=\mathrm{s}$ foot.] Having feet like goat, goat-footed.
căp'-rò-äte, s. [From Eug. capro(ic), sud auff. -ate.] [Cap holc Acid.]
ca-prö'-ice, a. [From Lat. capra $=$ a ahe.goat, caper = a he-guat, with allusiou to Gr. кärpo (kapros) = a boar, spec. a wild boar.]

## caproic acid, 6.

Chem. : $\mathrm{C}_{6} \mathrm{H}_{12} \mathrm{O}_{2}=\mathrm{C}_{5} \mathrm{II}_{11}$. CO.OH. A mona tomic, fatty acid, which occurs as a glyceride in the butter of cow's milk, and in cocos-nut oil ; it is produced by the aetion of alkalies ou amyl-cyanide, aud as a sodinm salt by the action of $\mathrm{CO}_{2}$ on sodium auyi. It is a clear oil, su. gr. 0.631 at $15^{\circ}$, hoils at $195^{\circ}$, soli, littes at - 9 : Its balts are called caproatea; tıey are aoluble and cryatallizable. A strong soluare aoluhle and cryitallizable. A strong solu-
tion of the potassinin salts yields, by electrolyais, diamyl $\mathrm{C}_{10} \mathrm{H}_{2 \%}$
©x̆p'-róo-my̆s, s. [From Gr. sámpos (kapros)= a boar, spec. the wild boar, and $\mu \overline{\mathrm{v}}(\mathrm{mu}, \mathrm{s})=$ mouse.]
Zool. : A genus of rodent mammals, family Psanunoryctide, or Sand-rats. Sume of the species, however, ininsbit not sand but the branchee of trees. They are found in south Annerica and the West Indies. Some genera have opides mixed with ordinary hairs, and have in consequence been deseribed as purcupines.
cā'-prŏs, 2. (From Gr. кámpos (kapros) $=\mathbf{a}$ boar.]

Ichthy.: A genus of spiny-finued fishes, famlly Scomberida. Capros aper is the Boar fish, sometimes ealled Zeus aper. [Boar-Fish.]
cā'pry̆-läte, s. [From Eng. capryl(ic), and suft. -ate (Chem.) (q.v.).] [Caprvilic Acid.]
$\mathbf{c a}-\mathbf{p r y ̌ 1}-\mathbf{1 c}, a$. [Lat. capra $=$ a she-goat ; Gr. $\kappa a \pi \rho o s(k a p r o s)=a$ boar, and $\ddot{\nu} \lambda \eta(h u l \bar{e})=\ldots$ matter as a principle of being.]

## caprylic acid, $s$.

Chem. : $\mathrm{C}_{8} \mathrm{H}_{16} \mathrm{O}_{2}=\mathrm{C}_{7} \mathrm{H}_{15}$.CO.OII. A monstomic, fatty acid, which occura as a glyeeride in butter and in cocoa-nut oil, also in fusel oll. It is prepared by the saponification of cocosnut oil ; its baryta salt is less aoluble than that of caproic acid. Cayrylic acid is an unpleasant liquid which solidilies at $12^{\circ}$. It boils at $238^{\circ}$. Its salts are called Csprylistes.
căp'-sa, s. [Lat. = a cane.]
Zool.: A geuts of Mollusca, placed by Cuvier betwcen Venua and Petricola, having two tecth on the one hinge, and a single but bifid one on the other; lunula wanting, shall convex, and the fold indicative of the retractor of the foot considerable.
oăp-sěl'-la, s. [Lat. capsello $=\mathrm{e}$ amall boz or coner.]
Bot. : A genne of plants, order Cruciferse.

Capuella Burea pastoris is the Shepherd's Purse 80 common at roadsides in thls country.
obpp'sǐ-qine, 2 [Lat, capoio(um), and suff. ne (Chem.).]
Chem.: The active principle extracted from the capanles of cayenne pepper. . It hae a resinous sppearance, and a hot, scrld tasta, so pungent that if half a grain of it be volstilized in a large room, it will caose all who respire the contained air to eneeze and cough.
exp'-si-cüm ${ }^{\text {s. }}$. [Lat. capsa $=\mathrm{a}$ case; so named from the seed-pods.]
I. Botany:

1. A genus of plants of the order Solsnaceæ, consisting of annual or blennial planta, bearing menibranous pods contalning seversl seeds, noted for their hot, pungent qualities. Capsicum annuum, a native of South America, furnlshes the fruits known as chillies. Theae, as well as the fruita of $C$. frutescens and other species, are used to form cayenne pepper. For this purpose the ripe fruits sre dried in the eun or lu sn oven, snd then ground to powder, which is mlxed with a large quantity of wheat flour. The mixed a carge quantity of wheat hour. The mixed powder is then turned into cakes with leaven; biscuit, and ere then gronnd and sifted. Csyenne pepper is largely sdultarsted with Csyenne pepper io largely sdultarsted with
red lead and other substances. [CAyENNE.] (Treas. of Bot., \&e.)
2. The fruit-pods of the plants described in 1.
II. Pharm. : Capsici Fructus, the dried ripe fruit of Capsicum fastigiatum, imported from Zanzibar. it is a small, oblong, scarlet, membrsnous pod, divided internally into two or orsnous pod, divided internaly into two or three ceils contalning numerons fist whites hot end acrid. Capsicum fruita are used medicinally, in powder or as a tincture, externally, or as a gargle in cases of malignant sore throat, and internsily as a stimulant in cases of impaired digestion.
Mp-nizze, v.t. \& \& Etymology nnknown. Mahn euggesta from cap = head, and seize, because it is properly to move a hogshead or other veasel forwards by turning it alternstely on the head. Skeat ouggesta that it is g nsutical corruption of Sp . oubeccar $=$ to nod one's head in sleep; from cabesa = the head; from Low Lat. capitium = a cowl, hood; Lat. caput $=$ the head. Cǔr'- 2-cill, s. [Fr. caracal; from Turk. qarahqootug; from qarah $=$ black, and qootag $=$ ear. ] Zool.: A species of lynx, the telis carracal of Linneus, of a reddish-brown colour, with black esrs, tipued with long black hairs. It is a native of Africa, India, Persia, and Turkey.
"The earacat has always been conisidered to he the lyax mentloned by the nucients ns pmescssing
wonderful power ol sight"-Library sut.
car-a-ca'-ra, s. [A South Anerican word.] Ornith. : The name given to the birda of the sub-fanily Polyborine, which is an aberrant one belonging to the Falconide, but constituting apparently the point of transition to the Vulturide. They occur in South America, and feed on carrion. [Polysorinse]
căr'a côle, căr'-a cóll, s. [Fr. caracole = a wheeling about; O. Fr., Sp., \& Port. caracol= a winding staircase, a snail ; Catalan caragol $=$ a screw.]

1. Arch.: A winding or spiral stairease.
2. Horsemanship: A half turn or wheel made by a horse.
"When the horse nivance to charge in battle, they Tide sometimes in caracoles: to sinuse the
$\dagger$ oăr'-a-cōle, v.i. [Caracole, s.]
Iforsemanship: To turn or wheel about in caracoles, to prance.
"Prince Jobu caracoled withtn the liats at the head
oăr-a-cōl'-ing, pr. par., a., \&s. [CabaCOLE, v.]
A. \& B. As pr. par. \& particip. alj.: (See
C. As subst. : The act of prancing sbout; s caracole.
căr-a-cơli'-1a, s. [O. Fr., Sr., \& Port. canacol a snail.]
Zool.: A genus of the Lucernine (Landvolutes or Lamp-snaila), in which the aper-
ture of the ahtll is circulsr, the twn lins ture of the ahell is circulsr, the twn lips united, teeth wanting, umbilicus open. Family, Limacinæ.
căr-a-cōl'-प̆, car-a-cō'-li, s. [Etymolngy doultful. Cf. caracole.] An alloy of golif, silver, snd copper, used for manufacturing inferior kinds of jewelry.
căr'-a-cöre, s. [A Bornean word (\%).]
Naut.: A light vessel used by the natives of Borneo and the aujacent islanis, and by che Dutch as a coast-guard vessel in their East Indias poasessions.
" cär'-act (I), * carro-̌ct, s.' [Craracter]
3. A tigure, zigo, or mark.

Thorugh euracta that crike wrot. 2. A book.

"caxr-act' (2), a. [CARAT.]
Că'-a-döc, s. \& a. [Wel. Caradoc, the ylace described vnder A., from Wel. cuer $=$ cily.] [CAR (1).]
A. As substantlve:

1. Geog. : The name of certaiu hills in Shropshire (the Caradoc hills).
2. Geol. : Tho formation described under B.
B. As adj.: Found at, bclonging to, or in any way counected with the place mentioned under A. 1, or with the formation described under A. 8.

## Caradoc formation, s.

1. Geol. : The upper, i.e., the more modern, of two series of atrata into wheh the Lower Siturian Rocks are divided. It coneists chiefly of sandstone, some years ago estimated st 2,500 feet in thichness, sbutting against the trappear chain called the Caradoc hifls. The name Caradoc was first given by sir Roderick Murchison in his "Silurian System." Sedgwick called it the Bals formation. It is closely allied to the Llandeilo rocks lemeath it. The Caradoc rocks were deposited in a shallow sea
2. Palceont.: About 600 fossils are known in the Caradocs; 146 are Crnstacca, 106 of them being peculiar. The Hydrozoa, Culenterata, and Echinodermata are slso well represented. The bivalves exceed in number those of any known formation below the Carionlferoue Limestone. (Etheridge: Address to Geol. Soc., 1831. Q.J. Geol. Soc., xxxvii., It. ii., p. 142.)

Caradoc sandstone, s. A sandstone, constituting the chief rock in tha Caradoe formation (q.v.).
cạ-ra'fe, că-ra'ff, s. [Fr. carcfe; Ital. car rafia.] A decanter; a water-hottle.
 IJ Frequently pronounced and written erof
căr-a-ga'-na, s. [Tartar carachana.]
Bot.: The Siberian Pea-tree, a genus of leguminous Asistic plants, belonging to the subtribe Galegea Flowers golitary or crowded, of a pale-yellow colour, with the exception of one species, C. jubata, in which they are white, tinged with red. C.spinosa io a thorny ehruh, plentiful in China, alout Pekin, where tha branches are stuck in elay upon the tops of walls, in order that the spines may keep off intruders. The bark of C. arborescens is used as a sulstitute for rope, dro.

* car'-age, 8. [Carrlaoe.] (Chiefly Scotch.)
căr-ag-ĕn-ine, s. [Eng. caragheen, and suffix -ine (Chem.).]
Chem.: A mucilaginous or resinous substance, obtalued frou Caragheen-moss.
căr'-a-ghcenen, s. \& a. [From Carragheen, or Carrigeen, near Waterford, 1reland, where this algal grows abundantly; it is also common on the English coast.]
oaragheen-moss, carrageon-mose, s.

Bot. : Irish mnes, Spherococus (or Chondrue) crispus, s speciea of ses-weed, from which a

Wnd of nutritious jelly is mannfsctinred. it is of a purplish-white, nearly transinarent colour.

## - oar-ain, : [Carrion.]

oxv-ai-pa, s., [Cf. carutpa, the Guiana name Bot. : A genus of Ternströmiaceex, distingulahed among the group laving the petals gulahed among the group having the petas contorted, an its leaves being slternate, its stamens usually free, with the anthers glanduliferouas st the spex and fixed near the base; and by its having two or three peadulous ovules in each of the three celis of the ovary. The species, sbout elght in number, grow in tropical America, and are trees bearing whiteucented flowers. The celebrated Balsam of Tamscoari is obtained from Caraipa fasciculata and is of great use in the cure of itch, s single application curing the most inveterate case in twenty-four hours. (Treas, of Bot.)
căr-aī- $\hat{a}^{\prime}-r a$, s. [The Orinoco name.]. A red colouring matter, obtained from Bignonia chica. [Cिhica.]

- oar'-alde, s. [Etymology donbtful; perhaps Canol, 8.] Perhaj's a writing-desk.
"Eer kystlesa and her coferess, her carraldes, alle."
oar-ali-lǐ-a, s. [Carallie in the Telinga language.]
Bot.: A genas of Esst Indian plats, beloaging to the order Rhizophoracee.
carr-al-line, s. [Fr.] Bol. : A plset, Ranunculus glacialis.
căr-ăl-lû'-ma, s. [An Iedian nstive name.] Bot.: A genna of East Indian plants belonging to the order Asclepiadacea. The specics, which are few in number, are fleshy, leafless, herhaceous plats.
- căr-a-1y̆ng, pr. par. \& s. [CARollino.] " Fair hulyis in ringis,

ăr-am-bö'-la,s. [Port. \& Sp. carambola; Mahratta kurmul.]

Bot., dc.: The scutely-sngled fruit of an oxalidaceons tree, Averrhoa carambola. It is very sour, but is eaten by the nstives of India
The leaves of the tree are very sensitive
1căr'-am-bōle, s. [Fr. carambole.] Billiards: The ssme as $s$ cannon (q.v.).
car-a-melle, s. [Carmele.]
căr'-a-mĕl, s. [Fr. caramel; Sp. caramelo; from Low Lat. canna mellis, cannamalla $=$ sugar-cane; from canna $=8$ reed, cane; mel (genit. mellis) $=$ honey.]
Chem.: A mixture of several compounds, formed by heatiog sugar to $210^{\circ}$. Water $i$ given off and caramel, a hrown substanee, re mains. It is used as a colouring material for spirits, wines, \&c.
"At a temparature a littie shove its furion, porume shithing mase, which is knowis as cis ramel losing nothing but two stolus of water., ${ }^{\text {m }}$-Graham
ae-ra'na, ca-răn'-nạ, cạ-râu'na, s Sp. caraña.]

1. A tree, a native of South America.
2. A resinous gum of an aroratic flaveur, extracted from the tree. It is used aa a remedy for toothsche.
ax̌'-aixx, s. [Mod. Lat., proh. from Sp. - carangue, \& West ladi:ul flat-fish.]

Iehthy.: A fish, a kind of mackert). The most common is Carant vulgaris, ilso called the Scad, or IIorse-mackerel. There is a series of scaly plates on the lateral line.
cear-an-ye, s. [Caration.]
"Caranye or careyn. Cadaver."-Prompl. Pare.
atar'-ap, 8. [A Guisns word.] An oil obtained by pressure from the carapa (q.v.).
căr'-ą-pą, s. [CARAP.]
Bot.: A small genus of traes with sbruptlypinnste leaves, belonging to the order of Melisces (Meliads), snd native of tronical America, tie West Indies, snd Guinea. Their flowers have s calyx of four or sometimes five
distinct sepals, and a corolla of the same immler of ohlong, eeforlaped spreadin: petala. Tha froit is large send contains numerous oily seeds, from which ls extracted by pressare s liquid oil cslled Cirap, or Crab-oil, suitable for burning in lamps. The bark of Carapl quiamensis possesses fehrifugal qualities, and la also ased for tanning. (Treas. of ties, and
Bot., \&\&.)
oăr'-a-pāçe, t căr'-a-păx, s. [Fr. carapace.] Zool.: A protective shield. Spec.-

1. The upper shell of crabs, lobstera, snd other crustaceans.
2. The upper half of the immovable case enclesiag a tortoise, turtle, or other chelonian [Callifash.]
"Thisa cnstog ts composed of two ehtelds, covered with horny platees the upper owe, which is, moore or lesi Phytiology $\$ 8 \% t$
3. The shell of an armadillo
4. The case in which certain infuaoris sre enclosed ; a lorica.
car-a-pā'çi-al (or çi-al as shail), a. [Eng. carapace; -ial.] Pertaining to a csrapace.

căr-a-piçh'-ĕ-a, s. [Carapiche, the natlve name of one of the apecies.]

Bot. : A genus of flowering shribs, belonging to the Cinchonacere. They are natives of the Csribbean Islands.
căr'-at, * căr'-act, s. [Fr. cerrat; from Arab. qirrat $=$ a carat, the twenty-fourth part of 8 n onnce; from Gr. кepation (keration) $=$ the fruit of the locust-tree; 1tal. carato; O. Port. quirate.]
I. Literally

* 1. The fruit of the Carob-tree, also called carot.

2. Weights and Measures:
(I) A weight of $3 \frac{1}{6}$ grains.
(2) The twenty-fourth part of sn ounce. It is used by jewellera to express the fineness of gold, the whole mass being supposed to be divided into twenty-four parts and said to be so tnany carats fine, accordiag to the number of twenty-fourth parts of pure gold contained in it. Twenty-four carat means all gold, eighteen carat three qusrters gold. Fine geld coesists of twenty-two carats of pure gold coasists of twentyotwo carats of pure gote and twe of alloy. The geld cotes of the cnited
States are $21 \cdot 19$ carats fine. A dollar weighe States are $21 \cdot 19$ carats ane, A dohar weighe
$0 \cdot 13$ ennce, sn eagla $1 \cdot 29$ gueces. Frent this, the proportion of gold in each can be calenlated.
"A mark, heing an ounce Troy, is divided into twonty-four equal parts, called earacts, and each caraes into four graing: by this weight is distinguibled the goid le ppt two caraces o alligy, both making, when
coid, tut an ounce, or twenty four caracts, thet this (3) a weight twent wo jowelle in weig.
(3) A weight used by jewellers in weighing
liamonds and other irecious stones. It is diamonds and ether precious stones. It is the 150 th part of ae ounce Troy
II. Fig.: Fineness, purity.

Thou best of goid, art worst of goid;
Other, iess fine in ctrat, is more preciou shaketar: : 2 ITen 1
car'-a-tōe, s. [A native word.]
Bot.: A Weat ladian aane for Aguve americana.
căr-ạ-văn', s. [Fr. caravane; Sp. \& 1ta]. cararana; frem Arab. quirawón; Pers. kâr wcin, qirwin = a caravau.]

1. Literally:
2. A aumber of travallers, pilgrims, or merchants traversing the deserts of Arabia, Africa, or other countries, in company for purposes of safety and convenience.

When Josel hh, and the Blessed Yitrin Mother, Liru lost their suost holy son, they sought him
nues of the the retir kindred, shd the carruan of the Gail lean pilgrims."-Taylor.
2. A large covered cart or waggen, auch as those used by gipsics, and for the conveysunce of beasts of a menagerle; slso a similar vehicle employed for moving furniture. A train or aumber of such waggons.
*3. A fleet of shiys or heats, such as those nsed in Russis for couveying hemp, \&c. (Webster.)

* II. Fig.: A filght or number of hirds ly iag together.

caravan-boller, s. A waggon-shaped boiler.
 -eer $=$-er.] The driver or condnctor of a cara van.
 căr-a-văn'-sẽr-ai, s. [Fr. caravansérail or caravansèrai; from Pers. kdrudn-sarai; from $k a r w d i n=\varepsilon$ caravan ; sarai $=$ a palace large house, or inn.] A kind of inn in Eastern countries, where caravans put up for the night.
 serah, enterta
"The furniture of this Caravansera comisted of a Chairs, snd sotheen Nogsin:-Corlyle: Sartor Re tartus, bk. ML., ch. $x$
* căr'-a-vĕl, * car-vel, oăr-a-vĕl2e, s [Fr. ciravelle; 1tal. caravella; Si]. carabela, dimin. of caraba $=$ a vessel ; from Lat, cara
 light vessel.]

1. Naut. (of the forms caravel and carvel)
(I) A light, round, old-fashioned ship, with

cafayel.
a square poop, galley-rigged, fornzerly used it Spaia and Portugal.
In Portugal it in is smanl veavel carrying lateen sails In Portugal it in is sminl vessel carrying lateen sails The three vessels which connposed the experition at were caravelt, but there is said to loe no authentio account of theor form, size, or rus."-Foung: Aumicul Dictionary.
(2) A small boat employed in the herring fishery on the coast of France
. she spreads sattens, as the king's ships do canvas every where, she may spare me her manen, nad her bonnets, strike her main inetticoat, mud yet dut
sail me. I ann a carrel to her."-Bcaum. of Fiefch sail me. I am a carrel
F'il without Money, I
2. Hort. (of the form caravelle): A kiod of pear
căr'-a-wāy, * car-a-waic, " căr-ra-wāy * car-wy, s.\&a. [Fr. \& Ital. cervi; Sp, curv ame al-caruzes; from Aral). kurweog, luruwate from Gr. кäpos or ќ́pov (kuros, ฝaron) ; Lat cureum.]
A. As substantive:
3. An whbelliferous plant, Curum carui, a biennal belonging to the parsley fimily. It has a taper root like a burship, and is conitivated principally in llolland and Lincolnshire.
"Carasaz, berbe. Ca
4. The seeds of the flatit fleseribed in I They are strongly aromatic. and have a warm mungent taste. They are mucll used in con feetionery, and in medicine. [Caraway FhuIr.]

* 3. A kind of swectneat contsining cara way-seeds.
ome other kind wont to eate carawaies or hiskets or spites, thereby to meake wiude ingendred by with and surely it is s very cod way fur scudents."- cheman Haven of Health (1593).
Nsy, yon shall see mme orchard, where, to su ar bonr, we will eat a last year's pippin of ray ow, grift
B. As uljective: (See the compeunds)
caraway-comfit, s. A comfit or sweet contatining caraway-seed

## caraway-fruit, s.

Pharm. : Carti fructus, tha dried fruit of Carum carui or Caraway. These seeds (mericarps) are of a brown olour, slightly curved with fine filiform ridges containing a gingla vitta
in each channel. They have a peculiar arom atic odour, and a warm taste. The oil is of a pale-yellow colour. They are used in medi cine as an aromatle, stomachle, and car minative, ta cases of flatulence; the ofl is added to purgative medicinea to preveat griplag.
caraway-seeds, s. pl. [Caraway, 2.]
căr-a-wāyş, s. ph [CARAWAY, 2.]

* car-ayn, s. [Carrion.]
carb, prefix.
Chem.: Haviag carbon In tha composition. Many componnds occur with this prefix. Only the important substances are here given; for the othera see Wat's Dictionary of Chemistry.
carb, car-a-bin, s. [CARP, v.] A rawboned, loquacious woman. (Jamieson.)
carb, car-ble, v.i. [Either a variant of Eng. $\operatorname{carp}$ (q.v.), or from leel. karp = braggiag karpa $=$ to brag, boast.] To cavil, to carp. (Jamieson.)
car-bal-ly̆l'-āte ${ }_{2}$ s. [Eng., \&c. carballyl(ic); -ate (Chem.) (q.v.).] [Carballylicacid.]
car-bal-ly̆1'-Ic, a. [From Eng., \&c. carb(on); allyl;-ic.,
Chem. : A term used chiefly or exclusively in the compound which followa

## carballylio acid, 8.

Chen.: Tricarbaliylic acid, $\mathrm{C}_{6} \mathrm{H}_{8} \mathrm{O}_{6}=$ $\left(\mathrm{C}_{3} \mathrm{H}_{5}\right)^{\prime \prime}(\mathrm{COOH})_{3}$. A triatomic, tribasic, fatty acid, formed by the action of nascent hydrogen on aconitic acid, or by the action of alcoholic potash on propenyl tricyanide. It forms coiourless trimetric erystals, aoluble in water and slcohol. Ita alkaline salts, called carballylates, are soluble io water. Ita meltiog point is $158^{\circ}$.
car'-ba-māte, s. [From Eng., \&c. car$\operatorname{bam(ic)}$; snd -ate (Chem.) (q.v.).] Chem. : ( $\mathrm{CO}^{2}$ " $\left(\mathrm{NH}_{2}\right)\left(\mathrm{ONH}_{4}\right)$. Ammonium
carbamate is formed by passing a mixture of parfectly dry carbna dioxide and ammonia gas perfectly dry carbon dioxide and aminonia gas into cold absolute alcohol, and heating the
crystalline deposit with absolute alcohol in a crystalline deposit with absolute alcohol in a
gealed tube to $100^{\circ}$. The liquid, on cooling, deposits ammonium carbamate in crystalline laninx, which, when heated in a sealed tube to I $40^{\circ}$, split into ammonium carbonate and urea. Ammonium carbamate is converted by water tuto acirl ammonium carbonate. It can be distinguished by its precipitating calcium very slowly from a solution of $\mathrm{CaCl}_{2}$ and ammonia
car-băm'-ic, a. [From Eng., sc. carb(on); 9nd amic (q.v.).
Chem. : A term uaed chiefly or exclusively in the compound which follows.

## carbamic ethers, s. ph

Chem.: Both acid and neutrsl ethers are known.
(1) Acid Ethers: The ethylammonium allt of ethylcarbamic acid.
(CO)' $\mathrm{NH}\left(\mathrm{C}_{2} \mathrm{H}_{5}\right) \mathrm{ONH}_{3}\left(\mathrm{C}_{2} \mathrm{H}_{5}\right)$, a snow-whita powder, is ohtained by passing $\mathrm{CO}_{2}$ into anhydrous ethylamine cooled by a freezing mixture.
(2) Neutral Ethers (called also Urethanes): Ethyl carbanate ( CO$)^{\prime} \mathrm{N}_{1} \mathrm{I}_{2} \mathrm{OC}_{2} \mathrm{H}_{5}$. It is formerd by the action of anmonia on atcohol saturated with carbonyl chloride, also by saturated with carbonyl chloride, also by
aqueous ammonia and ethyl carbonate. It forms colourlesa cry'stals soluble in water.
oar'-ba-midee, s.
and anide (q.v.).] [From Eng., \&c. $\operatorname{carb}(o n)$;
[Unea.]
Chem.: $\mathrm{CN}_{2} \mathrm{H}_{4} \mathrm{O}=\mathrm{N}_{2}(\mathrm{CO})^{\prime} \mathrm{H}_{4}$. It is produced by the action of ammonia gas ou carbonyl chloride, or upon ethyl carbonate, also by the decomposition of oxamide at red heat. Carhamide is decomposed by soluble hypobromites and hypochlorites with evolution of nitrogen, as $\mathrm{CN}_{2} \mathrm{H}_{4} \mathrm{O} \times \mathrm{O}_{3}=\mathrm{CO}_{2} \times{ }_{2} \mathrm{H}_{2} \mathrm{O} \times \mathrm{N}_{2}$.

## car'-ba-mine, s. [From Eng., \&c. carb(on);

 and amine.] [Amine, s.]Chem.: Tsocyanide. These compounds are oltained by distilling a mixture of an alcoholle ammonia base and chloroform with alcoholic potash. They are oily, stinkiag liquids. The isocysndea of plemyl, ethyl, and amyl are known.
căr-bă'-sé-a, s. [Lat. carbrasus; Gr. кápßaros $($ karbasos $)=$ flax, linen, a sail.]
Zool. : A partial synonym of the Cheilostom stove genns, Fiustra (q.v.). Flustra carbasea formerly Carbasea papyrea, the Lawn Ses-nat of Eilia, is a delicate Northern form living on shells and stones in rather deep water. The cells are in many rows on ane aide oniy and the poly pide has abont twenty tantaclea. It may often be found on the shore.
car-ba'-zó-tāte, a. [From Eng., \&c. car$b(o n) ; a z o t(i c)$; and auff, -ate.]

Chem.: A aalt of carbazotic acld.
car-ba-zōt'-ic, a. [From Eng., \&c. carb(on); and azotic (q.v.).]

Chem. : A term used chielly or exclusively in the compound which follows.
carbazotic acld, s. [Carbon, azote $=$ nitrogen.]
Chem. : Trinitrophenol, Nitrophenisic acid, Picric acid, $\pi \iota \kappa \rho o s(p i k r o s)=$ bitter, $\mathrm{C}_{6} \mathrm{H}_{3} \mathrm{~N}_{3} \mathrm{O}_{7}$ $=\mathrm{C}_{6} \mathrm{H}_{2}\left(\mathrm{NO}_{2}\right)_{3}(\mathrm{OH})$. Prepared from the in pure nitrophenesic acid. it is also obtained by the action of nitric acid and indigo, silk wool, resin, \&c. It crystallises in yellow crystals, soluble to water, has a very bitter taste, and dyeb silk and wool yellow, but does not dye cotton, hemp, and hax. Its salts are called picrntes. Potassium pierate is very are called picrites. Potassium picrate is very explodes with great energy. Carbazotic acid is a vitro-substitution compound of pbenol.
car'-bīde, s. [From Eng., \&c. carb(on); and suff. -ide (Chem.) (q.v.).]
Chem.: A compound formed by the union of carbon with an element, as iron or hydrogen.
car'-bĭn, cair-ban, * car-fin, 8. (Scotch.) [Gael. cairbean.] The basking-shark, Squalus maximus, L.
car'-bine, car'-bĭne, * căr-a-bĭne, $s, \& a$. [O. Fr. carabin; Fr. carabine; Ital. carabino = a hittle gun, corrupted from O. Fr. calabizen, calabrin $=$ a light-armed soldier; $O$. Fr. calabre, caable $=$ an engine of war; from Low Lat. chadabula = a catapult; Gr. катаßódך (katabole) $=$ a throwing down, destruction катá (kata) $=$ down ; $\beta$ одท́ $($ bolē $)=$ a throw ing; $\beta \dot{a ́ \lambda} \lambda \omega \omega$ (ballö) $=$ to throw.]
A. As substantive:

Military:

* 1. A minsketeer, a carbineer.

When he was taken, all the rest they fed
Aud our carbines puraued them to the death."
2. A short fire-arm, used by cavalry, srtillery, in the navy, de., similar in bore and nature to, and carrying the same ammunition as, the infantry rifle. Except with cavalry furnished with a sword-bayonet to increase its length as an offensive weapon. It ls in geaeral use by United States cavalry, which

## 1. carbine 2. carbine-loct

are all of light equipment, and adspted to serve as fufautry on occasion. In such cases the carbine jroves a highly usetml arm. Coit's, sharpers, and other makes of carbines are used.
"ines. : continued to iy an foot throwing awny car autay: Bist, Eng., ch. xiL.
B. As adj. : (See the compounds).
carbine-lock, s. The lock of a carbine. "Sling on thy bugie-nee that free from rust My carbinelock syrings worthy of tay trust,"
carbine-thimble, s. A stiff leathern socket, secured to a D -ring on the off-gide of the sadule by a strap and buckle. It reccives the muzzle of the horseman's carinue.
car-bin-ëe'r, căr-a-bin-ëe'r, s. [Fr. carabinier.]
Mil.: Formerly applied to mounted infantry armed with a ahort carbine, and intended to fight on frot. Name still retained in England by the 6th Dragoon Guards
car'-bin-bl, carbonis) (?), aud Eng., cte. (alcoh)ol.]
Chem.: A nume given to methyl alcohol $\mathrm{C}(\mathrm{OH}) \mathrm{H}_{3}$. by koibe, and the sicohols formed from it, by substitution of methyl, ethyl, \&c., for an atom of hydrogen, ore named according to the radicals which they contain, as Trimethyl carbinol, or Terttary Quartyl alcoinl, $\mathrm{C}(\mathrm{OH})\left(\mathrm{CH}_{3}\right)_{3}$.
car'-bin-y12 s. [From Eng., \&c., carbinfol). [y.]
Chem.: The name given to the alcohol radicals of the corresponding cartbinals, as Di methyi carbinnl $\left.\mathrm{CCH}_{3}\right)_{2} \mathrm{H} . \mathrm{OH}$ contains the radical Dimethyl-carbinyli $\left(\mathrm{C}\left(\mathrm{CH}_{3}\right)_{2} \mathrm{H}\right)^{\prime}$.

* car-bō, a. [Lat. = coal, from the jet-black colour of its wings.]
Ornith. : An old synoaym of Phalacrocoraz (q.v.).
car-bö'-çẽr-ite, s. [Eng. aarbo(n), and cerite (q.v.).]

Min.: Carbonate of cerium, also called Lanthanite (q.v.). It consists of oxide of cerium, 75.7 ; carbonic acid, 10.8 ; water, 13.5 Sp. gr., $2.605-2660$. Hariness, 2.5-3. oceurs at Bastuas, in Swedel, and slon in Silurian limestane in Sancon Valley, Leilegh Co., Pennsyivania
car-bol'-Ic, a. [From Eng., \&c. carbo(n); (aicohol: and Eng. suff -ic.
Chem.: Pertaining to, or derived from, carbon.

## carbolio-acid, s.

Chem. : $\mathrm{C}_{6} \mathrm{HI}_{5} \cdot \mathrm{OH}=$ Phenyl Alcohol, Phenol, Phenic Acid, Coal-tar Creasote. D'lumol is not technically an acid, but a eeconelary monatomic aromatic alcohol, ohtained hy the dry distillation of satieylic acdd, and formed by the dry distillation of coal, in the conal-tat oil. When pure it forms white deliqu"se nt crystals melting at $35^{\circ}$ to an oily liquid, whim boils at $184^{\circ}$. It has a penetrating oulonr ant burning taste ; it. is neutral; it congulater albumen and las powerful antiseptice jroper ties. It is used as a diainfectant, and tu jre ties. It is used as a disinfectant, and tir pre
serve meat, dic. It dissolvea in alkalits, finm ing conimunds called phenates. Petassinu. ing conilmunds called phenates. Petassinh phenste crystallises in white needlex; whiet double ethers are formed, as methyl-phenste $\mathrm{C}_{6} \mathrm{H}_{5} \mathrm{OCH}_{3}$. Chlorine, liromine lodiue, nad nitric acid fom with it sulatitution com phunds. [Chlobophenesic Acid, Caraazotic Acin. 3 Phenol is benzine with one molecule of $(\mathrm{OH})$ subatituted for one atom of H .
car'-bó-lĭze, v.t. [Eng. carbol(ic); -ize.] To impreguate with carbolic acid.
car'-bōn, s. [Fr. carbone; from Lat. carbo $=$ a coal.]
Chem. : A tetrad non-metallic element, bym bol C. Atomic weight, 12. Carbon occurs in three allotropic forms-two crystalline (dia mond and graphite), and one arworphous (char coal). Diamond cryatailises in furme belong coal). Diamond cryatailises in forms ingrent ing to the regular aystem. it is transpirent
either colourless, or yellow, pink, blue, or green. The hardest substance known, refracts light strongly, is jafusible, but is burnt into $\mathrm{CO}_{2}$ in oxygen gas at white heat. Sp. $\mathrm{gr}, 3 \cdot 5$ It is a non-conductor of electricity. It is found in gravel in India, Brazil, \&c. [Diamond. Graphite crystallises in six-sided prisms. ©p. gr., 2"3. It is grey-black, with e metaly Graphite often separates in scales from moltea iron; it is used for jead pencils; it is oftea called black-lead. [Graphite.] Amorjhous carbon occurs mare or less pure in lamp biack wood charcoal, coal, coke, and animal char coal. Sp. gT. from 1.6 to 2 . It is porous absorbs gasea, removes colour from organi liquids, is used as a disinfectant, and burns io the air at red heat, forming $\mathrm{CO}_{2}$. When boiled with $\mathrm{H}_{2} \mathrm{SO}_{4}$, it is oxidised to CO , and $\mathrm{EO}_{3}$ is also formed, which escape in gas used as reducing agent. Carhon forms two oxides with oxygen, CO and $\mathrm{CO}_{2}$, carbonic oxide and carboric anhydride.

## carbon-battery,. <br> Elect.: [Bunsen-battery]

## carbon chlorides, s. ph

Chem.: Carbon monochloride. This comb pound has been discovered to be hexa-chlor benzene $\mathrm{C}_{6} \mathrm{Cl}_{6}$ by determination of its vapour
 or, wöre, wolf, wõrk, whô, sôn; mūte, cŭb, cüre, ụnite, cũr, rûle, fùn; try, Sy̆rian. $\infty, \infty=\bar{e}$. ey $=\overline{\mathrm{a}} . ~ q u=2 \kappa w$.
denaity. It is obtained by passing the vapour of chloroform through a red hot tube. It forma white silky needles, melting at $226^{\circ}$, and boiling at 331 .

## Carbon-dichloride, $\quad \mathrm{C}_{3} \mathrm{Cl}_{4}=\mathrm{Cl} \xrightarrow{\mathrm{C}} \mathrm{Cl}_{\mathrm{Cl}}$ <br> analogous to ethene, obtaiaed by passing the vapour of carbon-trichlorids through a red-hot tube. It is a colourless liquid. Sp, gr., 1'6. It boils at II7'. <br> 

to ethene, obtained by placing ethene chloride into a glass vessel containing Cl and exposing it to sunshine. A white crystalline aromatic substance melting at $160^{\circ}$, and boiling at $182^{\circ}$.

A colourless liquid, ssp, gr. $1 \cdot 56$, and boiling at $77^{\circ}$; obtained by passing the vapour of Cl and $\mathrm{CS}_{2}$, through a red-hot tube, and distilling the liquid formed with potash. Also formed by liquid tormed with potash. Also formed by the action of Cl on $\mathrm{CH}_{4}$ in direct sunlight. By the action of sodium amsigam on its alco-
holic solution the atoms of Cl are replaced by holic solution the a
atoms of hydrogen.

## carbon dioxide, s.

Chem. : Carbonic acid gas, Carbonic anhydride, Carbonic oxide (of some chemists) $=\mathrm{CO}_{2}$ Carbon dioxide is a colourless gas I 524 time as lueavy as sir, sad 22 times as heavy as hydrogen. It is evolved in large quantities from fasures in active and extinct volcanic districts. It is given off ia the process of fermentation, from decaying animsl ad vegetable matter and by animals during respiration, and contaminates crowded rooms. It accumulatea also in the bottom of pits and wells, and forms a great part of the afterdamp or choke. damp of coal mines. It is also contained in most waters from spriags, and water charged with it has the power of dissolving carbonates of calcinm, magnesium, and iroa. It is always of caduced when carbonaceous mstter is burnt produced when carbonaceous matter is burnt in excess of air or oxygen. It has an agreeabie
pungent odour, but it cannot be respired, as plugent odonr, but it cannot be respired, as tinguishes the flame of a lighted taper. At the pressure of $38^{\circ} 5$ atmospheres at $0^{\circ}$ it is converted into a colourlesa limpid liquid insolnble in water, but soluble in ether and alcohol ; it alidifles, on exposure to the alr, into a snow white nass, which is a bad cooductor of heat when mixed with ether it is used as a freezing mixture. Carbon dioxids exista in the air ond is decomposed by the green leaves of plants, which retain the carben and liverste oxygen in sunlight. About four voluraes of $\mathrm{CO}_{2}$ are contained in 10,000 volumes air. The total quantity is eatimsted at about three billions of tons. Cold water dissoives about bilions of tons. Cold water dissoives abotat
ita own volurne of carbon dioxide, whatita o ovn volurne of carbon dioxide, what-
over be the density of the gas with which it ever be the density of the gas with which it
is ia contact, the solution reddens bue litmus is io contact, the solution reddens biue litmus alkaline earth metals into carbonates (q.v.) Carbon dioxide is contained in aerated water and ia sparkling winea. Carbon dioxide can be obtained by burniag carbon in execss of oxygen ; but by passing $\mathrm{CO}_{2}$ over red-hot char coal it is converted into carbon monoxide Carbon dioxide is uaually prepared by decomposing a carbonate with one of the stronger acids, as by the action of hydrochloric acid on marbie, which gives calcium chloride, water and $\mathrm{CO}_{2}$. Carboo dioxide can be distinguished by its giving a white precipitate when passed into a solution of lime or baryta water, by its quick absorption by caustic alkalies, and by its extinguishing the fisme of a lighted taper. [Carbonate.] Carbon dioxids is de composed by heating potassium ia it, forming
an oxide and liberating carbou.
carbon disulphide, s. [Bisulphide or chbon.]
carbon-holders, s. pl.
Elec.: Clampe for holding the carbons io lectric are lights.
carbon-ligith, 8.
Elect.: The light produced between and apon two carbon points, between which passes
a current of electricity. [Electrio cilni..] carbon monoxide, .
Chem. Carbonous oxide. Carbonic oxide Carbonyl $=$ co Carbon monoxide is colouriess, inodorous, tasteless gas, insoluble in water, sp. gr, 0.967. It burns with a light blue fiame, forming $\mathrm{CO}_{2}$. It is intensely poison ous, even when raixed with large quantities of air, producing faintness, insensibility and death. It is formed when $\mathrm{CO}_{2}$ is passed ove red-hot charcoal, also by heating oxalic acid $\mathrm{C}_{2} \mathrm{H}_{8} \mathrm{O}_{4}$, with oulphuric acid, which decomposes it into $\mathrm{H}_{2} \mathrm{O}, \mathrm{CO}_{4}$, and CO . The $\mathrm{CO}_{2}$ is re noved by pasaing the gas through limewater It $x$ nites with KHO at hich temperatures, form ing formiate of potassinin It unites with Cl when exposed to sundicht forioing phosgene when exposed to sunlight, forioing phosgene gas form by heating powdered ferrocyanide of formed by heating powdered ferrocyanide of potassium with tea times its weight of con(Carbunyl) in organic chemistry acts as a (Carbonyl) in or

## carbon oxychloride,

Chem.: Pboagene gas, Carbonyl chloride $\mathrm{COCl}_{2}$. Obtained by exposing dry CO and $\mathrm{Cl}_{2}$ to direct sunlight, also by passing carbon monoxide into boiling aatimony pentachloride, and by the oxidation of chloroform. It is collected over mercury. It condenses into a liquid at $0^{\circ}$ It is decomposed by water forming carbon dioxide and hydrochloric scid. Treated with dry anmonia gas $\mathrm{NH}_{3}$, it forms urea $\mathrm{CO}\left(\mathrm{NH}_{2}\right)_{\text {_ }}$ and ammonium chloride.
carbon-paper, s. Peper coated on one side with a substancs which, under pressure adheres to s blank sheet placed naxt to it Used for manifolding on a typewriter or otherWiss.

## carbon-printing,

Photog.: A photographic process introduced by Poitevia la 1855. It is as follows: Pape is coated with a compound of bichromate of potassa, gelatine, and lamp-black, in cold distilled water ; this is aliowed to dry in a dark room, subsequently exposed between a negative for a few minutes, according to the character of the solution and of the light, then dissolving off with hot water the parts not affected by the sctinic action of the light. The picture resulting from this treatment is a positive print in black and white, of which the shades are produced by the carbon of the lamp-black. Poitévin also introduced varjous colours iato the same process. Poitévin, later, introduced another process for carbon-print ing under a positive. The paper is floated in a hath of gelatine dissolved in lukewarm water and coloured with lamp-black. Such paper is sensitized in a dark ronm by immersion in a eolution of sesquichloride of iran sad tartaric acid. This renders the gelatine insoluhle, even in boiling water. The sheeta are dried and exposed under transparent positives in the printing-frame. The parta of the film acted upon by light becone soluble in hot water, the iron salts, under the influence of light, heing reduced by the tartaric acid, re storiag the organic matter to its natural solubility. The sheet is then washed io hot water which removes the ferrugitous compound and develops the picture. Improvements were subsequently intraduced by Swann, of New-castle-upon-Ty12c, in 1861, and others.

## carbon sulphochloride,

Chem. : $\mathrm{CSCl}_{2}$, a yellow, irritating liquid, de composed by petash into $\mathrm{K}_{2} \mathrm{~S}_{3} \mathrm{~K}_{2} \mathrm{CO}_{3}$, and $\mathrm{CCl}_{4}$. It is not acted upon by water. It is obtained by the action of dry chlorice on carbon disulphide
carbon tool-point, s. An application of the diamond to mechanical purposes. These points are used to point, edge, or face tools for drilling, reaming, sawing, planing, tura ing, shaping, carving, engraving, sad dressing fint, grindstones, whet-stones, emery, corundum, tanite, or tripoli wheels, iridinm, nickel enamel, crystals, glass, porcelain, china, steel, hardened or otherwiss, chilled irnn, copper, or other metals. Twenty-eight forms of it are figured in Knight's Practical Dictionary of Mechanics.
car-bó-nā'-çĕ-oŭs, a. [From Lat. carbo (genit. caroonis) = charcoal, snd Eng. suffix -aceous, from Lat. suffix -aceus.]

Min. \& Geol. : Consisting mainly of carbon the simple element of ehsreoal.

7 In geology the term in appled to atrata wholly or in large part formed by the accuniulation of ouch vegetable material as sunken bogs , Coal lignte and peat heve hydragen as well es ca often mineral impurities. Anthracite and graphito (metamorphosed coal) consiat of graphy (maron Diamond is pure cart on Bituminous shale possil pitch puretrolem bit inthe acene mound in the ceous materiais found in the earth. In ex ceptioaal cases the carbon of carbonaceous rocks may be of animal origin, thus the oily maiter with which the bituminous shales of Caithness are impregnated seems to have bsen derived from the decomposition of fossil fisbes rather than of planta.
" car-bó-nā'de, * car-bō-nā'-dб. s. [Fr. carbonnade; from O. Fr. carbon; Lat. carbo (genit. carbonis) $=$ charcoal.] A plece of fish flesh, or fowh, cut in slices, seasoaed, aud broiled.
"II I come in his way willingly, iet him make a car

* car-bot-nā'-dĕd, * car-bò-nā'-dōed, pa. par. or $a$ [Carbonade, v.]
 pr. par. \& E. [Carbonado, v.]
B. As subst.: The act or process of slleing fish, \&c., and broiling it over the coals.
car-bö-nä’-do, s. [Сanbonade.]

1. Ord. Lang.: The same as Carbonade.
2. Min. : Large pebbles or masses of diamonds, occasionaily 1,000 carata in weight. They consist of pure carbon, excepting 0.27 2.07 per cent. (Dana.) A variety of the diamond, (Brit. Mus. Cat.)

* oar-bō-nä'-dŏ, v.t. [Canbonado, 8.]
I. Lit.: To cut or slice fiah, fowl, \&e., and broil them on the coals.

A hare dainty ear Flatcher. 2. Fig.: To hack, cut to pieces.

Draw, you rogue, or Ill no carbonado
Your ghauks.
Shakelp.: King Lear, iL 2
car-bō-na'r-ĭsm. s. [Carbonar(i); -ism.] The principles of the Carbonari.
car-bot-na'-ro (pl. carbonari), s. [Ital carbonaro $=$ a collier.] A member' of a secret association estabished in Italy in the heginning of the present century, with the object of setting up a repullic. The Carbonari took charcoal [ital. carbone] as their symbol of purification, and adopted as their motte,
Revenge on the wolves who devour the "Reveligg on the walves who devour thi
lambs." The origin of the society is uncertain.
car'-bön-āte, s. "[From Eng. carbon(ic); and suff. -ate (Chem.) (q.v.)]
Chem.: Carbonates are salts. The corre sponding acid, $\mathrm{H}_{2} \mathrm{CO}_{3}$, is not known in a free state; it may be formed when $\mathrm{CO}_{2}$ is dissolved in water; it is dibasic: the carbonates of the alkaline metals are soluble in water, and are either seid or neutral salts according as ons or both atoms of H are repiaced, es KllCO snd $\mathrm{K}_{2} \mathrm{CO}_{3}$. The seid salts are often called bicarbonates. The carbonates of the other metals are insoluble. Basic carbonates are mixtures of carbonates and oxides. Carbonates liberate $\mathrm{CO}_{2}$ when treated with an acid, which may be recognisel by passing it iato a solution of baryta water, io which it throw down a white precipitate of $\mathrm{BaCO}_{3}$, soluble in HCl . Carbonic acid msy be theoretically considered to have tinis formula and belong to the lactic acid series-
car'-bŏn-à-těd, a. [Carbonate.]
Chem.: Combined or impregnated with car bonic acid. Carbonsted water is either pure or holding various saline matters in soultion, general sale in this country the water contains a little soda, which being charged with the gss is called soda-water. (Ure: Dictionary of Arts, Manufactures, and Mines.)
car-bŏn'-1̌c, * car-bŏn'-ǐck, a. [Eng. car bon; -ic.] Containing carbon, pertaining to carbon.
"Corn, and particularily wheat, contains more of the
carbomick principie than grasmen. $-K$ trwan: On $\mathbb{y}$. oarbonick prom
ures. 1. $\ddagger 2$
boln, bof; pout, j6wl; cat, çell, chorus, çin, bençh; go, gem; thin, ṭis; sin, ass; expeot, Xenophon, exist. ph = $\ell$.

carbonic acid, s.

1. Chem. \& Ord. Lang. : The old but etm well-known neme for what is called by modern chemists carbon dioxide (q.v.).
2. Phusiot. Ais exhated from the lungs is satursted with moisture, and, moreever, contalus about $4 \cdot 35$ per cent. of carbonic acid. The amonnt ia inereased by setive exercise. By breathing the same air agaiu and again, it is prossible to tnorease the carboric actd to is possible to cencrease the carbonic acir to about to per cent, but with very deleterious
effects. Lir in which animals had been sutfoeffects. Air in which animals had beell suffecated was fontid by Mr. Courthepe to eon-
tain 12.75 per cent of carbonic seid, but less tain 12.75 per cent, of cerbonic seid, but less
than balf that anount ( 5 to 6 per cent.) will than balf that
endsinger life.
Carbonic acid engine:
3. An engine driven by the expen ive power of condensed carbonic scid gas.
4. A machine for impregnatiag water with carbonic acid gas as a beverage.
5. A form of fre-engine, in which water is ejected by the pressure due to the evolution of earbonie suid in a closed chsmber over water, or in which carbonic acid is ejected with the water, to assist in extinglishing the fire by the exclusion of oxygetr from it
carbonic oxide,s. The old name for carbon nonoxide (q.v.).
aar-bŏn-if'-ér-oŭs, $\boldsymbol{c}$. [Lat. earbo (genit. cerbonis) $=$ cual; fero = to bear, produce, and Eng. satf. -ous.]
(reol.: A term applied to the evtensive and thick series of stratil with wherh scams of palseczoic coal are more or lens immediately associated. It is applied as well to that grest eystem of formations whlel yield our main supply of coal as to somie divisions of that system, sweh as thee 'arboniferoun Limestone snd the Carboniferols Slates (of Ireland). It is also arr.lied to the lussils found in any stratam belonging to the aystem.

## corboniferous system or forma-

 tion, s.Geol. : The Carboniferons suceeeds the Olu Rel Sandstone or some other menber of the Devonian system, and passes npwaris into the Pemman series. Its eomstituent gronps vary much in the thicknesses of their asndstones, clays, limestones, and coals in different parts of the conntry, aceording to thrir contditions of deposition is conterminous seas, estuaries, and layoons.
The Carloniferous Systmo atfains a grent devthpment in the Cnited states, the ofrata being divided into two groups, the lower on sub-c'arboniferous, and the ('arthonifrrons, comprixinz the millatume grit and the conl mensures. According to I'rofewar Ilana the coathearinc area of North America is upproxinately as followe:

Sq. miles. 50,000
$: \quad 6,009$
$: \quad 47.000$
$: 78,000$

The Carbonifi rous System is strongly de veloped in Fingland and Ireland and purts of Europe. Cbina pussesses extennive deposits.
Carboniferous fossils comprise labyrinthodont and other amplibia; heterocercal fishes of many forms; numerous inserts, myriapods and arathnids; cruataceans (incluiting the Inst of the trllohites and the eurynterids) of all orders except the bighest derapods; mol Juses of all the known orlers; polyzus; enrals of the " rugose ${ }^{12}$ kiod: foraminifera ; and some plants of the conifer and eycad grours, bnt far more of the ferm. equiseturn, and lycoplod orders The Carboniferous Limestone consists of the corals, enerinites, shells, and foraminifera of a great sea, with muds, sands, and coalbeds on its narmins, both at first (Tıedin), and afterwards (Yoredale). These enostitute the coal-measnres of Russia, Styria, Italy, Corsica, the Bonlonnals, \&e., and the Lower Conl-measures of Scotland.

The Millstone Grit next formed, in slallow water, of widespread sleets of gand sund chingle, has a fow scattered fossil plants sud shells, and thin seams of cosl.
"Measures" is a mining term for strata, retained for the coal-ineasures, which consist of (3) wherons successive groups of (1) clay, (2) coal, (3) shale, and (1) sandstone, each varying from a few inches to some feet in thickness. These originated as maritime flats with lixuiriant jungles, subjected to inundations of freah and
brackish waters, with mud and sund, and sometimes of sea-water, leaving a limestone of sem-ahelia
The thick forests of gigantic lycopods, equisetes, and ferns covered their floors with accumulated exuvie, and thick lisyers of each season's spore-dust Storms ters down the clastered trunks, and covered them with the mud and sand of imundations. [COAL]
The " underclay," or "seat-earth," under each coal-seam was the soil in which the trees (Sigillaria, Lepidodendron, sud Calamites) grew, and is a pure clay used for firebricks, encaustic tiles, \&c.
The "roof-shale" over the coal, forming a tough roof to the galleries in mining, was brought by floods, together with its waterbrought by floods, together with its waterlogged fern-fronds and trunks and branclies
of the larger plants. This and other shales of the larger plants. This and other shales ("batt," \&c.) contsin sume lieds of Antliraland shells, numerous entomostraca, and some higher crustaces, a few srachaids, insects, sod myriapods, with occasienal amphibia, snd sbundant remsins of heterocercal flshes. These fossils are often imbedded in ironstane, concreted in the shales.
Thick gand-drifts, of frequent occurrence, formed the aandstones ("post," \&c.), contalning acattered plant-remains. (Prof. T. $N$. Jones, F.R.S.)
car-bōn-1-zá-tion, cas-bठ̆n-ī-8ä'tion, 3. [Eag. carboniz(e); afion.] The set or process of carlonizing, or converting into carbon. (Ure.)
car'bon-ize, car'bcin-1ş, v.t. [Eng. carbon; $-i z e$.$] To eonvert into carbon by the$ action of fire or scids.
car'-bôn-izcd, car'-bōn-işed, pa pow. or a. [CARHONLZE.]
car'-bōn-iz-ẽr, \& [Fing. carbonize; -er.] A tank or vessel containing benzola or other auitable liguid hydrocarhon, and through Fhich air or gas is passed, in orter to carry off an intlammable vapour. [CARnuretor.]
 ., \& s. [CADUONIZE.]
A. \& B. As pr. par. \& parlicip. adj.: (Sce he verb).
C. As substan.: The act or process of converting into carbon; carbouization.
oarbonizing-furnace, s. An epparatus fer carbonizins woml, disintegrating rocks \&e. It is composed of a furnare or fire-charnber movable upen a stathory frame, hoth verti cally and horizontally, ant provicled with a nozzle by which the tiame is directed upon the object.
car-bön-ŏm'ě-tẽr, s. [Eng. carbon, o con neetive, and meter.] An instrunnent for de acid by its action on linne-water. (Webster.)
$\mathbf{c a r} \boldsymbol{c}^{\prime}$ bŏn-oŭs, a. [EDg. carben; ous.] The same as Carbonic (q.v.).
car'-bŏn- $\mathbf{y y}_{4}$ s. \& a, (From Lat., \&c. carbon = charceal, and Gr. v̈入خ (hul̄) $=$. . . matter a a purinciple of being.] a diatomic radical baving the formula C $v^{\prime \prime}$
carbonyl chloride, s. [CaHBON OXYCILOBLDE.
car-bo-trí-a-mino,s. [From Eng, ccrbo(n); bat. Iresix tri $=$ three, and Eng. amine.] [AMINES]

Chem. : Guapline, $\mathrm{CH}_{5} \mathrm{~N}_{3}$ or $\mathrm{Civ}\left\{\begin{array}{l}\mathrm{NH}, \\ \mathrm{NH} \\ \mathrm{Nil}\end{array}\right.$ An organic base produced by the action of nummonia on chlorophicritt, also by heating cyanamide, $\mathrm{CH}_{2} \mathrm{No}$, in alcoholic solition with ammoninm ehloride. Also by oxidizioy guanine with HCl and $\mathrm{KClO}_{8}$. Guanidine fornis colourles. crystals, forming an alkaline solntion witl water, which absorbs $\mathrm{CO}_{2}$. Gitanidine hoiled with baryts water yichls ammonia and urea Mctlirl, jhenyl, \&e. granidines sre known. (See Watts: Dict of Chemistry.)
car-bŏv'-in-āte, s. FFrom Eng. carbozin(ic), snd autl", ete (Chem.).I A salt of carbovinie scid.
car-bŏ-vinn'-1c, a. [From Eing. carbo(n), and vinic (q.v.).
carbovinic acld, s. The same ss ETHYL carbunic acio (q.v.).
car'-b6P, s. "Corrunted from Pers. gardbal $=$ a targe flugon.] A large glolualar glass
vessel,-protecied with wicker-work, and used vessel, protecied with wicker-work, and used
for containlng sulphuic scid and other corfor containlng
rosive Jiquids.

It ${ }^{\text {al }}$ karbunchel; all from Lat. carbunculus =a littie ceal, dimin of carbo $=\mathrm{s}$ coal.]

1. Min.: A precions stone, a variety of garnet, of a deep-red colour, feund in the East Indies. When held up to the sun ita deep tiage beconres exactly the colour of a burning coal. In the Middle Ages, it was popularly anpposed to have the power of giving out light. It is cut in a form called concave cabocion.
"Thas stons nohlest of alla

"And they हet in ft four rows of stones: the frst Exow. xuxix. 10.
2. Script. : The carbuncle of Exod, xxxix 10, Heb. 귝ㄱ (bareketh), snd that of Ezek. xxxviii. 13, Heb. Ipla (berkath), is prohably the emerald; that of Is. liv. 12, Meb. TT7\% (ekclachh), is an unidentifled flashing gem.
3. Med.: A malignant hoil or uleer, forming. \& hard rnund tumons, and ditfering fromi.an. ordinary beil in having ne core.
car-bün' ${ }^{\prime}$-clĕd, $a$. [CARBUNCLE.]
4. Set with carbuncles.

Hi has derervid it; wern it carburceled
Like holy Phoehan' ear.
5. Affected or marked with carbuncles ; 日uffering from a carbuocle.
car-bŭñ-cú-lar, $a$. [Eng. carbuncle; -ar.] Of or pertaining to a carbuncie; of the asture of a carbuncle. (Johnson.)

* car-bŭń'cu-lãte, a, [Lat. carbunculatus, 1's. 118r. of carbinculo $=$ (I) to sutter from carbuncles ; (2) (of plants) $=$ to be blasted.]
O. Bot. : Blasted by excessive heat or cold.
car-bŭin-c!̣-Lā'-tlon, s. [Lat. carbunc! latio; from carbunculo $=$ (I) to suffer from carbuncles, (2) (of plauts) $=$ to be blasted.] The blasting of the young buds of trees or plants, oither by excessive heat or exeessive coid. (Harris.)
- car-bŭñ'-cu-1ȳne, $a_{\text {. }}$ [Lat, carbuncu'(us); Eng. suff. -yné $=$ ine.] Full of red yelbles or ciods.
"Palladiuserthe fas apte, and Ionda carbunculyne."-car'-bu-rět,
[From Eng., de. carbo(n), and sutf. -uret (Chem.) (q.v.).]

Chem. : A compoond formed by the combl nation of carboa with another eolstance.
car-but-rĕt'-tĕd, a. [Eag. carburet; -ed.] Chem.: Combined with curben, or holding carlun in solution. The gas known amotig
miners as fire-damp is pure carburetted hyminurs
drogen.
car-bun-rĕt'-tõr, car-bư-rĕt'-ōr, n. [Eng. curburet; -or.]

Chem. : An apparatus for making carbuncts, through which coal-gas, hylrogea, or air is passed through or over a liquid hydrocsmbos, to increase or confer the illuminating power. They may be said to be of two kinds, thongh the purpose differs rather than the coustruction: (1) for enriching gas, (2) for carbureting air. The former of the two was the primary idea; the latter was suggested as the matter was developed.
car-bn-rı̌-zā'-til n, a. [From Eng carburet; -is; and -ation.]
of iron: The act of comllinigg it with carbolt with 1 he view of converting it inte steel.
car'-by̆I, s. [From Eng carb(on), gnd Gr. beling.] (see componul.)
carbyl-sulphate, s. [ETHionic Oxue.l
car-ca-jôu (j as zh), s. [N. Aruer. Indian.] Zooloyy: 1. The Glutton (Guio luseus).

9. The American Badger Meles labradorica.
3. Wrongly applied to the Canadian Lynx.
t car-ca-net (Eng.) " car-cant (Scotch), 8. [A dlminutive of Fr. carcan $=$ a chain or collar; Dut. karkant; Low Lat. carcennum; cf. Icel. krerk (in comp. kverka) $=$ the throat.]

1. $\Delta$ jewelled chain or collar.

Ronnd thy neck in subtle ring
A pendant ornament of the head.
Ypon thnir forebrows thay d!d beir
Teudants and carcants fhining cledr
Watanis Coll, th 10
car'-cass, * car-cais, * car-cays, * carcase, * car-keys, * car-kasse, * carcas, s. \& a. [O. Fr. carquasse $={ }^{* *}$ a carkasse or dead corpa" (Cotgrave); Fr. carcerse; Jtal. carcass $a=$ a bomb, a ahell $;$ careasso $=$ a quiver, aulk: Sp. carcasa; Low Lat. tercasius $=a$ quiver ; Pers, tarkash = a quiver.]
A. As substantive:
I. Ordinary Language:

1. Literally:
t (1) A body.
"Lovely her face; was noer no fair a creature,
(2) A dead body, a corpse.
"Carkege. Corpus, cadaber."-Prompt Parc. Could I myelif the bloody banquet fofn

- Now only used in contempt
(3) The lody of a slanghtered animal, after the head, limbs, and offal bave beeo removed 2. Figuratively
(1) The decayed or ruincd remains of anyhing.
"A rotten carecrss of a boat, not rigg'd,
(2) Any rotten or corrupt body
"Scelety" nays ha " is not dend: that Carcrss, Which you cail dend soclety, is bat ber noortal coil Carlsle: Sartor Resartess, tik. iil., ch, v.
(3) The unlluished framework or akelcton of anything : thus, the carcuss of a house $=$ the walls; the carcass of a ship $=$ the ribs, with keel, stem, and stern-post, after the llanks are stripped off.
II. Mil.: A cast-lron, thick-metalled, spherical shell, haviog three tire-holes. Filled with a composition of saltpetre, sulphur, rosin,

molphlde of antimony, tallow, and Venice turpentine, which burns about twelve minotes Fired from amooth-bore guns, howitzers and mortars. Used to ignite combustible materials.
TIF For the distinction between carcass and body, see Rody.
T. As adj.: (See the compounds).

## carcass-fiooring, $s$

Carpent. : That which aupports the board ing, or floor-boards above, and the ceilin below, being a grated frame of timber, vary ing in many particulars. (Gwilt.)

## carcass-roofing, s.

Carpent. : The grated frame of timber-work which apans the bnilding, and earries the boarding and other covering. (Gwilt.)
carcass-saw, s. A kind of tenon-saw. The blade is atrangthened by a metallic back ing, which is bent over and closed upon it with a hammer. (Knight.)

## car-cat, * car-kat, oar-ket, car-cant, 4. [Carcanet.]

1. A necklace. (Sootch.)
"Thair collart, carcath, and hale belds.
2. A pendant ornament of the head. (Watson: Coll.)
3. A gartand of flowers worn as a necklace. (Discipline.) (Jumieson.)

* car-çir, * car-¢̧ẽr, v.t. [Low Lat. carcero. Carcer, s.] To imprisod.

This Folton had belu tuyse carceired hy the Dike Sathert. p. 408
car'-çel, s. [The name of the lnventor.]
carcel-lamp, s. A French lamp, io which the oil is raised to the wick by clock work. It was invented early in the 10th cent., and is used in some lighthouses.

* car'-çěl-ąge, s. [Sp. carcelage; Low Lat. carcelagium, curceragium = a prison fee; from carcer $=$ a prison.] Prison fees.
car'-̧̧èr, s. [Lat. carcer $=$ a goal, a prison.] A pison: a titarting-post or goal.
* car'-çẽr-ăl, a [Lat. carceralis = belonging to a pison ; carcer = a prison.] Pertaining to, or of the mature of a prison.
"Notwithatanding through fazour they were con-
tented, that he should be relensed frow tis carceral tented, that he should be relersed from, bis carceral

ear-dow, cur-dow, v.t. [Jamieson suggests Fr. cuir = leather, and duire $=$ to fashion, freme.] To botch, to mend, to patch, as a tailor. (Uaed in Tweeddale.)
car'dew-er, s. [Scotch cardow; er.] A botcher or mender of old clothes.
card'-this-tle, carde'-this-tie (tie as ell)s 3. [Lat, canduus $=$ a thistle, and Eng. ihistle.]
Bot.: A plant, Dispsacus sylvestris. (Lyte.)
 thistle; fem. pl. adj. auff. -acece.]

Bof, : The Thistles, a anb-order of asteroid or compoaite planta, of whieh the Carduus, or Thistle, is the type.

- car-due, s. [Lat. carduus.] A thistle, teazle.
 xxv. 18. (Purvey.)
car-dụ-e'-liss, s. [Lat. carduelis, from car$d u u s=$ a thistle, from its being the food of the bird.]
Ornith.: A genus of birds, family Fringitlide, and sub-family Fringilline (True Finches) Carduelis elegans is the Goldfneh. It is a native of Britain, and is one of the handsomest of our birds. [Goldfinch.] C. canaria is the Canary-hird [Canary], and C. spinus the Aberdevine or Siskin (q.v.),
car-dŭn-çĕl'lŭs, s. [A dimin. from Lat. carduนs.]

Bot.: A genos of the thistle group of Composita. Nine apecies are known, all natives of the Mediterranean district. Sone are stemless herhs, others grow to a beight of from one to two feet.
car'-dụ-ŭs, s. [Lat.]
Bot.: The Thistle, a genus of composits plants, comprising numerous speeies, many of which are natives of Britain. Abont 101 apecies are known. Carduus lanceolutus (Spear Thistle), is the emblem of Scotland and the badge of the clan Stewart. C. marianus is the Holy Thistle.
carduus benedictus, s. [Lat. benerictus = blessed; benetico = to bless.]
Bot.: A plant, the Blessed Thistle, so called from its supposel extreme effeacy in many disuases. The leaves were used in medieine as a stomachic and diaphoretic.
cäre, * kare, s. \& a. [A.S. cearu, caru ; O.S. \& Goth. kera; O. 11. Ger. kara; chara'= sor row, lamentation ; M. H. Ger, karn = to lament.]
A. As substantive :

- 1. Sorrow, grief.
"Proft of berthe is sorwe end care in lyuynge"-
Ifir rewed of hir self ful sare

2. Solicitnde, anxiety,

I can be calin and free from care
On any shore, sizuee God is there.
3. Caution, heed (espeeially in the to have a care, to take care).

"King Olaf. have a carr/--Cartyto: Heroes ant
Heroworship, lect 1
4. Regard, eharge, solieitude for, oversight.
"I "I we belleve that there in a God, that takes care of
Are pre, and our affint
Coxper: A Poetical Epyults to Lady Austen.
5. The ohject of one's regard or aolieitude.

Flukhed wore his cheek, and glowlng were, his eyes
she thy care? fut the thy care?
"Onr fathers live (nur firt thout tender care),
Thy good Menct lum breathes the vftal air.),
Pope: Homer: : Itad anin.
6. It is vaguely used ia the sense of inclination or desize.
(I) Crahb thus distinguishes between care, solicitude, and anxicty: "These terms express mental pain in different degrees; care less than solicitude, and less than anriety. Care consists of thonght and feeling; solicitude and anxiety of feeling only, care respects the regard the present and future. Care is directed towards the present and absent, near or at a distance; solicitude and anxiety are employed
about that which is sbeent and at a certain distance. We ars careful abont the meana solicitous sud ancious sbont the end; we are solicitous to obtain a good; we are anxious to avoid an avil. The cares of a parant exceed every other in their weight. He has an unceasing solicitude for the welfare of hata children, and experiences many an anxious thought lest all his care ehould be lost upou them."
(2) He thus discriminatea between care, concern, and regard:-"Care and wncern conslst both of thought and feeling, but the latter has less of thought than feeling ; regard con siats of thought only. We care for a thing which is the object of our exartions; we concern ourselves about a thing whan it engages our attention; we have regord for a thing on which wo set aome valne and beatow some re flcetion. Care is altogether an aetive prinelple the careful man leaves no meana uotried in the purauit of his object; core actuates him to personal endicavours; it is opposed to negli personal Concern ia not zo aetive in its nature the person who is concerned will be contente the person exertiona made by others; it is oppoaed to sece exertiona made by others; it is oppoaed
to indifference. Regard is only a sentiment of to indinterence. Regord ts onty a seatiment of extends no farther than reflection. Tha busi ness of life is the subject of care; religion is the grand olject of coucern; the esteem of others is an object of regurd."
(3) In his view the following is the difference bet ween care, charge, and management:-"Care will ioelude bath charge and management; lout. in the striet sense, it eonprehends personai labour ; charge involves responsibility ; managelabour; charge involves responsibility; management ineludes regulation and order is employed in menial oceupations, charge in matters of trust and confldenee ; management in matters of business and experience. The servant has cars of the cattle; an instructor has the charge of youth; a clerk has the man. agement of a lusiness." (Crabb: Eng. Synon.)
(4) For the distinetion between care and heed, see Heed.
B. As adjective : (See the compounds)

T Compounds of obvions signification:-Care-crazed, care-defying, care-encumbered, carekilling, care-untroubled, care-wounded.

* (b) For a table-cover
"Private men's halls were bung with altar-ctotis cherpets and coverlets."-Fuller: The Church Histary of Brikain, p. vil \$3.1. (Trench: Select GLoskary, p. 29.)
The use of rugs is of great antiquity in Egypt, Inlia, China, and Babylon. In the East at present Persia, Asiatic Turkey, and India are great geats of carpet manuficture. Carpets were introduced into England during the Crusades, but long afterwards, indeed even to the time of Queen Elizabeth, the floors of palaces, not to speak of inferior habitations, were strewed with rushes. The practice of hanging the walls of palatial practice of lianging the walls of palatial than that of carpeting the floors: thus in Hatapton Court, built by Cardinal Wolsey, the floors are bare, while the walls are covered with tapestry. The tranufacture of carpets was introduced into France from Persia about A.D. 1606, and workmen from France brought the art to England about 1750. A caryet manufactory was eatabiiahed at Axmiaster in 1755. The carpet industry bas become au important one in the United States, particularly in I'hiladelphia.

 whole carriage and writings of late."-Pope: Letter to
* (4) Management ; manner of carrying out or tranaacting buaineas.
"The manner of carriage of the business, was as it
* (5) Meading, intent.

## And earriage of the article designid.

## II. Technically:

1, Vehicles: In the aenses I. 1 (3) and (4). Carriages of one kind or other have existed from immemorial antiquity. One of the earliest forms was a bullock carriage, of which aone specimens of primitive type may yet be seen in India. The simpleat is a short plank of wood, which the passenger bestrides, holling on hy two upright handles, and insertirg his toes between the whecla and the body of the vehicle. The practice of laagering wagons was known to the Romans, and is not a molern discovery, made by the South African Dutch Boors. Horne considers that the making of coachea in England commenced in A.D. 1555 . coachea in England commenced in A.D. $\operatorname{Stage}$-wagona were introrluced into Entland in Stage-wagona were intronnced into England in 1654, and coachea phed for hire in now 1700 the roads in that country were ao bad that they were suitable only for hack and pack horses, but having beea improved early in the eighteenth century, stage-coaches commenced to run about 1750, and from 1784 were allowed to carry the mails. In the United stateg road improvemeat ia advancing, and the use of haudsume carriages is steadily iocreasing. [Caa, Cart, Coach.]

- Hor*eless carriage: Vehiclea of various typea, propelled by amall steam enginee or electricity, are now being introduced in thia country and abroad, with much promise of rractical utility for business purposee and Illeasure jaunting.

2. Military:
(1) The frame on which a gun ia mounted and carried. [Gun-cabmiacie.]
" He commanded the great oriunce to be laid upou
carriages....-Knolles: History of the Turks. carriages, . ..-Nnolles: History of the Turks.
${ }^{*}$ (2) A aword-belt.
"The carriages, sir, are the hangers."-shctesp.; namlet, v. 2.

* cart'-ẽr-ly̆. $a$ [Eng. carter; -ly.] Like a carter or rough fellow ; rough, rude.
charterie. Acty or churlish trick."-Cotgrave, in e.
car-tē's-í-an, a. \&s. [From Reué Descartes, a celehrated French philosopher, who was
born at La Haye, in Touraine, on March 31, 1596, and died at Stockholm, on February II, 1650, aged 53.]
A. As adj. : Pertaining to Descartea or to his teaching ; taught by Descartes.
"The Cartesian philosoplyy hegins now to bo almost anlvernal
B. As subst.: Oae who adopts the philoaophical tenets of Descartes.
cartesian-deviz, s. A contrivance to Illustrate the effect of the compression or expansion of air in thanging the specifie gravity of bodies. It is a sulall glase tgure, hollow, and sometimes provided with a hollow bulb on its head. This is to be partly filted
with water, and placed in a tall vessel, nearl full of water, and having a plece of caont choue secured tightly over the top. On pressing the caoutcheuc the atr of the vessel will be compressed : this will compress that within the flgure or hulb, 80 admltting more water by a small aperture, and cansing the figure to aink. On remeving the pressure the air in the figure or bulb will expand, forcing out ome of the water, and causing it to rise. (Fruncis.) (Webster.) It is called also a car-tesian-diver.
cartesian-diver, s. The same as Can-TESIAN-DEVIL (q.v.).
car-tës'- $\mathbf{1}$-an-ism, s. [Eng. cartesian; -ism.] The system of philosophy trught by Descartes. René Descartes in bis twentieth year resolved as far as possible to eliminate from his mind all that had ever been taught him by his mind all that had ever been taught him by books or by inatructors, and think out for
himself the entire circle of knowledge. His himself the entire circle of knowledge. His frat jostulate was " Cogito, ergo sum "-"I think, therefore I exist." Inquiring next into ideas, which he cleflined as "all that is in our mind when we conceive a thing, in whatever way we conceive it," he regarded clearness and (listinctness as the criterion of a true as distinguished from a false idea. Of all ideas in the human mind that of a God ia the clearest, therefore there is a God. As in this clear conception of God inflnite veracity is attributed to Him, it is impossible that be conld make our faculties deceive ua in mathematieal and metaphysical demonstrations; these sciencca, therefore, are trustworthy The actual existence of the external world ia proved by the prior trath, the existence of God. Creation was and is a manifestation of the Divine will.
Descartea revolutionised mathematics, im parting to it a bencficial impulse. He did so ikewise to metapilysics. Among his imme diate followers in the latter seience were Geu linex, Nalebranche, and Spinoza. A celchrated opponent was Gassendi. The method of Des cirtes was adopted by all the philosophers of the rationalistic sehool who fiourished during the latter half of the seventeenth and the whole of the eightenth centuries. In physies he discoverch the law of the refraction of a ray of light through a diaphanous body, but his riori mothon was not the proper instrument or thysical investiration, and his researche in that department were a comparative failure. [F̌ortex.]

oăr-y̆-ŏl'-о-phą, s. [Gr. кápvov (karuon] $=$ a nut; $\lambda 0 \phi \dot{o}^{s}($ lophos $)=$ a crest.]
Bot.: A aection of Anchusa, a genus of Boraginaceæ, containing $A$. sempervirens, a plaot with a salver-shaped corolla, with very short straight tube. and the ring at the hase of the nuts prolonged on the inner side into an sppendage. (Treas. of Bot.)
 phyll(us), a lapsed srnonym of Dianthus (q.v.) ; fem. ph. ad.j. suft. -acpas.] The mane refers to the clove-like smell of the pinks.

Bot. : A naturat order of thalamifioral dientyletions, classel by Lindley under his stlenal alliance. There are three sub-orders :-I. Silener, the Piok tribe, with united sepals orposite the stamens, where the latter are of the same number; 2. Alsinex, the Chick-weed tribe, with separate sepals; 3. Molluginew, the Carpet-woed trike, in which the petals are wanting. and the stamens are alternate with the sperals when of the same mumber. They are all natives of cold and temperate regions The Clove-pink (Dianthus Caryophyllus) is the The Clove-pink (Dianthus caryopaydur) is cultirated varieties of carorigis of all the cultirated varieties of carnations, picontecs, hizarres, fakes, se.
căr-y phylu(unn); and Eng. edj. suff. -aceous.]

But. : Applied ta a corolla whose petals have long distinct claws, as in the clove-piok.
căr-y̆-ó-phy̌1'-1ĕ-w, s. pl. [LLat. caryophyt $u(u m)$, and fem. pl. adj. suff. -eke.]

Bot. : The samo as Carvophyllacere (q.v.).
 and Eog. adj. suff. -ous.]

Bot.: The same as Caryophyllaceous (q.v.).

Zool. \& Paloont. : A genas of Madrepore Polypi, in which the coral is branched, and the stars confined to the end of the branch. At each atar is a mouth, surraunded hy Dumerons tentacula. Caryophyllia cospitosia is a common Mediterranean coral, sad at Galleri, near Vizzlni, in Sicily, a led a foot and a balp thlek of the sane species ocenrs fossil in Newer Plincene deposits. The genus ranges from the Chalk to wodern times.
 and Eng. suff. -ic (Chem.).]

## caryophyllic acid, s

Chem.: An acid ohtained from the oil of cloves hy means of alcohol. It is composed and tour of oxygen.
chr-y-b-phy̌l'-line, z: [Lat. caryophylu(um): and Eng. satf. -ine (Chem.).]
Chem. $\mathrm{CO}_{10} \mathrm{H}_{6} \mathrm{O}$. A erystalline substance obtained from cloves by means of alcohol.
căr-y-t-phy̆1-1oid, a. [Fr. caryonhylloits; Gr. карvó申иdлov(karuophullon), and eitos (eilos) $=$ form, appearance.]

Bot. : Resembling tbe Caryophyllus, orCiove.
 $=$ a nut; фǜdov (phullon) =a leaf.]

1. Bot.: A genua of Myrtacex, eontrining Caryophyllus aromaticus, the tree producing the well-known spice called cloves. It is a handsome evergreen, rising from fifteen to twenty feet high. [Clove.] It grows in the East Indian Islands. The trees are now extensively cultivated in the West Indies and elsewbere. All parts of the plant are aromatic from the presence of a volatile bil.
2. Pharm.: Cloves, the unexpanded flowerbud, dried, of Caryophyllus aromaticus, or Clove-tree. The clove has a small tapering, Clave-tree redue clove has ady, censisting of a four-toothed calyx, and the unopened corolla

- Caryophylli oleum, oll of cloves, the essential oil distilled from cloves. It is of a light yellow colour whee fresh, gradually hecoming brown-red; sp. gr., I•055, It conaiats of a hydrocarbon $\mathrm{C}_{10} \mathrm{H}_{16}$, containing in solvtion eugenic acid $\mathrm{C}_{30} \mathrm{H}_{12} \mathrm{O}_{2}$, and $\theta$ crystallioe body carynphylline ( $q . v$. ). Cloves contaln tannin. Cloves and the oil are otimulant, aronatic, and carninative, and are employed in atonie dyspepsia, to allay vomiting in pregnaney, and to relieve flatalence; also the pregnancy, is used to allay the pain of carieus teeth.
căr-y̆-dp'-siss, s. [Gr. кápuov (karuon) $=$ :

Bot.: A name applied to dry fruit containing a single aeed, which is united by all parts with a thiu pericarp. This fruit has the aspect of a eeed ; such is the fruit (commonly called seed) ia the family of grassea. (Balfour.)
 phoinix $)=$ the date-palm; xápuop (karuon) $=$ a nut.]

Bot.: A genus of very elegant, lofty palms, with graceful twice pinnate leaves. Nine apecies are known, all nstivea of India and the Indian Istauds. They have flowers of different sexea borne upon the aame apike, or sometimes on different apikes. From the fowerapikes of c. urens a lirge quantity of the juice called toddy or palm-wine is obtained, and this on boiling yietds excellent palm-sugar aod bugarcsady. The sago of commerce is prepared prom the central or pithy part of the trink. The fibre of the leaf-stalks is used for making ropes, brooms, mats, \&c., and a woolly kind of scurt acraped off the leaf-atalk for caulking boats

* cas, s. [Case.]
cä sā, phr. [An sblureviation of Capias ad satisfociendum.] [Capias.]
* cas-ak-ene, 3. [Ital. casachino; O. Fr. casayuin.] A kind of smrtout. [CAssock.]
ca-sa'r-ca, s. [Russ. kazarka; Bashkir karakas.)

Ornith.: A fresh-water fowl of the Dack family Aoatide (Tadorna casarca), called elso Nuddy-goose. It is a native of Russia
căs'-ca-hčl, s. [Sp. cascabel, cascabillo $=$ little ball, s button or knob at the end of 3 cannon. Probably corrupted from Lat, soubib lum, scabellum.]

Ifil.: The space between the hatton or knob eneerin

on the rear of a muzzle-loadiog gun, and the first re-inforce or greatest circuinferel:ce of the breech. Rifled breech-loading guns have none
căs-cā'de, s. [Fr. caseade; Sp. cascain; Ital. ciscata, from cascare $=$ to fall, from Lat. caso
thte, thit, färe, ạnidst, whãt, fâll, father; wē, wĕt, höre, camẹl, hẽr, thêre; pine, pĭt, sïre, sïr, marine; gō, pơt

$=$ to be roady to fall, from oado (sup. carrm) to tall
I. Ord. Lang. : A fall of wster over a preciploe; a waterfail, 8 little cataract.

From ite full lavor, "ouirs the the whiter wrook.
II. Teehnioxlly:

1. Elect. : An slectric charge asnt through s number of Leyden jars in succession, and not simultaneously.
2. Pyrotechnics: A device to imitate sheets or jets of water. Chinese fire is nsed.
ass-cal'-ho, s. [Port $=$ a chip of stone or yravel : Sp. cascajo, from casoar $=$ to erack, to hreak in piscea, from Lat. quasso $=$ to bresk in pieces.]
Geol.: A deposit of gravel, pebbles, and and In which the Brazilian dianond is commonly found.
ox! -ag-xil'-18, s. [Sp. cascarilla $=$ a plece of thin bark; dimin. of cascara = bark, rind ; casoa $=$ bark for tanning ; cascar $=$ to break in pieces.]
3. Bot. : A genus of Cinchonacese.
4. Phar.: The same as Casoarilla bark (q.v.).

I Mexican Cascarilla: Cascarilln PsendoChina. It is called by the Spaniards Quina blanca.
cascarilla bark (Eng.), cascarilla oortex (Lat.) g .
Pharm. : The bark of Croton Eleuteria, or Eleutheria, a trea belonging to the order Einphorbiaceas. It is a native of the Bahsma lslands, being most abundant in Eleatheria, one of that gronp. The bark occurs in the markst as smail quillsd pleces, about the size of a pencil, fissured in both directions, of a dull, brown colour, spotted white with lichens. It has a spicy amell and a bitter snd aromstic taste. It contsins a crystalline substance, Cascarilline. It is highly esteemed as an sromatic bitter tonic without astringeney in cases of indigestion; also as a stimulant expectorant in chronic bronchitis. When burn it amita a fragrant amell, on which account it has been at times mixed with tobscco.
"Carcarilla bark is Imported chiefty from Eleu. therik, aue of the Eahania isiands, packed in chest
căs-calrill'līne, s. [From Sp., \&ic., cascorilla; and Eng., \&c., suff. -ine (Chem.) (q.v.).] Chem.: A crystalling substsuce found in Cascarilla (q.v.)
cas-ca'-ta, s. [Cascade.] A cascade. "Thore is a great cascata or fall of watera"-E.
cas-ceis, s. [Etym. douhtiul.] Some article of dress. (Scotch.)
"Ane qubste cascois pasmentit with silvir." - Inven-
*ea'sch-ot, * ca'sh-et (et as $\bar{a}$ ), s. [Cacher.] The king's privy seal.

Shakesp. : Richard IIM., iL. 2

* eas-tayne, s. [Chestnut.]
caste, s. [F'r. caste; Sp. \& Port. castu $=$ a rsce, lineage, from Lat. castus $=$ pure, claste.]

1. Literally: An hereditary class of oociety in India, the members of which are theoretically equal in rank, and, as a rule, follow the same profession or occupation. Formerly it was enstomary to add "and in Egypt;" but the iate Dr. Birch (1815-85), a distinguished Egyptologist, sald that the Egyptians, strictly apeaking, had not castes, though the son often musceded to the offlee of the father. Caste India alone. There it sprung primarily from the distinetion of ethnological race ad from conquest.
The ahorigines of India scem to have been Turamians. In pre-historic times a second infinx of Turanians ajpyears to have taken place, the new eomers eonquering the old iahahitants or driving them to the hills and jungles. Thus were produced two classea, what may be called Turanian caste people and Tnranian ontcasts. Next, hut still at a remoto periol of antiquity. say 1700 B.C., or eveu earlier, an Aryan people from central Asia invaried the land, and after a atruggle, continued for many centuries, became fominant nearly everywhere. Long before this conquest was effected, three occupations among them had hardened into castes the Brahmans or Priests, the Kohetriyas or Warriors, and the Valsyas or Merchants. It is worthy of note that in onr own time thers go out in numbers from Engiand the representatives of these three castea, and of these only-Brahmans (chaplains and missionaries). Kshetriyas (offcers and aoidiers), and Vaigyas (merchants). Artizans and labourers cannot atford to go, and the
fourth Hiadoo caste, that of the Sudras, or Artizans and Labourers, was constituted mainly of tha Turanian casto-people, whila the Parishs and other outcasts and the wild tribes of the hills aud the, iungies are the older Turanian aborigines. - When the real origin of the four leading castes and the outcasts beyoud the pate had been forgotten, the Brah mans attempted to base the atructurs of society on what was alleged to be diving revelation. It was gravely asserted that the Brahmans came oat of the mouth of the Suprems God to Instruct nies, the Kshetrigas from his arme to defend them, the Valsyas from his stomach to feed them, and the Sudras from his feet to serve thein.
Booddhism did its best to destroy caste, but aiter a struggle of about 1,250 years (say from 500 B.C. to 750 A.D.), during 1,000 years of which (from B.C. 250 to A.D. 750 ) it was victorious, it hall to quit the field. [Boodphism.] For the next 300 years caste was dominan and tyranaical in a high degree. Then the andssulmen conquest began to break its Mussuman conquest began to break its
power. Now Anglo-ludian influences, political, religious, and social, are sapping its anthority, especially at the Presidency seats. lt was an unintentional interference with caste law which produced the Sepoy mutioies and war of 1857 and 1858, though the Mohammedans foined in the onthreak from other motives.
Through the long ages during which Indian caste has existed, the original four castes have split into an immense multitnde, and at present in almost any tocality from 100 to 200 may be net with. Different castes refose to eat together or to internarry, and as a rule they follow hereditary occopations, but nature is often too powerfal for artiflicial and erbitrary restrictions. [Aryan, Bhahmanism, Eutcasian, Mutinv, Mission.j
2. Fig.: Any distinct rank or class of society, especially if it shut its rasks agaisst the ingress of strangers.

- Caste and ronk are not the sarne, thongh in masy casea they interpenetrate and supfort each other. The nan of highest rank in India is the Governor-Genem, who takes precedence even of the highest IIindoo Rajaha (kings) ; but by caste law he is an outcast, not higher than a Pariah. The relations between white and dark men, specially if the latter be negroes, are cesentially caste relations. The generality of Europeans or A mericans would never think of legally intermarryiug with negresses, regariling them as doomed hy their colour to he for ever the inferiors of the white man. The hereditary nowility of Britain are not, strictly speaking, a caste, despite their legialative privileges; one born a commoner can be created a nobleman, bnt no Sudra can, by any procesa of creatios kaown to man, be nade a Brahman.
"Rut to be sobjugated by an inferior cante way a desradation boyond alio
lay: $H$ ist. Engo, ch is

Her manners had not that repose
Wbich statins the caste of Verer de Vere."
Tennyeon: Lady chas Fero
II Caste Christians: Ilindoo converts who havo not been required at heptism to surrender their castes. The converts of the great missionary, Christian Frederick Swartz, who missionary, Christian Frederick Swartz, who
laboured in India from 1750 to 1798 , and those laboured in India from 1750 to 1798 , and those
of many of hia auceessors, were caste Christlans ; but the great majority of modern Proians; but the great majority of modern Pro-
testant missinaries inoist on carte veing reaonnced at baptism; those of the Roman Catholic Chnrch, on the other hand, permit it to be retained.
cast'-ăd, pa par. or a. [An improper formation from cast, v.] Cast.

A. As substantive:

1. A native of Castile.
2. The language spoken in Castile.
B. As adj.: Of or pertaining to Castile.

## Castilian-furnace, s.

Metellurgy: A lead-smelting furnsec invented by an Engrishman cailed Goundry, but which was first used in Spain. Its chic fi culiarity is the srrangenient far running off

8 constant atream of elag forfuture treatment, the slag running into cast-iron wagone, which ancceed each other as their predecespors becume filled. (Ure.)
ous'-till-lite, s. [In Fr. castillit.]
Min.: A foliated mineral of metallic lustre hardness 3, and ap.gr. $5 \cdot 186-5 \cdot 241$. Compos. Sulphur, 25.65 ; copper, $41 \cdot 11$; xinc, 12.09 lead, 10.04 ; silver, 4.64 ; and ron, 6.49 . It occurs in Mexico. (Dana.)
oth-till-10'-a, . [From Sp. Castilla, an ancient kingdom in Spain.]

Bot.: A genus of plants, order Artocarpacex. Costilloa elastica contains a milky juice from which caontchouc is made.
cast'-İng, "cast-ynge, pr. par., a., \& *. [CAsT, v.]
A. As pres. par.: in senses corresponding to those of the verb
" Menchometus wan a wonderrol man and fer eastunge,"
"Like to casting bees so rising up in ewarma"

* B. As adj. : Flexible.
"Castynge as a bo we ; Aexibulis, ot Arcus mous est C. As enbstantive:
I. Ordinary Language:

1. Literally:
(1) The act of throwing anything.
(2) That which is cast.

T Used in the plarsl for old clothen, castclothes $=$ the perquisite of a nurse or waiting maid. (Scotch.)

- Another midd Ogic ohe haid hat millk

Then gud ghe gre trae head to foot in stlk,
With catings rare and anued nourice fee,
To uurse the king of Elifn's heir Firzee.
2. Figuratively:
(1) A forecasting, forethought.

- (2) A contrivance, s plan, an srrangement. "Distribatio is that osseful carting of all roonins for oftee enter lainment, or
Etements of Architecture
(3) The act or process of computiag or sdding up figures, sccounta, dc.
*(4) The sct or science of divination.
" ${ }^{(5)}$ The act of vemiting, verait.
"The hound turnyde ngen to his cartyng, and a sowe
So waischea in whlewing in fenme."-Wyctufe: 2 St.
II. Technically:

1. Metallurgy:
(1) The act of forming metal in a mould.

II is believed that the art of ehsping metal by the hasamer, chisel, sad grisver is older than that of casting it in s melted atate in a mould. Bit casting is of very considersble satiquity, thus the golden calf made by Aaron was first "molten," i.e., melted and then graved (Exod. xxxii. 4, 24), and the brass (copper or bronze) vessela for Solomion's temple were slso cast ( 1 Kings vii. 46, 4i). Csst-iron statues are mentioned by Paussnias about A.D. 120, hut nothing else of cast-iron is known to have existed in elassic times. Abeat A.D. 1709 Johu Thomas, a Welsh boy, devised an effective method of casting iron, and he and his master auccessfuliy carried out the process (which was long kept a secret) at Coalhrookdsle. It is now ene of the great industries in Britsin, and other nusnufscturing comntries possessed of coal and ironstone. ing comntries
[Foundino.]
"Aftre this maner he nade the tea basean ; all of them had one casting, one measure, ard one size."1 Kings vil. 33
verything betokeas grest perfection in the
metals during the hronze period. - Kemble: Hore Ferales, p . 34 .
(2) That which is cast in a mould.

2 Not. Hist.:
(1) The act of moulting.
"The casting of the skin is, by the avoienta, compared to the treaking of the pecuutlies or cowl but
 History.
(2) The cast feathers, excreinents of hawks, se.
3. Bee-kepping: A swstm. [Cast, s., B. 3.]
4. Building: A coating of lime or plaster.
5. Joinery: The bending of the aurfacea of a piece of wood from their original position, either by weights, or by unequal expeanre to the weather.
6. Seulpture: The taking casta of impressions of figurea, busts, medals, \&ic.
7. Pottery: The act of stamping clay ware Delicate objecta, which camet be readlly moulded by preasing the clay into the mould, are cast by the following process. The plaster mould being clobed, the slip or creany clay is poured in, and the portion nearest to the mould becomes hardened by the abserption of the water by the monld. The fluld portion is then poured out, sad the moold partiall dried. A second flling of slip yielda snothe coating, and the process is repested as oftei as may be necessary to give the requined thickness to the casting. (Knight.)
8. Theat.: The aseigning of parts in a play (Webster.)
T Casting ia used in combination with many prepositions, as a casting avoay, 8 casting off correspouding nses of the verb.
Casting of the heart: A mode of divination used in Orkney.
"They have a charm alto wherehy thay try it per
song bo in a decay or aot, and si they, will de thereor, ${ }_{p}{ }^{2}$

* casting-bottle, s. A bottle for casting or aprinkling perfome.
"Call for your casting-botte."-Albumax, O. Pl., viL 10.

## casting-box, s.

Founding: A flask containing the mould. [Flask.]

1. A member of the Christian Church
2. Now generally suplied to a menber of the Romsu Cathelic branch of the Christian Clinrch.

## Catholic Church,

1. Ecclesiol.: (For definition see exsmple.) "The 1 st and larseat sense of the term Catholiou

 ber of these who shall flually statain unto salvation.
 than Church only: the Christian Courch, ns dintito
guished from that of the Jows nad putriarchs of old ; suished from that of the Jows nad patriarcha of old Saviour dsyanver an the world ; in contradistinction to one nation or people.-3rdly The Cuinolic Church slgnitles very frequently, in a stiil! more particular and Christ, when sense. that part of the Univenal Church of Carth; ;as dinting usher from those which have be tion Cefore, sud shall comesiter. thly And lastly, The term Crequently of all, that juart of the Universal Church o earth, in an outward protession of the helief of the word and sacraments. The Church of Rome pretends of all other societies of Christiana. "-Clutte, vol. i.

## 2. Church History

(1) Previous to the Reformation: Like most other words used iu ceclesiology, the tern Catholie was borrowed at first from the New Testament. It occurs in soine editions of the Greek original-including that issued in con Dection with the recent revision, -in the title prefixed to the Epistles of James, $1 \& 2$ Peter, John, snd Jude [Catholic Epistles], snd is the word translated "general" in the Authorised Version of the Bible. The first to apyly it to the Church was the Apostolic Father, Ignatiue. When he and his successors used it they mesnt to indicate that the chureli of which they constituted a part comprised the masin body of believers, sud was designed, as it was entitled, to be universai. In this sense the Church was opposed to the sects snd separate bodies of "heretics" who had separated themsel ves from it and were now outside its pale. This is the it and were now outside its pale. Thise given in the example under No. 1.
When, in the eighth century, the separation between the Eastern snd Western Churches took place, the lstter retained 83 one of ito took place, the lstter retained spellstions the term "Catholic," the Eastern Church heing contented with the word "Or thodox," still used by the Russisn emperora
in their politico-ecclesiastical manifestoes. [Orthodox.] The history of thia earlier portion of the Catholic Church will be best treated of in the article Christianity (q.v.). (See also Greek, Latin, Eastern, and Westerni.)
(2) Subsequently to the Reformation: When the Protestant churches aeparated from their communion with Rome ia the sixteenth century, those whom they had left naturally regarded them as outside the Catholic pale. They, on the other hand, declined to admit that this was the case, and the term " Catholie Church" is used in the English Liturgy apparently in the sense of sll persons making a parently in the sense of "Mors especially we pray Thee for the good eatate of the Catholick Chay Thee for the good eatate of the catho call Church ece christians. . ." (For the history of the Church of Rome, gee Roman Catholics.)

Catholic Emancipation Act:
Hist. © Law: An act passed for the relief of the Roman Catholics in the United Kingof the Rom very serions political disabilities, dom from very serious portical which they had previonsly laboured. under which they had previously laboured.
It was 10 Geo. Iv. c. 7 .
[EmAncipation, It was 10 Geo. 1V.

## Catholic epistles, s. pl.

Canon.: The epistles in the New Testament addreased not to individual men or to individual churchea, but to the genera! body of Christians. They are James, 1 \& 2 Peter, 1 John, and Jude.
-Catholick or canonical epiates are zeven [five] in nomber; that of St Jamea, two of Ske. Peter, three [one]
of St Jihn, Aud that of St. Jude. They are called catholick, because they are directed to shl the faithful. and nut to any particular churchi a and canonical,
because they contala excellent rules of faith and morailty."-Calmeh.

căt'-1 ǒn, s. [Gr. кaтá (kata) $=$ down, sad ${ }_{i \omega \nu}(i \bar{o} n)=$ goiag, pr. par. of ${ }^{i \mu}$ (eimi) $=$ to go.]

Chem. : An electro-positive substance, which in electro-decomposition is evolved at the cathode. (Faradey.)
căt'-kin, s. [Eng. cat, and dimin. suff. -kin, from their resembling a cat's tail; O. Dut katteken.]
Bot: The pendulous unisexual inflorescence of the willow, hirch, poplar, and other amea-

CATKIN8.
tiferous planta. It differs from the spike in falling off the stem by an articulation, after its temporary office as the support of the organa of reproduction is accomplished. Also called Ament or Amentum (q.v.).
cat'-1ill, v.t. [Kitrle.] To thrust the finger forcibly under the ear; a barbarous mode of chastising.
-T To gie one his catlills: To punish him in this way.
chat'-1ǐng, s. [Eng. cat, and dimin. sufif -ling.]

## I. Ord. Lang. : A little cat, a kitten.

II. Technically:

1. Bct. : The down or moss growing sbout walnut trees, and resembling the hair of a cat.
2. Surg.: A sharp-pointed, double-edged knife, naed by surgeons in ampntations of the fore-arm and leg for dividing the interosaeous ligaments.
3. Mfusic :
(1) Used by Shakeapeare apparently for catgut (q.v.).
"But I am sure, aoue, uniee the fidider Apollo get. iii.
(2) The smallest sized lute-strings. (Stainer \& Barrett.)
catt'-lin-ite, s. [Named after Catlin, the celehrated American-Indian traveller.]
Min.: Properly a rock and not s dafinite mineral species. It forms a bed of red clay of considerable extent in the Coteau de Pralries, Upper Miasouri region, and is referred by Hayden to the cretaceous formation. Compos: Silica, $48^{\circ} 2$; alumina, $28 \cdot 2$; aesquioxide of iron, 50 ; magnesia, 6.0 ; lime, $2.6 ;$ seaquioxide of magnesia, 0.6; water, 8.4. (Dana.)
căt'-mint, s. [Eag. cat, and mint. So called because cats like the odour of it.]

Bot. : A book-name for two plants.

1. Nepeta cataria, also called Catnep on Catnip. The flowers are white, tinged and spotted with rose-colour. They are 10 anbpeduncled dense many-flowered wharls. The leaves are whitish, pubescent beneath. It is found in England in hedges and waste places, especially in a chalky or gravelly soil. It is rarer in Scatland and Ireland.
2. Calamintha officinalis, Calamint. (Brilten \& Holland.)
căt'-nĕp, căt'-nı̈p, s. [The sense of the second element is donbtful.]
Bot. : The same as Catmint (1) (q.v.).
căt-ot-blěp'-as, s. [Gr. кađá (kata) $=$ down, and $\beta \lambda e \pi \omega$ (blepo $)=$ to look.]

Zool.: A genus of Ruminants, with the horus curved outwards, the base liroad, approximating, the tips turning downwards; proximating, the throat maned; tail hairy as in the neck and throat mancd; tail hairy as in the beat koown specles is Catobleas horse. The beat kown the Gnu (q.v.). It is froso Sonth Africa
căt-ò-cá-la, s. [From Gr. кátw (kató) $=$ down, downwards, and кa入oí (folos) $=$ Leantiful. So called from the beanty of their underwings.]
Entom: A genns of moths, family Noctulds. Under-wings of rich crirusom and red, with bar of intense black.

+ căt-ó-c㐅ath-ar-tic, * căt-б-căth-ar-
tiok, $a$. [Gr. кát $\left.{ }^{(k a t o}\right)=$ downwards, and каөवртккоs (kathartikos) = purifying, purging кaөaipo (kathairō) = to purify; коөapos (kath aros) $=$ pure.]
Med.: Purging by causing evacuation by stool.
* căt-ò-chŭs, s. [Gr. кároxos (katochos) $=$ holding down; кaтéx (katecho) $=$ to hold down; from катá (kata) $=$ down, and ëx $\omega$ (ech $\bar{\sigma})$ $=$ to hold, to keep.]
Med. : A species of catslepsy, in which the body is rigidly kept in an erect posture.
căt-ò-cō'-ma, s. $\quad[\mathrm{Gr}$. кatá (kata) $=$ down and $\kappa \dot{\alpha} \mu \eta($ komé $)=$ hair, foliage.]
Bot : A genus of climbing shrubs, native of the tropical parts of South America, an belonging to the Milkwort family. Upward of a dozen species are known. The rombin of a dozen species are knowb. from Brazil, Catocomr foribuna, in that country against amake-bites.
căt'-ö-dǒn, s. [From Gr. кárw (kató) $=$ down. downwards, and obovis (odous), geuit. boóvtos (odontos) $=$ a tooth.]

Zool.: An old genns of Cetaceans, founded on the specific name of the Physter catolon of Linnens. The Cachalot, the same specieg, is called Catodon macrocephalus in Griffith Cuvier; now it is termed Physter macro cephalus [Catodontiden]
fâte, făt. färe, ąmidst, whãt, fâll, father; wē, wĕt, hëre, camẹ, hêr, thêre; pīne, pitt, sire, sĩr, marine; gō, pờ ar. wöre, wqlf, wõrk, whô, sōn ; mūte, cŭb, cüre, ụnite, oũr, rûle, fưll ; trȳ, Sy̆rian. $\infty, \infty=\bar{e}$. ey = à. qu = Kw.
axt-d-dǒn'-ti-dse, s. pl. [From Mod Lat. cutodon, and fem. pl. suff. -idece.]

1. Zool.: A family of Cetaceans containing the Sperm Whales. They are sometimes called Physetoridm, Phyaeter inatead of Catodon being made the typical genne. There are no balcen-plates, bnt in the lower jaw there ara abont fifty-four pointed teeth.
2. Paloont.: Their remaina occur in the Pliocene, if not evan in the Miocene beds.
 (katō) = down, downwards, and дéтwnov (metópon) $=$ the forehead.]
Zool.: A family of decapod Crustacea called also Ocypodidæ (q.v.).

## *catt-ö-mounn'-taĭn, a [Catamoont.]

cā-tö'-nī-an, a. [From Lat. Cato (geult. Catonis), the Roman Censor, celebrated for his sternnass and austerity of mannera.] Resembling Cato in sternneas and inflexibility anstera, atern, grave.
cat-ǒp'-sǐs, s. [Gr. кároұıs (katopsis); from kará (kata) $=$ down, and of $\psi \stackrel{\text { ls }}{ }($ opsis $)=$ a look ing.]

Med.: A morbid quickness of aight. (Worester.)

* cąt-ŏp'-tẽr, "cạt-ŏp'-trŏn, s. [Gr. католगओं (katoptèr) = a spy; кáronтpo (katoptron) $=\mathrm{a}$ mirror; from кavá (kata) $=$ down, back, and opdiw (horaó) $=$ to see.] A reflecting optical instrument; a mirror.
aat-ŏp'-trić, * ca-tŏp'-trir-cal, a. [Gr. катónтрикos (katoptrikos) = pertaining to a mirror; from ќ́тonтpov (katoptron) =a mirror. Optics: Pertaining to catoptrica, or the lawa of reflection.
"Acatopericat or dioptrical hest is snperioar to any, virt.

## catoptric cistula, 3

Optics: A box with saveral aides, lined with looking glassea, 90 as to mnltiply images of any ohject placed in the box. (Knight.)

## catoptric dial, s.

Optics: A dial which ahows the hour by means of a piece of looking-giass, adjugted to reffect the aolar rays upward to the ceiling of a room on which tha hour-lines are delineated; a reflecting-dial. (Knight.)

## catoptric light, s.

Optics: A mirror, or series of concave mirrora, preferabiy parabolic, by which the rayg from one or more lamps are reflected in a parallel beam, an as to render the light visible at a great distance. (Knight.)
cat-óp'-trics, s. [Catoptarc, a.]
Optics: That part of optica which treata of reflex vision and the laws and propertiea of reflection.
 toptron) $=$ a mirror ; $\mu$ avreia (manteia) $=$ prophecy, divioation; $\mu$ dutıs (mantis) $=$ a prorhet, s diviner.]
Antiq.: A apecies of divination practised by the Greeks, in which a mirror was let down by a cord into a forntain in tha tetaple of Ceres, in Achaia, into which sick persons looked. If the observer's face appeared in it sickly or ghastiy the omen was conaidered unfavourable, and the sick peraon would not recover; but if, on the other hand, it appeared fresh and healthy, the omen was considered favourable.
căt-ó-stěm'-ma, s. [Gr. катá (kata) $=$ downwards, and $\sigma \tau \dot{\mu} \mu \mu$ (stemma) $=$ a stem, a root.] Bot.: A genns of mants of the Tea family, consisting of a singla apecies, Cotostemma fragrans, which is a tree growiog to fifty feet
in height.
căt-ŏs-tó-mi'-na, s. pl. [Mod. Lat. catostom (us); Lat, neut. pi. adj. suff. -ina $]$
Ichthy.: A group of fishes of the family Cyprinidx, having very numerous pharyngeal teeth, closely get in a single row, the dorsal fin elongate and opposite to the ventrala, and the aual short or of moderate length. Thera are no barbels. From North America and the north-east of Asia.
oat-os'-tđ̄-mine, a. \& s. [Catostomina.]
A. As adj.: Belonging to, or having the
characteristics of, the group Catoatomina (q.v.).
B. As subst. : Any fish of the gronp Catostomina (q.v.).
căt-ǒs'-to-mŭs, s. [Mod. Lat., from Gr. ка́ть (kato) $=$ down, and oтoцa (stoma) $=$ the mouth.]
Ichthy.: The typergenus of Catostomina (q.v.) The apeciea are popnlarly known sa "Suckera" and "Red Horses.

- caxt'-sō, s. [Ital. cazzo.] A low fillow, a rogue. (Beaum. \& Flurher.)

căt'-stǒp-pẽ̃r, s. [CATEEAd.sTOPPER.]
căt'-sŭp, s. [CATchup, Ketchup.]
* catte, s. [Cat.]
căt-tĕ-mŭn'-dôo, căt-tě-măn'- dôo, , [Tamil or Telnga cattamandoo, cattemundo.] A gum elastic furnished by a plant, Euphorbia antiquorum.
căt'tẽr, " ca-tẽrr, s. [Catahar.]
cät'-tẽr-1̌dge, s. \& a. [Etyiu. donbtfinl.] A word used ouly in the aubjoined compound.
catteridge-tree, s. A trea, Cornus san. guinea [Connus.]
* căt'-tĕr-y̆, s. [Eng. cat; ecry.] An establishment of cats.
"An evil fortune atteaded all our attempts, at re-
atabishing a cattery." Southy: The Doctor, p . 684 .
$\dagger$ căt'-tish, a. [Eog. cat; -ish.] Feline, cat-căt'-tle, * ca-tel, s. \& a. [A, differant form of the word chattel. In the pastoral age in England, as in other countries, the wealth of any man of substance was natinrally eatimated by the number of cattle that he posseased. Hence the word cattle came to mean what we now should call a man's chattels; on the same principle as the Latin word pecunia $=$ money, from recus = cattle.]
A. As substantive:
I. Literally:
* 1. Property, wealth, goods

A womman that hadde flux of blood twelve yeer and hamde spended all hir catel $G$ Gr Biov (bion) $=$ life.
Bit
 tiil. 43, 44
*2. Property consisting of live stock, as distinguished from goods.
 Harry. pp. so, s3.)
If Afterwards the word chattel was introduced for property without life.
3. Beasts of pature, both wild and domestic.

- The word cattle is generally limited to the varieties of the ox and ita congenera. Theas varieties of the ox and ita conkenera. Theas are sometimes called black catte, and horned cattle though some are hornleas; hence the term "neat cattle" bas been hornless; hence the term "neat cattle" bas been
guggested for them. For the different apecies guggested for them. For the different apecies
of ox, gee Bos, Bovidr. The chiaf breeds are of ox, gea Bos, Bovida. The chiaf breeds are
distinguished, among other characteristics, by the length of their horus. The chief longhorned cattle are the Disinley breed, so called from Dishley Farm, in Leicesterahire, where Robert Bakeweil reared them; they hava now become degenerate, and short-horns are in repute. Besidea these, the Devon, Suasex, and Heraford breeds ara worth mention. In the United States no new breeds of cattlo of special worth have been produced, but there have beeu large juportations of improved breeds from Europe, particularly of tha ahort horns, which are highly valued. The Jersey and Guernsey breeda are much esteemed here. The IIereford, Ayrshire, Holstein, and other breeda have beed introduced.
"And God made the beast of the earth after his kriud and cattle after thene kind, stre every thing that II. Fig. : Used in a slighting rense of human beings.
 B. As adjective: (See the compounda).

Obvions componnds: Cattle-breeding, catiledealer, cattle-lifter, cattle-market, cattle-pen, cattle-show, cattle-steater, cattle-fie.
cattle-feeder, s. An arrangement in a
cattle-stable for enpplying the feed in regulated quantities to the rack or manger.
cattle-gate, s. Common for one beast. (Wharton.)
cattle-leader, s. $A$ nose-ring or gripper for the aeptum of the noes, whereby dangerous cattle may be fastened or led. (Knight.)
cattle-plague, 2.

1. Gen. : Any plague by which larga numbers of cattle are deatroyed. Such plaguea have exiated at intervala, nore or lesa, in all conntries and in all ages. Among the eevere: visitations in centuries preceding the nineteenth may be mentloned a great plague which arose in Hungary in 1711, whence it apread to other countriea, deatroying in the next three yeara sbont one and a half millions of cattla. A aecond visitation, which affected England and the Weat of Eirrops between 1745 and 1756, cansed the death of about three milliona of cattle.
2. Spec.: The diaease above referred to fatled to reach the United State日, but the herde of this country have beeu seriousiy affected by a later digease, which is supposed to have originated in Central Europe, and apread thence all over the world. This disorder, known as Pleuro-pneumonia, cannot be traced back further than 1769, whea it was known in Eastera France aa Murie. It appeared in Germany in 1802, Russia in 1824, Great Britain and Ireland in 1841, the United States in 1843, Anstralia in 1858, and Liew Zcaland in 1864. It is contagious in character, and so far has oniy been checked by the slaughter of infected cattie, thaugh inocuiation has proved sonnwhat auccessful, particularly in Australia. Great cumbera of cattia have died from this disease, and atreuuous measurea are being adopted for its eradication. [Foot-AND-Mouth Disease, Plevio-Pneubionia.]
cattio - pnmp, s. A pump which is operated by the cattle coming to drink, either by their weight upon a platform or by pressing againat \& bar which gives way before them, they following it aromnd in a circular track and operating the piston. (Knight.)
cattle-raiks, s. A common, or extensive
pasture, where cattle feed at large. (Scotch.)
cattle-range, s. Any open space over which cattle may rauge or feed.
catilie-stall, s. A meana for fastening cattle at their mangers or racks other than by hatter or tia. It usually consists of a pair of parallel vertical stanchions, at auch distance apart as to admit the neck of the animal. One stanchion is movabia to allow the head of the animai to pass, and is then replaced and held ly a iatch or pio. (Knight.)
catt'-1é-ya, [. [Named by Lindley after William Cattley, Esq.]
Bot.: An extenaive genus of orchids, natives of Central America and Brazil, where they are round on the bark of trees and on rocka. The speciea bear two or more flowers, generally roae-coloured, but occasionally yellow.
căt'-ty̆, s. [Malay \& Japanese kati =a weight of $1 \frac{1}{\mathrm{l}} \mathrm{lh}$.] [Caddv.]
3. An East Iudian weight, equal to $1 \mathbf{l b}$. English.
4. The Bill-hook or Machete of Ceylon. (Knight.)

sâu'-cŭs, s. [A corruption of calker's-kouse $=$ a calker's shed. (Chumbers' Encyc., i. 206.) On Harch 2, 1ino, a quartel oceurred in Baston between the soldiers and some ropemakers, in which the latter were overpowered and beaten. The people were greatly exasperated at this, snd sought opportunities for retaliation. On the 5th of the aame month. in a aimilar atfray, the soldiers fired upon the people of the town, killing and wounding several. This induced the ronemakers and calkers, whose occupations brought them into contact, to form is society, at the meetings of which inflammatory addresses were delivered, and the most violent resolutions passed agninst the l3ritish goverument and its agents and instruments in America. The tories in derision called these assemblies calkers' meetings, and the term wad at length corrupted to caucus. (Knickerbocker Mag.) But its origin has been ahown to the of earlier date, and the Cent. Dict. anggests Mod Lat. ceucus, Mod. Gr. кaîkos ( k auhos) = a cup.] A private meeting of the representatives of any political party previous to an election, for the purpose of selecting candidatea and making otherarrangements for the promotion of party interests. A ayatem bearing the name, but easentially different, has been intruduced into Great Britain, having beea first allopted in Birmingham.
sâu'-dal, a. [Lat. caud $\alpha=$ a tail.] Pertalning to or of the nature of a tail ; tail-like.
"Thus one second and e tenth woold elspes bofore nu Impression wade apon its caudat aerves conid be Prag of sclence (3rd ed.). x xiv. 422

âuse, v.t. \& i. [CaUse, 8.]
A. Transilive :

1. To act as an agent in producing, to sffect, to bring inin existence.

He apologised to thone who had stood round him Sacaulay: Birt. Eng., ch. iv.
2. To prodnce an effect, to maks (with an infinitive foilowing).
"Wilt thou fodge them, woon of man, wilt thoo fodge Lnthern. - Erek. $x .4$

* B. Intrans. : To show cause or reason. " But he, to ahlite thelr curioas request. Gan causen why the eauld not came io place".
T Crabb thus discriminates between to cause, to occasion, and to create: "What is coused seems to follow naturally; what is occasioned follows incidentaliy; whst is created receives ita existence arbitrarily. A wound causes pain, accidents occasion delay, but bodies create mischisf. The misfortunes of the children cause great sffliction to the parents; bnsiness occasions a person's late attendance at a pisce: disputes and misunderstandings create animosity and illwill." (Crabb: Eng. Synon.)
câuşed, pa. par. or o. [CACbE, v.]
câuşe'-fūl, a. [Eng. cause; -full.] Having a snficient cause, reason, or excuse.
câuse'-lĕss, " canşe'-lĕs, a. \& adv. [Eng. cause; -less.
A. As adjective:

1. Having no canse or creative agent, uncreated, original, self-existent.
we have our philosuphical persons, to make moss" $=$ Shakesp.: Alt : Well, il: \&
And make hiscauseless pow the the cruase thane althinga, $\dagger$ 2. Without canse or reason

B. As adjective:
I. Knightly, warlike.

*2. Noble, generous, brave.
"The people are naturally not valiant, and oot mach cupaller:"-Sucking.
3. Belonging to tha Cavalier or Royaliat party.
 4. Haughty, disdainfui.

* oăv-a-11ër'-ĭsm, s. [Eng. carculier; -ism.] The principles or eustoms of cavallers. (Scott.)
ăv-a-liër'-ly̆, adv. [Eng, cavalier; -ly.] 1. Lit. : Lika a cavaller.

2. Fig. : Arrogantly, haughtily.

- căv-a-liër'-nĕss, s. [Eag. cavalier; -ness.] Arrogavce, haughtiness.
- căv-a-lin-ër'-ō, \& [Ital. cavaliere.] A cavalier.
"In short, he was a pertect carallepr."
Byron: Bappa, 7.88.
căv'-a-lot, s. [Fr. cavalot.)
Mil.: As ancient cannon five feet long, throwing a I-1b. ball, with a charge of I lb.; range, 900 paces.
căv"-al-ry̆, că-văl'-lẽr-1e, \&, [0. Fr. chevalerie; Fr. cavalerie; Sp. caballeria; Ital. \& Port. cavalleria] [Cavalier.]

Mil.: Mounted aoldiers organised in troops (as administrative unit, commanded by a cantain and two lieutenants), squadroas (a tactical unit of two troops, led by the senior captain), and regiments (composed of four aquadrons, commanded by a lient-colonel and a major). Divided io Europe into Ieary (Cuirassiers, and some Dragoouz or Iragoon Guards), Medilm (Lancers and Dragoona) and Light (Husars). Attached by single regigents to the infantry divisiong. In the United States tha cavalry are of light equipment and know only by the siogle name of caralry. They are geparate from infantry, being organived into distinct corps and under separate commanders. During the Civil War, cavalry provel to be a highly effectiva branch of the army. They nre formed into brigadets or divisions (commanded by a brigadier or licutenantgeneral), for iadopendent action in advance of and covering an army on the march, when horse-artillery battaries are attached to them. Light cavalry are chiefly employed for reconnaissance and foraging, heavy and medium fer battle, but these ditiea are interchangealle. Formations for narch are columns of troops, fours, gections, and half-sections; for fightivg, slways in line, frequently in echelon of regimenta or squadrons, and with a reaerve. Its action is esseutially offenaive, and its real power lies in the charge, which should be gudden and rapid. Its best opportunity is when the enemy is on the march, in diaorder from fighting, or changing formation. The best ground for cavalry is that which gives cover from view till near enough to charge, and then it ahould ha free from obstaclea, 80 as to get full henefit from the shock which depends on unbroken speed. Rate of march-walk, four miles; trot, eight milea an heur.
"If a giate run most to gen tiemen, and the husband-
men atid plowmea be hut
 coot." ELacon: Hen FII.
IV Originally cavalry and chiralry wera but two different waya of apelling the same word. (Trench: Eng. Past and Present, p. 65.)
" ca-vate, v.t. [Lat. cavatus, pa par. of caro $=$ to hollow out.] To hellew or dig out; now sulerseded by excarate (q.v.). (Bailey.)

* ca-vāt'-ěd, pa. par. \& a [Carate.]
căp-a-tin'-a, s. [1tal] A melody of a more simple form thas tha aria. A tong without a second part and a da capo. (Stainer \& Barrett.)
* cav'-āt-ing, pr. par., a, \& s. [CAvate, v.] A. \& B. As pr. par. \& partic, adj.: (Sea tbe verb).
C. As subst. : The act of hollowing out or excavating.
- oav-ã'-tion, "cav-ä'-zion, s. [Low Lat. cavatio $=a$ hollowing or excavating; cavo $=$ to hollow out, to excavate.]

Arch.: The hollowing or underdigging of the earth for cellarage or foumdations; according to vitruviua it should be the sixth part of the height of the whole building.
cāve (1), kāve, s. \& a. [Fr. cave; Sp. \& Ital. cava = a hollow place ; from Lat. cavea, from cavus = hollow.]
A. As substantive:
I. Ordinary Languags:

1. A hollow place or cavern nader the earth; a subterraneous habitation.
Thar he bigsede in a eave, the was thor in roche
graven.
"Tnou magie lyra, whose fascinating soond
Seduced tho savinge monters fromg thelr came",
2. Any hollow place or part.
"The object of aight doth etrike upoo the pupll of the eye directly whereas the cave of the enr doth hold II. Technically:
II. Technically:
3. Geol.: Caves in many casea are scooped out by the sea or by the action of Inland streams. They are most numerous in limeatone countries, and are of great intereat geologically. [Cave-deposits.]
4. Glass Manufacture: The ash-ptt of a glass furnace.
B. As adj.: (See the compounds).

I Obvious compound: Cave-keeper.

## cave-bear, s.

Palcent.: Ursus spelous, a fossil bear, more gigantic than any now known to exiat. It is found is Britain and elsewhere, in Post-Pliocene cave-deposits.
cave-breccla, s.
Geol.: A breccia, generally of marine origin, frequently met with iv caverns at the base of sea-cliffs. It often contaius organic remains. [Cave-deposits.]

## cave-deposits, s. pl.

Geol.: Deposits made in asa-cavea. Water washed in some of the materials which were afterwards fixed in their pace by the formation of stalactite pendulous from the roof, and atalagmite risiog in irregular columoa from the fleor. According to the celebrated chemist Liabig, the vegetable aoil above the limestone rock, when acted on by moisture and air, evolves carbonic acid (carhon dioxide). Falling rain, becoming impregnated with this chemical compound, is capable of disaolving the limestone, and subsequently losing by evaporation a portion of the carbonic acid, parts with tha calcareous matter, which it feares in the form of stalactite. The dropping of water impreguated with carbonste of lime froin the tips of the pendolens stalactites, generates the stalaymites, and hermetically logical examination. It is remarkatle that, tested by these organic remaina, caverns do not, as might be anticipated, range over a not, as might be anticipated, range over a
succession of formatimas; they secm to lie all but limited to the Newer-Pliocene and Post Pliocese perioda.
The flrat cave which attracted much geological notice was that of Kirk dale, alout twenty-five milca N.N.E. of York city. In it wera detected the remaina of about 300 hyenas and the animals on whose boncs they had preycd. (For details sce Buckland's Reliquice Diluviance.) Many cavea throughout tha world have aince been cxamined. Prof. Owcn of mammals-about eighteen of thera extinct, the rest recent-In the cares of the British islea. When the queation of the alleged "antiquity of man" came from France to Britain in 1858, the examination of caves here and elsewhere received a new impulse. First the Brixham caveru, on the coast of Devonahire, was exhanatively examined, and then Kent'a cavern, near Torquay, in the same county, became the acene of very elaborate exploratory digginge, Mr. Pengelley, F. R.S., actlog under the auapicea of tha Britiah Aasociation and the Royal Society of London, being the chief rgent in the work. Deposits of some interest have been found in the cuvea of the Thited States and of Brazil, but no particular yield no indications of ancient man similar to those of Europe. They contain lones of many of the former animals of the conntry, thengh usuailly of less intereat than those of the
European enves European envea.

## cave-dwellers, s. pl. 【Taoglodyte,

## oave-earth, s.

Geol. : A stratorn of earth constituting the
old floor of a cave, previous to the deposition of the atalagmite which now covera it.
ailleo fragernents of rock, rounded stones, nud brokea

cave-guarded, a. Guarded or protected

## cave-hyena, cave-hymna, s.

Palcont.: Hycena speloen, an old Britiah hyena akin to H. crocuta of South Africa, of which it may be only s variaty.
Withe cavo-hyena and eave-tiger are fovod amsocintod Pretisforic Tvimes, p. 23,

* cave-keeping, $a$. Secret, retired from sight, as tbougli hidden in a cave.
"Io men, ws in a roogh - Frow a grove, rematn
Cav-keping ovis thit Cave-keeptng ovils that obsuroly sleep."", 120-61.

## cave-1lon, s .

Palcont.: A foasil lion, Felis speloa, akin to If not even identical with the $F$. leo of modern times.

## cave-pika, s.

Palceont. : A speciea of Lagomys found in Post-Pliocena depoaita in British caves.
cāve (2), s. [Cave (2), v.]

1. A atroke, a puah.
2. A toss.
cāve (1), v.t. \& \&. [CAve, \&.]

* A. Transitive: To hollow out
"Under a ateons hilies side it placed was,
B. Intransitive:
- 1. To dwell in a cave.
" It may be heard at coart, thant nach as we
Cave here, hant herre are outinws."
Shakesp.: Cymbeline, iv.
†2. To sink or fall down, to give way.
T To cave in: Taglve wsy, to yield. (Slang.) "A puppy in if jolns the chase with heart ond soal, Geoffry Hamlyn, ch. $\mathrm{xx+1LL}$.
To cave over : To fall over auddenly. (Scotch.) "Sittlog down fon a hedside. he caven hack over so p. 32
cảve (2), v.t. \& i. [Scand. kava $=$ to throw, to tors.]
A. Transitive:

1. To toss ar pitch, as hay.
2. To toas (the head or horns) threateningly (soid of cattle).
3. To clean (grain) by raking.
"I cave corise. Seecouse le gratn."-Pategraw
B, Intransitive:
4. To rush.
5. To be plunged or buried.
 3rd per. aing. pr. subj. of caven $=$ to beware.] I. Techrically:
6. Lav: A notice or warning given by any person interested to aome public officer not to do a certain act until the party giving the notice has been heard in opposition.

A caveat is an iotimation giveo to some ordinary or ecclesiastical judge ly the act of man, wotifying to
him, that he ought to beware how hactu in ach or htm, that he uaght to
2. United States Patent Laws: A description of some invention deaigned to bo patented, lodged in the office lefore the patent right is taken out, operating as a bar to applications taked out, operating as a bar to applicatiens
respeeting the aane invention from any other quarter. It corresponds to the English Profection (q.v.).
II. Ord. Lang. (Ag.): A warning, a caution, a protest.
"As however. thers in marcely nny eoe of the prin-
ciples of a true niethod of philionophising which tives nut require to bo guard do aphinst errore ou both sidee I must enter a queveat agninst another wisayprehen:

Caveat emptor (Lat.): Let the purchaser beware, i.e., let him examine what he ia buying ware, i.e., et hinn axamine what ha ia buying words, the riak of the purchaag lies with the purehaser.

* cāv-ĕ-ā'tíng, s. [Tat. caveat, and Eng. suff. -ing.]
Fencing: The act of moving the sword alternately from one side to the otber of thet of the adversary.

I Crabb thns discriminstes between to cease, leave off, and discontinue:-"To case is nenter; to leave of and discontinue are active ; we cease from doing a thing; we bave of or discontinue a thing. Cease is used elther for particular actione or general hsbits; leave off more usually snd properly for paricular actions ; discontinue for general habits. $A$ restless spoiled child never ceases crying until it has obtained what tt wants ; it is a mark of impatience not to cease lamenting when one is in pain. A labourer leaves off his work at any given hour. A delicate person discontinues his visits when they are found not to be agreesble. It should be our firat endesvour to cease to do evil. It is never good to leave of working while there is soy thing to do, and time to do it in. The discontinuing a good practice withont adequste grounds evinces great instability of character." (Crabb: Eng. Synon.)

* qease, s. [Cease, v.] The end, extinction or failure.

 s. \& a. [A.S. ceder-bedm, celer-treow; Sw.
ceder, ceder-träo; Dan. ceder trä; Dut. ceder ceder, ceder-träo; Dan. ceder trä; Dut. ceder
boom; Ger. ceder; Gael. seudar; Wel. ceir; Fr. cedre: Prov. cedre, sedre; 'Sp. \& Port cadro; 1tal. cedra; Lat. cedrus; Gr. кédpos (hectros) $=$ (1) the cedar of Lebanon, (2) a kind of juniper.]
A. As substantive:
I. Scrip. \& Bot.: A tree or trees called in Heb. $\mathrm{ZV}_{\mathcal{Z}}$ (erez), from TN (araz), the root of ארח $($ (aruz $)=$ coiled, compressed. In Sept. Gr. it is кéSpos (kedros), Erez still continues in the Arab. arz, and seems to be a generic word, almost lika che English cedar, but limited apparently to apecies of the pine family, of which several are onl Lebanon, the three most notable being "the cedar of Lebanon," pre-eminently so called (II. 1], the Deodar [11. 1, and Deodar]. and the Scotch fir (Pinus sylvestris). The masta for ship's spomen of Scotch fir ; whilst the tree, of which
it te esid that "hte houghs were multiplied and his branches became long," to platnly the typtcal "Cedsr of Lebanon. The wood of sble ; and, contrary to the received opinion, the eres which furnished the beama, dec., of Solomon's temple, may have been from saother species of Lobanon pine.
II. Ord. Lang. \& Bot.: The English name given to various trees, chiefly of the orders Pinaceæ (Conifers) snd Cedretaceæ(Cedrelads). I. (Of the order Pinsceas):
(1) The Cedar of LLebsnon (Abies cedrus, often called Cedrus Libani). From the ellucion to it in Scripture it has, for many centuries, been an object of tnterest, and more than one hundrad years ego Miller thus described it:-"It is evergreen; the lesves sre much narrower than those of the pine-tree, and msny of them produced out of one tubercle, reaembling a painter's pencil; it has male flowera, or katkina, produced at remote diatauces from the fruit on the same tree. The seeds are produced in lsrge coaes, squanome and turbinsted. The extension of the branches is very regular in cedar trees; the ends of the ahoota declining and thereoy showing their upper surface, which is constantly closthed with green leaves so regulariy as to appear at s distance like a green carpet, sad, in waviag about, make an agreeable prospect. The wood of this famous tree is sccounted proof against the potrefaction of animal bodies. The sawdust is thought to be one of the secrets used by the mouatebanks who pretend to have the embalming mystery. This wood is also said to yield an oil, which is famous for preserving hooks and writings; and the wood is thought by Bacon to continue shove s thousand years somid. Many people suppose that to witness the cedarone mustclimb to the celebrated grove on Mount Lebanon, about 6,400 feet above the sea level, and 3,000 below the summit of the mountain, but there sre more apecinens of the tree in the gardens around London than in that grove. Here, of course, it is planted, but it is indigenous from Mount Taurus to the Himalayas,growing along with the Deodar, from which it may not be apecifically distinet
(2) Various junipers: Spec. (a) the Virginian Cedar (Juniperusvirginiana), commonly called "the red cedar," from the colour of its wood, (b) the Bermnda Cedar (J. bermudiana), and (c) the Barbadoes Cedar (J. barbadensis), $\& c$.

2. (Of the order Cedrelacer (Cedrelads) : Various trees. Spec., Bastard cedar = any species of the genus Cedrela; Bastard Burtalia
does Cedar (C. odorata); Cedar of Austral (C. austrciensis).
3. Of other orders: Various trees belonging to the Meliaceæ, Byttneriaceæ, \&c.
B. As adj. : Pertaiaing to or made of the tree described under A.

## cedar-bird,

Oruith.: A species of Chatterer, Amperis carolinensis, also called the American Waxwing. It derives its name from its partiality to cedars.

## cedar-wood, $s$.

1. Gen. : The wood of any of the ordiusry cedars.
2. Spec.: A name given in Guiaus to so easily worked and very aromatic wood, called also Curana, Samaria, Acuyari, and Mara.
ceé-dared, a. [Cemar.] Covered with or full of cedars. (Miltom.)
† ¢̧e'-darn, a. [Eng. cedar, with adj. suff. -(e)n.] Made or consisting of cedar, cedrine. Right to the carven cedarn doors." Nots.
Tennyson: Recol of the Arablion Nights.
çēde, v.t. \&i. [Lat. cedo $=$ to yield, give way ; Ft. celer.]
L. Transitive:
3. To give up, surrender, yield.
"By the peace of Paris In 1163 it [Domlntca] was
cedel th express terms to the Engligh."-Guthrie: Geography.
4. To acknowledge ss due, to ascribe.
"That honour was eutirely cedod to the Parthian

+ II. Intrans.: To give way, to yield, to pass over to.

This fertile glebe this falr domain,
Had well aldh ceded to the alothful hands
Of monks iibidinous." Shenstons: Ruined Abbey.

pě1-Ø-brant, 8. [Lat. celebrans, pr. par. of celebro.] Ona who celebratea or officlates in any aolamn offica; especially applied to the prieat who says Masa, or the cleric who adminiaters the Holy Commnnion according to the Augllean rite.
"They had thelis orders of elergy, hhathopa, priests, and deavonis; their readere and minitsters; their cele:

gel'-ĕ-brāte, v.t. [Lat. celebratum, gup. of celebro $=$ to freqnent, colemnise; celeber $\approx$ frequented, populous.]

1. Generally:
2. To perform or keep with solemo rites.
"'Ye phall ceiebrate It to the eveuth month."-
3. To commemorate in any set form, either of joy or gorrow.

Thin pause of power 'tla Ireland"s hour to mourn; While England celebrates your safe return.
Dryden: To the Duchesr of Ormonde, 98 3. To praise, extol, make famous or renowned. "The songs of Slon were psalma and pieces of poetry,
thint adored or celebrated the Supreme Beiog."-Adticom.
11. Spec.: To say Mass or administer the Holy Comununion according to the Anglican rite.

I Crabb thus diatinguiahes hetween to celebrate and to commemorate:-"Every thing is celebrated which is distinguished by any marks of attention, without regard to the tima of the event, whether present or past; but nothing ia commemorated but what has been paat. A marriage or a birthday is celebrated; the anniveraary of any national event is commemorated. . . . Celebrating is a feative as well as aocial act ; it may be aometimes aerious, but it is mostly mingled with more or less of gaiety and mirtls: commemorativg is a solemn act; it may be sometimes festive and social, but it is always mingled with what is serious and may be altogether solitary. . . Tha Jews celebrate their feast of tha Passover : as Christians, we commentorate the sufferings and death of our Saviour, by partaking of the Lord's Supper." (Crabb: Eng. Synon.)
pěl'-ð̆-brā-tëd, pa. pat. \&a. [Celebrate, v.] A. As pa. par.: In senses correaponding to those of the verb.
B. As adj.: Famoua, renowned.

IF For the difference between celebrated and famous see Fanous.
"çè1--6-brā-těd-něss, e. [Eng. celebrated; -ness.] The quality or state of being celebrated; celebrity, fame. (Scott.)
 brate, v.]
A. \& B. As pr. par. \& par. adj. : In aenses correaponding to those of the verb.
C. As subst.: The act of performing with solemn rites, or of praiaing; a commenoration, a celebration.
" Bot this A trase is not wufficlent Renson for us to Sen, ther the Celebrating of the Memory of such holy

gěl-ŏ-brä'-tion, 8. [Fr. celebration; Lat.
celebratio, from cslebro $=$ to frequent, to solemniae.]
I. Generally :

1. A solann performance of any ceremony or rites.
${ }^{4}$ "He laboured tadilve sorrow from her, and to hasten
the celebration of their marriage."-Sidney.
2. A commamoration of any occurreace, whether of joy or of gorrow.
"What time we whil our celeebration keep."
3. The act of praising or making famous; praise, renown.
N No more shall be added In this place, his momary desarving aiopurticular ceatiobration, than that him few. - Spec.: The act of aaying Mass, or of administering the Holy Sacrament according to the Anglican rite.
"Io the Roman Catholfo Church it is usual to renerve partlon\# of the sherament ufter celebration.
ceèl-ĕ-brā-tõr, s. [Lat. celebrator, from celebra.] One who celebrates, a 1 raiser, an ap prover.

IIt [Scriptnre] has, umog the wite, ns well celebra.
tors, aud admirers, as disregardera, - Boyle: Style of B. Serist, p. 174.

¢̧ĕl-ẽr-1-ac, s. [Celerry.] A apecie日 of parsley; also called turuip-rocted celery.
* çē-1ẽr-ĭ-pè'-dr-an, s. [Lat. celer (genit. ieleris) $=\mathrm{swift}$, and pes (genit. prdis) =a foot; Eng. suff. -an.] A swift tootmau. (Cockerom.)
¢̧ěl-ěr-1̆-ta', con, adv. [Ital.]
Music: With speed, baste ; quickly. (Stainer \& Barrett.)
 Ital. celerita, from Lat. celeritas $=$ apeed, celerity ; celer = quick, apeedy.] Speed, awiftness, velocity of motion. Used-

1. Lit.: Of things.
"'Thrce things coucar to make a percusslon grest;
 2. Fig. : Of the mind, thonght, \&c.
"Ho carried his pint with echaracteristic audacity
 from Lat. selinon; Gr. Gédevav (selinon) = 1arsley.]

Bot.: The common English name of Apium graveolens, an umbelliferous plant widely difgraved throughout Europe. The blauched leafstalk of the cultivated varieties is used extensstak of the cultivated varieties is used extens ively as a vegetable. In its native state the
seds and whole plant are acrid and poisonous.
cö-lěmte', \& [Fr, bleu cileste.]

## Ceramics: Sky-blue (also attrib.).

 [O, Fr. olestiel, from Lat. ceelestis = pertainng o heaven ; calum = heaven.]

## A. As adjective:

## I Literally:

1. Pertaining to the epiritual heaven.
"Againat a nolomn day, harnoesed «t band,
Celertial equipage.
Nitom: P. $L$, vii. 200.
2. Pertalning to the heavens.
"There stay, untlI the twelve celestat ingos Shakesp.: Lovo"t Labour'i Lost, v, 8

## II. Figuratively:

1. Surpassing earthly thlaga In excellence sagelic, divine.
"Their fortitade and wisdom were e flame
Celestial, though they knew not wheurce it came."
2. Inapired.
"Such the bardim prophetic warda,
r: Boadicoon
3. Gen.: An inltabitant of hearen.
"For who can tell (and nure I feare it in!
But that thee is aoms pow re celentiall)"
Thns affahle and mild the prince precelles. And to the dome th Puknowner : Odystey i. 166 2. Spec.: A native of China.
${ }^{*} \mathbf{C}$. As adverb: In a celestial manner; divinely.

Youth amiled celeatial. "In hls face every limb
suitable rrace diffused." M/ilcon: P. L., 1il. 688.
II Crabb thus discriminates between celestial and heavenly: ". . . Cetestial is applicd mostly in the natural sense of the heavens; heaventy is employed more commonly in a spiritual sense. Hence we speak of the celestial globe, as distinguished from the terrestrial, of the celestial bodies, of Olympua as the celestial abode of Jupiter, of the celestial deities; but on the other hand of the heavenly habitation, of on the other hand of the heavenly habitation, of heavenly joys or bliss, of heavenly aqirits and
the like. There ara dontlesa many cases in the like. There are douless many cases the
which celestial may be used for heavenly in the which celestial may be nsed for heaventy in the
moral sunse, but there are casea in which heavenly cannot so properly be aubstituted for celestial." (Crabb:Eng. Synon.)
$\dagger$ ¢̧ĕ-1ĕs'-tü-al-ize, v.t. [Eng. celestial, and suff. -ize (q.v.)] To make celestial or heaveuly. (Quar. Rev.)
çě-lěs'-tı̆-al-īzed, pa. par. \& a. [Celes. tialize.]
†çĕ-lĕs'-ti-al-1y̆, adv. [Eng. celestial; -ly] ] In a celestial or hoavenly manuer; diviucly.
*çĕ-Iĕs'-tĭ-al-nĕss, s. [Eng. celestial; -ness.] The quality or state of beiug celestial on heavenly.
çĕ-lěs'-tī-fied, pa. par. \& a. [Celestify.]

* çé-lĕs'-tĭ-fỳ, v.t. [Lat. ccelestis = heavenly, and fio $=$ to be made, fucio $=$ to make.] To celestialize or sonvert into a heaven.

* ¢̧̌̌-lĕs'-tī-fy-ǐng, pr. par., a., \& \&. [CELES. IFV.]
A. \& B. As pr. par. \& particip. adj. : (See the verb).
C. As subst. : The act of making celestial.
çĕ-lĕs'-tĭn, çĕ-lĕs'-tine (1), s., [Celestines. 1 One of the order of nonka known as Celestines ( $q . v$. .)
¢Cëlĕs-tine (2), s. [From Lat. ccelestis $=$ (1) hoavenly, (2) sky-blue; Fr. celestine; Ger. cölestin.]
Min. : Native aulphate of atrontia, Sro. $\mathrm{SO}_{2}$ It occurs in prismatic or tabular erystals, belonging to the rhombie aystem. Sp. gr., 4. Its uame refers to the aky-blug colonr gometimes preaented by it. It is pretty widely times preaented by actiou of nitric acid it is distributed. By the actiou of nitrie acid it is converted into nitrate of strontia, which is
nised for red-fire in theatres, fireworks, \&c. It is called also Celestite.
Cĕ-lĕs'-tines, s. [From Pope Celestine V.]
Eccles. Hist. : A monastic order instituted about 1254 by Pietro di Morone, afterwarda Pope Celeating V. Their firat convent was at Morone, in the Apeanines of Abruzzo. Tha
order was a reform of that of St．Bernard．1t becama a very rich order both in France and Italy．In 1776－8 it was auppressed by Pope Pius VI．

I In soms of the poets the accent is on the first syllable，both in the nouo and verb．
II．Technecally：
1．Building：of cements there are many varieties，according to the special needs of different trades．In bnildIng the principal are kuown as Portland and Roman．
（1）Porlland Cement was patented in Englend by Josoph Aspdin in 1824．It is so called be－ canse it resemblesincoloar Portland－stone．1tis manufactured by caleining a mixture of clayed mud from the Tbames with a proper propor－ tion of chalk．The calcined masa ia then re－ duced to a fine powder，and intimately mixed with the addition of water．The resulting paste is moulded into brieks，dried and burnt． The heat during the process of calcining must be a white heat，otherwise the carbonic acid and water may be expelled without the reaction between the lims and the clay necessary for the production of cement．The material is then assorted，all which has been too much or too little calcined being set aside and pul－ verized．
（2）Roman Cement is n mame given to certain hydraulie mortars，varying considerably in
their chemical composition，though physieally their chernical composition，though physieally
1ossessing the sams general character．It is lossessing the sams general character．It is nu argillaceous lime，inanufactured from adark
brown stone，a earbonate of lime with mnch alumina，fourd in the lelsnd of Shepper．The stone is calcined and mixed with sand in various proportions．Any limestons contain－ ing from tifteen to twenty per cent．of clay will，when properly prepared，form this cement Calcine any ordinary clay and nix it with two thirds its quantity of lime，grind to powder， and calcing again．The epithet Roman is im－ Iroperly given，since the preparation was entirely unknown to the Romans．
（3）Hydraulic Cement is a kind of mortar used in building piers and walls under or ex－ posed to water．Thers are many varieties Hamalin＇s is composed of cround Portiand－ stone sixty－two farts，sand thirty－five，and litharge three．
2．Gluss Munufacture：Cement forglass is of various kinds，according as it is designed for ordinary or for chemical glasses，for the neeks of bettles，for lens grinders，or for affixing metallic letters to plate－glass windows．
3．Gold Mining：Gravel cemented by clay， constituting an auriferous atratuin in Eierra Nevada and Placer Counties in Califormia （Knight．）

4．Metallutgy：
（1）A brown deposit in the precipitation tank in which the soluble chloride of gold oh tained by the ehorination jrocess is deposited by the addition of sulphate of iron to the solu tion．（Knight．）
（2）The material in whieh metol is embedded in the cementing－furnace（q．v．）（Kinight．）
5．Odontology：The tissua which forms the onter cruat of the tooth．It is less bony than dentine，and commences at the cervix or neck of the tooth，where the enaniel terminates ncreasing in thickness to the lower sxtremities of the root．

A single tooth may be composed of dentine，cement enamul，Rnd wone：Dut the deutine and cement are present in the teeth of all reptilen．＂一ouren：A natomy
of Vertebrates．

Sooms to Imply a centure oin the rest
II. Old Low: A cuatom in certain manora, nuder which all under sixteen years of age were ebliged to awear fealty to their lord, to pay twepence per head, and s pemy per annum ever after, as cert-money, or common fine. [Ceht-money.]

* çen-sure (2), s. [Censer.]
gen'-surre (s as sh), v.t. \& i. [Censure, s.]
A. Transitive:

1: To form or give a judgment or opinion regarding anything without its being implied that this award was unfovourable.
"His voynge was variously censurad; the Templers -Fuller: The Hoty War, vol, iv. ch. 3
fit is not creditable to man's candour in judging of others that the word censure in process of time became limited to the proneuncing of unfavourahte judgments, these having from the first been so much more having from the farst icen so much more word censure ceased to be applied to the latter at all.

* 2. To condemn judicially, to seatence.
"Has censur did him
Already, and, a I Ihear. the provost hath
sure i. 5.

3. To blame, to find fault with, to reprimand. "To ceasure Homer, because It is willike what it wns
never meant to resemhle. never measat to rese
Odysurey, Postacrip
${ }^{*}$ B. Introns.
to judge frollow. : To form or give an opinion, to judge (followed by on).

I (I) Crabb thus discriminates ketween to censure, to animadvert, and to criticize:-"To censure and animuivert are both personal, the one direct, and the other indirect; criticism is directed to things and not to persous only. Censuring consists in finding aone fault real or aupposed; it refers mostly to the conduet of individuals. Animadvert consists in suggesting some error or impropriety; it refers mostly to matters of plinion or dispute. Criticism censists in minutely examining the intrinsic characteristies and appreciating the merits of each individually or the whole col lectively; it refers to matters of science and learning. To censure requires no more than simple attention; its justice or propriety often rests on the authority of the individual animadversions require to be accompanied with reasons. require criticism is altogether argumentative and illustrative.
(2) He thas diatinguishes between to censure, to carp, and to cavit:-"To censure respecta positive errers, to carp and cavil have regard to what is trivial or imaginary; the former is employed for crrors in versons, the latter for supposed defects in thingi. Censures are frequently necessary from those who have the authority to use them.
Carping and cavilling are resorted to only to indulge ill-nature and self-conceit.
(3) The distinction between to accuse and to censure is thus stated :-"To acouse is only to assert the guilt of another; to censure is to take that guilt for granted. . . An accusation may be false or true, a censure mild or severe."
(4) For the difference bctween to blame and to accuse, aee Blame, v. (Crabb: Eng. Synom.)

çĕn'-sụr-ër (s as sh), s. [Censure, v.]

¢ёn'-surr-ǐng, pr. par., a., \& s. [Censure, v.] A. \& B. As pr. par. a paricicip. adj.: In sensea corresponding to those of the verb.
C. As subst. : The act of blaming or reproaching; censure.
Çĕn'-surs, s. [Lat. census, from censeo $=$ to rate, to value.] The ect of takiog the numbers and other statistics of the population of any district or country, or of the members of any class or denomination.
from the aceount of the Roman consosf, ..."-
Bentley: Serm, p. 107.
5. In Ancient Rome: The Cenana was establiahed at Rome by Servius, and was held every five years in the Compus Martius. Every Romao citizen was obliged, on oath, to give in a atatement of his own name and age, of the names and sges of his wife, children, alaves, and freednen, if he had any. The punishment for a false returu was that the person's goods should be contiscated, and he himself scourged aod aold for a slave. Taxation depeaded upoa the reaults of the Ceasus.
6. In the thited States: The first Census io the Cnited States was taken in 1790 , sinca which time it has been repeated regularly every ten years. In Great Britain the first Census was taken in 1801, and is lrelsnd in 1813. They have been repeated every tea years gince.
census-paper, s. A ruled paper left with the householder, or head of the family, to be filled up with the necessary particulars, and handed back to the enumerator when called for.
ceant ( $k$ ), s. [An abbreviation of Lat. centum $=\mathrm{a}$ hundred. It is generslly a part of a combination or phrase, as flve per cent. = five by the hundred. In "cent per cent," however, it is a separate word.]
I. Ord. Lang.: A hundred.
"And broght with hem many stont cent
The demon makes his fuyl doseent

II. Technically:
7. A coin, made of copper or copper and nickel, in circulation in the United States. It is of the value of ten mills or the hundredth part of a dollar, and about equal to a halfpeony English.
8. A game at cards, resembling picquet, 80 called because one hunared was the wiuning nunber.

- genl (2), s. [Scent.]
* çěn'-tặge, s. [Eng. cent; -age.] Rate by the hundred; rate of interest or conmission (only now used in the compound per-centage).
t çĕnt'-al, s. [Lat. centum = a hundred.] A weight of 100 lbs avoirdupols, in use for corn at Liverpool. [Quntal]

A Connell meeting of the Central Chamber of in tavour of the cencal weight of 100 lh , as the standar was adopted, together with one meniorialislng the Board of Trape to duly verify the contal no a new imperial

¢̧en'-tâur, ${ }^{*}$ çěn'tâure, çĕn-tâu'-rŭs, s. [Lat. centaurus; Gr. кevtavpos (kentauros).]

1. Ifythol. : A mythical creatnre, half man, half horse, aaid to have sprung from the union of 1 xion and 8 Cloud; the most celebrsted was Chiron. They inhabited Thessaly, and wera also called Hippncentaurs.

So mas the bloodle feast, Which sent away,
so mas centaures arunken eontes to hell."
2. Astron.: A constellation in the Southern Hemisplere.
̧ěn-tân'-rĕ-a, s. [Jat., from Gr. кevaúpeca (kpntaureio) $=$ relating to a centant; so called from some confusion with centaury (g.v.).
Bot.: An extenaive genus of Composite plants, comprising both annual and peremial herbaceous, or half-shruhby plants, some of them common weeds, as Centaurea nigra, the Knspweed of our pastures, while a certain number are estemed border flowers. of the annual species one of the most remarkable is C. americanus, or Piectocephalus americanus of
aome authors, which has a stout erect stem four to five feet high, oblong lance-bhaped leaves, and very large capitules of a lilacpurple tint. The beat known in England is the Common Cornhottle, C. cyanus. [Cornborrle.] Centaurea Calcitrapa was once used as a febrifuge.
cĕn'-tâur-ěss, 8. [Eug. centaur; ess.] A remale centaur.
çĕn-tâur-ǐ-é'- $\infty$, s. pl. [Low Lat. centaurea (q.v.) ; Lat. Sem. pl. adj. auff. -iece.]

Bot. : $\mathbf{A}$ aub-tribe of composite planta, tribe Cynaree.

* çĕn'-tâa-rize, v.i. [Eng. centaur; -ize.] To be or act like a centaur; hence, to be a man and act like a brute.
cečn'-tâur-līke, a. [Eng. centour; -like.] Like or resembling a centaur. (Sidney.)
çĕn'-tâu-rŭ, * çen'-tõr-̌̆. * çen'-tõr-ie, ${ }^{\text {s. }}$. [Lat. centaureum; Low Lat. centourea; Gr. kevtav́petov (hentaureion), from kévanupos (kentauros) $=$ a Centaur, the plant being said to have been discovered by Chiron the Centaur.]
- Popular name of some English plants belonging to the Gentianacea: (1) Chloro perfoliata, (2) Centaurea nigra; Little Centaury: Erythroa Centaurium; More Centaury: The same as Great Centaury (q.v.); Sea Centaury: Erythreen littoralis (Scotch); Small Centaury: The same as Little Centaury (q.v.); Yellow Centaury: Chlora perfoliata (Britten \& Holland); American Centaury: The English name for the genus Sabbatia, of the gentian order.
çĕn-tē-när'-1-an, a. \& \&. [Lat. centenarius = of a handred.]
* I. As adj. : Of or relating to a hundred.
II. As subst.: A person who has attained to the age of one hundred years.
† çĕn-tē-när'-1̆-an-ĭş̧m, s. [Eng. centenarian; -ism.] The act or atata of attaining the age of one hundred years.
"Futing aside, however, the questionsble legends
* çĕn-tē-när'-1-oŭs, a. [Lat, centenarius.] Of or relatiog to a hundred. (Ash.)
çĕn-té'-nar-y̆, çĕn'-tĕn-a-ry̆, çĕn-tĕn'-ar- $\breve{\mathbf{y}}$, a. \& s. [Lat. centenarius.]
A. As adjective:
I. Relating to a hundred; consisting of a bundred.

2. Recurring once in every hundred years. "Centonnary solemnitien, which retnrned but once
in a hupdred yeara "- Masler.
B. As substantive :
*1. The aggregate of a hundred years; a century.
"In every centenary of yeara from the creation, Hakevill: On Providence
3. The celebration of the hundredth anniversary of any event.

* ̧̧én-tẹnçe, s. [SENTEsce]
çĕn-tĕn'-ĭ-èr, s. [Fr. centenier, from Lat. centenarius.]
* 1. A centuriou.
"They are an hundred, chosen out of every town and villafe, and thereou tere tornsed

2. Ao hooorary police-officer in Jersey, elected by the inhabitants every three years, and ranking next to the constable, who performs the duties of an English mayor.
çĕn-tĕn'-nĭ-al, a, [Low Lat. centennis; from centum = a hundred, and onnus = a year.] I. Pertaining to a centeuary, or hundredth anaiversary.

Her centennial day." Mason: Posms.
2. Recurring once in a hundred years.
çen't-tẽr-Ing, s. [Eng. center; -ing.] The temporary woodwork or framing on which any arch or vaulted work ia constructed. Also called a Centre (q.v.).
çěn-těs'-1-mạl, a \& s. [Fr. centésimal; Lat. centesimus $=$ hundredth; centum $=$ a hnmdred.]
A. As adj.: Hundredth, by the hundred, per cent.
"Thiarentersimat Increase is not naturally strange."
Browse - Truct L
"B.

- çĕn'-tǐ-nęl, s. [Sentinel.]
"gen-tin-er, s. [Centenier.]
 hundred ; nodus = a knot.] A kind of graas of the genus Illicehrun, a purslane-like plant; knotweed.
t ̧̧̆n'-ťi-pěd, ¢夭̆n'-tǐ-pēde, s. [Fr. centipedts; Lat. centipeda $=$ hundred-footed; from centum $=$ a hundred, and pes (genit. pedis) $=\mathrm{s}$ foot. 1

Zool.: An artlculated animal baving, in the popalar estimation, 100 feet, but acientific men do not guarantee the number. It is opposed to a millepede, i.e., an animal with 1,000 leet, s number no more guaranteed than the former. The real distinction between them is that the Centlpedes have only one pair of legs from Centipedes have only one pair of legs from
each ring or "somite" of the body, while ia the Millepedes there are to each oomite, except the auterior five or six, two paira. The Centipedes constitute the order Chilipoda, of the class Myriapoda (q.v.). The feet are generally from fifteen to twenty pairs, and the joints of the antenare not Jess than fourteer.

- Pěn-ť̌p'-ĕ-dal, $a . \quad$ [Lat. centum $=$ hundred; pedalis $=$ of a foot long, from pes (genit. pedis) $=$ a foot.] Of a huudred feet in leagth.
'gèn'-ť̌-pëe, s. The same as Centipede (q.v.).乌̆n't-nẽr, \& [Ger. centner $=a$ hundredweight; from Lat. centenarits $=$ of or per taining to a hundred ; centum $=$ a hundred.]

1. A weight of one huadred pounds, used in sonie parts of England and Germany.
"The Liverpool comn measuze of 1001b, Called It dand, March 50 , 1881 .
2. A weight of a drachm, divided into a hundred equal parts.

- ģĕn'-ť̆, " çěn'-tōne (or as çhěn-tō'-nê), 1. [Lat. cento $=$ a garment made up of several plecea joined together; patchwork.]

1. A composition conaiating of verae or passages from different authors arranged in a new order.
"Centones are pieces of cloth of divers colocors.
 by. it of verses, 15, note. - Vives; Auguatine's city of God, II Becoming at length naturalised in our tongue, it dropped the Latin plural centones and took the English one centos in its room (Trench: On some Def. in our Eng.Dict., p. 28.)
"From differeat netions next the centos crowd." ${ }^{\text {Cambridge }}$.
2. Musia: An opera or musical composition made up of selections from other pieces; a musical medley.

* çĕn-tŏc'-ụ-lä-těd, a. [L_at. centum =a hundred; oculatus = having eyes, from oculus $=$ an eyc.] Having a huadred eyes.
 and Eng. sutf. -ism.] The act or art of making op a composition from selections out of other suthors; compilation.
$\boldsymbol{q}_{6}{ }^{\prime} \mathbf{n}^{\prime}$-tral, $a$. [Lat. centralis $=$ pertaining to the centre, from centrum $=$ the centre.] 1. Relating to the centre, coataining the cutre.

2. Situated in or at the centre.
"Palmyra, ceneral in the desert... fell." Wordsioch: Excursion, bl. vil

## central artery, $s$

not.: That which, given off by the ophthalmic, inainuates itself into the optic nerve in ita passage to the retina.

## central-eclipse, s.

Astron.: A central-eclipse is when the centres of the heavenly bodies, which are affected, exactly coincide, or are directly in a line with the spectator.
central-fire, s, \& a.
*1. As substantive:
Alchemy: The fire which alchemiets formerly imagined to be in the centre of the earth, the fumes and vepoura of which, as they supposed, made the metals and minerals.
2. As adjective:

Gunmaking: Constructed for the use of centre-fire cartridges. [Centhe-Fire.]
central forces, s. pl.
Mech. : The two antagoaiatic forces (centrifugal and centripetal) by whose united action bodics are caused to revolve round a central point.
¢̧̌̌n'-tral-iģm, в. [Eng. central; -ism.] The same as centralization (q.v.).
$\dagger$ ̧̣̆n'-trąl-ist, s. [Eng. central; -ist.] One in favour of the policy of centralization.

* gean-traxl'-1-ty, s. [Low Lat. centralitas; entralis = pertaining to a centre; centrum= a centre.] The state or quality of being central.
"An actual centratity, though as low an next to
 8. [Eng. centraliz(e); -ation.]

çĕn'-tral-1̆̆, adv. [Eng. central;-ly.] Aa regards the centre; io a central manner.
 spur; äveos (anthos) = a fiower.]

Rot.: Spurred Valerian, a amall geaua of plants of the order Valerianacea, much used for borters in gardens. Centranthus ruber growa in the South of England apparently but not really wild. It comes from the south of Europe and north of Africa

* çĕn-trā'-tion, s. [Lat. centrum $=3$ centre.] A tendency to approach the centre.

What needs that aumerous clos centration
Like wattefull sand ytost with boisterous inurda
ěn'-tre (tre as tẽr), çèn'-tẽr, s. \& a. [Fr. centre; Sp. \& Ital. centre; Lat. centrum; Gr. кévтpol (kentron) = a prick, a goad, a centre; кevтє $\omega$ (henteō) = to prick, to goad.]
A. As substantive:
I. Ordinary Language:

1. Literally:
(1) The middle point, that poiat from which all points on the circumference of any circle, real or imaginary, are equally distant. [111. (3).]
"This erthe
; iti. 9 h ${ }^{\text {ha }}$
(2) The middle portion of anything.
"The market-place, the middie centre of this corsed
(3) A point of concentration; the point to which all thinge converge.
2. Figuratively:
(1) The point on which men's thoughts or minds are cencentrated; the principal point. Times, Novire of the diplomatic diffculty
(2) The earth.
"The hearns themselves, the planeta, snd this centre, observe degree, priority, and place, $\begin{gathered}\text { shakesp.: Troilus } \& \text { Crestda, i. s. }\end{gathered}$
(3) The soul.

Poor soul, the contre of my unful cutth,"

## II. Technioally:

1. Geom., Nat. Phil., Ec.: [I. 1.]
2. Mech. : One of two conical steel pins on
a lathe, on which the body to be turned is axed and revolves
3. Building:
(1) Any timber frame, or set of frames, for

ogntre of an arce.
supporting the archstonea of a bridge during the construction of an arch. (Weale.)
(2) Pl. centres: The length of timber disposed in a certain way by the process called centering (q.v.).
4. Tumery (pl. centres): The two cones with their axes horizontally posited for sustaining the body while it is turned. (Weale.)
III. Compound Terms:
(1) Centre of a bastion :

Mifl.: A point in the middle of the gorge of the bastion, whence the capital line commences; it is generally at the ianer polygon of the figure. (James.)
(2) Centre of a battalion on parade:

Mil.: The middle, where an interval is left for the coloura. (James.)
(3) Centre of a circle:

Geom. : A point within a circle, and so striated that all straight lines drawn from it to the circumferance are equal to one acother.
(4) Centre of a conic section:

Geom. : The point which bisects any diameter, or the noint in which all the diametera intersect each other. [Nos. 7 \& 11.]
(5) Centre of a curve of the higher kind:

Geom.: The place where two diameters meet.
(6) Centre of a dial: That part where the gnomon or atyle, placerl parallel to the axis of the earth, intersects the plane of the dial. (Weale.)
(7) Centre of a hyperbola:

Conic Sect.: The point of bisection of a straight line joiaing the foci.
(8) Centre of a regular polygon

Geom. : A point so aituated that the atraight line drawa from it to the aeveral angles of the polygon are equal to one another.
(9) Centre of a sphere:

Geom. : A point within a sphere, ao situated that all the radii running from it to the circumfereace of the aphere are equal to earch other. It is the centre also of every great circle of the sphere.
(10) Centre of a square:

Geom. : A point so aituated that straight lines drawn from it to the scveral angular points of the aquare are equal to each other.
(11) Centre of an ellipse:

Conic Sect.: The point of bisection of a straight line joining the foci of an ellipae [No. 4.]
(12) Centre of attack

Mil.: An attack carried upon a capital in the middle, which generally leads to the half the midde, which generaly leads worka with a considerable front upon three capitals are used is besieging a place. (James.)
(13) Centre of attraction:

Nat. Phil.: The point to which bodies tend through the attraction of gravity.

- The sirength of a centre, called also the absolute force of a centre of attraction: The intensity of force at unit distance. Attraction being inveraely as the square of the distance, the atrength of a centre of attraction is $=\frac{\mathrm{L}_{\mathrm{S}}}{\mathrm{T}} \mathrm{B}$ $\mathrm{L}_{\text {standing for length, and T for time. (Everett: }}$ The C. G. S. System of Units, ed. 1875, ch. i., p. 6.)

66in, boy; pout, jowl ; cat, çell, ohorus, chin, bench; go, gem; thin, thie; sin, aş; expect, Xenophon, excist. ph = $\mathcal{L}$

(14) Centre of buoyancy:

Ship-building: The same as Centre of displacement (q.v.).

## (I5) Centre of cavify :

Ship-building: The same as Centre of displacement (q:v.).
(16) Centre of conversion :

Nat. Phal.: A point in a body abont which it tends to turn, or turns when etruck by another body.
(17) Centre of displacement:

Ship-building: The mean centre of the portion of the vessel immersed in the water. It is called also the Centre of cavity, immersion, or buoyancy.
(18) Centre of equilibrium in a series of connected bodies:
Nat Phil.: A point so situated that if it be supported the whole series of bodies will remain at rest.
(19) Centre of forces:

Nat. Phil.: The point of spplication of a number of forcea where they can be counteracted by a single force.
(20) Centre of friction :

Nat. Phll.: The yoint around which anything gyrates
(21) Centre of gravity:

Nat. Phil. : A point in any material body or system of particles rigidly connected which is go situated that if it be bupported or fixed the body will remain at reat whatever be the position which the body itself may occupy at the time.
(22) Centre of gyration :

Geom.: The point at which, if the whole matter in the body were collected, given forces would produce the same angular velocity of rotation in a given time as ther would do if the particles of the hody were distributed in their proper places. (Pen. Cyel.)
(23) Centre of immersion:

Ship-builling: The same as Centre of displacement (1.v.).
(24) Centre of inertia:

Nut. Phil.: The same as Centre of grovity (q.5.)
(25) Centre of magnitude:

Nat. Phil.: A point in a hody equally distant from all its external parts.
(26) Centre of motion:

Nat. Fhil.: The point which remalis at rest while all the other jarts move about it.
(27) Centre of oscillation:

Nat. Phil., Pendulum, ac. : The point in which the whole of the matter must be col lected that the time of the oscillation may be the same as when it is distributed.
(28) Centre of percussion:

Nat. Phil. : The point at which the force of he stroke is the greatest possible
(29) Centre of position:

Nat. Phil.: The same as Centre of gravity (q.v.).
(30) Centre of pressure

Nat. Phil.: The point at which the whole monnt of pressure may be applied with the same effect as when it is distribnted.
(31) Centre of pressure in a fluid against a plane:

Hydrostatics: A point so situated that it will just austain a force equal and contrary to the whole pressmre of the fluid.
(32) Centre of rotation:

Nat. Phil.: The point aronnd which a body rotates, the centre of motion of a body.
(33) Centre of spontaneous rotation:

Nat. Phil: The centre around which a body, every part of which is tree to move, actually does so when atruck by a force not passing through its centre of gravity.
B. As adjective: (See the compounds).

## centre-bit, s.

Mech.: An inatrument turning on a centre, and having a projecting conical polnt. It is nsed for boring circular holes of various diameters. The head of the atock is preased against the hreast, and the stock itself caused to revolve swiftly by means of a handie.

## centre-bosard, s.

Naut.: A board placed amidship in a well

Which extends longitudinally and vertically through the keel, and is a dapted to be lowered to give a deeper draft, in order to avoid leeway and to give the vassel greator stahlity under press of csavas. It is the old Dutch lee-board in a central position. A eliding. keel. ( $K$ night.)

## centre-chisel, s.

Mstal.: A chisel used to make a dent at the exact centre, to form a starting-point for the drill, in drilling holes in metal. A pointed cold-chisel.

## centro-chuck, s.

Turning: A chack which can be screwed on the mandril of a lathe, and has a hardened steel core or centre fixed on 1t, and alao a projecting arm or driver.

## centre-drill, s

Turning: A sinall drill used for making a short hole in the ends of a shaft about to be turned, for the entrance of the lathecentres.
centre-fire, s. \& a. (See the corapound). Centre-fire cartridge: A cartridge in which the fulminate occupies an axial position, instead of being around the periphery of the flanged capsule.
centre-gauge, s. A gauge for showing the angle to which a latlee-centre should be turned, and also for sccurately grinding and 6etting screw-cutting tools.
contre-lathe, s.

1. A lathe in which the work is supported unon centres at each end; one on the ent of the mandrel in the head-stock, and the other, the back-centre, on the axia io the tail-stock. The latter is adjustable
2. A pole lathe; a lathe in which the work is held by centres projecting from two posts, and is driven by a hand, which pases two or three times around it. The band is fastened at its respective ends to a treadle beneath the lathe and a spring bar above it. ( $\mathrm{K}^{\prime} \mathrm{right}$.)

## centre-line, s.

Shipbrilding: A central, longitudinal, vertical section of the hull

## centro-phonic, s.

Acoustics: The place where the speaker stands in making yolysyllabical and articulate echoes. (Weale.)

## centre-phenceamptic, s.

Acoustics: The place or object which returns the voiee. (Weale.)
centre-pin, s. The pivot on which the needie oscillates in a mariner's compass.

## centre-punch, s.

Joinery: A small piece of steel, with a hard eved point at one ead, used for makiug a gmall hole or indent.

## contre-rall, 8

Rail. Engineering: A third, or middle, rail placed between the ordinary rails of a track, and used on inclined planes in convection with wheels on the locomotive iu ascending or descending the grade. (K'night.)
centre-saw, s. A machine for splitting round timber into bolts, instead of rlving it, for sxe and pick handles, and heary spokes. It has a siding carriage, furnished with centre head-blocks, mion which the log is plared; aod is provided with a dial-plate and atous, by which the log cau be spaced into stuff the desired size. The centres can be aljusted up or down, to suit the work. Is caplable of splitting timbers np to 20 inches in dianeter, 3 feet long; cuts invariahy 22 inches or less in diameter. (Kinight.)
centre-second, s. A term applied to a wateh or clock in which the gecond-hand is moanted on the central arbor and completes its revolution in one minute. It is more easily resd than the ordinary second-hand traversiug in its own small dial. (hnight.)
centre-valve, 3. A device in gas-works intended to distribute the coal-gas to the purifiers.
centre-vellc, s. The centre of gravity of an equivalent aail, or that single sall whose position and magnitude are such as cause it to be acted upon by the wind when the vessel

Is salling, so that the motion shell be the same as thst which takes place while the salla have their usual positions. (Weale.) It is called also velio-point.
centre-wheol, s. The "third wheal " of
a watch in some klads of movements.

[enthe, 8.]

## A. Transitive

L Ordinary Language

1. Lit.: To place in the ceutro.

Ono foot he entred, and the other turned

2. Fig.: To collect or gather at one polnt : to conceutrate.
"He may taks, a pange all the world over, and drav In all that wide air and circurnforence of win and viot "Bnt here onr hopes are cont

| Temant: |
| :---: |
| tofes, |

II. Optics: To grind an optie glass so that the thickest part shall be exactly in the centra.
B. Intransitive:
I. Lit. : To be placed or to atand in the ceutre.

Is ceatre, yet oxtends to anil, Hearez thom.

* II. Figuratively :

1. To rest or repose aa a body in astata ol equilihrinm.

Where there is no visible truth whereln to ompro errour is as wide ay mea's lancies, and may wander t 2. To be collected to centrated.
"Byeak, for he can, avd none so well sat he,
What tranares centre, what dellghts, in theo
çe̛n'-tred (tred as tered or tẽrd), çĕn' tered, pa. par. or a. [Centhe, v.]

- cĕn-trĕ'-I-ty̆. 8. [Eng. centre; -ity.] The quality or state of being central ; centrality.

Ench part of in, every thing eompost

+ ģĕn'tre-mĕnt (tre ss tẽr) s. [Eng. entre; -ment.] The centre, the chief point.
"They fall at orco into that otato in whieh anothes perso becomes to ns the very giat and ocxtrument of
çĕn'-tricc, * ̧̧ĕn'-trĭck, "çĕn'-trì-oal a. \& \%. [Eng. centr(e), and suff. -ic, -ical.]
A. As aulj. : Placed in the centre; central.
" Rome, that have deeper diggid to mfas that I.
कay where his centrick bappiness doth lie." Dionn
B. As subst.: A circle having the samo centre as the earth.
with centric and "How gird the sphare"*
* çěn'-trǐ-cạl-1y̆, ady. [EDg. centrioal; dy.] Centrally, in the centre.
* çĕn'-trǐ-call-nĕss, s. [Eng. centrical; -ness.] The state or quality of being central.
* çĕn-trǐç'-i-ty̆, s. [Eng. centric; -lty.] The bame as Centhicalness.
çen-trif'- $\mathbf{n}$-gal, $a$. [Fr. centrifuge, from Iat. centrum $=$ the centre, and fugio $=$ to fly from.]

1. Mech.: Having a tendency to or causing to recede from the ceatre. [Centraifuoal FORCE.]
"They described an hyperbola hy changing the con-
trpetal into a centriugal force."-Cheyna.
† 2. Botury:
(1) An eplthet applied to tbat kind of inflorescence, which, like the cyme, flowers first at the end and last at the base; called also Determinate, Definite, or Terminal idiloresceterminale, [Centhiruoal inylonescence.]
"The expasimion of the fowers is io thifs crae contry fugal, that is. from apex to base, or frozn co
(2) Having the radicle turded towards the aides of the frait.
centrifugal drill, s. A drill haviog fly-wheel upon the stock, to maintale and steady the motion sgainst the effect of temporary lmpediments.
centrifugal filter, \& A filter the
periphery, and is very raplidiy rotated on its vertical axis, so as to drive off hy centrifugal force the liquid with which the substance contained in the cylinder is saturated.

## centrifugal force, $s$.

Nat. Phil.: The force which impels a revolving body from the centre to the circumforence of its erhit.
Frof. Airy objects to the use of the term centrifugal force, saying that there is no force im opersitioa. He propoges to substitnte the expression "ceatrifugal tendency," - (Prof.
diry: Pop, Astron., 6 th ed., pp. 24i-2.) diry : Pop, Astron., 6 th ed., pp. 241-2.)

## centrifugal gun, s.

Mil.: A form of maching cannon in which balls are driven tangentially from a chambered disk rotating at great speed.
centrifugal inforesconce, $s$.
Bot.: An innores. conce in which the terminal fuwsr opens frst and the lateral ones succasslvely afterwstas. (Fiquier: Vegetable World.)

## centrifugal

## machine, s.

CENTRIFUCAL INFLOR 1. Hydraid.: A ma- escence-geranion. ohine contrived to
ralse water ly means of centrifugal force, combined with the pressure of the atmoвphere.
2. Mamufac.: A machine for drying yarn, cloth, clothes, sugar, \&c., hy centrifugal actioa. The flbre or other materisl is placed in a bollow cylinder with a reticulated periphery of wire gavze, and, being rotated at a rate of from 1,000 to 2,000 revolutions per minate, the water fliss off by the centrifugal action, and is collected by the enclosiug cyliuder, down which it trickles to a dis-charge-pipe. It is alsu found uaeful in rsmoving the must from ths grape after crushing. (Knight.)
centrifugal pump, s. The same as Centrifuoal Machine, I. Hydraul.

## contrifugal radicle, $\boldsymbol{s}$.

Bot. : An embryoulc radicle which is turoed way from the centre of s seed.
contrifugal sugar, s. A trade-name for sugar prepared in a centrifagal machine.
centrifugal tendency, s A compound term designed to sypress the aama dea as the mors common one, centrifugal force (q.v.)
"A circular hoop when set to pinning boomen moro or iess alliptic owing to this contringual tendercy."
 -ly. 1

1. Lit.: In a ceatrifugal manner.
2. Fig.: Spreading outwards.
"The Brtilinh Associntiou then. As a whole, Acces phycical nature on a al wides and pushes knowiedse entrijugatly
¢̣̆n-trĭf'-u-gĕnçe, s. [Eng. centrifug(al); -ence.] Centrifugal tendeney ( $\mathrm{f} . \mathrm{v}$.).
¢ĕnt'-ring RE, $v$.]

* A. As adj.: Tending or gravitatiag towrids the centro.
B. As substantive:

1. Builling: [Centerina.]
2. Optics: Tha grindiag of s lens, so that the thickest part be exactly in the middle.
¢ĕn-trǐp'-̌-tal, a. [In Fr. centripite, from Lat. centrem $=$ centre, and peto $=$ to seek.] 1. Meck. : Having a teadency to or causing to approach the centre; having gravity is the oppoatts of centrifugal (q.v.).
"In the anme manuer the centrifugal force is not a of the irst law of motion, mesurured by the portion of
 2. Botany:
(1) An epithet for that kind of inflorescence Which, like the spike or capltulum, flowers first at the base and last at the end or centre; called also Indeterminate, Indefinite, or $A x i l$,
lary iuflorescence. [Centhipetal infloaesCENCE, $]$
that the erpansion of the fowers io thus ontrippotas, oentre. - Baivour : Botany ( 2855 ), $\$$ \$81.
(2) Having the radicle turned towarde the axis of the fruit.
3. Ostoology: Progressing by changes from the exterior towarda the centre, as the centripetal calcification of a bone. (Owen.) (Webster.)

## centripetal force, s.

Nat. Phil.: A so-called force which tends to make a body move towards a centre.
centripetal inflorescence, 2 .
Bot. : An inflorescence in which the lowest flowers open first continues to stem gate, developing resh flowers, (Fig uier: Veg. World.)

## centripotal

 press, 8 A me chanicai contriv ance for pressing Inwardly on a radis line from all directions ia the common plane. (Kright.)
centripetal
pamp, s. A pump in which the water is gathered by revolving ludes or arms, snd drawn to the axis from whence the dischargctube rises. (Knight.)

## centripetal tendenoy,s

Nat. Phil. : A name proposed by Prof. Aliry to designate what is aow commonly called "centripetal force," but properly speaking is not a force but a tendency. [Centaipetal Fonce.] Centripetal and centrifugal tendencies make the planets revolve stound the sun in their present elliptic orbits. If centripetal action ceased, they would fly off into space if centrifugal action failed longer to operste, if centrifugal action failed longer to operste, they would move with continually angmentlng velocity towards the sun, against which
they would ultimately impinge, with the they would ultimately impinge, with the
effeet that everything in them combustible would be burnt.
+çĕn-trip'-ĕ-tal-1y̆, adv. [Eng. centripetal; $-l y$.] In a centripetal manner; by centripetal force.
çen-trip'-ð-tẹn-̧̧y̆, \& [Lat, oentrum $=$ centre: petens (genit. petentis), pr. par. of preto $x$ to aeek.] The quality of having a tendeney to approach the centre. (Month. Rev.)
¢̧ĕn-trǐs'-cŭs, s. [Lat. centrisorts; Gr. кévтproxos (hentrikkos).]

Ichthy.: A geru1s of fishes of the family Fistularidæ or Aulostomidx, haviag the head lengthened into a very narrow bnout, mouth without teeth, gills broarl and flat, body compressed, helly carinate, ventral fins united (Cruig.) Centriscus seolophex is the Trumpet fish or Ses-anipe, called in Cornwall the Bel lows-flsh. It is about five inches long. It hahtat is in the Mediterrauean. It has been found, though rarely, iu the British seas.
¢̧ĕn-tró-băr'-ĭc, $\alpha$. [Gr, кєvтроßарька́ (kentrobarika), the title of a book by Arehimedes on the finding the centre of gravity; from кєขтpo $\beta a p$ pr's ( $k$ entrobarés) = gravitating towairls the centre: кévтpov (kentron) $=$ centre, Bajpos (baros) $=$ weight, gravity. 3 Relating to the centre of gravity, or to the procesa of fiuding it.

## centrobaric method, $s$.

Math.: A process invented for measuriag or determiaing the quantity of suy surface
or solid, by considering it as generated by or solid, by considering it as generated by
motion, and multiplying tha generating line or motion, and multiplying tha generating line or
surface into the path of its centre of gravity: surface into the path of its centre of gravity; pus, and alao, but incorrectly, Guldinus's properties.
çĕn-trot-car'-phą, s. [Gr. кértpov (kentron) = a spur; кápфos (karphos) = a stalk.]
Bot.: A group of Composites, differing but slightly, if at all, from Rudbeekia (q.v.).
ç̛̃-trot-clin'-ǐ-ŭm, s. [From Gr. кévtpov (kentron) $=$ s sharp point, s centre; кגim (kline $)=$ a conch, a bed.]

Bot.: A genus of composits planta, with two-lipped corvllas. The four knowa apecies are hards or small bhruba found in the Perivian Andes at an slavation of 6,000 to 8,000 eet. Thay have alternsts leaves, stalked toothed, or entire, and covered beneath, as well as the stems, with a white tomentum. The flower-heada are purple, about an lach in diameter ; the ray florets are few and femals. Centroclinium ailpressum and c. refleanm are oultivated, and produce ross-coloured flowers, smelling like bawthorn (Treasury of Botany.)
cĕn-tró-lé-pis, s. [Gr. кévтpov (kentron) = a spur; Aetis (lopis) $=\mathrm{a}$ a scals.]

Bot.: A genus of Deevauxiacer, containing a few small tufted sedge-like herbs from Anstralia and Tasmania. Lesvea setaceous, all radical; scapes chort and terminated by a simple spiks ; glumes two, membranous stamen ons; ovaries two to twelve, becoming utriclen in fruit. (Treas. of Bot.)
çĕn-tro-lin'-e-ad, s. [Lat, centmem = centre; linea $=$ a line.] An instrument for drawing lines converging to or passing through 2 point.
¢̧en-trod-lin'-厄-al, a. \& \& [Lat. centrum = linea $=$ a line.
A. As adl.: An epithet spplied to linee cnavarging to or meeting ia a point or centra.
B. As substantive: A centrolinead.
 $=$ a spur; $\lambda o \beta$ ós (lobos) $=$ a hood, s capsule.]

Bot.: A genus of loguminous trees from Brazil, Guisis, and Venezuela. The leaves sra a foot or more in length, and clad with a rusty pubescence. The pod is the most remarkabls part of the plant. It is like the fruit of the common maple. it is sbout nins inches in length, tha lower or seed-bearing portion length, globular, and clan with long, stralght prickles; the upper or winged portion thin, lapery in
texture, shout $2 t$ inches broad, and bearing on texture, shout $2 \frac{1}{2}$ inches broad, and bearing in
its back s long, straight, spurred spine, which ia the hardened stylc. Centrolobium paräcnse furnishes one of the most esteesued timbers of the Orinoco; its colour is liright orauge while fresh, fading to lrown after expoaure.
 = a goad, a spur ; Aó申os (lophos) $=$ a crest.]

Ichthy.: A genus of flahos of the family Coryphitnider, with elongated bodies, the dorsal fla commencing evenly with the pectoral; ventral fin small ; anal fin half as long as the dorsal ; vent central ; lateral line prominent. Centrolophus morio is the "Black fish," rarely met with on the British coasta, It is intensely black above, eapecially on the fins. It is of a paler colonr beneath.

* ¢̧ĕn'-tró-nêl, s. [A corrupt form of centinel (q. v.).] A sentinel
çẽn-trṑ-nl̆-ă, s. [Gr. кévtpov (kentron) $=8$ sinur, from the anthers being furnished with s loag spur.]
Bot. : A genus of plants of the order Melano stornaceæ, haviug large purple flowers.
çĕn-trot-nōt'-ǐ-dæ, s. pl. [From Mol. Lat centronotus, the typical genus; and fen. pl. adj. sutif. -idne.]
Ichthy.: A lapsed fanily of fishes, of which Centronotus (q.v.) was the type.
çěn-trò-nō'tŭg, s. [Gr. кévтןov (kentron) = a goad, a spur; woros (notos) $=$ this back: so called from the faet that the dorsal fin is entirely eomposed of glines.]
Ichthy. : A genus of fishes, family Blenuidire, with ten speciea, of which one, C. gurellus, the Gumnel-, or Batter-flsh, is British. The body is elongate: dorsal (of spines only) and anal ting of equal length and falcated; caudal fin large and forked; scales minute.
çěn-trò-pö'gŏn, s. [Gr. кévтpov (kentron)=

Bot.: A genus of Lobeliacee, natives of tropical America. All the plants are undershrubs with irregular flowers on long sxillary stalks. It is alleged that the aueculent fruit of Centropogon is eatable (Lindley), though the Lobeliacea are geaerally dangerous.
¢ӗn-tró-pó'-ma, ¢ĕn-trot-po'-mŭs, s. $\pi \bar{\omega} \mu \alpha($ рӧma) $=$ a lid, a cover.]

[^114]Iehthy．：A genus of flshes belonging to the Percidæ or Perch family．Centropomus un－ decimalis，the specific name of which refers to the fact that it had eleven rays to the posterior dorsal fin，freqnents the month of some South American rivers．It is called by the English residents the Sea－pike，and is eaten．
¢̧モ̌n－tróo－priss＇－tiş，s．［Gr．кévipov（kentron） ＝a spur；and npioris（pristis）＝a large fish， prob．the ssw－fish（q．v．）．］
Ichthy．：A genus of fishes belonging to the Percidæ or Perch family．Centropristis nigri cans，one of the epeciea called Black Perch or Black Bass，is abundant in the rivers of the United States，and is eateemed for the table．
gěn＇－trot－ph̆s，s．［Gr．кévtpov（kentron）＝a spur；поvis（pous）＝a foot．］
Ornith．：A genus of birds belonging to the Coccyzinæ or Hooked－billed Cuckoos．
 ＝s spur；rediju（selen $\tilde{e})=$ the moon．］
Bot．：A genus of Gesnerscex，from Britiah Guisna．It conaists of but a single plant， which has a short，creeping stem，subcondate， yetiolste leaves，and solitaryaxillary peduncles． The calyx is five－parted，with eerrats eegments． It is distinguished from Nemetanthns，to which it is allied，by the spur of the flower， coupled with the hablit and the toothed seg－ ments of the calyx．（Treas，of Botany．）
¢ĕn－trあ－sē＇－ma，s．［Gr．кévтpov（kentron）＝ a spur ；$\sigma \bar{\eta} \mu a(s e ́ m a)=$ a mark，a device．］
Bot．：A genus of leguminous prostrate or twining perennial plants，distinguished by having on the back and near the base of the standard a short spur．The species are entirely Anserican，and are mostly found in Brazil． The large and elegant pea－like flowers are white， violet，rose，or blug in colour，single or in villary racemes．The poda are very narrow， axillary racemes．The pods are very narrow，
compreased，thickened at both sides，and ter－ conpressed，thickened at both sides，and ter－
minating in a long point ；in some species they minating in a long point；in some species they species are knowo．
gěn＇－trŭm，s．［From Mod．Lat．centrum； Gr．кévtpov（kentron）＝a horse－goad， the stationary part of a pair of compasses．］ Anat．© Zool．：A centre，applied opecially

I．Ichthy．：A genus of Cod．fishes（Gadidx）， in which the head is remarkably large，do－ pressed，and broad
2．Entom．：A genus of dipterous insecto．
Çé＇pheūs，s．［Named after the husband of Cassiopeia sad father of Andromeda．］
Astron．：A coastellation in the Northern hemisphere，lying between Cassiopeis snd braco．Io the British Catalogue thirty－five stars are enumerated
 re．
Entom．：A genus of Hymeaopterous in－ eects，of the family Xiphydridge．Mr．Ste－ phena enumerates ter species of this genue occurring in Britaia．Cephus pygmous is com－ mon in fowera，particularly buttercups．
 Ichthy．：A genus of anguillitorm flshes， order Thoracica，having the head roundish， compressed，tecth curved；gill－membrane with six rays；body ensiform and asked．
qè-pǒr'-1-dea, s. pl. [From Mod. Lat. cepola, nd fem. pl. adj. Buff, -idar.]
Ichthy.: Band-itshes, a family of fishes in Which the body is very Jong, compressed, sad ribbon-like. Genera Cepols, Gymnetras Trichiurus, \&c. Some are British.

* çĕp'-tẽr, * ¢̧ðp'-tre, * ̧ĕp'-tyr, s. [SCEPTRE.]

## * cep-tur-it, a. [Sceprasd.]

- ¢̧c̈r-ä'-çěons, a. [Lat. cer'(a) $=$ wax, and Eng. suff. -accous.] Pertaining to or made of wax; like wax ln appearance. Specially in botany. (Brande.)
 bees-wax, and à $\delta \dot{\eta} v($ oulen $)=$ a gland.]
Bot. : Ceradia furcata, a half succulent plant from the moat barren part of South-west Africa, yields African Bdellium. It is a brittle, resinoid substance, fragrant whea burned, and mast not be confounded with ordinary Bdellium. (Lindley.)
¢ër-a'-gō, s. [Lat. cera=wax. Second element in the componad noknown.] Bee-bresd, a gubstance consisting principally of the polleo of flowers, and insed by bees for food.
çër'-a-In, çër'-a-ĭne, s. [From Lat. cer $\alpha=$ wax, and Eng., \&c. suff. -in, -ine (Chem.) (q.v.).]

Chem.: The part of beeswax which is sparIngly soluble in alcohol and cot sapuaified by potagh.
¢̣̆-răm-bỵ̆'-í-dm, s. pl. [Lat. cerambyx, genit. cerambyo(is); suff. -ide.]
Entom.: A family of coleopterous insects, Which have the head large and vertical, the jaws sharp aod strong, the tarsi prehensile, and the thorax nearly as broad as the body. They live upon aolid or dccayed wood, both In their larva and perfect states.
$\boldsymbol{\varphi} \mathbf{C}^{-} \mathbf{r a x m} \mathbf{x}^{\prime}$-by̆x, s. [Lat. cerambyx; from Gr. керая (kerus) $=8$ hom, and á $_{\mu} \beta v \xi(a m b u x)=s$ curp, from the form of the joints of the antennæ.]
Entom.: A genus of Coleoptera, or beetles, the typical one of the family Cerambycille. They sre widely digtributed all over the world, but mainly in hot countries. The Musk Beetlo (C. Moschatus) is fonnd on willows in England. It has a strong but agreeable odour, somewhat resembling that of sttar of roaea.
 fem. pl. autf. -acece.]
Bot.: An order of Florideous Algre. Rosered or purple ses weeds with a filiform froad, consistiug of an articulated, branching filament, composed of a singla string of cells, gometimes coated with a stratum of smsil cells. (Grif. \& Henfrey.)
 pertaining to pottery; керано (keramos) =a potter.] Of or pertaining to pottery, or the art of pottery.
¢е゙-răm'-ics, s. [Cenamic.] All the varieties of baked or bornt clay. It is distinguished from ritrics, in which ailex predomingtes, the result being glass.
 кера́мор (keramion) = a pitcher.]
Bot.: A name given to the globose-ovate or conical capsule of rose-spored Algæ. Examples are sfforded by Laurencia.
$\dagger$ çĕr'-a-mĭst, s. [Eng. ceram(ic); -ist.] A maker of pottery or eartheaware; a potter.
 a hittle pitcher, from the shape of the capBoten

1. A genus of marine, rose-spored Alge belonging to the order Ceramiacea. The tips of the filaments are incurved. Several apecies occur on our coasta, Cerumium rubrum being especially coumon.
2. A synonyin of Didymochlæna, a peculiar genus of South American Ferns. (treas. of Bot.)
qux-a-pŭs, s. [From Gr. кépas (keras) $=$ horú, aod rovis (pous) $=$ a foot.]

Zool.: A genua of Amphipodous Crustaceans. Cerapus tubularis, this Caddis-shrimp, occurs among Sertularim in the sea, near Egg harbour in the United States.
çăr-ar'- हैyr-ite
[Gr. кераs (keras) $=\mathrm{s}$ horn: dpypos (arguros) $=$ silver, and Eug. gutf. -ite (Min.).]
Min.: A mineral of a pearl-grey, greyish-
green, or whitish colour ; trangsrent Comgreeo, or whitish colour; traspssrent. Composition: Chlorine, $24 \cdot 7$; silver, $75 \cdot 3$. It is
çěr'-a-sĭn, çĕr'-a-sĭne, s. [Lat. ceras(nm) $=\mathrm{a}$ cherry, sad Eng. autf, -in, -ine (Chem.).]

1. Chem.: The portion of the gum of the cherry, plum, sud other trees, insoluble in 2. Min.:
(1) A mineral. the same as Mendipite (q. $\nabla$. ). (2) Cromfordite (q.v.).
 cherry-coloured.]
2. Ord. Lang.: Cherry-coloured.
3. Chem.: Pertaining to cerasin.
 Eng. suff -ite (Min.).]
Min. : Native murtate of lead.
çĕr-ăs'-tēş, s. [Gr. кepáarทs (kerastīs) $=$ horned, from кє́pas (heras) $=8$ horn.]
4. Ord. Lang.: A horned serpeot, Cerastes horridus.
scorpion, and asp, and aon, hisbena dire,
Ceraites horned, hydrus, and elops dreats
 ance.
¢̧̆-răs'-tĭ-йm, s. [Gr. ке́pas (keras) $=$ a horn, from the shape of the capsules.]

Bot. : An extensive cenus of Caryophyllaceæ, contaiaiag suall, white-flowered plants, generally called Mouse-esr Chickweeds. The petala are generally bifid. The number of sepals, petals, and stamens varies; it is generally five in the two former, and tea in the ataminal whorl. Several species occur in Britain. Cerastium areense is a common Eng. lish plant. (Treas. of Bot.)
 = a cherry-tree.]

Bot.: The Cherry-tree, a genus of trees of the order Amygdalacea. Three speciea arc British-(1) Cerusus vulgaris, called also Prunus cerasus, the Dwarf Cherry; (2) C. Frunus cerasus, the Dwarf Cherry; (2) C. Avium, called also Prunus Aviun, the Gean,
and (3) Cerasus Padus, called also Lauro-cerasud (3) Cerasus Padus, called also Lauro-cera-
sus Padus snd Prunus Padus, the Bird Cherry. sus Padus snd Prunus Padus, the Bird Cherry.
Hooker considers Nos. 1 snd 2 mere varieties of each other. The firat of these is generally supposed to have originsted the Garden Cherry, and the aecond the Morelle. The leaves, bank, and fruit of Cerasus Luuro-cerasus (the Common Laurel), and the oil derived from them, are virulent poisons, owing to the amount of prussic acid which they contain. For a similar reason C. capricide, of Nepand, kills, as the Latin specific name imports, the gosts of that region. C. Paduts and $C$. virginiana have the deleterious projuerty in less mensure. All the species of Cerasus yield a gum acalogons to gum tragacanth The leaves of Cerasus Avium liavo been used The leaves of Cerasus Avium lave been used tree is used in the Vogges and in the Black Forest in the prepsration of the liquor called "Kirschwasser." The kernel of C. occidentalis, a West Iodiau species, is employed in flavouring the liquor called "Noyau." The bark of Cerasus virginiann la prescribed as a febrifuge. So also is that of C. cajollim of Mexico. [CeEfRy.]

+ çĕr-ate, s. [Lat. ceratus, pa. par. of cero = to cover with wax ; cera $=$ wax.] A pharmaceutical preparation of wax, oil, and some softer aubstance made into a plaiater.
 Faf: of cero = to w8x; cera
covered with wax. (Bailey.)
 horn ; cíSos (cidos) $=$ form, appearance.]

Zool.: A geone of Infusoria, of the family Oxytrichina. It is furnished with ellia, horm on the fore part of the body, but nelther hooks nor styles. One species, Ceratidium cumeatum, Dujardin considered to have been a matilsted Oxytricha. The appearance of horns arises from the anterior psit of the boid
being deeply notched. (Grif. \& Henfrey.)

* çer-a-tine, a. [From Gr. кeparions (keratinés) $=$ the fallacy called the horne: xepas (heras) $=\mathrm{a}$ horn.] Sophistical.
çerr-a-ti'-tēş̧, çěr'-a-tīte, \&. [From Gr. ке́pas (keras), genit. кépatos (keratos) $=$ a horn, and suff. tr7s (itess).] [ITE.]
Polceont.: A genus of Ammonitidse, with a discoldal shell, having lobed entures with the lobes oviculated. They exist from the Devonian to the Cretaceous formations, occurring in Europe and Indis.
çĕ-rä'-tǐ-ŭm, s. [Gr. кepátcov (keration) dim. of кipas (keras) $=$ a hom.]
Botany:

1. A genus of Isariacel (hyphomycetous Fungi), containing a generally diffused British plant, C. hydnoidea, which grows on rotten wood, has a tuft of white simple or slightlywood, has a tuft of white simple or slightly-
branched prichle-like processes, whlch jrobranched pricile-like processes, whlch pro-
duce on their surface sterigmata (spiculee, duce on their surfuce sterigmata (spiculee, Berk.), each of which is surmounted by a
apore which easily fslls off. The whole plant apore which easily fslls off. The whole plant
readily collapses into a mucilsginoue niss readily collapaes into a mincilsginous mass
The cellular appearance figured by Greville depends on the collapaing of the processes. (Grif. © Henfrey.)
2. A kind of fruit, placed by Lindley under his class Syncarpi. It is ainuilar to the siliqua, but has no septum.
¢̧̆r' $\mathbf{a}$-tō, in compos. [From Gr. кépas (keras) genit, кépuros (keratos) $=2$ hora.] Provided genit. кepuros (keratos
with a hurn or homs.

## cerato-branohial, a

Comp. Anat.: A term applled by Prof. Owen in his Homologies to tha longer bent fieces supported by the bones which furn the lower extremities of the branchial arches io fishea.

## cerato-gleasns, 3.

Anat.: A name for the hyo-glossus mnecle, from its appearance and insertion Inte the tongue. (Mayne.)
cerato-hyal, $a_{\text {. Pertaining to the lerger }}$ of the two chief parts of the hyoid bone.
¢̧ĕr'-a-tot-cēle, s. [Gr. кipas (keras) =athorn; $\left.\kappa \dot{\eta} \lambda \eta \eta^{(k \bar{e}} \bar{l}\right)^{3}=8$ tumour.]

Pathol.: A term for a heroia of the corner of the eye, consisting in the protrusion of the inner laser by the presaure of the aqueons humour at some point where the outer lsjer is destroyed hy ulceration.
çĕr'-a-tōde, çěr'-ạ-tōse, s. [Gr. кeparúdTs (keratōdès) = horn.like.] The horny or fibrou skeletal substance of aponge.
çǒr-ăt'- © dŭs, , [From Gr. кépas (keras), gemit. кéparos (heratos) $=$ a horll ; and obovs 1. Zocl.: A genus of fishes, ovder Dipuol. With Lepidosiren, till lately placed suloug the Amphibla, it constituter the point of tranaition between Fishes and Amphibians. Ceratodus Fosteri is the Australian Mud-fish.
2. Palceont.: Agassiz first fouoded the genns on certain horned teeth fornd in Tri. assic and Jurassic rocka. Seventeen types of tecth have since been frund in Queenalan in Australia, and in Central Indis.
çěr-a-tō'-nĭ-a, s. [Gr. кepaitoo (keration) $=$ a little horn; dim, of кepas (keras) $=\mathrm{a}$ horn, from the ahape of the pods.]
Bot.: A genus of legaminous plants. Ceratonia Siliqua is the Carob (q.v.).
 ceratophylu(um) ; and Lat. nom. pl. fem. sulf. -acea.]
Bot. : A natural order of planta, consisiling

of Roating herbe with whorls of multifd，cel－ Inlar leaves．
 shorn ； бu入hov（phullon）＝a plant，a leaf，the petals resembing a horn in shape．］
Bot．：A genus of plants，tha typical one of the Ceratophyllacees，of which it ia the only known genne，and has only one koown epecies．C．demersum（Hornwort）ta fairly columon in ponda and alow atreains in Britain．

f̧ër'-ŭm, a. [Named by the discoverera sfter Cerea.]
Chem. : A metal (Sym. Ce.; At. Wt., 92) found with two other metals, lanthanum and didymium, in cerite. Powdered cerite is made into a thick pasts with concentrated aulphuric. acid, and hsated nearly to redness. The mass is then treated with water, sstursted with $\mathrm{H}_{\mathrm{w}} \mathrm{S}$, filtered, acidifed with $\mathbf{H C l}$, and precipitated by oxalic acid. This precinitate heated in ths air to redness gives s brown powder of the mixed oxides. Nitric acid diasolves the oxidea of lanthanum and didymium, and leaves the oxidss of cerium. Tha oxides of lanthanum snd didymium are separated by the repeated crystalization of their sulphstes (see Watts'a Dict. of Chemistry). Cerium is obtained by reduciug ita chloride with sodium as a grey powder which decomposes water slowly It dissolves in dilute acids with evolution of hydrogen. Cerous oxide, CeO , obtained by igmiting the carbonate or oxslate, is a greyislimitue powder, which, in the sir, oxidises into ceroso-ceric oxide, $\mathrm{Ce}_{3} \mathrm{O}_{4}$, \& yellowish-white powder. The salts of the former are colourpowder. The salts of the former are colour-
corium carbonate, a. Min.: Lanthanite ( $q, v$. ).

 cerale (Lat, coruleus), and facio $=$ to make.] Having the power to produce, or producing a blue colour.
"The nevaral species of mys, as tha rulinck, cerw
titck, and ot lurck,
and otbers, are separated $00 e$ irom another."
gër'-u-linn, s. [Lat. cerruleus $=8 \mathrm{ky}$-blue, and Eng. suff. -in (Chem.).]

Chem.: A name given to the colouring matter in a salt or aulatance of an intensely hime colour, obtained by dissolving indige in concentrated sulphuric acid, and adding potash to the aolution
cër- $\bar{u}^{\prime}-\mathbf{m e ̌ n}$, s. [Lat., from cera $=$ wax.]
Physiol.: The wax or wax-like secretion of the ear, which is given out by the follicles ranged along the inner sturface of the meatus auditorius externus. [EAs.]
"When cerumen accumulatea and hardens in tha enrs so an to ocexalion deannans, it is canity sontened by of turpent:ne ${ }^{\text {. }}$ - Ariande
Anamay and $P$ Phyology.
 (genit. ceruminis); fero = to hear, and Eng suff. -ous.] Bearing or producing cerumen.
¢̧è- $\overline{\mathbf{n}}^{\prime}-\mathbf{m i n}$-ŏ̆s, a. [Lat. carumen (genit ceruminis), snd Eng. suff. -ous.] Of the nature of or pertaining to the cerumen or wax of the ear.

## cerrminous glands, 8

Anat: The follicles, or numerous smsli glands situated between the cutaneous lining and the cartilage of the extarnal euditory canal.
gër-ür'-a, a. [From Gr. кépas (keras) = horn and oupa (oura) = tafi. So named from horn-like appendage on the tail of the lerva.]
Entom. : A genus of motha, family Bombycidæ. Cerura vinula is the Pues-moth (q.v.)
gër'-üse, s. [Fr. ceruse ; Sp. cerusa ; from Ital. and Lat. cerussa; from Gr. кท́ค (kerr), genit. кnpós (kēros) = death, poison : from its poisonona qualities.]

1. Ord. Lang.: A name given to white lead or carbonate of protoxide of lead. Comp. or carbonate of protoxide of lead. Comp. is prepared from the subscetate of protoxide of lead by a currant of carbonic acid, on exposing metallic lead in minute division to air and moisture ; and alsoby the setion of the vapour of vinegar on thin sleets of lead, by which the metal ts both oxidised and converted into a carbonate. Mixed with oil it is used in painting, and a cosmetic ia prepared from it.
"A preparation of lead with vinesmr, which 18 of a it it that particular, are iny chymistige called ceruse the like."-Quincy 2. Min.: [Cerussitre].

* cër'-ūsed, a. [Cerver.] Washed over or treated with a coametic prepared from ceruso.

Here'g a colour what ladles cheek:
Though ceru"d over, comes uast IL"
Beaum and Flot. : Sea Voyaga
oër'-q-sīte, ç̌-rüs'-site, s. [Lat. cerussa = white lead; Eng. suff. -ite (Min.) (q.v.).]
Min.: An orthorhonbic mineral, transparent or ambtranalucent, of a white, grey, or greyish-black colour, sometimes tinged blue or green by some of the salta of copper. Harduess, $3-3 \cdot 5 ;$ sp.gr. $6465-6.480$. Comp. Carbonic acid, 16.5 ; oxide of iead, 83.5 . It ia found, in connection with other lead minerala, in several places in Britain, and slao on the Continent. The crystala are thin, broad, and brittle. The lustre is adamantine or vitreous, sometimea pearly. (Dana.)

* çẽr'-จa-1ět, + çẽr'-จě-1ăt, s. [Fr. cor relat.] [Saveloy.]

1. Ord. Lang. : A kind of sausage

Music: A short wind instrument, resembling the bassoon in tone. (Webster.)
cẽr-vann-tē'sǐi-a, s. [Named in honour of Cervantea, the celebrated Spanish author.]
Bot.: A genus of plants belonging to the order of Sandal-worts. The apecies are tree or ahrubs, natives of Peru, having scattered entire simple leaves. The fruit of Corvantesia tomentosa is used as food in Peru.
çer-vann'-tite, s. [From Cervan(tes), in Spain where it is folnd, and Eng, suff. -ite (Min.) (q.v.).]

Min.: An orthorhombic mineral of a aul-phur-yellow or nearly whitish colotir. Lustre, greasy or pearly, liright, or earthy; hardnesa, $4-5 ; \mathrm{sp}$. gr., $4^{\circ} 084$. Connp, Oxygen, 20.8 ; entimony, $79 \%$. 1 t is widely distributed.

* çer-vawnte, a. [Servint.]

Corvawnte Servus, vernacwius,"-Prompt. Para
çẽr'-vi-cal, $\alpha . \quad[$ Lat cervicalis $=$ nertaining to the neck; cervix (genit. cervicis) $=$ the neck.] Anat.: Of or pertaining to the neck.
"The aorta, bendillg alittie upwards euvds forth
| çẽr'-- ǐ-çide,s. [Lat. cervus=a deer, a staç; ccedo = tơ kill.] The act of deer-slaying.
¢̧c̃r'- vǐ-cō, in compos. [Lat. cervis (genit cervicis) = the neck.] Pertaining to or connected with the neek

## * cervico-branchiata, 3. pl

Zool.: An order of Mollusea forming De Blainville's anb-clasa Paracerlalophora MFermaphrodita. The organs of respiration are
situated in a large cavity a hove the neck, and open widely in front. Head distinct, with two contractile conical tentacula; eyer aessile at their external base. It included two families, Retifera and Branchifera.
 pl. auff. -idoc.]

1. Zool.: A family of mammals. Order Ruminantia. The malea of all the epecies and also the fernale of the reindeer have antiere, which are deciduous, this last character com pletely distinguishing them from the Bovidx (Oxen). The entlers also are solid, thas dis criminating them from the Cavicornia. [Cer. vus.] The speciea are widely distributed and well known. But none are found in Africa eonth of the Sahara or in Australia. Genera, Cervus, Caprislus, Alce, \&a.
2. Palcont.: It is doubtful if they were in exiatence in Eocene times. There is no doubt with reapect to their existing from the Miocene onward.
¢̧ẽr-vi'-næe, s. pl. [Lat. cerv(us) (q.v.); fem. pl. adj. auff. -ince.]

Zool.: A aub-family of Cervidæ, containing the true deer. Antlers may be present in the males only or in both sexea, aud caninas ar amall or absent

وẽr-vine, a. [Fr. cervin; Sp. \& Ital. cervino, from Lat. cervinus $=$ pertaining to atags; cervus = a stag.]

1. Zool.: Of or pertaining to the Cervidx, or Stag fainily of animala; of the nature of deer.
2. Bot. : Of a deep, tawny colour, such as the dark parts of a lion's hide.
وör'-vix, s. [Lat.]
Anat. : The reck; that portion of tha body which is between the head and the ahonlders, especially the back part of the ueck. The term is alao uaed of constricted parta, as cervix uteri = the parrow part of the uterus; cervix vesice = the neck of the bladder
gẽr-vu-1̄'-næ, s. pl. [Mod. Lat. cervul(us); Lat. iem. pl. adj. sutf. .ince.]
Zool. : A onb-family of Cervidæ (q.v.), containing the Muntjacs. The malea are horned and have tusk-like caninea.
oẽr-Fu-line, a. [Cervulus.] Pertaining to the Cervulinæ or Muntjacs.
gẽr'vu-lŭs, s. [Mod. Lat. dim. from cervus (q.v.).]

Zool. : The sole genus of Cervuline. [Muntuac.]
gẽ̃'-vŭs, s. [Lat.]

1. Zool. : The type-genus of the family Cervidæ. C. elaphus is the Red-deer or Stag C. canadensis the Wapiti of North America.
2. Palcont. : From the Miocene onward.
çẽr-vyç-a-ble, çer-vyc-y-a-ble, cer-vys-a-ble, $a$. [Serviceable.]
©̧ẽr'-vyçe, s. [Service.] (Prompt. Part.)

* Cẽr'-vylle, v.t. [O. Fr. ceruelle = the brain.] To dash out one's brain, to brain.

To ceruylle : excorebrare."-Cathod. Axplicum.

- ¢ẽr'-vyll-lẽr, s. [Mid. Eng. cervylu(e); •er.] One who knocks out another"s brains.
"A ceruyller : excerebrator."-Cathol. Anglicum.
 $=$ bees-wax ; and Eng., \&c., suff. -yl (q.v.).] Chem. : An organic radical, $\mathrm{C}_{24} \mathrm{H}_{55}$.
ceryl cerotate, $s$.
Chem. : $\mathrm{C}_{72} \mathrm{II}_{55} . \mathrm{C}_{27} \mathrm{H}_{53} \mathrm{O}=$ Chinese wax, white cryatalline substance produced on cerwhite cryataline substance produced on certain trees in China by the puncture of a speciea of Coccus. It meits at 82,'s distilation it yields cerotic acid and Cerylene, $\mathrm{C}_{\mathbf{2}} \mathrm{H}_{34}$.
¢ĕ́r'-y̆l-ēne, s. [From Eag., \&c., ceryl, and suff. -ene (Chem.) (q.v.).]
Chem. : The asme as cerotene (q.v.)
ger-yl'-ic, a. [From Eng., \&c., ceryl (q.v.), and suff. -ic.] Ot or pertaining to ceryl.

## cerylio alcohol, s.

Chem. : $\mathrm{C}_{27} \mathrm{H}_{55}(\mathrm{OH})=$ Cerotic alcohol.

Obtsined by fuaing Chinese wax with oolid potash, yieiding potasslum, cerotate, and cery alcohol. It is a waxy substance, meiting at $97^{*}$; heated with potash lima it gives off H sod is convertad into potassium cerotate.

chăd＇－dy̆，a．［CaAn（2），s．］Gravelly；as， ＂chaddy groum，＂that which chicfly consisto of gravel．（Scotch．）
＊ohad＇－lock，s．［Carlock．］
Bot．：A book－name for Sinapis arvensis．
Water－chadlock：Nasturttum amphibium． （Gerarde．）
 open，and $\pi \lambda$ evpa（pleura）$=$ the aidea．］
Bot．：A genur of West Indian shrubs，of the order Mxlostomaceu．
cheo－nơs＇－tō－ma，s．\｛Gr．xaivw（chainō）$=$ to open，to gape，sid $\sigma$ тóma（stomu）$=$ the moutb．］
Bot．：A considerable genus of South African ahrubs，belonging to the order Scrophularia－ ceæ．Leaves dentate，opposite；flowers axil－ lary or racemose，pedicellate；calys fivc－ parted；corolls deciduous，funnel－ghaped； style simple，atigna aub－elavate．
chsor－a－dō＇－dil－a，s．［From Gr．xaipw（chairó） $=$ to rejoice ；sccond element doubtful．］

Bot．：A genus of endogenous plants，order Amarylldacem．A cold infusion of the leaves of Cherralodia chilensts，the Thekel of Chili，is used by the natives as a purgative and diuretic．
chæ－ró－phy̆l＇－lŭm，s．［Gr．xaipw（chairō）$=$ to rejoice，and $\phi \dot{u} \lambda 10 v($ phullon $)=a$ leaf，from the agreable sinell of the leaves．］
Bot：Cicely，or Chervil，a genus of um－ belliferous plants of the tribe scandiclne． ［Chervil．］Cherophyllum temulum，or temu－ lentum，a plant one to three feet high，with purple－spottel stems，retlexed bracteoles snd durple－spotter stems，reflexed bracteoles and deltoid twice－pinnate hairy leaves，ia common in Britain，from Moray and Ross，
ascouthward
ascending to 1,200 feet in Yorkshire ；rare in ascending to 1,200 feet in Yorkshirs；rare in
Ireland．Other alleged British species are donltful．
chos＇ta．s．［Gr．xaitm（chaitē）$=$ long，loose， flowing hair ．．．a bristle．］
＊1．Anat．：An oll term for the hair st the back of the head，and ahout the temples．
2．Bot．：A bristle．The alender atalk of the spore－case of mosses；also called Seta（q．v．）．
chmetě－teş，8．Latinised from Gr．xaim （chatete）$=$ long，loose，flowing hair，and $\lambda i$ oos $($ lithos $)=$ stone．$]$

Palcoont．：A genus of Tabulate corals，the
typical on of the fanily Chetetidæ，It in found froin the silurian to the Permian．
chzo－tett＇－1－dm，s．pl．［From Mod．＇Lst．that－ tetes（q．v．），snd fern，pl．sdj．suff．－idec．］

Paloeont．：A family of Tabulate corals，con－ taining species with a compound corallum of closely approximated imperforate coralliten without septa．They occur from the Lower Silurisn to the Permian period．

Zool：A group of Spoon－worma［Gephyere］ having the mouth st the base of the proboscia， two strong ventral bristles，and the vent terminsl．
chæ－tif＇－ẽr－oŭs，a．［Chetifrra．］
1．Furnished with，or bearing，bristles．
2．Belonging to，or connected with，the Chætifers（q．v．）．
 s bristle，and кípas（keras）$=$ a horn．］

Zool．\＆Palocont．：A genus of marine and fossil Diatomacex，having the frustules coa－ catenate；valves equsl，sub－cylindrical，with two processes，ons on each side，which sre subsequently converted into very long，thin and interwoven alliceous flamants．（Griff．\＆ Henfrey．）
 briatle，and Gr．Sipha（derma）$=$ the ekin．］ Zoology：
1．A primitive or degraded genus of Gastro． poda Isopleura，with a single species， 0 ． nitilulum，from sbout 100 fathons in the North Sea．It is a anall，worm－shaped snimal，and the shell is replaced by unmerous minute calcareous spines in the surface of the skin．They were formerly thought to be Skin．Thay
2．（Used as a pl．）The ssme as Chrto－ dermata．（Lankester．）
Chzo－t交－dẽr＇－ma－ta，s．pl．［Ceetonerma．］ Zool．：An order of Gastropeda Isopleura， consisting of the single gaus Chætodernia．
ohm－tö－dẽr＇－ma－toũs，$a$ ．［Mod．Lat． chetodermat（a）；Eng．suff．－ous．］
1．Bearing spines in the integument．
2．Belonging to or chsracteristic of the Chretodermata
ohm－tठ－dis＇－cŭs，s．［Gr．xaim（chaitē）＝a hair，a lristle，and sioxos（diskos）$=2$ disk．］ Zool．：A genus of Distomacer，having the frustules disk－shaped；valves circular or oval with radiating lota and a submarginal circla with radiating dots and a snbinarginal circla special radiating lines of dots with the centre．
ohes＇－t⿳亠丷厂犬－dŏn，s．［Gr．хаíтク（chaitē）$=8$ bristle； ¿סov＇s（odous），genit．isouros（odontos）＝a tooth．］ Ichthy．：A geuus of fisbes，the typical one of the old family Chetodontidx．The body is oval ；the mouth nore or less pointed ；to spine on the pre－operculum，or prickles before the dorsal fin，which is single．Thers are about 70 species from the tropical parts of the Atlantic and lndo－Pacific，nearly all character－ ised by brilliant coloration．
cheo＇－tठ－dŏnt，u．\＆8．［Снетодо
A．As adj．：Belonging to or charaeteristic of the family Chetodontide
B．As subst．：Aay fish of the family Chæto． dontidæ．
 don，gen．chetodont（is）；Lat．fem．pl．adj． suff．－idx．］

## Ichthyology：

－1．A tamily of Acanthopterygisn ftshe： from tropical seas．The body is compressed from tropical seas．covered with finely ctenoid or sinooth scales．The mouth，which in in or sinont of the scalest，is generally small．Dorsal consisting of nearly equal apinous and soft parts，and the dorsal and anal fins are so thickly covered with scales that it is slmost impossible to tell where the fins beatand the body enda．Teeth villiform or aetiform in hands，no csnines or incisorg．In this sense it la equal to Squamipinnes．
2．Later ichthyologists who use the term restrict it to Chætodon and its near ablipa．

chso－tt－ghs＇－tra，o．［Gr．xaity（chaite）$=\mathrm{A}$ boistle，a hair，and yaoripp（ gaster）$=$ a belly．］ Bot：$\Delta$ genue of plente，natlves of tropical America，belonging to the order Melastomaces． it derives ith name from the tube of the calyx being bristly．
ohse－tt－glē＇－ng，s．［Gr．xaity（chaite $)=8$ hair，a briatle，and $\gamma \lambda$ inn $(g l e n e)=$ the pupil of an eye．）

2007．：A genus of Infusoris，of the family Peridina．Carapace hispld，or studded with rigid splaes ；no traverae furrow ；an eye－spot present ；organ of motion a flagelliform fils－ ment．（Griff．\＆Henfrey．）
ehse－tǒg＇－na－tha，8．pl．（From Gr．xaim （chaite）$=$ long，loose，flowing hair，and yrioos （gnathos）$=$ the jaw，the month．］

Zook：A class of small marine worms with but two genera，Sagitta snd Spadella，both of which have British representatives．
chse－tŏg＇ma－thoŭs，a．［Mod．Lat．cheetog－ wath $(a)$ ；Eing．gntf．－ous．］Belonging to or characteristic of the Chetognatha（q．w．）．
chso－tö＇－mǐ－ŭm，s．［Gr．xaitm（chaité）$=8$ hair，a bristle ；etymol．of mium doubtfnl．］
Bot．：A geniss of Perisporiscei（Ascomy－ cetous Fungi），having a filamentous mycelium beariag gaverticial roundiah or ovate concep－ tacles clothed with haira，finally opening above and containing clavate asci with paraphysea； aporidia simple，ovate．The asci in this genus are very delicate，and are readily abaorbed，so that frequently there is not a trace of them， and the sporidia seem naked．（Grif．\＆ Henfrey．）
chmo－tठ－nō＇tüs，s．［Gr．xaitm（chaite $)=a$ hair，and yóros（notos）$=$ the back．］
Zool．：A genus of microscopic animals found in fresh water，amongst aquatic plants． They appear to be allied to the Rotifera，bnt have neither mastax nor trochal diak．With ooe or two allied genera，they are now held to constitute a distinct phylnm，Gastrotricha．
oheo－tơph＇－õr－a，\＆［Gr．xairn（chaite）$=$ a hair；фopos（phoros）$=$ bearing，prodncing， фépo（pherō）＝to bear，to produce．］
1．Bot．：A genus of Chxtophoridæ（Confer－ void Algæ），characterised like Draparnaldia by setigerous branched filaments，but differing from the latter by the filaments being imbedded in a gelatinous natrix．The Chætophore are in a gelatinous natrix．The Chetophore are tuberances on atones，sticks，\＆c．，usually bright green．The zoospores are formed aingly in joints，and bear four cilia（Grif．o Henfrey．） There are abont six British givecies known，all from fresh water．
2．Zool．（As a pl．）：A sub－class or order of Aonelida，comprising those in which progres． sion takes place hy means of chitinous sets， or by auctorial disks．Of the former gection the Farthworms，Tabeworms，and Sand－ worms are examples；of the latter，the Leeches．（Nicholson．）
chse－to－phǒr－1－dm，s．ph［Mod．Lat．choo－ tophor（a），and Lat．fem．pl．suff．－ide．］
Bot：A family of Confervoid Algx growing in sea or fresh water，invested with gelatine； either fliform or（a number of filaments being conaected together）expaoded into gelatinous， branched，definitely or shapeless fronds or masses．Filaments jointed，furnished with bristle－like processes．Fructification congist． ing of spores and four－ciliated zoospores， formed ont of the contents of the articulations． （Grif．\＆Henfrey．）
ohss＇t㐭－pǒd，a．\＆s．［СнетороDA．］
A．As adj．：Belonging to or characteristle of the Chretopoda．
B．As subst．：Any individusl of the Chrto－ poda（q．v．）．
Ohas－tŏp＇－あd－a，3．pl．［From Gr．xaitn （chaitē）$=$ long fiowing hair，and movs（pous）， genit．тoঠós $($ podoz $)=\mathrm{a}$ foot．］

## Zoology：

1．In Prof．Ray Iankeater＇s classification， one of the three branches of the phylum Appendiculata，the other two being Rotifera and Arthropoda．
2．An order of Annelidxe，contsining those marine worms with dorsal hranchix and non－ suctorial．［Olioocreta，Polycenta．］
chso－tŏp＇－t－doŭs，a．［Mod．Lat．chatopodu（a）； Eng．snff．－ous．］Belonging to or characteristic of the Chetopoda（q．v．）．
chas＇－topps，${ }^{\text {s．}}$［Gr．xaity（chaitè）$=a$ bristle， a hair，and $\bar{\alpha} \psi$（opa）$\stackrel{\text { a face．］}}{ }$

Ornith：A gedus of birds，belonging to the Myotherine or Ant－thrushes，no named from the bristly feathers in front of the face．

Ohse＇töp－ais，a．［Gr．xaim（chaite）$=$ a hair ； ow（ops），genit．öts（opsis）＝a face．
Bot．：A gedas of Mncedines（Hyphomycetons Fungi）characterised by erect jointed threads， whorled below，above aimple and flagelliform， bearing cylindrical spores from the tipe of the branchlets．One epecies only ls known， Chatops is Wranchii．（Grif．\＆Henfrey．）
chse＇tot－pŭs，s．［Gr．xairn（chaitt）$=\mathrm{s}$ bristle， a hair，and rous（pous）$=8$［oot．］

Ornith．：The Francolla，a genas of birds belonging to the Perdicidæ or Psrtridges， so named from the tarsus of the male being armed with spura．
ohse totspör＇－a，8．［Gr．xaim（chaite）$=\mathrm{a}$ bristle，a hair，and $\sigma \pi$ opd（spora）$=$ a sporule．） Bot．：A genns of Algæ，of the order Confer－ voidx，so named in reference to the fine capil lary divigions of the filaments．
chze－tös＇－tomm－a，2．［Gr．xaim（chaitê）＝a bristle，a hair，and бт $\dot{\mu} \Omega$（stoma）$=$ a mouth．］ Bot．：A genus of small，dry，heath－like Brazilian shrubs，belonging to the order Me－ lastomacer．Stema leaflesa at base ；flowera golitary，rather small，purple with yellow anthers．
chae－tür＇－a，s．［Gr．$x_{a}$ airn $($ chaitē $)=$ s bristle； and ovipa（oura）$=\mathrm{a}$ tail．］

Ornith：A genus of birds of the family Cypselide（ $\mathrm{Swifts} \mathrm{)}, \mathrm{,60} \mathrm{named} \mathrm{from} \mathrm{the} \mathrm{shafts}$ of the tail－feathera being prolonged into acute points．
Chab－tu－ri＇－nw，s．pl．［Mod．Lat．chatur（a）； lat．fem．pl．sdj．suff．－ince．］

Ornith．：Spine－tailed Swifts，a sub－family of Cypselidx（q．v．），with four or five genera．
chse＇tu－rine，$a$ ．［Cheturine］Belonging to or characteristic
chse－tür＇－us，z．［Gr．$x$ aitn（chaitē）$=$ a bristle， a hair，and oupa（oura）$=$ a tail．］

Bot．：A genue of grasses belonging to the tribe Agrostidese．The only species described， Cheturuy fasciculatus，is a smsill snnnal grass， a native of Spsin．It derives its name from the silky sppearance of the paaicles．
＂chaf，o．［Chaff．］

Bot. : A family of Dicotyledone, consiating of ahrubs with alternate bistipulate, short atalked, oval, acute, feather-nerved, entire leaves : flowers axillary, white, usually with the pedunciea adhariag to the petiolas. There are nearly seveuty species, uatives of the tropies, and distributed into four or five genera, of which the priacipal are Chailletia, Moscurra, and Tapura.
chäln, "chāine, çayne, cheinc, * ¢hoyne, "chine (kng.), * chonrie, a ohenyle (Scotch), s. \& a. [O. Fr. cadene chaaine, chaine; Fr. chaine; Ital. catena; Lat. catena; M. H. Ger. kétene; O. H. Ger. kétina, cheitinna; Ger. ketten, kette.]
A. As substantive:
I. Ordinary Language:

1. Literally:
(1) A line formed of a serfea of metal links connceted with or fitted into each other, and used for varions purposes, os of restraint, support, conuection, transmisalon of mechenical power, \&c.
"Cheyne Cathena boia"-Prompe parp.
(2) A sarles of links of gold or silver, worn as an ornament.
 Genesis. xith. 12.
(3) (Pl.) Fetters, bonda, manaclea.
"Petre wan sleplnge hitwixe twey knygbtie, boundene rith twey chaynes -Wycliff: Deodi, $\mathbf{x 1 0}$ a
2. Figuratively:
(1) Anything which conflnes, fetters, or binds.
" Rivet the chains of hablt."-Lamb: E7ta.
(2) A state of subjection or marsl captivity.
"A Briton" scorn of arbitrary chains."
(3) A series of material things connected with and following each other in auccessina.
 "From the chain of Tauros to the shorem of the Euxime. "-AThola: Rist. Rome, ch 3s.
(4) A connected serics or line of immaterial things, as of events, causes, thoughta, or arguments.
Fullor: Church History, blesion could be plesded."II. Technioally:
3. Surveying: A line formed of a serieg of iron diaka, used in measuring land. That now used is known as Gunter's chain, from the used is known as Guater' cham, from the divited into 100 linka, esch link being equal divited into 100 inka, esch link heing equal
to $\tau 92$ inches. Ten square chaias ara equal to 792 inch
4. Sporting: The trail of an otter.
5. Nauth (chains, properly chain-wales, or chavnels): Broad and thick planka projecting choanels): Broad and thick plaska projecting which they are fayed and bolted, abreast of and somewhat behiud the maats. They are and somewhat behiud the maats. They are
formed to project the chain-plate, and give formed to project the chain-plato, sisd give
the lower rigging greater outrig or spread, the lower rigging greater outrig or spread,
free from the topsides of the ship, thus affording greater security and support to the masts, as well as to prevent the shrouds from damag. ing the guawale, or being hurt by rubbing against it. Of course they are respectively designated fore, main, and mizzen. They are now discontinued in many ahips, the eyea being secured to the timber-heads, and frequently within the gunwaia to tha stringers or lower shelf-pieces above the water-way. In the chains applies to the leadsman, who stande or the channels betweea two ahrouds to hesve the hand-lead.
 Eno
6. Weaving: The warp threads of a web. It is called also fitting or hoist, and in the case of silk it is denominated organzine.

- Crahb thus distinguishes between a chain, a fetter, a bana, and a shachle:-"All these terms designats the instrument by which snimalis or men are confined. Chain is general and indefnite; all the rest are chains: but there are many chains which do not come nnder the other names, a dooin is indefluite as to its make; it is madc generally of iron rings, but of different sizes and ahapes: fetters are larger, they consist of many ftout fetters are larger, they consist of many atout
chains: bouds are in general any thing which chains: bands are in general any thing which
confines the body or the limbe; they may be either chains or even corda: shackle is that apecies of chain which goes on the legs to
confine them; malefactors of the worst order have fetters on different parts of their bodies end shackles on their legs. These terma may all bo used figuratively. The substantive chain is applied to whatever hangs together like a chain, as a chain of evente; but the verb to chuin signifiea to confing as with a chain: thus the mind is chained to rules, according to the opiniona of the frea-thinkers when men adhere strictly to rule and order and to represent the slavery of conforming to the establishment, they tell us we are fettered by systems. Band in the figurative aense is applied, particularly in poetry, to every thing which fa sapposed to serve the purpose of a band; thas love is aaid to have its silken bands. Shackle, whether as a substantive or a verb, retaina the idea of controlling the movements of the person, not in his body only, but also in his mind and in his moral conduct; thus a man who commences life with a borrowed capital is shackled is his commercial concerns by the interest he has to pay, and the obligations he has to discharge." (Crabb: Eng. Synon.)
- Chain of lock:

Hydraulic Endineering: A anccesaion of lock-chambers, the lower pair of gates of each of which (axcept the loweat) forns the upper pair of gatea for the chamber below. [Canal LOCK.]

## B. As adj.: (See the compounds).

## chain-belt, s.

1. A chain forruing a band or belt for the conveyaace of power.
2. A chain covered with piping or overlaid with atripa to form a round beit.
chain-boat, s. A hoat used in harbours for recovering chain-cables and anchors.

## chain-bolt,s.

1. Naut.: A large boit to sacure the chains of the dead-eyea through the toe-link, for the purpose of securing the masts hy the ahrouds. Also the holts which fasten channel-plates to the ahip's aide.
2. Carp.: A boit having an attached chain by which it may be drawn back, falling by its own gravity or pushed into place by a apring.
chain-bond, s. The tying together of parts of a wall by a chain or iroa bar built in.

## chain-bridge, $s$.

1. A form of ferry-bridge in which the passage is made by chains laid acrose the river and anchored on each side, and rooving over cbain-wheels on board, driven by engines. Such a ferry-bridge used to crosa the Itchen, in Hampahire (Ferry-bridge.]
2. An early form of the auspension-bridge in which cateaary chains supported the fioor. The first was erected over the Tees, in 1741 Rods with eyes and connecting-links were used by Telford on the Menai Suspansion Bridge, 1829 ; ateel wires laid up into cablea are now used. [SUSPENaion-bridae.]
" chain-bullets, s. pl. [Cнаin-внот.]
Like two chain-buthots, sine by aide, will iy
Thorow the jawes of death

## chain-cable, s.

Naut.: A cable made of iron liaka. They are not aew; Cassar found them on the shorea of the Britiah Channel. Smyth, in hia Sailor's Word-Book, says that in 1818 he saw upwards nf eighty sail of veasels with them at Wesenzann, na tha Lago di Garda. They hava Desenzann, nn the Lago di Garda. They have all but auperseded hemp cables in recent
times; they are divided into parts tifteen times; they are divided into parts Hifteen
fathoms in length, which are conaected by ahackies, any one of which may be alipped in emergency; at each 77 fathoms a swivel used to be inserted, but in many cases they aro now dispensed with. Chain-cables were madd ia England by machinery in 1792, and introduced into the British merchant-service by Captsin Brown of the "Penelope," West India nicrchantman, 400 tons burden, 1811. The cable had twisted links. Chain-cablea are generally made in lengths of from 121 to 25 fathoms; each length is usually pravided with a awivel. The leagths are joined together by a swivel. Tha leagths are joined together by
shnckles (q.v.). A cable'alength is 100 fashnckles (q.v.). A cable' c -length is 100 fa-
thoms of 6.08 fcet esch, and is one-tenth of a thona of 6.08 fcet esch, and is ne-tenth of a
nautical mile. Chain-cahles are stowed in chain-lockers, generally near the mainmast, or just before the engine and boiler compartment. The locker-spsce required may be
found by the following rule: Multiply the square of the diameter of the cable-iron in inches by 35 . The product is the apace required in cubio feet, nearly. Four kinds of apparatus are used for regulating or checising the motion of the cable as it runs towards the hawse-holes, and for holding on by the cable after the sachor has taken hold. These are Controllers, Bitts, Stoppers, Compressore (q.v.).

Chain-cable compressor: 1 curved arm of lroa which revolves on a bolt through an eye at one end. At the other is a larger eye in which a tackle is hooked; it is used to bind the cable egainat the pipe through which it is passing add check it from ruaning oat too quickly.

Chain-cable controller : A coatrivance for the prevention of one part of the chain riding on another whila heaving in.

Chain-cable shackles: Uned for coupling the parts of a chain-cabie at varinus lengthe, 80 that they may be disconnected when circumstance demands it.
chain-corai, s. An elegant Europeas apecies of fossil, Catenipora escharoidse.

## chain-conpling, s.

Railroud Engineering

1. A aupplementary coupling between cars, as a aafety-devica in case of aceldental uncompling of the prime connector.
2. A shackle for a chain whereby leagtha are united as in a chain-cable, or a shackle or clevis to unite a chain with an object.
chain-fastening, s. A sailor's bead, or cable mooring.
chain-gang, s. A gang or number of persons chained together, in order to pravent the escape of any one.
chain-gcar, s. A form of cog-gearing In which an open linked chain catches up the cogs or sprockets of the wheel, ald is the meas of motion thereof, or conversely.

## [Cbain-wheeln]

## chain-guard, s.

Hor.: A mechaniam in watches provided with a fusee, to prevent the watch being overwound.

## chain-hook, s.

Nautical:

1. An irou rod with a handling aye at onf end and a hook at the other for handling the chain-cable.
2. A cable-stopper which clampa the link of a chain between two other links.
chain-inclinometer, s. A form of level in which the inclination of the surveyor's chain is indicated on a scala dy the pointer on the end of the level.

## ohain-linot,

I. A succession of loops on a cord, each loop in auccession locking the one above it, and the last one locked by passing throngh it the end of the cord.
2. A kind of knot used in splicing. [Ksor.)
3. Tha loop-stitch of a ome aswing-machines [Stitch.]

## chain-urter,

Naut. : A cast-iron grooved rim, with projectiona, aituated at the foot of the capstanbarrel, and forming tha drum around which the chain-cable is wound in weighing anchor.

## chain-lock-

er, s. The same
(q.v.).

Chair-locher ріре:
Neut.: The iron-boundopening or section of pipe passing and through which the chain. cable passes to or from the it is stowed.

## chain-mail.

A kind of armaur made of interlsced ring or links.

Cite, făt, färe, amidst, whãt, fâll, father; wō, wět, hëre, camel, hẽr, thêre; pine, pǐt, sire, sïr, marine; gö, pơt,

chain-moulding, \&
Archit.: A kind of moulding used in the Rowan etyle, made In Imitation of a chain.

Chain-mouldino.
chain-pler, \& A pier which runs out Into the sea and is supported by chains like a suspension-bridge.

## chain-pin, s.

Surveying: The wire pla, having a loop at ane end and polated at the other, employed by aurveyors for merking the termination of each chain in measuring distancea.
chain-pipe, s. An sperture throogh which a chailn-cable passes from the chainwell to the deck above.
chain-plates, s. pl. Plates of irom with their lower ends bolted to the ship's aides under the channels, and to these plates the dead-eyes are fastened ; other plates cap over and secure thern below. Formerly, and atill in great ships, the dead-eyes were linked to chain-pleces, and from their being occasionally made in one, they have obtained this appellation.
chain-pore, s. \& a. (See the compound.) Chain-pore coral: The look-dame for the soological genus Catomipora.
chain-pulley, s. A pulley having pockets or depressions in its periphery, in which lie the links, or alternate links, of a chain which passes over it and gives motion thereto, or conversely.
chain-pump, s. One form consists of an endluss chain jassing around a wheel above snd descending into the water below. In its upward course it passes throngh a vertical tube whose lower end is subnierged, and at whose upper end the water is diacharged. Along the chain are round diske or buttons, which fit in the bore of the tube, and form pistons which elevate the water as the chain ascends in the tube. The cellular punips are of this kind, and when packed piatons sre used, they are termed paternoster pumps, from the resemblance of the chain and buttons to the rosary.
ohain-rule, $s$.
Arith.: A theorem for solving mumerical problems by composition of ratios or compound proportion.

## chain-saw, s.

1. Surg.: A saw whose teeth are jointed linka, used in making sections in deep-scated plsces by passing the saw around the booe and then beck again, so as to give command of both ends to the operator, who draws the ends back and forth.
2. One form of band-saw or scroll-gaw is also msde of separate teeth pivoted or hooked together.

## Chain-saw carrier:

Surgery: A hinged and hroked instrument wherehy the end of the chain-saw, or a ligaturs, by which the saw may be drawn, is passed bepeath a deep-seated bone, and so far up on the other side as to be grasped by a forceps.
chain-shot, . T'wo balls connected either by a bar or chain,
 formerly used for cuitling and deatroying the spars and ngging of an eneny's ahip. Invented by Admiral De Witt in 1660. (Knight.)
the thigh, or the calf of the leg, is torn of hy the chain shot, and epliatern."-W iseman: Surgery.
chain-slings, s. pl. Chaine sttached to the aling-hoop snd mast-head, by which a lower yard la hung. Used for boat or any other alinge demanded.

## chain-atitch, $s$.

1. An ornsmental stitch resembling a chain 2. (In sewing-machines): A loop-stitch, in contradistinction to a lock-stitch. It consiats in looping the uppar thread into itself, on the under gide of the goods; or using a aecond thread to ongage the loop of the upper thread.
chain-stopper, \& A stopper for a chain-cable (q.v.).

## chain-timber, 8 .

1. A timber of large dimenaions placed in the middle of the height of a story, for impart ing atrength.

## 2. A bond timber in a wall.

chain-top, A chain to eling the lower yards in time of battle, to prevent them from falling down when the ropes by which they are hung are shot away.
chain-towing, s. A method of towing ferry or canal boats, in America, by means of a chain which ia laid in the bottont cr the watercourse, but with one end on the deek of Watercourse, but with one end ou the deck of
the boat, where it is wound round a windlass the boat, where it is wound round a windlass
as the boat advances. it was first introduced as the boat advances. It was frst intioduced
by Marshal Saxe in 1732, in France, for transporting war material. The steam ferry between Portsmouth and Gooport is worked by towing chains.

## chain-wales, :

Shipbuilding: One of the walea or thick planks bolted to the ahip's sides and serving for the attachment of the chains to which the ahrouds are connected. [Channel.]
chain-well, s. A receptacle below deck for containing tho chain-cable, which is passed thither through the deck-pipe. It is also called a Cbain-locker.
chain-wheel, s. A wheel fitted with pprockets adapted to rcceive the links of the chain anccessively. The power may be communicated by the wheel to the clain, or converscly.

## chain-work, s.

1. Ordinary Language:
(1) Work with open apaces like the links of a chain.
" Nets of chequerwork, and wreaths of chatnuonk,

(2) Applied to articles of manufacture in wiltich cordage or thread is linked together in manner of a chain.

## 2. Technically:

(1) Hosiery: (See extract).
"This texture [stocking-knitting] is totally diferent froun the rectangular decusestion which coustitutes of a single thread uuitud or looped together in a Deecu liar manner, which is called strek lug btitch, and poune times chainwork"-Ure: Dictionary of Arts, Manu
(2) Naut.: Chains laid over the oides of vessels, in order to deaden the eflects of slot
or shefl.
çhāin, * çhaeynyn, v.t. [Chain, s.]

chāi'-qeql, "chel-mel, chey-sil, a. [0. Fr. chaisel; Fr. cheinsil; from Mod. Lat. camisile, from camisa $=8$ shirt.] Fine linen used in the Middle Ages.
"Pitche and cheisel al bibled."-Eeven Sages, 1810.
çhāis'-ti-fie, v.f. [Lat. cast ficuts = msking chaste or pare; castus = chaste, pura; facio (pass. fo) $=$ to make. 1 To chastise.
"Heirfor to dant thir attemptatio of 1nglismen. 1 fad nis thing es expedient so to be ponfderat with the Crom. xa
chat (1), v.t. [Check.] To check.
chack (2), v. h [A word formed in imitation of the sound produced by the action.]
3. To gnssh, to snatch at an object with the chopa, as a dog does. Properly it expresses the sound made, "when he misses his aim." (Rudd.). [Cracx.]
4. The sharp sound insde by any fron aubstance, when entering into its accket, as of the latch of a door when it is shut; to ciick.

T To chak to: To shut with s sharp sound.
ghak, 9. [Снеск.] The act of checking, stop.
çhăk'ẽr, s. [Checouer.] A chess-board.
"Ane auld chaker with the men of tabllis thairto."
çhăk'-II, s. [SHackle-bone.] The wrist. (Scotch.)

Gold birscelets on thair chakita hings.

Ghǎk'-kir, s. [Chequuer, Chekker.] The 'Exchequer. (Scotch.)
çhǎl-ançe, 3. [Challenoe.] (Scotch.)
"chăl-an-drie, * chal-an-dre, * chalaun dre, s. [Fr. calondre: lat. calandrus = a lark.] A singing-bird, a lark.
"Chalandre and wod wale."-Land of Cokayna, 97.
ohal-ăs'-tic, * chal-ăs'tick, a. \& s. [Gr. $\chi_{a}{ }^{\wedge} \dot{a} \sigma$ тıкos $($ chalastikos) $=$ relaxing; $\chi a \lambda \hat{\omega}$ (chalo) $=$ to relax.]
A. As adj.: Having the property or quality
of removing stiffness or rigidity of the body.
B. As subst. : A medicine having the power or quality described under A.
 aza) $=$ (1) hail ; (2) a pimple.]

1. Bot.: That part of the seed where the nucleus joins the seminsi integuments: it represents the base of the nucleus, and is invariably opposite the end of the cotyledons.
2. Veterinary: A disorder in swine, in which the flesh becoues full of tubercles.
3. Physiol. : The treddle of an $\theta_{j} g$, or the knotty kind of string at each end, whereby the yolk and white are connected together.
4. Med.: The same as Chalcuium (q.v.).
cha-làz'-al, a. [Chalaza.] of or pertaining to the chalaza. (Lindley: Introd. to Bot.)
chă1-a-zĭf-ẽr-oŭs, a. [Mod, Lat. chalaza, sud Lat. fero $=$ to bear.]
Biol.: Noting or pertaining to the layer of alburaen surrounding the yolk of an egg, which is called the chalaziferous membrane, and which, when iwisted, gives rise to the chslaza [Chalaza, 3.]
 hail (from the size and shape).]
Puthol.: A small tubercle on the eyelid, commonly called a atye.
chă1-bot, cha'-bǒt, s. [From Fr. chabot, dimin. of cab or chab $=\mathrm{s}$ head. (Littre).]
Her. : A name given in biszonry to the fish called Bullhead, or Miller's Thumb.
chă1-căn'thīte, s. [Gr. xanxós (chathos) = brass: ä้ $\nu$ or (anthos) $=s$ flower, and Eng. suff. -ite (Min.).]
Min.: A triclinic mineral; colour bluc, of different shades, sometines s little greenish ; subtranaparent or translucent ; hardness, 2.5 ; sp. gr. 2"213. Compos. : Sulphuric acid, 32.1 ; oxide of copper, $31^{\circ} 8$; water, $36^{\circ} 1$. It occurs in mines in Wicklow and elsewhere.
chà1-çe-đon' Of or pertaining to chalcedony. (Brande)

 (Chalkedón), a town in Asis Minor.j
5. Min : A cryptocrystalline variety of quartz, hsving the lustre nearly of wax, and either transparent or translucent. Colour, white, greyish, pale-brown to dark-brown or blsck; tendon-colour common; sometimes deficate biue. Aiso of other shades, and then baving other names. It is a true quartz with some disseminated opal-quartz. Composition : Silica, 98.87 ; sesquioxide of iron, 0.53 ; car bonate of lime, 0.62 . (Dana.)
6. Scrip.: It is not quite certain that the chalcedony of Rev. xxi. 19, la the mineral now designated by that nsme. The probabilities, however, are in fsvour of its being so.
"The firnt tonndation was a jasper; the oeqond,

- Chaicedony of different colours, arranged in stripes or layers, is called agate; if the stripes or layera sre horizontal it is called onyx; chrysoprase ia green chaicedony, carne lian a flesh-red, and sard a greyish-red variety. (See these words.)
 onyx.]
Min.: The name applied to those agates in which opaque white chalcedony alternates with the transiucent grey variety.
chăl'-ci-dēs, chǎl'-çis (1), s. [The first form is properly the pi. (but used as sing.) of the second, which is Latin from Gr. xaxcis (chalk is) $=$ a klad of lizard.]

Zool.: The type-genus of the Chalcididx.
chăl-çid'-i-dso (I), chăl'-çi-des, s. pl. [Mod. Lat. chalcid(es), or chatc(is) (1); Lat. fem. pl. adj. suff. -ide.]
Zool. : A family of tropical American snake like lizards, but with minute feet. 8ome suthorities use this name for the Tejide ( $q$.v.)
chă1-čId-İ-dse (2), s. pl. [Mod. Lat. chalcis (2), gen. chalcid(is); Lat. fem. pl. adj. soff. -idke.]

Entom.: A family of parasitic Hyroenoptera, of which Chsicis (2) is the type.
chăl'-cI-huîtl, s. [Nstive Mexican deme.]
Min.: A mineral, identified with jadeite (q.v.), or with turquoise (q.m).
chall-çis (1), s. [Chalcides.]
chat'-cís (2), s. [Gr. Xadkós = copper, from the metallic coloration of the adult species.] Entom: The type-genus of Chalcidide (2). They are minute parasitic insecta, undergoing metamorphosis in the bodies of their hasts.
chăl-çi'-tēs, 3. [From Gr. xadxítrs (chalkitas) = containing capper, coppery.]
Ornith.: A genus of Cuculine or parasitic Cucknos. They are adorned with phanege of a brilliant metallic luatre.
 (chalhitis) $=$ the name of a minerai.]
Min. : A disintegrating pyrites, iron or copper, impregmated with vitriol. (Dana.)
chăl-cot-cite, s. [Gr. XaNxós (challos) $=$ brass; Eng. suff. -ite (Min.).]
Min. : An orthorhombic mineral of a ieadgrey colour, often tsrnished with bine or green. Hardnesa 2.5-3. Sp. gr. 5.5-5.8. It occurs in Cornwall, Scotland, and many other localities. Compos.: Sulphur, $19.00-21 \cdot 90$ copper, $11 \cdot 31-79.50$; iron, 0.28-0.49. (Dana.)
chă1 ${ }^{r}$-có-dite, s. [From Gr. xadeocolif (chalkoeides) = liks brass or copper, and Eng suff. -ite (Min.) (q.v.).]

Min.: A variety of Stilpnomelane (q.v.) It consiafs of minute fiexible acales of submetalic lustre.
chăl'-ct-gräph, s. [From Gr. Xaגxós (chal kos) $=$ conper, and үpaф' $(g r a p h e)=$ a drawing or delineation.] An engraving on copper or brass.
chăl-cơg'-raph-ẽr, 3. [Gr. Xaixóypaфo (challographos) $=$ an engraver: $\chi_{\text {anacós }}($ chaultos $)$

屯ate, făt, färe, amidst, whãt, fâll, father; wê, wĕt, hëre, oamel, hễ, thêre; pīne, pit, sire, sir, marîne; gō, pơt

## 143. p. sio. <br> Walk your chalks : [WaLx]

## II. Technically:

1. Min. © Chem.: A masslye, opaque carbonate of lime, of a white, greyish, or yellowish colour, with an earthy fracture. Sp. gr., 1.8$2 \cdot 8$. Dana places it along with calcareous msrl, under the heading soft, compact limestone, conatituting his 21st variety of the miaeral species Calcite. It forms extenaiva rocks in the sonth and nonth-easi of England.
2. Geology and Palceontology:
(1) Spec.: A rock which, when pure, as it often is, is made up of the constituents given noder II. 1 Min. (q.v.). A great belt of it crosses England diagonally from the eastern to the aoutharn coast, and it is impassible to approach London from the east, weat, Dorth, or aouth without having chalk rocks, at a distance often very limited, beneath one's feet. Their appearsnce is Camiliar, owing to their being conspicnously displayed in the chalk cliffs of Dover, and in varions chalk pits ia the southern counties, on the escarpments on the sides of the Northern and Southern Dowas [Dowss] and in railway cuttings. The chalk, properly so called, consista of The chalk, properly so called, consista of the highest portion of the Upper Cretacoous System, and is divided into Upper White Chalk with Flints and Lower White Chalk withont Flints. [Fuint, Geol.] The larger animal fessils of the White Clalk consist of Crinoids and other Echinoderms; Cephalopod Molluses, specially Ammonitcs, Baculites, Belemnites; Brachiopods, such as Terebrathle, sc.; of other Molluscs, IRudistide, \&c. ; of fish, teeth of Cestrscionts: of reptiles, Pterodactyls, Turtles, and Oviparous Saurians. Of the smaller organisma, Globigerine, and other Forsminifers abound; in fact, chalk is mainly composed of these cemented together by a calcareaus paste. The examination hy Sir Leopold Mcclintock. The examination hy Sir Leopold Meclintock, Huxley, Dr. Wallich. and others, of the Atlantic ooze obtained in connection with the laying of the telegraphic cable to America, and in the aubsequent explorstory expeditions of the Porcupine, Challenger, de., have shown that the noze now being deurosited at a depth of from 5,000 to more than 15,000 feet in the Atlantic is essentialy chalk, with Globigerinæ and other Forminifers, the former apparently identical with exiating species. Most other organisms are extinct, though a few are not. This discovery dor's not ahorten by an hour the period which has elarsed since the chalk first began to he formaed, but only proves that arst begas to he formed, but only proves that a process which was thought to have termi-
nated or internitted, still goes on. As chalk nated or internitted, still goes on. As chalk is a deep-sea formation the vegetabl
(2) Gen.: The Cretaceous rocks in genersl, whetever their actual eomposition. [CaETAcenous Fobmation ur System.]
3. Comm.: When purified, chalk is called whiting and Spanish white In England. Pure chalk shonid dissolve readily in dilute muriatic actd, and the solation should afford no precipiactd, and the solution should afford no precipi-

I. Ordinary Language:

* 1. A fighter, a warrior, a boxer.
"Onampyon or campyon. Cumpio, athleca, pugil."
"A champioun is in the place
Gamelyn, 20,

2. One who sngages in a duel or battis on behalf of another.
"Tis therefore sober and good men are sad
And sickly, while her champions wear thelr hearts
 "What checks the fiery nonl of James ? Huys gite that champion of tbe dames
scoatt: Harmion, V1. 20.
3. A atout-hearted warrior ; a noble knight. The meth of these champions pruad
Seetued like the burstiuk thunder-cloul soott: The Lay of the Last Minstrel, iil. 5.
4. One who is the acknowledged superior in any exercise.
5. A atrong aupporter or defender of any thing.

* II. Law: One who maintained a cause by wager of battie. When a tenant in a writ of right pied the general issue, i.e., that he had mora right to hold than the demandsnt to recover, and offered to prove it by the body of his champion, the demadiant had the option of refusing or accepting the proposal. If he did the latter, then the temant's chamurion being produced threw down his gage or slove, whirh his opponent's champlon took up. A piece of ground, aixty feet square, was then enclosed with lists. Within it the chanpions, if brave enough, fought tiil the stars appeared; ; and if the champion of the tenant heid his own till that time, he gained the vectory for his employer or friend, while if vanquished the land for which he contended was lost.

Sometimes the fight was terminated prematurely by one of the champlons proving "recreant," and pronouncing what Blackstone calls "the borrible word 'craven.'" The man who did so was belleved to be permanently diagraced, and was never in future put on a fury, or even allowed to appear as a witness in a court of law.

B. As adj.: Holding the place or position of a champion ; the acknowledged auperior in anything.
"The emperor"s wish to echeck the tyranny of the
profects and tax-gatherers wne ntrougly markedin the profects and tax-githerers whe troygly marked in the
case of the champion Aghtiug-cock."-sharpo : Hitory of $A g y p t$ ch $\times 1$
TChampion of the King, or Queen, or of the Realm: An ancient officer who, at the coronation of our kings, whilst the king was at dinner, rods armed cap- $\dot{-}$-pié into Westninster Hali, and wtthaprociamation mads by a herald tbrew down hia gauntlet, aod challanged any who disputed the kIng's right to the throme to single combat. His fee was a gilt cup, with a cover, filled with wine. The cerbmony has been discontinusd.
If For the differeace between champion and combatant aee Combatant.
çhăm'-pí-ón, v.t. [Сеамріол; 8.]

* 1. To challenge, as to a combat.

Rather than "The seed of Banquo kings!, Fate, into the list,
And ehamplon me to thi utteranoe "
2. To fight for or defend as a champion ; to support, protect, or defend.
çhăm'-pǐ-öned, pa.par. or $\boldsymbol{a}$. [Сhampion, v.] Furnizhed with or defended by a champion.

Long'ellow: The Song of $H$ ia wontha, ${ }^{\prime \prime}$,
8. An opportunity offered.

The last chance: The last remsining hope. The main chance: The principal or most im. portant opportunity offered to one.
To take care of or mind the main chance: To watch one's best opportunity to look after oneself, or one's own interests, before those of others.

- (1) After pointing out the heathenish character of the three words chance, fortune, and fute, Crahb thns distinguishes between them:-"In this ordinary sense chance is the generic, fortune and fate sre specific terms chance applies to all things personsl or otherwise ; forture and fate are mostly said of that: which is personal. Chance neither forms orlers or designs; nelther knowledge or ln tention is aitributed to it; its events are uncertain and variable : fortune forms plans and designs, but without choice. we attribute to it gn intention without discernment : it is said to be blind: fate forms plans and chsins of ranses ; intention, knowledge, snd power or manses intention, knowledge, snd power are attributed to it; its views are fixed, its disults decisive. A person goes as chance directs hin when he has no express ohject to deternine his choice one way or other; his fortune favours him, if without any expectation he gets the thing he wishes; liis fate wills It, if he reaches the desired point contrary to what he intended. Merns success in their oudertakings depends oftener on chance thas on their slility [?]; we sre ever ready to ascribe to ourselves what we owe to our gool fortune; it is the fate of some men to fsil in every thing they undertake.
(2) Chance snd probadility sre thus diacrinii-asted:-"These terms are both cmployed in forming an estimste of future events; hut the chance is either for or astainst; the probar bitity is always for a thing ; a chance is hut a degree of probaliility."
(3) The following are stated to be the differences between chance and hauard:-"Both these terms are employed to mark the course of future events, which is not discernible hy the human eye. With the Deity there is meither chance nor hazard; His plans are the result of omniscience, but the designs and sctions of men are all dependsnt on chance or sctions of Chance msy be favourahle or mofahazart. Chance msy be favourable or unfa-
vourable, more commonly the former; hazard is alwsys unfavourable; it is properly s apecies of chance. There is a chance either of gaining or losing: there is s hazard of loaing.
(4) The following sre the differences between accilent and chance. ". . . Accident and chanoe may be used indifferently in the colloquial expreasion to happen by chance or by accident; but the word accident is used only in respect to particular evente, as it was pure accident; but chance is employed to
denote a hidden senseless cause of things as opposed to a positive intelligent cause." (Crabb: Eng. Synow.)
(5) The Penny Cyclopodia states briefly and pointedly that the word chance has been used in two senses, as opposed to providence and as opposed to certainty.
B. As adj.: Happening accidentally ; casual, accidental, fortaitous.

Now shoold they part malleloun tongues would any,

a grating ; dinin. of cancer $=\mathrm{a}$ crab.]
I. In ancient times:

* 1. Originally (in the Roman Empire): $\mathbf{A}$ petty officer stationed st the fence of bars or lattice-work in a law-court, to introdnce such functionsries as were entitled to pass inside. The Emperor Carinus, the imme diate predecessor of Diocletian, gave great offence by making such a cancellarius prefect of Rome.
*2. Next (in the Eastern Empire): A secretary who sat inside the lsttice-work to write, slso with judicisl functions, and ultimstely with a superintendence over the other officers of the empire. From this high dignity to that of a modern English Lord Chancellor the transition is easy.

3. Then (in the church of Rome durtig mediceral times): An offleer standing to the bishop much in the same relstion as the cancellarius of the lower empire did to the emjeror.
II. In more modern times:
4. On the Continent : An officer of the highest rank, with a certain jurisdlection over cther civil' functionsries. The powers of the chanceilor, however, varied in the different nations.
5. In England:
(1) In the Civil Government: A дame appliod

Cate, fat, färe, amidst, whãt, fâll, father; wē, wĕt, hëre, camel, hẽr, thêre; pĩee, pĭt, sīre, sĩr, marîne; gō, potit

to various functionaries, some of them of very hlgh rank ; viz., to-
(a) The Lord Chancellor: Originally he was the king's chief secretary, to whom petitions were referred, whence be was called referendarius. This title enbeequently gave place to chancellor, which first occurs, accordiog to Selden, in Euglish history about A.D. 920 Selden, in Euglish history abont A.D. 920.
Being generally an ecelesinatic, be became Being generally an, ecclesiastic, he became Keeper of the Eing $\theta$ conscience. Having to express the sovereign's views in cases appealed to him from the Courts of Law, he gradaally acquired a great legal standing himself, a ad fnally developed into the potent personage now denominated the Lord Chancellor, or more fally the Lord High Chancellor. He ls now the highest judicial functionsry in the kiogdom and ranks above every temporal lord, exceptthg those of the blood royal ; he is also above every spiritual lord, except the Archbishop of Canterbury; he is keeper of the great seal he presides' in the House of Lords of which he io prolocutor; he is a cabinet minister and privy conpcillor; presides in what was the privy conpcillor; presides in what was the court of Chancery (once spelled chancelry), but is now the Chancery Divieion or the Supreme Conrt; appoints all Juatices of the peace throaghoot the kingdom ; is the general guardian of all lofants, idiots, and lunatics risitor of the hoapitals sad colleges of royal foundation ; and patron of all livings onder twenty marks In valne. He goes out with the ministry of which he is a member.
(b) Chancellor of the Exchequer: Properly the under-treasnrer of the Exchequer, the head treasurership being held, not by an ladividual, but by the Lords Commissioners of the Treasury. The Chancellor hae, however, a very powerful voice in connection with the Exchequer. He must be in the House of Commons, and may b's tts leader, and also Prime Minister.
(c) Chancellor of the Duchy of Lancaster: An offcer who presides, either himself or by deputy, in the Duchy Chamber of Lancaster, deciding on all matters of equity connected with lands held of the crown in that Duchy.
(2) In the Unitersitics: The titular head of university. The offce is ooly honorary. Under him ia a Vice-Chancellor, who is the actaal working head.
(3) in the Church: Specially two kinds of officers, viz. :-
(a) Chancellor of a Catheiral: One of the our chief dignitaries in the cathedrals of old foundation.
(b) Chancellor of a Diocke or of its Bishop: A hw officer who acts as vicar-geaeral for the bishop, and holds courts fis him to decide on casea tried by ecclesiastice] law
(4) In Heraldry: A fuwctionary, viz., the Chancellor of the Order of the Garter, or other military onders. As officor who acts as aecre tary to the order, sealing the commissions aod mandstes of the Ascembly of the Knights.
3. In Scotland: Till the Union, Ia 1707, there was a Chancellor of Scotland, who was the hesd of law as well as equity, thus having gained a step beyond what the English Lond High Chaocellor had attained, he being specially head io equity, though with superiority to the judges in law. There are also a Chancellor aad Vlee-Chancellor in each of the Scottish Lniversities. The foreman of a jury was also sornetimes called its chancellor. (Scott: Heart of Midlothian.)
4. In freland: There is a Lord High Chan cellor of Jreland. There are Chancellora and Vice-Chanceilors in the Jrish Uaiversities and colleges.

> *. A secretary.
"One Gilbert Pock, his chancellor." - Shakesp.
ghan'-çěi-1õr-shǐp, 8. [Eng. chancellor ; -ship.] The office or position of chanccllor.

Fr. chancellerie chancelrie $=$ "a chaucery court, the chancery, eeale office, or court of every parliament" (Cotgrave) ; from Low Lat cancellarin $=$ a place where recorda are kept, a recordoffiee of a chancellor, from cancellarius $=$ a chancellor.]

## A. As substantive

1. The Court of Chancery was the Mighest court of judiesture next to the House of Lords. The Lord Chancellor presided In thie court, having under him the Lords Justicas and Vice-Chencellors, who bet for him in separste courts, snd the Master of the Rolls, who had the keeping of all the rolls and record of the Court of Chancery, and also presided of the Court of chancery, and also presided in a conrt of his own. The court or chancery was a court of equity. Under the Judicature Act of 1873 the powers and jurisdiction of the Court of Chencery were transferred to the High Court of Justice, and it now exista as the chancery division of that court. In the United States there are Courta of Chaacery in several of the origioal thirteen otates, bat in most of the etates the priaciples of equity are administered in the higher courts of law,

To change round: To alter ; to change aides. To change sides: To forbake one'a party, or side, and join another.
To change the mizzen :
Naut. : To bring the mizzen-yard over the other side of the mast.
B. Intransitive:

1. To be aiterel ; to undergo change
"Hs chaungesh tram water ioto biod", worice \& Bloutch, sos.
2. To become altered in appesrance.
"Tho chamgoon gan hare colour in here race"
3. To pass from one atate or phase to anot her.
"I arn weary of this moon ; would he would change."

4. To take or aubstitute one garment for another.
5. To turn gour or aeid, to become tainted.

- (1) Crsbb thus distinguisbes between to change, to alter, and to vary:-We change a thing by putting a nother in its place; wa alter a thing by making it different from what it was before ; we vary it by altering it in differeut manners and et different times. We change our clothes whenever we put on others: the taiior clters the clothes which are found not ty fit, and he raries the fashion of making them whenever he makes new. . A thing is changed rithout altering its kind; it is altered withont destroying its identity, and it is varied withont destroying the similarity."
(2) He thus discriminates between to change, to exchange, to barter, and to substitute:-"The ider of putting one thing in the place of another is eommon to all these terms, which varies in the mammer and the object. Change is tlie generic, the rest are speeific terms: whatever is exchanged, bartered, or substituted, is changed; but not vice versai. Change is applied in general to things of the same kind, or of different kinds; exchange to articles of property or possession; barter to all articles of merchandise; substitute to all matters of of merchandise; subsinute to all matters of
serviee snd offee. Things rather than persons service snd offee. Things rather than persons changing, although whatever one has a conchanging, although whatever one has a con-
trol over may be changed, or exchanged; a trol over may be changed, or exchanged; a
king may change his ministers; goveruments exchange prisoners of war. Things only are the proper objects for batter; but, ty the ahame of humanity, there are to be found people who will barter their conntrymen, and even their relatives, for a paltry trinket. Subatiuting may either have persons or thilus for an object; one man may he substitutel for apother, or one word substituted for annther. The act of changing or substituting requires but one person for an agent : that of exchinging and battering requires two: a person changes his thinga or substitutes ona for another; hat one person exchunges or barters with another. Change is used likewipe in. with another. Change is used likewife in,
transitively, the others always tranaitively; transitively, the others always ransitively;
things ehange of themaelves, but persons always exchange, barter, or substitute thiogs. In thie figurative alplication these terms bear the same analogy to each other. A person changes his opinions; but a proneness to such changes evinces a want of firmuess in the character. The good king at his death exchanges a temporal for an eternal crown. The mercenary trader barters his conacience for paltry pelf. Men of doguatical tempera substitute assertion for proof, and abuse for argument." (Crabb: Eng. Synon.)
çhānge, a \& a. [CHANOE, v.]
A. As substartive:
I. Ordlnary Language:

1. Literally:
(1) The act of altering or changing ; a substitution of one thing for another.
"Nothing can cure this part of til-breediog, hut
(2) The set of passing from one atata or phase to another; alteration, mutation, vicisaitude.
"Hear how Timotheur varions lasn surprize,
And hid altermate passions hall and rien ;
While at ench chatige the ron of Lybinin Jove
Now hurns with glory, and thent Helts with love-
(3) The state or quality of being altered.

Thern Is in you liat,
shakesp.: A notony \& Cluopatra, ii. s .
(4) That which is surhstituted for another. 2 King took with him . . . Ten changes of mimeat."
(5) An alteration in the order or auccession of a series. [II. 3, 4.]
(6) The aet or process of giving and receiving things in exchange.
(7) That which is given to exchange for anything of a higher or lower denomination. (A shortened form of exthange, q.v.).
"Wood buys up our oid halfpeoce, sad from thence
the preaent want of change arises:.
(8) The balance of money paid beyond the price of goods parchased, and therefore returned to the purehaser.
(9) A succeasion of events.
" O wood'rout changes of a fatal socoee.
*2. Figuratively:
(1) Death; the moment of exchanging life for death.
(2) Novelty, variety.
"Perbap you would like an. . . 1 liney instead of a Temple, UL vi. ch. xi
II. Technically:

1. Comm. : A place where merchants and others meet to transsct businesa. (Properly a curtailed form of exchange, q.v.).

- The bar. the beach. the change, the echooly and pulpits are
LEserange.
"He fouud that he could not go ou Change without belag followed roond the plazzal
Maculthy: Ahst. Eng., ch.

2. Hunting: Applied to a stag, whose acent has been crossed by chance by lounds in pur* suit of another, and who is pursued in his turn.
3. Music:
(1) The word used as the short for change of key or modnlation. Changes are of three kinds: the Diatonic, the Chromatic, and the Enharmonic changes. (See these words.) (Groves.)
(2) An alteration or permutation in tha order in which a set of bells is rung; alternate or varied peals rung on lells.
 and eve bellio orie hundrod and tweuty."-Huder:
4. Math. : The permutations, alterations, or variations which any mumber of things may undergo. or are capable of in respect of position, order, \&c.
5. Astron.: The phases through which the nioon passes.

The seedr or roots, and set zome of thems imme-

6. An inn or ale-house. [Chanoe-houge.]

- Change of voice:

Music: [Larynx.] (Stainer a Burrett.)

- To ring the changes:

1. Lit: To ring a set of bells in varied peals. [II. 3.]
+2. Figuratively:
(I) To phay upou words by alight changes in order or meaning.
"Easy it may le to contrive new posturas, and ring
(2) To render a money transaetion over a counter or har ss complex as possible with the vlew of fraudnlently obtaining baek more change than one is entitled to, as for instanes a half-sovereign which one has pald and ailver for it. (Slang.)
E Crabb thua diatinguiahes between change, variation, snd vicissitude :-"Change consists
simply in ceasing to be the same; variation consists in being different et different times vicissitude in being alternately different and the same. All created things are liabie to change; old things pass awsy, all things become new; the humours of men, like the elements, are exposed to perpetital variatioxs. human affalrs, like the seasons, are subject to frequent vicissitudes." (Crabb: Eng. Symon.)
B. As adf. : (See the compounds).
change-church, s. One who hoids various beneflces in anccesslon.
Fuller: iforchiea Hercht changeckwrch in Rome"-
change-house, e. An inn, an ale-honse. "When tha Lowlander, weot todrink a eherupplag hotise "-Strollott : Bumphry Cinker (Sept. 8).

"That nobody went tato the house but the thre hrothers. and Neizon the ehzngekeepor sad the do-
change-pump, s. A pump introducod by the snccessors of Boulton and Watt in connection with the boilers of sea-going vessels, in order to keep a continual change in tha body of water, removiag the ouper-salted water and aubstitnting sea water. The blow-of cock, which, being turned at tntervals, allows a portion of the enper-aalted water to eacape overboard. Extermal condensation and fresh-water boller-supply are Dow the mode. (Kntght.)
change-ringing, s. The art or practice of ringing a peal of bells, ao as to make the greatest possibla numher of permutations.

## change-wheel, 3

Mach. : Change-wheels, having varying nnmbers of cogs at the same pitch, are used to connect the main arbor of the lathe with the feed-acrew, ao as to vary the relative rates of rotation and conscquently the pitch of the acrew to be cut. The first application of ehauge-whaels to a lathe is aupposed to have been in a fusee-cutting lathe, described in a work, 1741. The change-wheels are interme diate, and journaled in e bracket, whieh permits tham to be brought into engagemen with the rotative and feed wheels respectively. [Screw-cutting Lathe, Engine-latuc.]
I Change-seats, the King's come: A game Scotland. (Jamieson.)
çhānge-a-bill-i-ty̆, çhaunge-a-ble-te, s. [Eng. changeable; -ity.] The quality of being changcalle or aubject to change ; changeableness.

çhānge'-a-ble, *̧haunge'-a-ble, a. [Eng. change; -able.]

1. Capsble of being changed.
 1ii. 2.2
2. Liable to clange, fickle, incoustant.
"This worlds life that chaungeable ee".",
*3. Having the quality of exhibitiog different appearances.
 Twelfth $w$ ight, in 4
I Crabb thns distinguishes between shange versatile:-"Changeuble is said of persone or things ; mutuble is said of things only: homan beings are changenhle, luman affairs are mutable. Changeable respleets the centiments and opinions of the miud; pariable, the state of opinions of the minut tariable, the stang : inconstant, the affections ficke the inclinations rud attachments ; versatile, the inclinations and attachments $i$ rersatule, jerson rejects what he has once emhraced in order to take up something new; a variable persou likes and dislikes alternately the sams thing; an incoustant person likes nothing long; a fickle person likea many things snocessively or at the same time; a versatile person has a talent for whatever he likes. Changeable, rariable, inconstant, and fickle, as applied to persons, are taken to the bad sense; but versatility is a nstural gitt, which may be employed adrantageously." (Crabb: Eng. Synan.)

IChangenble chant: [Cunnt.]
Changeable gauge-truck: A means of adjuattog wheels to different gauges of tracks by making the wheels adjustable on the axis. (Knight.)

## channeling-machine, s.

1. Boot-making: A machine for cutting the channels in boot-soles, to allow the thread to bury itseld in the leather and be protected from immediate wear. It consists of a knife, which makes an oblique cut in tha sole, to a gauged depth and regulated as to diatance from the sole-edga by a guide.
2. Stone-working: A machine heving a aeries of jumpers or chisels which make a groove across the face of a block in the quarry, or detached. It has a gang of cutters operated by direct-acting stean-cylinder. The cutters have direct motion from the piston. The value is reversed at the blow of the cutters ; or, in case of no blow heing given, it is reversed hefore the cylinder-hottom is tonched by the piston. The cutter-har ia adjustabla on the cylinder-bar, to suit the depth of groove-cut. The whole mechaniam ia monnted on vertically adjustable rollers, and the feeddevice is operated from the cross-head.
channeling-tool, s. A tool uaed for cutting a chsnnel near tha edge of a pieca of leather, so as to hida the scwing. Used is making round work, auch as running reina, whips; also in ainking groovea in shoe-soles, to hide tha stitching. The cutteris adjustable on the shank, for penetration, and the guida at the end to gange tha diatance of the channel from the elge of the leather. (Knight.)

* çhăn'-nẹl-lize, v.t. [Eng. channel; -ize.] To hold or carry as in a chamnel.

çhăn'-nel-1̆y, a. [Channel, s., A. 1., 1 (4).] Gravelly ; full of gravel.

"Lady Spratt. . . hait taken odischargod eervent
II In character: Appropriata, in keeping
with other things. with other things.
 Out of character: Inappropriate, incongruous.
B. Technically:

1. Law: Witnesses to the character of a prisoner may be called, but they must not go ioto details. When there has been a previous conviction, it may be proved after the prisoner ia found guilty.
2. Nat. Science: A ahort definition express. ing the essentisi marka hy which au animal, a plant, or a minersl is distinguiahed from the others which most vearly resembie it.
3. Music: A general nsme for the signs employed in music, auch as brsce, biad, bar aharp, flat, natural, clef, stave, shake, \&c.
4. Roman Theol.: The change wrought in the recipient of the Sacrament of Baptiom or Holy Orders.

T (1) Crabb thus diatingulahes betweea character and letter: "Character is to letter as the genus to the opecles: every letter is a character: but every character is not a letter. Character; is any printed mark that aerves to designata something; a letter is a species of character which is the constituted part of a word. Short-hand and hleroglyphica conaist of characters, but not of Jetters. Character is employed figurstively, but letter is not. A grateful person has the fsvours which are conferred upon him written in indelibie charocters upon his heart."
(2) He thus diseriminates between character and reputation:--"Character liea in the man; it is the mark of what he is ; it obowe itself upon all occasions: reputation dependa upoa others ; it fo what they think of him. 4 character is given particularly: a reputation is formed generally. Individuais give a charncter of snother from personal knowledge: public oplaiou constitute the repulation. Character has alwsye aome foundation; it is a positive deacription of aomething: reputation has mors of conjecture in it; its aource is hearsay. it is possible for a man to have a fair repula. tion who has not in reality a good charucter: although men of really good character are not iikely to have s bad requtation." (Crabb: Eng. Synon.)

char-cōal, ghar-cole, char-coll, char-kxole, g. a a. [Eng. char, v., snd coal $=$ that whioh is turned to coal or carbon.]
A. As subatantive:

1. Ord. Lang.: The same as 11. 1.
II. Technically:
2. An impure variety of carbon, prepared from vegetable subatances or bones.
(1) Wood charcoal consists of wond burned with but little access of air. Billets of wood are built into a heap, which is covered with earth or sand. The heap ls fired at openings left near the bottom of the pile, and the gases eacape at amall openings above. For making fine charcoal, auch as that of willow, used in the manufacture of gunpowder, the wood is burned in iron cylinders, or rather retorts, in which a procesa of deatructive distillation removes the volatile hydrocarbons, pyroligneous acid, de. By this more perfect mesnes the process is accurately regulated. Charcoal is used in the arts as-a fuel; a polishing powder; a table on which pieces of metal are secured in position to be goldered by the blowpipe; a filtering material; a defecator and decolorizer of solutions and water ; an absarbent of gases and aqueous vapours; a nonconducting packing in ice-houses, safes, and refrigerstora; an ingredient in gunpowder and fire-works; in the galvance battery and the electric light.
(2) Animal charcoal: Used largely in sugarrefining, and as a diainfectaut and filtering medium, is urepared by calcining bones in closed vessels. These are either retorts, similar to those in which coal is distilled for the production of illuminating gas, or they ara earthenware pota piled up in kilns and fired. Charges of fifty pounde of boues to a pot will require, ssy, sixteen hours of firing. The bones are then ground between finted rollers, the dust removed, and the granulated una terial used for charging the filters of the sugar-refiner. The materisl is used for re moving colour, feculencies, sad ferneating ingredieuts from the syrup. [BONE-BLACK FURNACE.] (Knight.)
"Charcole (or charkole, P.), Carbo."-Prompe. Part. "Sonconi lanta longer than oharcoast: and charooal of root, being coaled into great Pleces, insta longer than
ordinary chareoal." Bucon: Naturat History. 2. A name for the finest tin-plates, so called from being manufactured with charcosl fires.
B. As adjective: (See the compounds).
charcoal-blacks, s. pl. Various black pigments cssentially composed of charcoal, the latter formed by burning ivory, bones, vine twigs, \&e.
charcoal-burner, s. A man employed in attending to the manufacture of charcosi.
 Was found dead oy noure charooal-burnerrs"-C. A. Pear
xxv.
charcoal-cooler, a. A wire cylinder in which animal charcoal is agitated and cooled, after revivifying, while a current of air carries off the noxious gases. ( K night.)
charcoal-filter, s. A filter charged with ordinary or atimal charcoal for domestic use, or with animal charcoal for use in the sugarhonse or refinery. (Knight.)
charooal-furnace, s. A furnace for producing charcosl by the dry distillation of wood, and for the collection of the tar and pyroligneousscidreaulting therefrom. (Knight.)
charcoal-point, s. A pencil of carbon prepared for use in the electric-light apparatus. (Knight.)
chard (1), s. [Fr. carde; Ital. carda; Lat. carduus $=$ a thistle.]
Botany:
3. The leaves of the artichoke planta (Cynara scolymus), bound in atraw during the autumn and winter, till they become blanched, and lose part of their bitterness.

char'-tẽr-ǐst, s. [Eng. charter; -fst.] An advocate of chartism; a clartist. (Gent. Mag.)
chart'-ẽr-lĕss, an [Eng. charter; -less.] Having no charter ; vachartered.
mingi protexharterless and naendowed naiversity.

$\dagger$ çhart'-ing, s. [Chant, v.] The act or process of laying down on a chart or map.
"The effectlveness of well-derised processes of chartWayt made Smooth, \& 97.
chart'-ism, s. [Eng. chart $二$ charter ; suff. -ism.] The priaciples or politicsl views of the Chartists as aet forth in the People's Charter.
"Chartism means tho hitter disconteat grown 3erce
chart'-1st, s. [Eng. chart = charter ; evff. -ist.] A natme given to a political party in this conntry, whose views were embodied in a document called the People's Charter. The chief points were-universal suffrage, vote
by ballot, annuai parliamenta, paynent ou members, equal electoral divislons, and the abolition of property qualification for mem. bers. These principles were set out in a bill prepared in 1s3s. The party hecsme divided in the following year, the extreme members advocating the empioyment of force for the attainment of their object. These were knawn as Physical Force Chsrtists. They perpetrated grest outrages at Birmingham on 15th July 1889, and at Newport in Donmonth, on 4 th November of the eame year. Inspired by the proclamatlon of a republic in France early in
1848, they agreed to assemble on 10th April of that year to the number of 200,000 men, snd that year to the number of 200,000 mea, sad march in proction alleged to be aigned by aix mililons of persons. Under the direction of the first Duke of Wellington, the Bank of England, the Post Offce, and other public bnildings were in conaequence temporarily fortifled, whilst troops supported by artillery hell the ordges. About 200,000 civilians were swort in as special constables, among them being Lonis Napoleon. afterwards the Emperor Napoleon III. The petition wss permitted to be delivered, sud was found to have only two millions of signatures, many of them forged. The procession was forbidden, its suppression being facilitated by the auggestive fact that only about 20,000 had actually put in an appesrance at the plsce of readezvous. The rise of the Chartists was in large measure produced by the distress consequent on the existence of protection, and when free trade wasestablished, with the effect of raising wages and chaspening food, the movement died away. Now ons never heara of a Chartist, but it is worth noting that some points of the Charter, and notahly household autfrage and vote by ballots, have been accepted by the legislature, and are the law of the land.
¢hart'-lĕss, a. [Eng. chart; -less.]

1. Lit.: Without s chart or map by which to direct one's course ; not get down on charts.
2. Fig. : Without a guide; wandering helplessly.

A. \& B. As pr. par. \& particip. adj.: (In senses corresponding to those of the verh).
C. As subst.: The act of correcting or pun ishing ; chastisement.
"Chausysynge. Cantigatio."-Prompt. Parv.
çhăs'-tī-ť̆, * chastete, * chastite * chastetee, * chastyte, s. [O. FT. chas cit. Sp castiad: Ital castita; from Lat custitas $=$ chastity, from castus $=$ pure, clean

1. Purity of body and mind; freedom from unlawful sexual intercourae.

Chatyse. Cashtas. pudiecta. -Prompt. Park.
TYs chaselyy, my hrother ; chastity:
She that has that to clad in comprote steel."
2. Celibacy.

As wisly as I echal for evernoro
Eud holdo werre uidny with chastits",
3. Freedom from obsceuity.

Thers is not chatity enongh in language,
Withont offence to atter them." $\begin{gathered}\text { Shaterp. } \\ \text { such Ado, IV. }\end{gathered}$
fite, 低t, fare, amidst, whãt, fâll, father; wë, wĕt, hëre, camẹl, hẽr, thêre; pine, pĭt, sïre, sir, marine; gō, pơt

## 4. Purity; freedom from eny intermixture

 of lurbarous or sffected axpressions.Crabb thus distinguishes between chastity and continence:- "These two terms are equally employed $\ln$ relation to the pleasures of asnes: both are virtues, but sufficiently diatinct in thatr characteristica. Chastity prescribee rules for the indulgence of thesa pleasures continemce altogether interdicta their use. Chastity extends Ita views to whatever may bear the amallest relation to the object which it proposes to regulate ; it controls the thoughts, worda, looks, attitudes, food, dress company and in ahort the whole mode of living: continence simply confines itailif to the privation of the pleasures themeelves: it the privation of the pleasures themeelves: it being continent, and continent withont being chaste. Chastity ia ouited to all timea, ages, chaste. Chastity ia ouited to all timea, ages, and conditions ; continence belongs only
state of celibacy." (Crabb: Eng. Synon.)

* $\operatorname{çhā}{ }^{\text {st'-IIChe, }}$ adv. [Cuastely.]

*3. To cause a feeling of restraint or represfion ; to act as a restraint.

It checks too ntrong presuncen me", Drydon.
II. Falconry: To stop, to hover over the game ; to change the game while irf pursuit, especially for an inferior kind.

Thilike the hagrard check at every feather
Shakesp.: Tweifth Night, ith

- (I) Crabb thus distinguishes between to eheck, to curb, and to control:-" To check' is to throw ohstsclea in the way to impede the course; to curb is to bear down by the direct exercise of force, to prevent from setion; to control is to direct and turn the course : the actions of men are cheched; their feelings are eurbed; their actions or feelings are controlled. External noeans are employed in checking or controlling; external or internal means are controlling; external or internal means are employed in curbing: men check 8nd control others; they curb themselvea or others young people onght aiways to be checked whenever they discover a too forward temper in the presence of their superiors or elders it is necessary to curb those who are of so mpetuons temper, and to keep youth under control, unless they have within themselves the restrictive power of judicment to curb their passions and control their inordiaate appetites."
(2) He thus discriminates between to check, to chide, to reprimand, to reprove, and to rebuke :-" The idea of expressing one's disapprobation of a person's condrict is common to all these terms. A person ia checked that he may not continue to do what is offensive ; ha is chidulen for what he has done that he msy not repeat it : impertinent and forward people require to be checked, that they may not becom intolerable; thoughtless people are chidden when they give hurtful profs of their care lessness. Paopie are chertied by actions and looks as well as by words ; they are chidden by words only : a timid person is easily checked
the young are perpetually falling into irregularities which require to be chidden. To chilue marks a stronger degree of dis pleasure than reprimand, and reprimand than reprove or rebuke...Chiding and reprimanding are employed for offences against the individual, and in casea where the greatest disparity exists in the station of the prarties. disparity exists in the station of the parties : reprimanded by his master. Reproving sad reprimanded by his master. Reproving sad
rebuking have iess to do with the relation or remiking have less to do with the relation of station of the parties than with the nature of the offence ; wisdom, age, and "xperience or a
gpiritual mission give anthority to reprove or gifiritual mission give anthority to reprove or
rebuke those whose conduct has vioiated any law hamso or divise
(3) The differeuce between to checte and to stop is thua stated:-" To check is to cause to move alowly; to stop is to canse uot to move it does not grow so fast as is checked when it does not grow 80 fast as usual; its growth ia stopped when it ceaser altogether to grow. the water of a river is stopped hy a dam: the rapidity of its course is checked by the intervention of rocks and sands. When sppiied to persons, to check is aiwzys contrary to the will of the sufferer ; but to stop ia often \& matter
of indifference, if not directly serviceable one is checked in his career of success by some untoward event; one is stopped on a journey by the meeting of a friend." (Crabb: Eng. Synon.)
chěck, " ģhěk, çhěque, * çhecque, s. \& a. [ 0 . Fr. eschec $=8$ check at chess, from Pers. shà $h=$ kiug.] [Checkmate, Cuess.]

3. To ntter a cheer of acclamation.
'And o'en tho rauk of Tuncany
Coula ecarco ivrbear wachery: Toratius, xi.
ficrabb thus distingulshes between to cheer, to encourage, snd to comfort:-". . To cheer and comfort have both regard to the spirits, but the latter differa in degree and manner: to cheer expresses mors then to comfort; the former signifying to produce a lively sentiment, the latter to lessen or remove a painful one: we are cheered in the moments of despondency, whether from real or imaginary causea; we are comforted in tho hour of distress. Cheering is mostly effected hy the discourse of others; comforting is effected by the actions, as well so the words, of others. Nothing tends more to cheer the drooping soul than endearing expressions of tenderness from those we love; the most effectnal means of comforting the poor and sfflicted, is by relieving their wants." (Crabb: Eng. Synon.)
çëer, " cheare, "cheere, " ¢here, " ¢her, "chlere, 8. [O. Fr. chere, chiere; 1tal. cera; Sp. \& Port. cara, from Low Lat. cara $=$ a face; Gr. кapa (kara) $=$ the head; Sansc. giras = the head.]

2. Spec.: Brandy and water, a tumbler of toddy, or anything similar.

* gheere'-fŭll, a. [Eng. cheer; -ful( $($ ).]
I. Subjectively

1. Of the mind or spirits: Gay, full of life.
"The nest morning she found him cheorful and
2. Of the looks, dc.: Having an appearanee of gatety; expressing or denoling cheerfulnees; arising from pleasure or joy.

- "A merry heart maketh a cheerful courtenance. . ."
II. Objec.: Inspiring cheerfnlness; cheer. ing, gladdening.

I (1) Crabb thus distinguishes between chcerful, merry, aprightly, and gay: "Cheerful marke an unruffled flow of epirits; with mirth there is more of tumult and polse; with sprightliness there is more buayancy; gaiety sprightiness there is more buayancy; gaiety
comprehends mirth and indulgence. A cheercomprehends mirth shd indulgence. A cheerthe sprightly person dances; the gay person tskes his pleasure. is itual . Cheerfulness is sn habitual state of the mind; mirth is an ocea. slonsl elevation of the spirits; sprightliness lies in the temperature and flow of the blood; gaiety depends altogether on external circuustsnces. . . Sprightliness and mirth are eeldom employed but in the proper sense as reapects persons: but cheerful and gay are extended to different ohjects; as a cheerful prospect, cheerful room, gay attire, a gay scene, gay colours, \&c.
(2) For the difference between cheerful sud glad see Glan.

A. As substuntive:
3. The curd or caseine of mill, with variable quantittes of butter and common salt, pressed into moulds and ripeoed by keeping. The varioue kinds or cheese differ chieffy in the mode or manufacture, the amount of fat which they contain, and in the flavour, which is due partly to the food, end partly to the breed of the animal. In this couvtry, cheees la made from the inilk of the cow, but on the continent of Europe it 16 nade from goat'e milk and ewe's milk, whilst in Arabis it is prepared from the milk of the camel and the mere. There are three kinds of cheese, viz., whole-milk, skim-milk, and crearn-cheese. To the first class belong the Stilton, Cheddar, Donlop, Gloucester, sind American, all of which are made from ungkimmed milk and contain from 20 to 40 per cent. of fat or cream. and 30 to 50 per cent. of caseine. Skim-milk cheese is poor in fat. contaln!ng from 1 to 4 per cent. Cresm-cheese contains from 60 to 70 per cent.
Authorities differ as to the diefetic value of cheese, aome affirning that it is very indipestible, whilst others assert that it assists digestion. Its digeatibility, however, varies with its age, its texture, and ita composition. and it is possilhle that it may prodnce different effects on different persons. Cream-cheese is more digestible than any other kind of cheese, owing to its containing less caseine.
Cheese is rarely adulterated. To suit the public taste it is frequently coloured with annetto, or some other vegetahle colour, and so long as the colouring matter is not injurious, it cannot be considered an adulteration.
4. (Sing. cheese, or more frequently pl. (1) Malva sylvestris, and (2) M. r.ptundifolia,
B. $1 t a d j$. : (See the compounds).

Palceont.: A genus of ganoid fishes founded by Agassiz for speeies from the Old Red Sandstone of Gowrie in Forfarshire sad of the Orkney Islands.
cheir-žn'-thër-a, s. [Gr. xeip (cheir)=a hand; Lat. anthiera $=$ sn anther, from Gr. ä $\nu$ थnpos (anthêros) $=$ blooming.]

Bot. : A genus of Pittosporaceæ, containing an Australian undershrub with erect stems and narrowly linear acute leaves; peduncles terminal, with small blue corymbose fiowers calyx of five sepals; petals and stsmens five each; fruit dry, two-celled. (Treas of Bot.)
cheir-ăn'-thŭs, s. [Gr. xeip (cheir) $=$ the hand, snd ävoos (anthos) $=$ a flower.]
Bot.: A genus of cruciferous flowers, of which Cheiranthus cheiri, the Wallfower, is well known. In its wild stste the flowers are always single and of a bright yellow colour, but the cultivated plants produce a wide varlety of tints. The Wallfower is by soms supposed to be the Viola of the Latin poets. [WAllflower.]

* cheir- $\mathrm{t}-\mathrm{gă} \mathrm{l}$-ĕ-ŭs, s. [Gr. रeip (cheir) $=$ the hand, and yaineos (galeos) $=$ a young weasel or kitten.]
Zool.: A genus of Quadrumana belonging to the Lemuridæ (q.v.).
cheir-б1'-ĕp-ĭs, s. [Gr. xeip (cheir) $=$ the hand, and demis (lepis) $=$ a scale.

Palcont. : A genus of fossil fishes fonnd in the Old Red Sandstone of Morayshire and the Orkney lslands. (Miller: Otd hed Sandstone. ch. iv.) It is donbtfully referred to the Lepedosteidæ. It is skin to Palæoniscus.
cheir-ori'-ō-ğy, s. [Gr. xeip (cheir) = the hand, snd $\lambda$ oyos $(\log 0 s)=$ a discourse, a treatise.] A treatise on the languge of the hands ; also a mode of conversing with manusl signs practised by the deat snd dumb.
Cheir-ŏm'- $\mathbf{y}^{-\mathbf{d} \infty, ~ 8 . ~ p l . ~[F r o m ~ M o d ~ L a t ~}$ cheiromys (q.v.), and fem. 1h. sdj. suff, -idce.]
Zool.: A fanily of mammsls, order Quadrumanz, tribe or section strepsirhina.

* cheir'- ${ }^{\text {© }}$-my̆s, 8. [Gr. xeip (cheir) $=$ a hand, snd $\mu \hat{s}$ ( mus) $=$ a rat.,

Zool.: The genus containing the Ayseaye, a singular animal inhabiting Madagascar. It is the Aye-gye Squirrel of Pennant. Swsinson elsssed it smongst the Rodetitis or Gires Cheiromys madagascariensis, formerly called

Sciurus madagascariensis. Its large and fiat ears resemble those of a bat, while its habite spprosch those of the squirrele. It is of a musk-brown colnar mixed with black and ash-grey ; tall black.
chein-rt-nðc'-tēs, a. [Gr. xeip (cheir) = the hand ; vixx $(n \bar{c} c h \bar{o})=$ to owim.]

1. Ichthy.: The Frog-fish, the name given by Cuvier to a genus of Acantheropterygian fishes, comprising some of those fielies popinlarly known under the name of Anglers. They are mosi grotesqnely and hideously shaped, having the pectoral fins supported liks short feet on peduncles, by means of which they can creep over mud or eand whea left dry by the reeeding tide. [Anoler.]
2. Zool.: A name given by Illiger to a genus of marsupial animals, the opossums, in which the hiuder lega are webbed. [Didelphines]
 hand; vonos (nomos) = a law, a regulation.J The management of the hands with sjpropriste movements and gestures in speaking.
"Chetronomy or the decoroun and expreedive move: Hist Gizeece, ch. 29
ohei-rb-pleür'-1-a, s. [Gr. , xeip (cheir) $=$ hand; $\pi \lambda e v \rho a ́ ~(p l e u r a)=a ~ r i b]$.
Bol.: A synonym of Anapaneis, spplied to A. vespertilio, and $A$. bicuspis, two ferns which ars remarkable in bearing froads of a form resembling bats'-wings.
cheïr-ŏp't-dist, s. [Chiropodist.]

* cheir'-б-pords, * cheïr-ŏp'-öd-a, s, pl [From Gr. Xeip (cheir) = the hsud, and movis (pous), genit. rodós (podos) $=\Omega$ foot.]

Zool.: Ogilby's asme for the mammale possessed of hands, all of which he brings together, dividing them again into Bimsna (two-hsaded), includiag msu; Quadrumsna (fonr-handed), including noonkeys; Pedimaoa (foot-handed, including the lemurs, cevine, the eheiromys, and the didelphidæ). His viewa have not been adopted by other zoologists.
t cheir-ōp'-tẽr, s. [Cheiroptera.] A memnal belonging to the order Cheiroptera (q.v.).
cheir-ŏp'tẽr-a, s. pl. [Gr. xcip (cheir) $=$ the hsud; $n$ тepoiv (pteron) $=8$ wing.]

1. Zool.: The name of a natural order or tribe of msmmiferous animsls, hsving the fingera elongated for the expansion of membranes which aet $8 s$ wings. It eontsins the bats. They are widely spread over the globe

CHEIROPTER.
Generally speaking they remain in concealment during the day in hollow trees, caverna, ruins, Sc., and fit forth at dusk to seek their prey, which eonsists prineipally of ties. Ths genera sud specics are numerons. The Cheiroptera sre divided pringrily ioto Frugivorous Bats and Insectivorous Bats, the first tribe contsining onlyone family, Pteropidæ(t)ı Foxbsts, or Roussettes) , and the second three, viz., Yespertilionide or Tynical Bats the Rhimolophidex or Horse-shoe Bats, and Phyllostomidx, Phidai or Horse-shoe Bats,
Vanpire Bats or Vampires.
2. Palcont.: Bats have been found as early as the Eocens.
cheïr-ŏp'-tĕr-oŭs, a. [Eng. cheiropter(g); -ons. I of or belonging to the cheiroptera; sion of membranes which set as wiags.
cheïr-ŏs'-põr-a, s. [Gr. $\chi$ cip (cheir) $=$ the hand; $\sigma \pi \varphi \rho \dot{(s p o r a)}$ ) a seed. $]$
Bot.: A genus of Mielsnconiei (Coniomyce tous Fungi), growing upon the twigs of the
tâte, făt, färe, ąmidst, whãt, fâll, father; wē, wĕt, hëre, camel, hẽr, thêre; pīne, pit, sire, sĩ, marîne; gō, pơt, or, wöre, wolf, wörk, whô, sōn; mūte, cŭb, cüre, nnite, cũr, rûle, fûll; trȳ, Sy̆rian. $\infty, \infty=\bar{e} . ~ e y=a, ~ q u=k w$.

[^120]Zool.: A genus of the Emyda, or River Tortoises, in which the neck is remarkshly long. Order, Chelonides.
chĕ-10'-nē, s. [Gr. xedóvy (chelone $)=$ tor toise. $]$

1. Zool.: A genus of turtles, often written Chelonia. Thus, the common green turtle is .called by some naturalista Chelone midas, snd thy others Chelonia midas.
2. Bot. : A amall genus of linariads, closely allied to the Pentstenmon. The corolla lias s broad-keeled upper lip and scarcely apen mouth, giving it some resemblance to the head of a tortoise or turtio, to which it the its acientifle spreliation, sid the American popilar nane of Turtlehead. The American specica la Chelnne obliqua, s jerennisl with creeping roots and flowers in terminal spikes, with corollaa mostly of a rosy-purpis colour.
 (chelone ) = a tortoise [Cuelone], and Lat. pl. anfl. ea. 1
Bot.: A tribe of Scrophularisceons plants, type Chelone (q.v.).
 toise.]
Zoology:
3. A genus of reptiles, the typical one of the family Cheloniddx. It contsins the Turties proper. Chelonia midas is the Green Turtle, C. imhricata the 11 awk's-hini Turtlo, and $C$. caretta the Loggerhead Turtle. [CheLoNe.]
4. In Prof. Owen's classification, the 12th orice of the class Reptilia, or Reptiles. It includes the Tortoise, Turtle, \&c.
ahð-iō'-nil-an, a. \&s. [Cnelonta.]
A. As adj. : Of or pertaining to the Chelonia.
B. As subst. : One of the order of Chelonia. OToen: : An the thorax of hirdy and cheloniant, . ."-
chĕ-10̄-ni'-i-dæ, s. pl. [Mod. Lat. chelonf(a), snd fem. pl. suff. -ider.]
5. Zool.: The Sea-turtles, s lamily of the order Chelomia (q.v.) They sre all marine.
6. Polcont. : The Chelonidx appear st lenst as early as the Portland Stons in the Upper Jurassic beds. They are abundant in the Eocene.
ch $\overline{\text { B }}$-lö-nīte, s. [Gr. $x^{\text {endún }}$ (chelōnē) $=$ a tortoise, and Eng. suff. -ite (q.v.).] A name given to certain speciea of fossil Echind of the gemns Cidaris.
chěl-ö-nó-bă-trā'-chil-a, s. pt. [From Gr. xèám (chelönè) a tortoise, and $\beta$ árpaxos
(butrachos) $=a$ frog.]
Zool. A name sometimea given to the amphibian order of Anoura, which contains the frogs and toads.
 claw.] The claw of a lobster. [Crebla.] "It happeaeth ofteen, I confes, that a lobeter hith
the chely
other."-Browem.
chĕ-ly̆d'ĕ-a, a [From Gr. xédus (chelus) = a tortoise.]
Zool.: A genus of turtles, family Emydidx. Chelydea serpentina is the Alligstor Tortoiso of North America.
ch 3-1y̆d'-1-dw, s. pl. [From Lat, chelys (q.v.), and fem. pl. adj. suff. -iloe. ]
Zool.: A family of Chelonians. They reaemble the Trionycide, but have a carapace anficiontiy large to allow the head snd neck o be retrscted within it. of tha five toes, three or four are furnished with clawa, whereas in the Trionycidæ only three are thus armed.
chĕl'-y-dra, s. [From Lat. chelydres; Gr. $x^{\text {ejuvopos }}$ (cheludros) $=$ a fetid saske, living in water, from $\chi^{e} \lambda u s($ chelus $)=$ e tortoise ; sod "̈oup (hudōr) $=$ water.]
Zool: A genns of Chelonians; family Trionyeidz Cholydra serpentina is the Snapping Turtle. It is found in the United States. It deatroys many young alligators, and occsaionally bites pieces of flesh from the bodies of any bathers st whom it has an opportunity of snspping.

Ohel'-Y̌s, 2. [Lat. chelys; Gr. xider (cheius) $=$
a tortoise.]

1. Minsic:
(1) The lyre of Mercury, enpposed to have been formed by strings stretched accose a tortoiseshell.
(2) In the 16th and 17 th centuries a bass-viol sud division-viol were each called chelys. (Stainer \& Barrett.)
2. Zool.: A genus of turtles, the typical one of the family Chelydida (q.v.). They live in the ponis and rivers of warm comntries, feeding on fish.

## * cho-mer, e [CHimere]

chĕm'-ic, chy̌m'-ick, a. \& a. [In Fr. chimique; Sp., Port., sud Ital. chimica; from Gr. xumeкós (chumikos).] [Chemistry, I. 1 (2).]

## A. As adj.: Chemical.

R. As subst.: A chemist, an alchemist.

chĕm'-10-al, chy̆m'-ic-al, a. \& s. [Eng.
chemic; -al.]
A. As adj.: Of or belonging to chemistry, as chemical action; resulting from the forces investigated by chemistry, as chemical changes: deaigned for auch invertigation, as tha Chamical Society.
B. As subst. (pi. chemicals):

1. Subistances having a definita chemical composition, sa crystallized cupric sulphate, $\mathrm{CuSO}_{4} \cdot 5 \mathrm{H}_{2} \mathrm{O}$.
2. Chemical reagents.

## T Chemical affity: [Aprinity]

Chemical analysis: [Avalyers].
Chemical apparatus: Apparatus designed for chemical purposes, such as a hlowpipe, retorts, test tubes, reagents, de.
Chemical attraction: The same as Chemical aflnity (q.v.).
Chemical combination: The combination of chemical substsvces into a compound different from niny of the constituents, and having a definite percentage composition, and mostly having their vapour densitiea the halvea of their molecular weights. When such mion takes place heat is generally evolved. The constituents of s chemical compound cannot be separated by mechanical means. [Comaination.]
Chernical deposits:
GeoL: Deposits, like carbonste of lime, thrown down from water by chemical sction. They are distinguished from mechanical deposits precipitated by mechanical means. Cyell.)
Chemical equivalents: The relative proportions in wheth chemical aubstances will replace one annther, according to their atomcity (q.v.) ; thus one stom of oxygen, a dyad element, is the chemical equivalent of tw $f$ atoms of hydrogen, a monad element.
Chemical formules: The formulx or symbolic expressions which indicate the chemient constituents of a body, $8 s \mathrm{NaCl}$ indicates that chloride of bodium contalns one atom of chloriae and one atom of sodium.
Chemical furnace: A amali furnace for laboratory uses.
Chemical notation: [Notation].
Chemical printing: (See the componnd).
Chemical printing-telegraph: An apparatus for printing symbols upon prepared paper by means of elcetro-chemical action; as, for in stance, by an iron stylus on paper prepared with a solution of yellow cyanide of potassium.
Chemical reagents: Pure chemicals uaed for testing.
Chemical Society of London: A Socicty founded on Fob. 23, 1841. The letters F.C.S. indicats a Fellow of the Chemical society.
Chemical works: Manufactoriea where chemical processes are carrich ont on s large scale. They are regulated chiefly by the Alkalies Act of 1863, which requires them to condense at least 05 per cent. of the muriatic neid gas which they produce.
chom'-i-cal-iy̆, adv. [Eng. chemical; -ly.] By a chemical process; oplosed to mechani cally, tc.

chĕm'-iok-ing, s. [O. Eng. chemick: -ing.] Bleaching: The process of ateeping gooda is a diluts aclution of chloride of lime in atone rats, the liquor being contimonaly pumped up and straining throngh the goode nitil the sction is compiete. This precedes the sonriu which sets free the chlorine. [Bucwine-kier.]
Chĕm-i-cō, pref. [Снемic.] Relating to chemistry. (The mesaing completed hy the second element.)
chemico-algebraic, a. Relating to chemistry and slgebra.
ohemico-electric, a. Pertaining to or derived from electrio force excited chentically, not mechanlcally.

## chemico-gaivanic, $a_{0}$ The same ae chemico-elactric (q.v.).

chemico-techrical, $a$. Pertaining to chemiatry as applied to thearts and industries.
chĕm'-i-ct-grăph, s. [Lat. chemicus $=$ chemical, sad suff. -graph (q.V.)]
Chem.: A diagrammatic representation of the conatitution of a chemical anlastsuce. It consists of the symbols of the respective atoms connected by lines or bonds
chĕm-I-gly̆ph'-ic, a. [From Gr. xnueia (chemeax) = chemistry, and $\gamma \lambda$ ú $\omega(g l u p h \overline{0})=t 0$ engrave.] Engraved by meane of a galvanie
usttery. ustiery.
cher-mise (1), s. [Fr. ; Ital, camicla; 8p, at port, camisa, from Low Lat. camisia $=$ a ahirt: from Arab. gamis = a shirt. (Skeat.)]

1. Ord. Lang.: A ahift or under garment worn by females.
2. Fortif.: A wall for iining a bastion or ditch

- Chemise de Notre-Dame:

Bot.: Convolvulus, or Calystegia septum.
chě-mişce (2), che-mys, ${ }^{2}$ chymes, s. [O. Fr. chesmez $=$ the principal house on an estate.] A chief dwelling, as the manar house of a landed proprietor or the palace of sprince.
"The chemite or prinejpalt meanage nould not be woman, .. .-Ealfour: Prach, p. 109.
chĕm-I-sĕtte', s. [Fr., dim. of chemise ( $q . v$. )] Au under garment worn hy females over the chemlse. (Quin.)
 form of alchemist (q.v.). In Sw, kemist; Dat chemist; Fr. chinista; Sp. chimista.]

* 1. An alchemist.

I have ohacrued gearaily of chymizets and the
sopbists, as of coveral other men more palpably that their thourhteral other men more palpably mad,

2. One versed in the sclence of chemistry.

- Thers are differsnt kinds of cheulsts, as a pharmaceutical chemist, an agricultural chemiet, an analytical chemist, a scientific chemist, do.
* chěm-Ǐ'-tico-al, a. [Eng. chemist; -ical] lelating to cheristry. (Burton.)
chĕm'-iss-try̆, † chy̆m'-ǐs-try̆, \&. [Eng chemist: -ry. In Sw. kemi; Ger. chemie; Fr.
chimie, chymie; Sp. chimio, chimfou: Port. chimie, chymie; Sp. chimíc, chimfou; Port. chimica, chymica; Ital. chimica; Sp. \& Port. alquimia, fron Arab. al-kimia $=$ alchemy. (q.v.).] The sciance which investigates the several elements of which bodies are comlosed, nod the lsws which regulste the comblnation of these eleinents snd the resctions of chemical compounds on each other.

1. History:
(1) Claims to have been tha originstors of chemistry have been put in on behalf of the Eryptians and the Chinese, but detsils ars waiting. The blow-pipe was known to the fomer people [Vol. I., p. 596, col. 2].
(2) The freek period: The first atage in the dovelopment of themistry seems to have been conducted by the Oreeks, who gave prominent attention to investigating the properties of plant juices for medicinal puryoses. This would now be cslled pharmacy, thongh some of the more recoodite researches might lay the foundstion of organic eliemistry.
(3) The Arabian and Medicual periods (those of Alcheiny): When the Arabs adopted the Greek worl $x \eta_{\mu}$ eía (chëmeia) or its analogue, and preflxed to it their article al $=$ the, their

[^121]mppiries took a new form, and ware mainly mose to Which the term Aicheny is still applied. Suidas himself had defned XMreia The Mcors introduced alchemy into Spain bout A.D. 1150 . For its further history see AICREMY.
(4) The modern period (that of Chemistry properly so called) : As astronomy deveioped trom astrology, so chemistry came forth from alchemy. The transition was gradual, but a considerable part of it was effected in the 15th century, though straggling alchemists fourished tili the 18th.
Among the ditcoveries which heve made chemistry what it now is, the following may be mentioned : Boyie, who published his "Scep theal Chemist" Io 1689 , introduced the use of chemicai reagente or tests. In 1674 Mayow, of Uxford, perceived that respiration produced the osme effect on atmospherio air as combus tion did. In 1758 Dr. Black proved that su seriform body (carbon dioxide) existed in car bonats of lime, thus distinguishing it from quickllme. About 1765 Mr. Careadish brought to notice hydrogen gas. On August 1, 1774 Dr. Priestley discovered oxygen, and in the latter year Cavendiah made known the con tituent elements of water In 1774 Scheele diecorered chlorine and in 1783 Berthoilet disconer out the te, which might be made pointod out the in bieachias the same year aso he deacriber the elements oinmon in 1797 Vavquelin discovered chromium. in 1800 Daiton intro duced his stomio theary. In November, 1807 , Bir Humphrey Devy intimated the existence of potassium and sodinm. Klaproth during his life, which ended in 1817, analysed nesriy 900 minersla. The synthesis of urea by the molecular transformation of ammonimm cya nate, by Wohler in 1828, also the discovery of the 6ynthesis of cyanogen and alcohoi, dc., showed that organio compornds could be formed without the aid of plants or animala. The discoveries of Wurtz, Berthelot, koibe, Baeyer, \&c.; the researches of Willamson on ethers, Haffimann on compound ammonias, Frankland on organic radicals, Kekule on the benzene series, Bunsen's spectroscopic re searches, leading to the discovery of the elemente casium and rubidium, followed by the discovery of thallium by Crookes, dec, and the synthesia of alizarin and indigo, may be mentioned to give some idea of the rapid progress of chemiatry in recent yeare. (Consult Watts's Dis Chem. and the Journals of the English German, and French Chemical Societies.)
2. Modern divisions of chemisiry: It is divided into organie and inorganio chemistry, the former connprising the chemistry of car bons and the componnds derived irom them and the latter dealing with the compounds of the other elements. The aupposed distinction between organic sand inorganic compoundswas broken down by Wohier in 1828 by his me paration. Another classification is into or theoretical analytical, and applied or practical chemistry. The istter may be sul divided according to the erts or occnpation which it is iesigoed to benett, as agricultural chemistry, \&c.
ohym'-1-tȳpe, s. [Eng. chemi(c), and type (q.v.).]

Kngraving : A somewhat general term whicb meludes a number of relief processea by which a drawing or impression from an engraved plate is obtained in relief, so as to be printed on an ordinary printing-press.
© chem-ne, s. [CFIMNEY.]
 distinguished conchoiogist of Niuremberg, who pubbahed s work on anells in seven vols between A. D. 1780 and 1795.]
Zool. : A genus of gastaropodous molluses, family Pyramidellidæ. The shell, which is alender, is many-whorled with a simple aperture closed by a horny subapiral operculum. The snimal has a very short bead, with a long proboscis. Recent species thirty-two, fonr of them British ; fossil 240, from the Silurian period on ward. (Woodward, ed. Tate.)
ohy-mð1'-y-st̆, s. [Eng. chem(ic), and Gr. Aṽous ( lusis) $=$ loosing, solntion.]

H. Ger. kirse; O. H. Ger kirsa; Fr. \& O. Fr. cerise; Prov. serisia; Sp cereza; Port. cereja; 1tal. ciriegia; Lat. cerasus, Gr. керáбıov (kerasion) = a cherry, керабós' (kerasos), керагéa (kerasea) $=$ the cherry-tree from Cerasus (now Keresoun), in Pontus, from Which Lucullus is said to have first broucht cherries to Italy about 68 B.C. So says Pliny but as the cherry grew wild in Greece it is more probable that the town was called from tha tree rather than vice versa.]
A. As substantive:
I. Ordinary Language, Bot. \& Hort. :

1. The name given to varioua apeciea of the genus Prunua and anb-genus Cerasus, especiaily to certain treea which grow wild in America, Europe, and other portions of the Northern temperate zone. (I) Prunus cerasus, called also Cerasus vulgaris, (2) P. Avium, the Gean Cherry, called also the Small Cherry, and (3) Prunus Padus, the Bird Cherry or Bird'a Cherry, called also the Cluster Cherry and the Fowl Cherry. Bentham and Sir Joseph Hooker consider Nos. I and 2 mere varieties or aub apecies and not really distinct. From these came the cultivated garden cherty. [Cerasi/s.] Other apecies are the Bastard Cherry (Cerasus Pseudo-cerasus), the Choke Cherry (c. vir giniana), \&c. [Сноке, \&c.]
2. The drupe or stone-fruit of the cherrytree. It is a auperior one-celled, one-seeded indehiscent fruit, having a fleshy or pulpy sarcocarp, a hard endocarp, and a pericarp.
3. The name given to varioua tress with resemblauce often superficial to the cherrytree. Spec. : The Barbadocs Cherry (Malpighia ghabro), the Hottentot Cherry (Casine Mauro. cenia), the native cherry of Australia (1) Exocentpu, the native cherry of Australia (1)
4. A cordial composed of cherry-juice and apirit aweetened and diluted.
II. Metai.: A spherical bar, used apecially io running out the cavitics of bullet-monids.
B. As adjective: Resembling a cherry in colour.
"A cherry lip, a passing plenstng tonguve."

- Obvious compound: Cherry-coloured.
cherry-bay, s. [Laurel.]
cherry-bird, a. Oriolus galbulus.
cherry-bob, s. Two cherriea, having the satalks united, used by children as earring and in ganes.
cherry-bounce, 8. Cherry-braudy and augar.

Burnt hraudy very good I hold.
To keep in heat, and force out cold; And if you chuse to drink it raw When men together these do gornce They call the Ilquor eherry-bounce" Poor Kobin, 1740 (Narez.)
cherry-brandy, s. A favourite condial, propared by ateeping freahly-gathered Morello
cherries in brandy for one or two mooths and then aweetening with powdered angar or ougar-candy.
Cherry - cheoliced, a. Rosy - oheaked, ruddy.

A. As substantive:
I. Ordinary Language:

1. The game described in II.
"Me deth manye kueades ate ches other wte tahles"
$-A$ yenbite, p. 52

- 2. A chess-board.
"His tables, his ches ho base,"-Triacram, ii. 10.

3. The quarter or any smalier division of an applie, pear, sec, cut regularly into pieces; the chess or lith of an orange.
II. Tech.: The game of chess is of very great antiquity. It was probably invented in China or India, certainly in the East. In India it has been from time inmemorial known as chaturanga, i.e., the four angas, or members of an army, viz. : elephants, horses, chariots, ami foot soldiers. This was by the Persians corrupted into chatreng, and by the Arabs into shatrang. By them it was introduced into Spain in the eighth century, and from thence it found its way into France, and was known in England before the Norman conquest. From the Arabic shatrang canme the still furFrom the Arabic shatrang cane the still fur
ther corrupted forms scacchi, echecs, and chess. Iner corrupted forms sacchi, echecs, and chess. In the modern European arrangement the idea
of clephants, horses, chariots, and foot soldiers has been abandoned, and, in their places, have been aubstitnted a kiug, queen, knights, bishops, castles or rooks, and pawns, forming six distinct classes of pieces. [See these words. The name rook is the Hindu rot' $h=$ an armed chariot; Pers. roin: the pawns are the footsoldiers, Hindu peor $=$ an attendant. The game is played on a board divided into sixtyfour squares, coloured alternately black and white. Each player has aixteen pieces, kiz, a king, \& queen, two bishaps, two knights, two castles or rooks, and eight pawas. The manner of moving each piece is player is to checkmate the other. [Checkplayer
B. As adjective: (See the compounds).

IT Obvious compounds: Chess-game (Carlyle), chess-player, chess-table, chess-tournament.
chese-board, 5 . The board or table on whlch chese la played. (For description sea Chess, A. II.)
ohess-man, chest-man, 2 One of the " men" or pleces used in the game of chess.

goyne: The Heiress, iii. 1. (Davies)

## ohicken-pox, a.

Poth: : The common name for Varicella, a contagious and infections disease which in some respects resemblea modified amall-pox, and is characterised by a specific eruption wbich breaks out over the whole body, and runs a defioite course in abont eight or ten days. The disease appears to be the result of apecific poison which, after a period of latency or incubation, develope into one of more or less feverishness. This lasts for two or three days, when an eruption of pimples appears, at first on the body, then on the face and head, the fever subsiding as the rash appears. These pimples soon till up with rash sppears. These pimpies soon and become vesicles which in their yoph, and become vesicles which in their
turn, two or three days later, shrivel ap and turn, two or three days later, shrivel np and
fall off in the form of crusts or scaba, geldom, tall off in the form of crusts or scaba, seldom, the eruption of small-pox. Chicken-pox appears to have obtained its name partly from the pulse or pea-like (Fr. chiche) character of the rasb in the first instance, and partly from the mild nature of the complaint as compsred with amali - pox. Swine-pox, bastard-pox, hives, horn-pox, pearl or stone-pox, are the names popularly given to this disease, according to the character of the eruption, which varies somewhat in different cases. Adults seldom suffer from chickea-pox.
chicken-weed, * chekyn-wede, * cheken-wede, s. [Сніскweed.]

chic-ó-rā́-č-oŭs, a. [Eng. chicon(y); -aceous.] Of the nature of, or having the qualities of chicory.
"Dioreticks evacuate the anit serum; as all acid
diureticka, and the testaceous aud bitter chicoraceous plants."-sir J. Floyer
 cichorée $=$ succorie (Cotgrave); Fr. chicorée from Lat. cichorium; Gr. кıx́̄piov (kichörion); $\kappa i \chi \omega \rho a(k i c h o ̈ r a)=$ вnccory.] [Succory.]
Bot. © Comm. : The root of the Cichorium intybus, Wild Succory or Chicory. The plant is cultivated in various parts of England rod Europe and is also raised in Califoroia. The roots were formerly used medicinally, possessing properties reaembling thoae of the Dandelion. The root roasted has been employed as a eubatitute for coffes for more than a century. It is now uned extenaively as a a century. It is now used extenaively as mixture with genuine coffee, but ia regarded the aeller is bonod to acquaint the jurchaser

with the fact that the compound is sold not as genuine coffee, but as a mixture of chicory and coffee. Its presence is easily detected by the microscope, and by the brown colour which is immediately produced when a few grains are thrown into cold water. Chicory root is heated in iron cylinders, which are kept revolving as in the roasting of coffee. In this country about two pounds of lard are added to every hondred-weight of the kiln-dried root to every handred-weight of the kiln-dried rater during the roasting process. In Frsnce butter that of coffee is imparted to it. When roasted the chicory is ground to powder and nixed with the coftee. thecry cuntans some ac charine matter, but otherwise does not serve to
supply the anional economy with any neeful anpply the anibal economy with any nserul duces diarrhoea. The prepared chicory gives a deep brown color to water, when an infusion is made, and it is this property which makes it valuable for the adulteratiuo of coffee, giving an artificial appearance of strength. As io the case of many other adulterants, chicory itelf is sumetimes adniterated, the adulterants being roasted pulse, damaged wheat, parsnips, carrots, logwood aud mahogany duat, burot augar, dogbiscnit, aod even baked livers of horser and bullocks. Venetian red and ruddle are used to colur it. (Ure, dec.)
chi'-cōt ( $t$ silent), a. [Fr.] The seed of a plant, Moringa pterygosperma.

çhill, "çhll, "çhele, 8. \& a. [A.S. çle, céle $=$ great cold, chilliness, from cilan $=$ to $\operatorname{cool}, c o l=\operatorname{cool} ;$ Dut. $k i l l=a$ chill, killen $=$ to chill, koel $=$ cool; Sw. kyla $=$ to chill, kuter, kylig = chill, cool ; Lat. gelu $=$ frost.] [Cool, Chele.]
A. As substantive:
I. Ordinary Language :

1. Literally:
(1) The state of being moderstely cold; chillness.
(2) A audden sensation of cooloess, generally accompanied with shivering: a eudden check to the circulation of heat.

Chills and fecer: Fever and ague. (U. S.)
2. Fig.: A sudden check to warmth of manner or feeling; a diacouragement.
II. Technically:

1. Painting: A duluesa or dimness in e painting ; also called blooming.
2. Iron Manuf.: A piece of iron introduced into a mould ao as to raplidiy cool the ourface of molten fron which comea in contact there with. Cast-iron, like steel, is hardened by rapid cooling, and softened by the prolongatioa of the cooling procesa. The extreme in th former direction gives chilied iron the hard ness of hardened ateel; the extrame in th direction of aoftaess is obtained by prolonging the heat, abatracting the carbon from the cast-iron, reducing it to a nearly pure crystal line iron. [Malleable iron.]
The chilled east-iron plonghahare has a hard under-surfaco, and the top wears away, lesving a comparatively thin edge of hardened metal This reacmbles the natural provision in the teeth of rabbita, aquirrels, and other rodents, teeth of rsbbita, aquirreis, and other rodents, aofter portion of the tooth, keeping a abarp adge. (Knight.)
B. As adjective:
I. Literally:
fâte, fatt, färe, ạmidst, whãt, fâll, father: wē, wĕt, hëre, camẹl, hẽr, thêre; pine, pit, sïre, sir, marine; gō, pőt,

3. Subjec. : Having a sensation of coolness ; somewhat cold.
4. Objea: Moderately cold ; causing a aensation of coolness, generally accompanied with ahivering; chilly.
II. Figuratively:
5. Subjea: Cold and reserved in manaers, temper, or feeling; distant, formal.

$$
\begin{aligned}
& \text { "But be is chill to praite or blame." Tennyon: The Troo Yoces. }
\end{aligned}
$$

2. Objec.: Causiag a diacouragement to or dhecking warmth of feeliog or manners ; dopressing, discouraging; diataat, formal.
"Downwnid and evor downward, and deeper in agoie
ohell valloy."
Crabb thu dit Ch nd cold: "Chis diatinguighes between chil is to say, it expresees a degree of cold. The weather is often chilly in summer; but it ia cold in wiater. We apeak of taking the chill off water whes the cold is in part remoyed; and of a chili ruaning through the frame when the cold begins to penetrate the frame that is in a state of warnth." (Crabb: Eng. Synon.)
chill-cold, as Very cold.
"A chiluoold hloud... .
chill-hardening; s. A mode of tempering ateel-cutting iatriments, by exposing the red-hot metal to a blast of cold air.
ghill, "chyl-2ym, v.t. \& i. [CumL, s.]
A. Transitive:
L. Ordinary Language:
3. Literally:
(1) To make cold or chilly; to strike with a chill.
 Cali: Frag. of Science ande ec
". . by suowe linuodirate chilita."
4. Fig.: To -heck warmth of feeling or manners; to discourage, to depress ; to damp the apirita.

As an icy touch had chiurd its heart. II. Iron Manuf.: To cause the surface of moiten iroa to cool auddenly by the introduction of a piece of cold iron, so as to incrense the hardnese. [Chill, s., B. 2.]
$\dagger$ B. Intransitive:

1. Lit.: To become cold, to ahiver.
2. Fig. : To become cold, diatant, or formal In manners or feeling; to be diacoaraged, dishesrtened, or downcast.
-Al chaonged her chere and chylled at the hert."
Altit. Poems ; Potionce, 307.
ghilled, pa. par. \& a. [Cuill, v.]
A. Aspa. par.: (See the verb).
B. As adjective:
-1. Ord. Lang.: Chill, cold.
"He and, nad Prlam": aged lointa with chuled fear
3. Technically:
(1) Iron Manuf.: Made of Iron which has been hardened by chilling. Chilled castings are psed for axle-boxea, iron wheel-hubs, rulls for iron-rolliag milla, ploughaharea, aad mouldboards, stamp-heads, heavy hammers, and anvils for some kinds of work, and in many other mstancea. (Knight.)
(2) Painting: Dimmed, clonded; affected with blooming.

## chilled-shot, 8

Mil.: Shot of very rapidly cooled or chilled east-iron, which thus acquire a hardaess of nearly equal efficiency with ateel for penetrating iron platea, and yet produced at a very much leas cost. Chilied-ahot break up on passing through the platea, and the fragments are very deatructive oa crowded decks.
ghin'-1̌, s. [Sp. chilit, chile.]

1. The popular name of the American Redpepper.
2 The pod or fruit of the Capsicum (q.v). Spec, the dried ripe pod of Capsicum fastigiatum.
"Curry powder.- Form the baile of Cayenne pepper and Chilli or Chili Vinegar: Vinegar flavoured with Capsicam poda.
chilli (or ohili) sauoe, s. A spicy condimental sauce, varioualy composed.

## chill'-11-nčes, s. [Eng crilly; -ness.]

1. Literally:
2. The quality or state of being chilly.
"The chillinew of their waters."-Locke: Education,
3. Coolness ; a moderats degree of cold.
II. Fig. : A aenastion of diecouragenaent or depreaaion.
 Cilil., v.]
A. \& B. As pr. par. \& particip. adj. : (Sce the verb).
C. As substantlve:
4. Ordinary Language:
(1) The act of cooling or making chill (lit. fig.).

* (2) The act or atate of alivering.

Promyle Pory.
2. Iron Manuf.: The procesa of chill-hardening. [ChilL, s., II. 2.]

Chill'-Ǐ̌ig-hạm, s. [A proper name, see A.] A. As substantive:

Geog.: A parish in Northumberland, on the river Tili, about four and a haif miles aouth of Wooler.
B. As adj.: In any way pertaining to or connected with the parish described under A.

## Chillingham bulls, Chillingham

 cattle, a. pi. Certain bulls, or rather cattle of both aexea, preaerved in a semi-wild state in Chillingham Park. They are jure whits, except the muzzie, which is black, and the horna, which are tipled with black. The white colour on the body, however, is artificially produced, the owner causing ali spotted calve日 to be killed. They are now generally believed to be the deaceadanta of the mountain bull or Urus which were wid in Gaul at the time of Cæsar's invasion, and the atock whence our larger cattle have beea derived. Some writers have thought them descended from ordinary cattle which have become wild, and others have made them a distiact speciea, Bos Scaticus. Profeasor W. Boyd Dawking considers them the last surviving repreaentatives of the gigantic Urua of the Pleistocene period, reduced in aize and modifted in every reapect by their amall range and their contact with mant. (Q. J. Geol. Soc., vol. xxii. (I866), pt. i., p. 398.)$\dagger$ ghil'-líng-1̆̌, adv. [Eag. chilling; -ly.] la a chilling manner.
"Auilingiy a qualifcation which must then have fallen
the ears of belligerent Tories." - Doiry Newer, April 19, 1872
"çillínĕss, * Yhin'-něss, * çhill'něsse,

I. Literally:
3. Feeling a sensation of coldnese or chillinesa.

Gir Charies I'm as chitly an a bottle of port in a hard trost,"-Colman the younger: The Poor Gentlo-
2. Causing a seasation of coldneas or chilliдезя.

## My chuddring limbs." $\begin{gathered}\text { A chith sweat bedews Phutpa. }\end{gathered}$

II. Fig. : Cold in maaners, distant, cool.
t B. As adv.: In a chili or cool manner (lit. \& fig.).
chī-1ó-car'-pŭs, s. [Gr. xéinos (chellos) $=\mathbf{a}$ lip, and кaprós (karpos) $=$ a fruit.]

Bot. : An imperfectly known genus of climbing planta, nativea of Java, having a salvershaped corolla, capitate atigma, and capsular fruit. The geaua is referred to the Apoeynacex. (Treas. of Bot)

 grass.]

Bot. : A geaus of plants of the order Graminex, allied to Phleum and Phaiaria.
 and obovs (odous) $=$ a tooth.]

Bot. : A genns of Labiatz, consisting of a aingle speciea from Now Holland. It is a branched glsbrous or elightly pubescent slirub. In habit and structure the genus is very near Prostanthera, differlag only in having no appendagea to the anther cell. (Treas. of Bot.)
 and obovs (odous), gealt. öfovtos (odontos) $=\AA$ tooth.]
Zool.: A genta of Infuaoris, of the family Trachelina, having the body cnvered with cilia; month with teeth arranged in tlie form of a tube; fore part of the head produced into a broad mernbranous or ear-like lip. The cilia form loagitudinal rowe. (Griff. \& Henfrey.)
chi-1t-glðt'-tis, s. [Gr. xeilos (cheilnt) $=a$ lip, and $\gamma \lambda \omega \bar{\omega} \sigma \sigma a$ (glōssa) or $\gamma \lambda \hat{\omega} \tau \tau a$ (glötta) $=$ a tongue.]
Bot. : A small geaus of terreatrial Australaaian orchida, bearing radical leaves in pairs, and solitary palaste reddish fiowers.
chī-1og-nath-ㅍ-form, a. [Eng. chilognuth, and form.]
Entom.: A term applled to the larve of those coleopterous insects which are herblvorous, elongated, and oub-cyliadrical, and reaemble the geaus Jula.
 chi-log'-na-thees (Mod. Lat.), s. pl. [Gr. xeìlos (cheilos) $=$ a lip, and $\gamma v a ́ \theta o s($ gnathos) $=$ a jaw.]

1. Entom. : An order of the Myriapoda, or Centipedes, distinguiahed by having the two mandibles and the tongue ao united as to form a large lower lip; aateane ahort with six or seven joints, body convexly cylindrical, legs ahort and alender. The aegments of the body, from the fourth, fifth, or sixth from the head, have each of them two jair of legs. It containa the Millepedes and Galleyworins. At leart aeventy apecies are known. The arder is also called Diplopoda. They are found beneath the bark of trees and in luumid found beneath and feed both upon animal and vegetjlaces, and feed
2. Palceont.: The order began, as far as is known, in the Carboniferous period.
chill'-ó-gram, s. [Kilogram.]
$\dagger$ chī-1o'-ma, s. [Gr. хeín $\mu \mu a$ (cheiloma) $=\mathbf{a}$ lip, rim, or edge. (Septuagint.)]

Zool. : The upper lip of a mammal when it is tumid, and contiuued uninterrujtedly from the nostril. A good example of this may be seen in the camel.
chī-1orm'-ö-năs, s. [Gr. $\chi^{\text {cinos }}$ (cheilos) $=a$ lip, and $\mu$ óvas (monas) $=$ single, solitary.]
Zool.: A genus of Infusoria, of the family Mnuadina, free awimming or temporarily fixed; mouth oblique or lateral, and aurmounted by a lip; chere are two flagella, one of which is convolute and adherent.
Chī-10'-nī-an, Chī-lŏn'-ic, $a$. [From Lat, Chil(o), and Eng. 81ff. -ian, -ic.] Relating to Chilo, one of the seven sagea of Grcece. (Smart in Worcester.)
chī-1ǒp'- $\mathbf{\delta - d a ( L a t . ) , ~ c h i ̄ ' - 1 \delta - p o ̆ d s ~ ( E n g . ) , ~ * ~}$ pl. [Gr. xidias (chilias) $=$ a thousand, snd noús (pous', genit. roóós ( podos) $=$ a foot.]

1. Entom. : An order of Myriapoda or Centipedes, the genera of which have clongated antennæ, with fourteen to forty or more joints, a depressed body covered with coriaceous plates, snd legs of variable length. Each segment of the body has a singie pair of legs. The order contains the Centipedes proper as distinguished from Millepedes, \&c. it is sometimes called also Syngnatha. Nearly 100 apecies arc known. They all run tast, are caroivorous, and nocturnal. They are principally found beneath stones, the bark of trees, and in loose, humid earth.
2. Palcaont. : No apeciea of the order has yet beea found fossil.
ohīl-ö-pǒd'-i-form, a. [Eag. chilopod, -i conaective, and form.]
Entom.: A term applied to the larve of Coleopterous insects which are oubhexapod, with a long, linear, depressed body, and bear a resemblance to the genus scolopoder. o. 166.)
! ohil-б-pǒd-I-mor' phoŭs, a. [Eng. chilo. pod; - - - connective; Gr. $\mu$ орфй (morphè) $=$ form; Eng. auff. -ous.] The same as Canlopodilorm (q.v.).
"Thoes |lartwi belng the must perfect chilopodh mology. IIL. xxix, p . 16 C
©hī-löp'-sìs, s. [Gr. xeî̀os (cheilos) $=$ a lip,
 ance.]

Bot.: A genus of Bignoniacer, conaisting of a single apecies of erect branching shrubs from Mexico. It has long linear entire altermate leaves, and beautiful flowers in terminal, dense, apicate racemes. (Treas of Bot.)
Chil'-tẽrn, a. \& a. [A proper nsme, see A.] A. As substantlve:

Geog.: The name of certain beech-ciad hills in Buckinghamshire, formerly tnfested by robbers. To keep these in cheek, a func tionsry was appointed, who was called Steward of the Chillern Hundreds $(q . \nabla$.
B. As adj.: Pertaining to, or in any way connected with, the hills deacribed under A.
Chiltern hundreds, s. A hiliy diatrict in Buckinghamshire, belonging to the Crown. The office of Steward of this diatrict, although the duties have loag ceased to be more than nominal, is still retained for a special purpose. No Member of Parliament is allowed to resign his seat, sad if ha wishea to vscste it he can ouly do so by accepting some offica of profit under the Crown. The Stewardship of the Chiltern Hundreds is therefore applied for by sny member desiring to retire, and its acceptance necessarily vacates his seat.
Chil-tōn-īte, s. [Etymol. douhtful. Apparently aamed sfter a Mr. Chillon.]
Min.: The same as Prehnite (q.r.).
Ch1-mæ'-ra, s. [Lat. chimora; Gr. xıнаipa (chimaira) = (1) a she-goat, (2) a fire-apouting ponnster with a son's head, a serpent's tail and \& goat's bouly, killed by Bellerophon.] [Chimera.]

1. Myth.: [Chimera].
2. Tchthy.: A genus of fishes, tha type of the family Chimerida, having the tail eading in a slender thread, the hear pointed, and apirade single. Chimera monstrosa ia aoma. times called tha Sea-mouster, snd sometimes the King of the Harrings. It is s native of the Northera Seas, from which it atraggles to Britain and follows shosls of herrings $8 s$ they move from tha deep aea towards the ahore. [Cin:1eride.]
chi-maer'- $\mathbf{1}$ dm, s.pl. 【Lat. chimer(a); fem. n. suff. -ider.]
3. Cchthy.: A family of cartilgginous fishes, diatiaguished by tha head being furnished with appeddagea, and the tail terminating in a point. it contains two apecies, Chimera and Callorhynchus.
4. Palcoont.: The Chinærida begin with the Devonian rocks.
chi'mwr'oid, a, \&s. [Lat. chimora; and Gr. l㖵 (eulos) $=$ form, apjearance.]
A. As adj.: Pertaiving to, or reaembling Chimeride
B. As subst. : A fish beionging to the family Chimæridx, or akin to Chiniera.
"In the Mesozolc and Kasnozole deposita the remalns
of Chimeroido

ohi-măph'-il-a, (Gr. xeiua (cheimut) $=$ winter, snd $\phi$ ini $\omega$ (phileō) $=$ to love; from the laves rataiaing their green colour during winter.]
Bot.: A amall genns of Pyrolacere, nativea of Europe, Siberia, snd North Arnerica. The plants, called Winter-greena in America, hav Woody aubterranean shoots, sud a ahort sten with s tuft of thlck, ahining, avergreen leaves, oblong, wedge-ahaped, or lanceolate. The pedicels are one-flowered, bearing handaomo beil-shaped, whita flowers,tinged with purplishred, and very sweet-acented. (Treas. of Bot.) Chimaphita umbellata is a most activa diuretic. C. mactlata ia used in North America in strangury and nephritis. (Lindley.)
chī-măph'-1-1ĭn, s. [Mod. Lat. chimaphil(a) -in.]
Chem. : The name given to the tasteiess, inodorous crystals found in the leaves of Chimaphila umbellata.
chī-măr'-this, s. [Gr. Xeiдирpos (cheimarros) $=$ a torrent; from the plaut growing on the banke of torrents.

Bot. : Riverwond, a genus of white-wooded American trees, velonging to the order Rubi acea. The wood is used for beams and rafters.

- çimb ${ }^{\circ}$ chÿmbes s. [A.S. cim, found in cimstan $=$ a base; Sw. kim, kimb, kimme: Dut. him, kimme.]

1. Coopering: The edge of a cask or tab formed by the ends of the ataves.
"Tha atreem of lyf now droppeth on the ehymba.
2. Naut. : Thst part of the wsterway which is left above the deck, and hollowed out to form a channel.

## * çhím'-blĕy, s. [Chimney.]

chĭm-hŏ-rāz'-ite,s. [From Chimborazo, where it is found, and Eng. suff. -ite (Min.). 1 Min.: The asma as Aranonite (q.v.).
çhime (1), "çhimbe, "chymbe, "çhymme,
3. [A corruption of chimbale or chymbate, a dialectic form of O. Fr. cimbale or cymbale, $=$
 umbalon).]
A. Onlinary Languags:
I. Literally:
21. A cymbai; probabiy used also for a bell. (See extract.)
rasen bella.
Cursor Mifundis 12.198
2. The harmonic or consonsnt sound of scveral instruments or bells. [B. I.]
$\dagger$ II. Figuratively:

1. Harmoniaed sonads of any inatrument of music.

The Minatrel waked his harp-three times Aroue the weott: The Lady of the Lake, IL \%.
2. Any gound in harmony or accord.
"A happy chime of many dancling feet."
3. A correspoadeace in sound or propor-

Ring all thelr "Lyifo and time
B. Techntccully:

1. Mrusic:
(1) A number of bells sttuned to each other in diatonic succession. A peai consists of threa or more bells in harmonic auccession, which may be rung auccessively or simuitaneously, but will not admit of a tuue being played upon them. Thus a set embracing the eight notes of the common acale will constitute a chime, while a set upon the first, third, fifth, and eighth of the acalo would be a pesl. The amallest number of bella that can be gaid to constitute a chima is flve, hut the number may be increased indafinitely. The ususl number is st least nine, which number embraces the eight notea of the naturai acale, with the addition of a flat seventh. A pparatus for ringing chimes is aaid to have been firat msde at Alost, in East Fianders (Belgium), in $\mathbf{1 4 8 7}$. Pottheff, the chime-player of Amsterdam, in the latter part of the lith ceatury, played planoforte music with faclity. Each key required a force equal to two ponads' weight. (Knight.)
(2) An arrangement of bella and atrikers in an organ or musical box, operated in harmony with the reeds, pipea, or tonguea, as the case may be.

## chime-barrel, \&

Horol.: A prolnagation of the rim of a triking-wheel, which is furnished with pins Ske the harrel of a musical-hox, the pin lifting the tails of the hammers, which are set on one axis and strike their respective bella when aet in motion.
chime-bell, * chymbo belle,s. A bell or set of bells harmoniaed.
"His chymbe belle ho doth rynge" $\begin{gathered}\text { ditanunder, } 1,852\end{gathered}$
çhime (2), s. [Chimb.]

* çhime (3), \%. [Chine.]
¢hime, * chi-men, *'chy-myn, "chimbe, v.i. \& t. [Chime (1), s.]
A. Intransitive:
I. Literaily:

1. To sound in harmony or accord; to give out a aound in harmony, as bells, they mesowhile remsining unmoved. it is opposed to
ringing, in which the bell la raised, l.s. swune round. (Stainer \& Barreti)
2. To cause belle to ring in harmony or so cord.

## ${ }^{\text {Mrompe Pary }}$

11. Figuratively:
12. To correspond or accord to rotation or proportion.
"Father and son, pusband and wits, and such other correlattva torma, do beloog ooe to another ; and 2. To agree, suit, or accord with.

- Any mect whoge roveoning , lotervretation and language I have been ueod to,

3. To join or fali in with in accord; to join or interfera in a conversation; ofton followed by in with.
"He yot only ent quietly and heard his futher mallec not: Fircorg of John Bult.
4. To make jingling rhymes.

- 5. To clatter, to chatter.

Tho sely longe may wel ryngo and eMmbe
Of wreechednen that pased is ful yoorse"
O1 wreecliednen uhat passed is fal yoore."
16 To give utterance to any harmonioue aounda.
${ }^{12}$ Before the ening of those thoo chime for ever

B. Transitive:
I. Litcrally:

1. To play a tuna on beils, efther hy ma chinery or by hand, by meana of hammers, on swingiag tha clsppers, the beli remaining un moved. It is opposed to ringing in which the bells are raised, that is, ownog round. (Stainer \& Barrett.)
2. To cause to oound in harmony.

- II. Fig.: To ufter harmoniously.

A. As substantive:
I. Ordinary Language:
- 1. A furnace, a grate.
"And his feet [were] like to intoun as in a brennynge ciymeney."-Wycliff: Riev. 1 is .

2. A fire-place, a 8 tove, a hearth.
"A schimnay of charcole to chanfen the knygbta"
3. The flue, vent, or passage throngh which the amoks escapes from ths fire into the open air.
4. A tube of glasa placed over the flame of a lamp to increase the draught, improve the consbustion, and protect the flame.
5. The portion of the flue staading sbove the rool. [Chimney-shaft.]
II. Hist.: Down to the thirteenth century, the peopla seem to have been generally destitute of chimneya. The open hols for the emission of smoks is referred to in Herodotus, viil 137 :-" Now it happened that the sun Was shining down the chimeey into the room Where thay were; . . . the boy, who had a knifs in his hand, made \& mark with it round
the sunehins on the floor of the room." In the Middle Ages people mads fires in their house in a hols or put in the centre of the floor, under an opening formed jo the roof; and when the fanily lay down for the night -for it cao hardly be sald that they went to bed-the hole was closed by a cover of wood. The laws of the frudal sges (couvre-fou of the French; curfew-bell of the Engliah) ordered that auch fires should be extingulshed at a certalo tims in the evening. William 1. introduced this law into England in 1068, snd troduced tha flxed the ignitegium at seven in the evening. The law was abolished by Henry I. in 1100. Comimon before the reign of Elizaheth. Thus Harrison, in his Description of England (ed. Furnivall), 1. 338, says: "Now have we manle chimniea; and yet our tenderlings complains of rhoumes, catarrha, and poses [colds in the head]; then had we none but reredosses [open hearths]; and our heads did naver ake" A tax, called Chimney-money (q.v.), was imposed on each hesrth or atove in a houss in the reigu of Charles 1I., and was aboliahed in the relgn of William and Mary.
The following are the names of the various parts of the chimney : The opening into the room is the fireplace. The floor of the fireroom is tha fireplace. The foor of the ireplacs is the hearth. Ths paved portion in front of the hearth is the 8lab. At the back of the fireplace is the firs-back. The flariog sides of the fireplace ara the covings.
The vertical sides of the opening, a part of the wall of the apartment, are the jarnbs. The chimney - pieca is the ornamental dressing around the jambs and mantel. The entabis. ture resting on the latter la the mantel. The mantel-shelf, or mantel-piecs, rests thereupon. Ths whole hollow apacs from the flreplace to the top of the wall is the fonnel, or chimneyhood. The contracting portion of the funnei is the gathering. The narrowest part is the throat. The throat is closed (at times) by a damper. Above this is tha flue. The wall above the mantel against the flue is the breast. above the mantel against the fhime is the breast. This, in England, is usually gurmounted by a chimnsy-pot, and that frequently by \& hood, vane, or cowl. A cluster of chimneys is a stack. A chimney-board closes the fireplace in summer. A ciper-tunnel is a false chimney placed on a house as an orndment or to balance things. (Knight.)
B. Aa adjective: (Sea the compounds).
chimney-arch, s. An arch turned over the fireplace.
chtmney-hoard, s. A plecs of board used to close ul the fireplace in anmmer.
ohimney-brace, chimley-brace, 8. The nantel-shelf. (Scotch.)

He thet 1 in his line did chine the long ribbed Apen.
Dine.

Fabric:

1. A lady's dress goods made with printed or dyed cotton or ailk warps, afterwarda woven. A mottled effect is produced.
2. A tabric in which a mixture of coiours is produced hy a double thread formed of two smaller threads of different colours twiated togethar.
çhined, a. [Eug. ohin(e) (1), s. ; -ed.] Havling a hack-bons; back-boned ( (it. \& fig.). Usuaily in composition, as in the example.
".... These be they, these steel-ehined racals"-
ghine'-Ing, $a$. [Cuine (3), a.] Pertaining to the chine or chimh of a cask.

## chineing-machine, s.

Coopering: A mschina to chamfer the ends of staves on the inaer aurface, and form the chine.

Chī-nēşe', a. \& s. [Fr. Chinois. Properly as a noungingular, with a regular plural originally of Chineses, hut now taken from the aouod as a plural. Cf. cherry.]
way. Aa adj.: Pertaining to China in any
B. As substantive:

1. A nstive of China
2. The language of China

Chinese architecture. The architecturs of China had its rise from Indlan srt fintroduced with the worship of Buddha, But diversities of treatment soon sppeared, and instead of the Indian dagoba arose a towerlike construction of many atoreys, growing gradually smaller towards the top, aed with each stsga distinctly marked, and covered with many-coloured curved roofs, to which bells were attached. These edifices were, for the most part, octagonal, and were conatructed for religious purposes. Chinese atructurea hava nothiag durshle about them wood forming an essential element in their constrnction. They are mora remarkable for their elegance and alender proportions than their elegance sud alender proportions than
for size. The toofs ars especislly characterlatle, the most atriking peculiarities being that they are always curved, and lave figures on them in high relief, as well as st ths corners, from which hang bella, and that they are decorated with isntastic cmbellishments, such as dragons, \&c. The Chinese do not possess the art of arching large spaces, and consequently numbrous columns are introduced for the support of the ceilinga and roofs; thess are of wood, aometimes carved, but alwaya painted. (Rosengarten. \&c.)
Chinese-balance, a. A form of the steelyard having four pointa of auspension,
and as many quadrated aidea to the wolght arm of the lever. [STEELTARD.]
Chinese-blue, ${ }^{2}$ A mixture of altrsmarice, or of cobalt blue, with flake white. (Weale.)
Chinese capmtan, s. A differential holating or hauling device, having a vertical axia, and therein only differing from the differential windlass (q.v.).

## Chinese-cherry, s. <br> Bot. : Cerasus chinensis <br> Chinese-crab, s.

Bot. : (1) The fruit of a tree, Pyrus spectabilis, (2) the tree itself.

Chinese-fire, a. A pyrotechnio composition, consisting of gumpowder, 16 ; nitre, 8 ; charcoal, 3 ; auiphitr, 8 ; cast-iron borings (small), 10.
Chinese-glne, s. A superior glue and varnish, obtained from a apecles of algæ, which abounds on the ehores of China. When once drisd it resiats the action of water, and fa used by the Chinese to fill up the lozengeshaped iaterstices in the natwork of hamboos of which their windows are frequently constructed, as well $8 s$ to atrengthen and varnish the paper of their lanterns. (Ogilvie.)

## Chinese-grass, $s$

Bot. : [China-orass].
Chinese indigo, 8. A plant, Isatis indi. gotica.

## Chinese lantern, s. [Lantirn.]

Chinese pavilion, s. [So called from the usual shape.]
Music: A pole with several trensverse brass plates of soms creacent or fanatastic form, genarally termiosting at top with a coaical paviprts hat. On all bells parts are hung small bells, to jingle hy ahaking the inatrument held vertically up and down. It is used only in military bands, and mors for ohow than use. (Victor de Pontigny, in Grove's Dict. Mus.)
Chinese pitoher-
plant, s. A pitcher plant,
cpenthes phylumphora.
Chinese stones, s. pl.

pavilion. Certain stones consisting chiefly of silicate of alumina altered by hest so as to adapt the material to be used in makiag grotesque atatuary.

Chinese swallows' nests, 8. pl. These curious productioes, which seli at such a high price in China, though they have no apecial points of recommendation beyond many other gelatinous ingredients in soups, were formerly supposed to be mada of gems Were inmerly aupposed to be mada of aems
species of the rose-spored Algæ, ss Spherospecies of the rose-spored Alga, as Sphero-
cocous lichenotdes; but this is now ascertained to ke a mistake, sud it is known thst they to be a mistake, snd it is known thst they
are formed of a secretion froo the mouth of sre formed of a secretion frolo
the bird itsalf. (Treas. of Bot.)

## Chinese-tree, s.

Bot. : Poconia Montan.
Chinese-varnish, s. Rhus vernicifera.
Chinesc-wax, s. A secretion from a tree growu in China. [Ceryl cerotate.]
Chincse-white, a. White oxids of zinc.
Chinese windlass, A. A differential windlass, in which the cord winds off one part of the harrel and on to the other, the amount of absolute lift being goveraed hy the difference in the diameters of the respective portions. It is a good contrivance in the respect that great power may be attaiged without msking the axle so small as to bs too weak for its work. [Differential, winoLass.]

Chinese-yellow, s. A very bright sulphuret of arsenic, formeriy brought from China (Weale.)
cchǐn'-gil-y̆, "chìn-giy̆, a. [Shingly.]
"chĭn'-gle, "chyn-gyl, chyn-gle, a.
chinit (1), 2. [Formed by the sddition of $k$ at a dimin. from chins (2) (q. v.).]

1. Ord. Lang.: A narrow oleft or crevice; a mall longitudinal oponing ; a ollt.
"And Where, nocurs as monse in chink,
Rovired Cas.
2. Mining: A Joint in a vain, through which air or water flows. (Weale.)

- Her Beanty and har Chivatry, and brlght

## II. Technically:

1. Hist. : The rise of chivalry has been plsced by sone as late as the crusadea, but st that tinne it was in an sdvanced stage of developinent. From the 9 th to the 12th cantury, a "niles," that is, oae bearing a deaignation which in classical times meant aimplys soldier, and in the mediaval jeriod a knight, wiss one who held land or fee from a auperior, and was in consequence bound to rcader him nilitary service. Whed a young man who was heir to these respoosibilities came of age enough to formally pledge himself to discharge them honourably, a ceremony of iovestiture took place. Tlie Church, as was naturai end right, sought to add solemaity to the interesting event, snd made the investiture of 8 youthrul knight an imposing religinus ceremony, boldlog up, moreover, before him e high maral to aspire. vercy to vanguished exhorted pnrity in the youthful koight's relations to wousen were earneatly pressed upon him; and there was ondouttedly more of both than if the Christian Church had not ioterfered. Yet withal the ages of chivalry were marked to a frightfal extent by cruelty nod impurity. Whilst the Church counselled End poets celebrated the religions and moral elevation of the true knight, that individual himself manifested little of either; his principles sod his practice were wonderfully different. Chivalry declined and fell with the feudal system, of which it was a normal growth. The institution of the military orders, the Knights Templars, the Knights of St. John, snd the Teutonic Knights, was an interesting development of chivalry. To a certaln extent also it has a place in the present, its ceremontes being retsined in the creation of modern knights, though some of to the days of its vigonr it effected in makiog ociely braver, more compassionste, snd noore phre, created for it a title to gratitude which shonld never pass away.

* 2. Law: A tenure of land by kuight's capite. [Cuier, B., I1. 1.]
"Servitiume molltare of the French chovallorp: E but is holden mediatel or lmumediatuly of the orown,

 to be pale-green ; $\chi^{\text {dóos (chioos) }}=$ pale green.] Med. : A discoiouration of the human akin which oecurs in greenish or yellowigh-brown petches, and for the most part on those portions of the body which are covered by clothing. The affection is due to a fungus or confervoid, Microspora furfur.
ahy-è'- -a, s. [Gr. xhón (chlot) $=$ the young ehoota of grsss, \&c. $]$
Zool.: A genus of Annelids, belonging to the order Dorsihranchlata, in which the head is furnished with five tentacuis, and the branchie resenuble a tripionsta leaf.
chlör-, pref. [Спloro-.]
chlör'-a, s. [Gr. xגupós (chlōros) = green.] Bot. : An snnnal herhsceous plant, wel nosrked smong Gentianacea by its eight-clef lowers sud eight stamens. Chlora perfoliatt called Yeilow-wort, the only British example, ts a singularly erect, slender pisnt, about a foot high, with but few root-reavea. The whole plsnt is perfectly smooth, and of a de cided glaucous hue. The flowers, which sre rather large, sud of a delicate ciesr yeliow expand only during the sanshine, like the enus Erythrea, to which Chlora is aliied The whole plsnt is Intensely litter, and may employed with advantage as a tonic; it also dyes yellnw. It is common in chalky pastures, especisliy near the sea.
chlör-ă'-ět-āte, s. [Eng. chloracel(ic);-atc.] Chem. : A salt of chioracetic scid.
chlör-a-çĕt'-ic, a. [From Eng., \&e. chlor(ine), and acetic (q.v.).] Derived from chlorine and acetic scid.

## ohloracetic acid, s.

Chemistry:
Monochloracetic acid, $\mathrm{CH}_{2} \mathrm{Cl} . \mathrm{COOH}$, is obtained by ths sction of chiorine on boiling glacial scetic scid. It boils at $186^{\circ}$, snd solidj fies st 64*. Suluble in water, and is gradually decomposed when the squeons solation is boiled. IIeated with KHO it is converted into potassium glycollate, $\mathrm{KC}_{2} \mathrm{H}_{3} \mathrm{O}_{3}$.

Dichloracetic acid, $\mathrm{CHCl}_{2} \mathrm{COOH}$, is formed by the action of chlorine on monochloraceticscid. It boils at $105^{\circ}$.

Trichloracetic acid, $\mathrm{CCl}_{3} \mathrm{COOH}$, is obtsined by the action of excess of chlorine on glacial cetic acid in direct sunlight, or by oxidation of chioral hydrata with chromic acid or with nitric seid; slso synthetically by the setion of $\mathrm{Cl}_{\text {snd }} \mathrm{H}_{2} \mathrm{O}$ on $\mathrm{C}_{2} \mathrm{Cl}_{4}$ carbon dichloride $t$ is a colourieas scid deliquescent substance Nascent hydrogen reduces it to scetic scid. Bolied with excess of smmonia it yields ammonia carbnnate and chloroform. By PCl it is converted into trichloracetyl chloride, $\mathrm{CCl}_{3} \cdot \mathrm{CO}^{\cdot} \mathrm{Ci}$.
chör'-g-gĕt-ŏne, s. [Eng. chlor(ine); and acetone.]
Chem.: Acetons in which hydrogen has been replaced hy chlorine. Monochloracetone $\mathrm{CH}_{3} \cdot \mathrm{CO}^{\cdot} \cdot \mathrm{CH}_{2} \mathrm{Cl}$ is prepsred by the action of hynochiorous acid on acetone. It is a colourless liquid, boiling at $119^{\circ}$.
chlör'-8-a, s. [Gr. $\boldsymbol{x}^{\lambda}$ woós (chlöros) $=$ green.] Bot. : An extensive genus of terrestriai or chids, exclusively found in the southern districts of South America. Their roots are coarss, fasctcled, glutinous fibres. The lesves are all radical. The scape is ciothed with thin herbaccons sheaths. The flowers grow in spikes or racemes in the manner of the Green Orchis, ars greenish, whitish, or yellow, occasionally marked by deep hrown specks. Some thirty or forty species are cnown, none of which are in cultivation (Treas. of Bot.) It is thought in Chili that Chlorcea disoides promotes the flow of milk.
chlör-al, s. [From Eng., \&c. chlor(ine); -al.] Chem. : $\mathrm{C}_{2} \mathrm{HCl}_{3} \mathrm{O}$ or $\mathrm{CCl}_{3}$. $\mathrm{CO} \cdot \mathrm{H}=$ trichloral dehyde. Chloral is a colourless, odorons, ail alcono snd ether sp. It is 502 is water by passing chlorias gas through sbsolute sle by passing chlorias gas through sbsolnte slcohol. By the action of carstio potash it is
decomposed into chloroform and formsta of potassium. It chsnges on keeping into s solid

Whita modification, reconverted into s iiquid by heat With water it forms a crystaline compound called hydrate of chloral, $\mathrm{CCl}_{3}$. $\mathrm{HC}(\mathrm{OH})_{2}$.
chloral hyrirete
Pharm. (Chloral Hydras): A white orystalline substance, forming a neutral aqueous oolution if free from HCl. Ita solution in chioroform, when shaksn up with suiphuric acid, remains colourless if no oily tmpurities are present; 100 grains of hydrate of chloral dissolved in an ounce of distilied water and mixed with thirty grains of sisked lime obould yield, when carefully distilied, not less then seventy grains of chiloroform. Chlorai is used in medicine in the form of a syrup. It produces sieep, but oniy acts as sn anodyne during sleep, the pain returning as soon as the pstient wskes. The babltusl use of this trug is followed by profonnd melancholy snd drug is followed by profound melancholy snd
enfeeblement of will, snd muscular lassitude enfeeblement of will, snd muscular lassitude and suicidsl inss
Dr. O. Lieltreich.
chlör'-al-işm, s. [Eng. chloral; -ism.]

1. The act or practice of using chloral ss a hypnotic.
2. The slinomini condition of the systen rasulting from tho hahitual use of chlorsi. The ill effecta sra often mental and moral as weiliss physical.
chlör'-al-ist, s. [Eng.chloral(ism): -ist.] A person addicted to the use of chloral.
chlör-al-ize, v.t. [Eng. chloral: -ize.] To treat with chloral, to sffect with chioralism.
chlör'-a-nill, s. [Eng. chlor(ine), and anil(ine).]

Chem.: $\mathrm{C}_{6} \mathrm{Cl}_{4} \mathrm{O}_{2}$. Tetrschloroqninone. It is formed by the sction of bydrochioric scid and chiorste of potassium, on sniline, phenol, isatin, \&c. It crystallizes in golden-yeflow lsminæ, which sre insoluble in wster, soluble in hot sicohoi and ether; it sublimes at $150^{\circ}$, and is converted by $\mathrm{PCl}_{3}$ into perchlorobedzene, $\mathrm{C}_{6} \mathrm{Cl}_{6}$. The potassium salt of chloranilic actd, $\mathrm{C}_{6} \mathrm{Cl}_{2} \mathrm{O}_{2}(\mathrm{OK})_{2}$, is formed by dis. solving chloranil in strong potash; it erystal. lizes in dsrk-red needies, sparingly soluble in water.
chlör-a-nill'-Io, a. [Eng, chloranil; and -ic.] l'ertaining to or derived from chloranil (q.v.).

## chioranilio acid, s.

Chem.: Chioranilic acid, dichlor-dioxy quinoas, $\mathrm{C}_{6} \mathrm{Cl}_{2}(\mathrm{OH})_{2} \mathrm{O}_{2}$, is formed by decom posing the potassium salt by acids. It forms reddish crystalline scales.
chlor-an'-l-line, s. [Eng. chlor(ine), and aniline (q.v.).] [ANILINE.]
Chem. : By the setion of chiorine on aniline, monochioranitine, $\mathrm{C}_{6} \mathrm{H}_{4} \mathrm{Cl}\left(\mathrm{NH}_{2}\right)$, diehlorsniline, $\mathrm{C}_{6} \mathrm{H}_{3} \mathrm{Cl}_{2}-\mathrm{NII}_{2}$, and trichlorsniline, $\mathrm{C}_{6} \mathrm{H}_{2} \mathrm{Cl}_{3} \cdot \mathrm{NH}_{3}$ are obtained.

Chlör-ăn-thä'-çé- 8 , s. pl. [From Mod. Lat. chloranthus (q.v.), and Lat. fem. pl. adj. suff. -acece.]

Bot.: A small fanily of Dicotyledons, with fowers of a very simple structure, sllied to those of Piperacere and Saururacea. They are trees, shrubs, or rarely herbs, with oppo site leaves connected hy sheathing stipules. The minute flowers are in simple or branched terminal spikes, often srticulate ss is Gectur.
chlör-ăn'-thŭs, s. [Gr. $x$ ג $\omega \rho$ ós (chlöros) $=$ green, sud äv $\nu$ os (anthos) = a flower.]

Bot. : A genus of piants, the type of the order Chioranthacee, the only florai envelope of which is s very sinsll calyx, consisting of one scals sdhering to the side of the ovary. The spparently singie stamed, which is the most remarkable part of ita structure, con sists of three, the central one of which has s perfect two-celled snther, and the other two, ous on esch side of it, have only half si snther, so thst they are only one-celled, or the two listeral half-anthera may be deficient, lesving s single perfect stamen. They sre sttached to the side of the ovary immediately shove the calyx. They are natives of Jspsa and Chinn, whera they sre called Chn-han.
chör-ăn'-thy̆, s. [Chloranthus.]
Bot.: The tendency in hrightly coloure petals when decaying to lecome green.
chior-mp'-9-tita, \& [Eng. chlor(ine), and patite (q.v.).]
Min. : A variety of Apstite (q.v.), in which the proportion of chlorine is excessive
chlör-ar-igyr-ite, s. [Gr. $\chi^{\text {anopós }}$ chloros) $=$ green ; äpupos (arguros) $=$ sllver; snd Eng. uff. -ite (Min.)]
Min. : A mineral consisting of silver and chlorine. (Brit. Mus. Cat.)
chlör-ăs'tërr, s. [Gr. $\alpha$ גupós (cilōros) $=$ grean, and äomp (astêr) = a star.]
Zool.: A genns of Infasoris, of the fsmily Monsdina, having a single month (\%) terminai, a single frontal eye-spot, no tail, snd the middle of the body with radiste warty processes. (Griff. \& Henfrey.)

 star, and Eng. suff. -lite (Min.), from dieos ( lithos) $=$ a stone.]
Min. : A light blnish-green minerai, found on the benks of Lake Superior, in smali rounded pebhles. It receives s fine polish. Herduess, $5 * 5-6 ; \mathrm{sp}$. gr., $3 \% 180$.
chlör'-ate, s. [In Fr. chlorate, from Eag.; de. chlortine), and suff. -ate (Chem.) (q.v.).] [Chzonic Acid.]
Chlorate of potassium :

1. Cherr.: $\mathrm{KClO}_{3}$. Obtained by passing a current of chlorine gas through a mixture of carbonste of potassium and slaked lime, $\mathrm{K}_{2} \mathrm{CO}_{8}+6 \mathrm{Cs}(\mathrm{OH})_{2}+6 \mathrm{Cl}_{2}=2 \mathrm{KClO}_{3}+5 \mathrm{CaCl}_{2}+$ $\mathrm{CaCO}_{3}+6 \mathrm{H}_{2} \mathrm{O}$. The carbonste of calicium is removed hy filtration, snd on evaporating the solution the potassium ehlorate separstes out in colourless trsnsparent anhydrous six-sided piates; wster dissolves only 3.3 psrts of the ssit at $0^{\circ} \mathrm{C}$. It is insoluble in slcohol. When heated, potassinm chlorate is decomposed thus $2 \mathrm{KClO}_{3}=\mathrm{KClO}_{4}+\mathrm{KCl}+\mathrm{O}_{2}$; on iscressing the potassium perchiorate is decom-posed- $-\mathrm{KClO}_{4}=\mathrm{KCl}+2 \mathrm{O}_{2}$. [Chlonic actid.]
2. Pharm. (Potasse Chloras): It is given it the form of Trochisci Potasse Chloratis (Chlorste of Potassium Lozenges). Chlorate of potassium acts as a refrigerant and dinretic ; it exerts a powerful action upon the mincous membrsnes when used as a gargle in csses of sevcre tonsilitis, \&c.
chlör-é-a, s. [ChLorea.]
chlör'- éth - āne, s. [Eng. dc. chlor(ine); ethane.]
Chem. : $\mathrm{C}_{2} \mathrm{H}_{5} \mathrm{Ci}$. [Chloric Ether.]
chlör'-ĕth-ène, s. [Eng. \&c. ohlor(ine); ethene.]

Chem.: $\mathrm{C}_{2} \mathrm{H}_{3} \mathrm{Cl}$. A gas liquifying st $18^{\circ}$. It has an sllisceons odour.
ohlör-ĕt'-lic, a. [Eng. chlorit(e); -ic.] Resembling or containing chlorite.
$\dagger$ chlör'-hȳ-dricc, a. [From Eng. chlor(ise), and hydro, in compos., from Gr. ivoup (hutōr) $=$ wster.] [Chlobide.]
ohlorhydric actd, s. [Chlonide]
chiör'-hȳ-drings, s. pl. [Eng., \&e. chlorthy$d r(i c)$, sud (glycer)in(e).]
Chem.: Etbers produced hy the sction of chlorine nu glycerine - monschiorhydrin $\mathrm{C}_{3} \mathrm{H}_{5}(\mathrm{OH})_{2} \mathrm{Cl}$, dichlorhydrin $\mathrm{C}_{3} \mathrm{H}_{5}(\mathrm{OH}) \mathrm{Cl}_{2}$. By the action of $\mathrm{PCl}_{5}$ on giycerine, trichlorhydrio $\mathrm{C}_{9} \mathrm{H}_{5} \mathrm{Cl}_{3}$ has been obtsined. Ethers of glycerine end in in. [Dichlorhymin.]
chlör-hÿ-drб quĭn'-ŏneş, s. pl. [Eng., \&c. chlon(ine); hydroquinones.]
Chem.: Substitution comprounds of hydroquinone, $\mathrm{C}_{6} \mathrm{H}_{4}<\mathrm{OHF}^{\mathrm{OII}}$, the $(\mathrm{OH})_{2}$ occupying the position in the benzene ring, $1-4$. They ars obtaincd by the reduction of the corresponding chloroquinones with sulphurousacid $\mathrm{C}_{6} \mathrm{II}_{2} \mathrm{Cl}_{2}(\mathrm{OlI})_{2}$ melts at $158^{\circ} ; \mathrm{C}_{6} \mathrm{HCl}_{3}(\mathrm{OH})_{2}$ st $134^{\circ}$; snd $\mathrm{C}_{6} \mathrm{Cl}_{4}(\mathrm{OH})_{2}$ at $200^{\circ}$.
ohlör'-1́, a [Eng. chlor(ine); -ic.] Pertaining to or containing chlorize.

## ohlorio actd, s.

Chem. : $\mathrm{HClO}_{3}$. A monobasic scid obtainsd by decomposing barium chiorate, $\mathrm{Ba}\left(\mathrm{ClO}_{8}\right)_{2}$ by diluta sulphuric scid, and decanting the ciear liquid. It oxidises organic matter rapidly. When boiled it gives off $\mathrm{O}_{2} \mathrm{snd} \mathrm{Cl}_{2}$, and perchloric scid is formed. It forms
boin, bofy; pout, fợl; cat, çell, ohorus, çhin, bençh; go, gem; thin, țhis; sin. as ; expect, Xenophon, excist. -ing.

salts called chlorates; they are soluble, and give no precipitate with $\mathrm{AgNO}_{3}$. Potassium chlorate explodes when triturated with sul. phur or phosphorus in a mortar. It is used in the manufacture of fireworks, percussion caps, and luciter matches. Chlorates when beated on charcoal deflagrate. When hested strongly they give off oxygen and are con verted into chlorides which give a white precipitate with srgentic nitrate. Heated with strong $\mathrm{H}_{2} \mathrm{SO}_{4}$ they give off $\mathrm{Cl}_{2} \mathrm{O}_{4}$ with explosive violence. Hydrochloric acid liberates euchlorine, an explosive mixture of chlorine and chlorine tatroxide ; it is a powerful oxid ising agent, used to destroy organic matter.

## chloric ether, s.

1. Chem. : $\mathrm{C}_{2} \mathrm{H}_{5} \mathrm{Cl}$, or $\mathrm{CH}_{3} . \mathrm{CH}_{2} \mathrm{Cl}$. Ethyl chloride, Chlorethsne, also called Hydro chloric ether, a monstomic haioid ether formed by substitution of an stom of chlorine for an stom of hydrogen in the hydrocarbon ethsne by the direct action of chlorine. It also can be prepared by the union of hydrochloric acid with ethene, $\mathrm{C}_{2} \mathrm{H}_{4}$, and by dis. tilling st a gentle heat alcohol saturated with dry hydrochloric acid gas. It is a thin, colourless, volatile liquid, hoiling st $12.5^{\circ}$ By the action of hot aqueons caustic potash, it is resolved into ethyl slcohol and potas sium chloride; with sleoholic potash it forms ethylic ether, $\mathrm{C}_{2} \mathrm{H}_{5} \cdot \mathrm{O}_{2} \mathrm{C}_{2} \mathrm{H}_{5}$. Heated with ewhlic ether, $\mathrm{C}_{2} \mathrm{H}_{5}{ }^{\circ} \cdot \mathrm{C}_{2} \mathrm{H}_{5}$.
soda-lime, it yidlds ethene, $\mathrm{C}_{2} \mathrm{H}_{4}$.
2. Pharm.: The so-called chloric ether used in medicine, is only a solution of one fluid ounce of chlorotorm in nineteen fluid ounces of rectified spirit of wine. It is given as a parcotic snd antispasmodic, and is a valuable sedative in neuraigia.
t chlō-rǐdāte, v.t. [Eng. chlorid(e), snd chloride.
chlö'-ide, s. [Eng. chlor(ic), snd suff. -ide
Chem. : A compound of chlorine with an slement, or radical. Hydrogen chloride, $\mathrm{H} . \mathrm{C}$ $=$ Hydrochloric acid = Chlorhydric seid $=$ Huriatic scid. Hydrochloric acid is a colourless gas. It is very soluble io water; 450 rolumes dissolve st $15^{\circ}$. It fumes strongly is damp air. It is formed by the action o difused daylight on a mixture of H snd Cl slso by the action of strong sulphuric seid on sodium chloride; it can be collected over mercury; it is condensed into a cololir less liquid by a pressure of 40 atmospheres at $10^{\circ} \mathrm{C}$. Sp. gr., $1 \cdot 27$ Its solution in water (commonly called hydrochloric acia say or sulphuric acis ung common sal NsCl with sulphuric acid. Muristic acid is sn impure, solution of matter, sad sulphuric acid. It is nic, organuc matter, snd sulpharic scin. large quatities in the preparstion of sodinem carbonate. The hydrogen in hydroof shdium carbonate. The lyydrogen in hydro-
chloric acid can be replaced lyymetals, forming chloric acid can be replaced ly metals, forming
metallic chlorides (see the different metals). metallic chlorides (see the different metals). Soluhle chlorides are detected by their giving a white precipitate with silver nitrsto which is insoluble in nitric scid but soluble in $\mathrm{H}_{2} \mathrm{SO}_{4}$ snd $\mathrm{MnO}_{2}$ give off chlorine.

## Chlorile of antimony solution:

Pharm.: Antimonii Chloridi Liquor heavy yellowish-red liquid. Sp. Gr., I'47. It consists of terchloride of sntimony, $\mathrm{SbCl}_{3}$ dissolved in hydrochloric scid; on the addition of wster it gives a precipitate of oxy chloride, SbOCl ; this, treated with sodium carbonate, is converted into the oxide $\mathrm{Sb}_{2} \mathrm{O}_{3}$. [Astisosix.] Chloride of sntimony is a powerful caustic and escharotic, and is apphed to cancerous growtias and poisonous twice its weight of calcium phosphaste, is a twice its weight of calcium phnsphate, is a
substitute for "Jsmes's powder." It is given substitute for "Jsmes's powder." It is given
when the diaphoretic and slightly alterative offects of antimony sre required in s mild form.

## Chloride of nitrogen :

Chem.: $\mathrm{NCl}_{3}$ an oily explosive liquid, sp. gr. $1 \cdot 65$, obtained by the sction of excess of chlorine on ammonium chloride solution; slsa by suspending a piece of ammoninm chloride in a solution of hypochlorous acid, $\mathrm{NH}_{4} \mathrm{Cl}+3 \mathrm{HClO}=\mathrm{HCl}+\mathrm{NCl}_{3}+3 \mathrm{H}_{2} \mathrm{O}$. This dsngerous substance is decomposed violently by sentle heat, or by contact with fat, \&c.
By some chemists it is thought to contain By some chemists it is thought to contain
hydrogen. it is smmonis $\mathrm{NH}_{3}$ in which the hydrogen. It is sm
H is replaced by Cl .

Chloride of sodium :
I. Chem. : NsCl , sodium chloride or common salt. [SODIUM]
2. Pharm. : Sodii Chloridum. It occurs in transparent cubes or in emsil whita grains. It is soluble in three parts of cold water, and ita solubility increases very slightly with rise of temperature; it is partly precipitated by HCL. It is nearly insoluble in alcohol, sind fuses at $776^{\circ}$, and at higher temperatures volstilises. It is a necessary article of rood, and occurs in the blood snd other animal fluids ; a deficiency causes disease. Chloride of sodium deficiency causes disease. Chioride of sodium in large doses acts as an emetic, purgative, snd anthelmintic ; in milder doses it is a
slight stimulant and alterative. Externally slight stimulant and alterative. Exbefacient. Sponging with salt water is good for rhenmatism and joint sffections.

Chloride of zinc solution:
Pharm.: Liquor Zinci Chloridi. A solu tion of chloride of zinc, $\mathrm{ZnCl}_{2}$, which applied externslly scts as an irritant and astringent when mixed into a paste with gypsum it is applied as a powerful escharotic to malignant ulcers. A solution of chloride of zine, sp gr. 2, is nsed as a deodorizer and disinfectan ander the nsme of "Sir W. Burnett's solution.
chlör-ĭd'-ic, a. [Eng. chlorid(e); -ic.] Pertaining to or containing chloride.
chlör'-id-ize, v.t. [Eng. chlorid(e); -ize]] The ssme as Chloridate (q.v.).
chlör - ĭm'-ĕt-ry̌, chlör-ŏm'-ĕt-ry̆y, [Eng. chlorine; Gr. Meqpor (metron) $=$ a mes sure.] The method of determining the amount of chlorine in a ample of bleaching powder. (For methods see Wotts : Diet. Chem. " He [Gay-Lussac] now prescribes an the preferahle
plan of chorometry, to pour very slow from $A$ gradusted glass tube a standsrd solntifon of the chloride, to be tested upon a deterrmaale quantity of arsenions
acid dissolved in mariatic actd, till the whole arentous mo converted into the arienic ncide "-Ure: Diction ary of Arts, Manułactures, and Mines.
chlör'-in-āte, v.t. [Eng. chlorin(e); -ate.] To treat with chlorine.
chlör'-int-à-těd, a. [Chloninate, v.]

## chorinated lime,

Pharm.: Cslx Chlorata. A mixture of cal cium hypochlorite, $\mathrm{Ca}(\mathrm{ClO})_{2}$, with calcium chloride, $\mathrm{CaCl}_{2}$. A whitish powder is obtained by passing chlorins gas over loosely spread at hydrste of calcium. Its solution (Liquor Calcis Chlorate) is formed by adding one pound of the solid to 160 fluid ounces of distilled water. $1 t$ is used as s disinfectant and in the preparation of chloroform.
chlör-in- $\mathbf{a}^{\prime}-\mathrm{tion}$, $s$. [Eng. chlorin(e); -ation.] A process for the extraction of gold by ex-
posure of the suriferous msterial to chlorne gas. Firat introduced by Pisttner. The ollowing conditions are necessary :- (1) The gold must be in a metallic state (2) There must be no other substance in the charge which would combine with fred chlorine. (3) The chlorine must have no int purities which would dissolve other metals on ases. (4) No reaction must be induce d which would cause precipitation of the gold before the termination of the process. The incocess with quartz and freasting, but the istter process is necessary with ores containing sulphurets and arseniurets. In the chlorinstion process, the ors is sitted into a wooden vat lined with pitch, snd having a false bottom, beneath which the gas is admitted. The top is luted on snd the gas sumitted; when the gas legins to escape at a hole of observation in the lid, it hole is then thast the sir is ejected snd the passed into the mass for say eighteen hours according to the coarseness of the gold; th cover is removed and water introibucci, and the solution drawa off into the precigitation vat. The goid is precipitsted by sulphate of iron, the supernstant liquor decanted. The sediment is s brown powder which is filtered apon psper dried in sn iron or porcelain vessel, smelted to a metalicic regulus in clay crucibles, a little borax, salt, sind nitrate of potash being used as fluxes. (Knight.)
chlör'-in-dïn, s. [Chlorigat.de.]
chlör'-ine, s. [Ger. chlor; Fr. chlorie, from Gr. xiwos chioros) = pale-green, light-green,
greenish-yellow, and Eng. suff. -ine (Chem.).]

1. Chem.: A monatomic elemsnt. Symbol CL Atomic weight, $85^{\circ}{ }^{5}$. Discovered by Scheele contain oxygen, and was called by him axy. muriatio acid. It was found to bo an eloment by Davy in 1810. Cblorine is a yellow-
green incombustible gas. It has a powerful irritating smell, sad attacks Fiolently the mucous membrane and the lungs. It is very solubls in water, acta strongly on metala, and is best collected by displacement. Sp. gr., 247 . At the preasura of five atmospheres
it is condensed into s heavy yellow liquld. It is ohtained by heating common salt, sodjum chloride, with sulphuric acid and black oxido of manganese. It combinea with bydrogen to form hydrochloric acid, with en explosion in direct sunlight or when a light is applied to a mixture of the two gases, but slowly in diffnsed dsylight. $A$ solution of it in watar is gradusily converted in the sunlight into candle burns in Cl with a smoky flame. Phosphorns, antimony, arsenic, snd turpentine take fira in chlorine. Chlorine destroys animal and vegetable matter; and forms sddition and substitution compounds with organic com pounds ; an squeous solntion of it has powar ful blesching properties. It is also a power rul disinfectant. It occura in nsture in the form of metallic chloridea. Three oxides of chlorine are known, $\mathrm{Cl}_{2} \mathrm{O} ; \mathrm{Cl}_{2} \mathrm{O}_{3} ; \mathrm{Cl}_{2} \mathrm{O}_{4}$.
2. Pharm.: Chlorine is used in pharmacy as Liquar Chlori, 8 solution of chlorins in water; snd as Vapor Chlori, inhalstion of chlorine. Fres chloring gas acta as a power ful stimalant or irritant, sccording to its state of dilution; it is used in cases of chronio bronchitis and phthisis. A diluted solution is used as a gargle for ulcerated tonsils; and as a lotion to foul ulcera, and in some skin diseases.

## chlorine monoxide, s.

Chem.: $\mathrm{Cl}_{2} \mathrm{O}$. A colourless gas obtained by the sction of chlorine on cooled precipitated mercuric oxide; it can be condensed to a red liquid, which explodes on elevstion of tem perature. It has powerful bleachiog properties It dissolves in wster snd forms hypochlorous acid: this acid forms 881 ta called hypochlorites These salta can also be obtaine of alkalies of chlorine gas into cold solutions odrates of cal cimin, de. Bleaching-powder is thus prepared

## ohlorine tetroxide, $s$

Chem.: $\mathrm{Cl}_{2} \mathrm{O}_{4}$, \& dark yellow explosive gas which can be condensed to a red liqnid. 1 is obtained by the sction of stroug sulphurio scid on chlorate of potassium. It is absorbed by canstic potash solution, forming a chlorate and a chlorite.
ohlorine trioxide, chlorous oxide, chlorous anhydride, 8 .
Chem.: $\mathrm{Cl}_{2} \mathrm{O}_{3}$, s greenish-yollow gas, ob tained by heating s mixture of potassing chorate, nitric scid, and sraenic trioxide. It can be condensed into a very explosive liquid the gas explodes st $50^{\circ}$, and is decomposed by sunlight. It is soluble in water, torming erystalline hydrate which is gradually codverted into chlorous acid.
chlör'-in-ize, v.t. [Eng. chlorin(e); -ize.] To trest or prepare with chloride.
chlör'-in-ized, pa. par. or a. [Culoninize]
ohlör-i'- ©-dine, s. [Eng. chlon(ine); todime] Chem. : A compound of charine
chlö'-ie, s. $\quad[\mathrm{Gr}$, x $\lambda \omega \mathrm{p}$ is $($ chlöris $)=$ a hird
 green.]
Bot.: A genus of grasses, the typical ons of the tribe Chlorideæ, distinguished chiefly by the spikes of inforescence being in finger-lika tascicles, rarely two, or only one. Flower polygamous; glutnes two, containing trom three, to six florets; lower fiowera ons to three, hermaphrodite; stamens three, and styles two. Sixty-two species are described in Steudel "Synopsis," and these are mostly natives of warm, dry countries. Chloris radiata is in rretty snnusl grass, frequently culinntal and curious sppearance. (Treas. of Bot.)
chlör-is-Xt'-ic, a. [Eng. chlorisati(n); -la. Pertaining to chlorisatin (q.v.).

[^123]
## chlorisatic acid, 8.

Chem.: $\mathrm{C}_{8} \mathrm{H}_{6} \mathrm{CLNO}_{5}$. The potasslum salt of thls ecid is obtained by mixing solntions of cauatic potash and chlorisatin. It crystallisea in yellow needles, which are decomposed by hydrochloric acld with precipltation of chlorisatin.
ohlör-1s'-a-tinn, s. [Eng. chlor(ine), and seatin.] [IsATIN.]
Chem. : $\mathrm{C}_{6} \mathrm{H}_{4} \mathrm{CLNO}_{2}$. Ohtained by passing chlorine into tepid water in which isatin, or powdered indigo, la suspended. It ia pnrified by crystallization from alcohol. It crystallises
in orsnge prisms, having a disagreeable odour.
chlör-is' -a -t $\overline{\mathrm{y}} \mathrm{de}$, s. [Eng. \&c. chlor(ine); isatyde (q.v.).]
Chem. : A white or yellowish powder, deposited on cooling when chloriaatin has been diasolved, with heat, in hydrosulphuret of smmonia. It is sparingly solable in water, and by heat is resolved into chlorizatin water, a new compound appearing as a violetcoloured powder, and termed Chlorindin.
chlör-ǐ-sō'-ma, s. ${ }^{\text {s. }}$ [Gr. $\chi^{\lambda \omega \omega p o ́ s ~(c h l o ̈ r o s) ~}=$ green, and $\sigma \hat{\omega} \mu a($ sóma $)=$ a body. $]$
Ornith.: A sub-genus of the Myotherine, or Ant-thrushea, separsted by Swaioson from the Pitta of Temminck. (Craig.)
ohlör'-ite, 3. [Gr. x $\quad$ dшpitıs (chlöritis) $=a$ grass-green atone, from $x \lambda \omega \rho o s$ (chlöros) $=$ reen, and Eng., \&c. suff. -ile (Min.) (q.v.).]

1. Mineralogy:
(1) The game as Rapidolite (q.v.).
(2) The same as Penninite (q.v.).
(3) The same as Clinochlore (q.v.).

Ferruginots Chlorite:
Min.: The same as Delessite (q.v.).
2. Chem. (Pl.) : Salts of chlorous acid. They can be obtained by passing chlorine trioxide into alkaline solutions ; also by the action of $\mathrm{Cl}_{2} \mathrm{O}_{4}$ on basea. They are moatly aoluble in water. Chlorites of lead and silver are insolnbla, and are obteinel by double decomposition.

## chlorite schist, 8 .

Geol. : A green slaty rock, in which chlorite is ahundant in foliated plates, nanally bleaded with minute graina of quartz or aometimes with or even gradustes into gneisg and clayslste. (iyell.)

## chlorite slate, s.

Geol.: The same as chlorite schiat, or if there is any difference, then in the slates the there is any differenc
laminations are finer.
chlorite spar, s. [In Ger. chloritopath.] Min.: An old name for Chloritoid (q.v.).
ohlör-ǐt'-ic, a. [Eng. chlorit(e); -ic.] Per-
taining to or contaioiog chlorite. taining to or contaiaiog chlorite.

## chloritic sand, s.

Geol.: Sand coloured by an admixture of the simple mineral glanconite.

## chloritio series, s.

Geol.: A name sometimes given to the Greengand beds, but the mineral ia glauconite.
ohiör'-it-oid, s. [Eng. chlorite, and Gr. eifos (eidos) $=$ appearance. ]
Min.: A monoclinic or triclinic chlorite-like mineral, of a dark-grey, greenish-grey to refrectiolour. It is brittle, aad has a double ${ }_{3} 6$.
chlör'- ${ }^{\text {, }}$, in compos. [Gr. $\chi^{\lambda} \omega \rho$ ós (chlöros) $=$ green.]

1. Nat. Science: In composition frequeatly used as a prefix to scientille words, and indicating a bright grass-green colour.
2. Chem.: Compounds in which chlorine has
repiaced some other element replaced some other element, as hydrogen, withoat altering the conatitution of the conpound, as chloro-vemzens, $\mathrm{C}_{6} \mathrm{H}_{5} \mathrm{Cl}$. The 0 is often omitted, and chlor is used.

## chloro-argentotype, s.

Fholog.: A photographic agent prepared hy molstening a sheet of paper with a solution of common salt, and then dipping it in a bath of nitrate of silver. Taking out a thin film of the latter substance it becomes extremely sensitive to light.

## ohloro-benzene, 8.

Chem.: Monochlor-benzene or phenyl chloride, $\mathrm{C}_{6} \mathrm{H}_{5} \mathrm{Cl}$. It la prepared by the action of chlorine on beuzene, or of $\mathrm{PCl}_{5}$ on phenol. It boila at 132*. (Conault Watts: Dict. Chem.)

## chloro-calcite, $s$.

Min. : Calcite with chlorine in its compoaltlon. (Brit. Mus. Cat.)

## chloro-naphthalene, s.

Chem.: Monochlornaphthslene, $\mathrm{C}_{10} \mathrm{H}_{7} \mathrm{Cl}$, dichloro-naphthalene $\mathrm{C}_{10} \mathrm{H}_{6} \mathrm{Cl}_{2}$, se. The chloronaphthalenea are obtained by boiling the chlorides of oaphthalene with alcoholic potash, which removes HCl . These, when aubjected to the action of chlorine, form addition products, and by again boiling these witb alcoholic potash it removes more HCl , end a more highly chloriaated anbstitution compound is ohtained.

## chloro-phenol, $s$.

Chem.: Phenol $\mathrm{C}_{6} \mathrm{H}_{5}(\mathrm{OH})$, in which hydrogen has been replaced by chlorine, as Monochlorophenol $\mathrm{C}_{6} \mathrm{H}_{4} \mathrm{Cl}(\mathrm{OH})$. Dichloro$\mathrm{C}_{6} \mathrm{H}_{2} \mathrm{Cl}_{3}(\mathrm{OH})$ are obtained by action of chlorine on phenol. Pentachlorphenol or perchlorpheaol, $\mathrm{C}_{6} \mathrm{Cl}_{5}(\mathrm{OH})$, crystallizes in long chlorpheaol, $\mathrm{C}_{6} \mathrm{Cl}_{5}(\mathrm{OH})$, crystallizes in long
colourless nedles aoluble in alcohol and colourless needles aoluble in alcohol and io ether. It melts it $187^{\circ}$ Concentrsted $\mathrm{C}_{6} \mathrm{Cl}_{4}\left\langle{ }_{0}^{\mathrm{O}}\right\rangle$. When distilled with $\mathrm{PCl}_{5}$ it yields $\mathrm{C}_{6} \mathrm{Cl}_{8}$ hexa-chlor beuzene.

## chloro-picrin, 3.

Chem. : A compound formed by diatilling picric acid with chloride of lime and water. Chloro-picria, Nitro-trichlor-methane, Nitrochloroform $\mathrm{C}\left(\mathrm{NO}_{2}\right) \mathrm{Cl}_{3}$. Also obtained by distilling chloral with strong nitric acid; also by distilling a mixture of methyl alcohol and sulphuric acid over a mixture of sodiuna chloride and potassium nitrate. It is an oily liquid, bolling at $112^{\circ}$. It is reduced to methylamine $\mathrm{CH}_{3} \cdot \mathrm{H}_{2} \cdot \mathrm{~N}$ by the action of iron filings and acetic acid. Chloro-picrin heated with alcoholic ammonia is converted into guanidine hydrochloride $\mathrm{CH}_{5} \mathrm{~N}_{3} \cdot \mathrm{HCl}_{\text {. When }}$ heated with solium ethylate it is converted into ethylic orthocarbonate $\mathrm{C}\left(\mathrm{O}_{\mathrm{C}_{2}} \mathrm{H}_{5}\right)_{4}$.

## chloro-qninones, s. pl.

Chem. : Substances formed by the action of chloriae oo quinoae, $\mathrm{C}_{6} \mathrm{H}_{4}\left\langle{ }_{\mathrm{O}}^{\mathrm{O}}\right\rangle$; monochloroquiaone, $\mathrm{C}_{6} \mathrm{H}_{3} \mathrm{ClO}_{2}$. Dichloroquinone, $\mathrm{C}_{6} \mathrm{H}_{2} \mathrm{Cl}_{2} \mathrm{O}_{3}$, is formed by action of hypochlorous anhydride, $\mathrm{Cl}_{2} \mathrm{O}$, on benzena; and hy heating trichlorophenol, $\mathrm{C}_{8} \mathrm{H}_{2} \mathrm{Cl}_{3}(\mathrm{OH})$, with nitric acid, it forms large yellow prisms, meltiog at $120^{\circ}$. Trichloroquinone, $\mathrm{C}_{6} \mathrm{HCl}_{3} \mathrm{O}_{2}$, is obtained by the action of cliromyl chloride, $\mathrm{CrO}_{2} \mathrm{Cl}_{2}$, on beozene, $\mathrm{C}_{6} \mathrm{H}_{6}$. It cryatallizes in large lamine, melting at $166^{\circ}$. Tetrachloroquiaone, $\mathrm{C}_{6} \mathrm{Cl}_{4} \mathrm{O}_{2}$. [Chloranil.]

## ohloro-toluene, $s$.

Chem.: Chlorotolueae, or Tolyl Chloride, $\mathrm{C}_{6} \mathrm{H}_{4} \mathrm{Cl}^{-} \cdot \mathrm{CHI}_{3}$, ocenrs in three moditications. Parachlortoluene, 1-4, is formed by the action of chlorine on toluene at ordinary temperatures; it is a liquid, boiling at $160^{\circ}$. By oxidation with chromic acid mixture it yields parachlorhenzoic acid. When chlorine acta on boiling toluene, benzyl chloride, $\mathrm{C}_{6} \mathrm{H}_{5} \cdot \mathrm{CH}_{2} \mathrm{Cl}$, is formed. (See Jiatts: Dicl.Chem.)
chlör-ó-bĕn-zō-ic, a. [Eng. chlor(ine), and benzoic.]

## chlorobenzoic acid, s.

Chem. : $\mathrm{C}_{6} \mathrm{H}_{4} \mathrm{Cl} \cdot \mathrm{CO} \cdot \mathrm{OH}$, Benzoic acid in which hydrogen is replaced by chlorine.
chlör-0.chrŏm'-1c, a. [From Eng, ehloro, and chromic.] Having chromium and eblorine ia its composition.

## chlorochromio acid, s.

Chem.: $\mathrm{CrO}_{2} \mathrm{Cl}_{2}$. Dioxychloride of chrominm, chromyl chloride, obtained by the action of sulphuric acid on a dry mixture of potassium dichromate and chloride of sodium. A heavy red liquid, giving off red vapours. Sp. gr.,
1.71 ; boiling at $118^{\circ}$, decomposed by water into chromic and hydrochloric acids. Slowly into chromic and hydrochloric acids. Slowly pedness it depoaits rhombohedral dark-green hard cryatala of sesquioxide of chrominm.
 = pale green, and xóa (chroa) $=$ colour. $]$
Having a green colour.
 l'ale-greeu, and ко́ккоs (kokhos) $=$ a kornel.] Bot. : A genus of Algals, order Palmellacees. Chlorococcum vulgare consiate of extremely minnte cella, multiplying into twon and fours, with no gelatinous aubetratum and no zoospores. It covers nearly every plece of unpainted timber and old trunk in England 300 millions of individuals on a aquare inch (Griff. \& Henfrey.)
chlör'- $\mathbf{-}$-form (Eng.), chlör-あ-för'-mŭm (Mod. Lat.), s. [Eng., se. chlor(ic), from Lat. formica = an ant.]

1. Chem.: $\mathrm{CHCl}_{3}$, trichloromethane, methenyl chloride, terchloride of formyl. Chloro form is formed by the action of the sum's rays on a mixture of cblorine and mareh gas; also by the action of cauatic potash on chlorsl or chloracetic acld, or by the action of naacent hydrogen on tetrachloride of carbon. It is prepared on a large scalo by distilling water and alcohol with bleaching-powder. Chloroform ia a colouriess, mobile, heavy, ethereal liquid. Sp. gr., 1.5. It boils at $62^{3}$; ita vapour density ia four times that of air readily in alcohol. It has a sweet taate. It dissolves caontchonc, resins, fats, alkaloids, dissolves caontchonc, resins, fats, alkaloids, it may decompose, hydrocbloric acid and chloriae being ret free.
2. Pharm.: Cbloroform is used in medicine, dissolved in alcohol, under the name of chloric ether, as is atimulant. Chloroform taken internally acts as a nareotic, sedative, and antispasmodic, and is given in cases of asthma, colic, and cholera, also for neuralgia. Linimentum Chloroformi, equal parts of chloroform and camphor linameat, is used externally to allay paio and irritation in neuralgia and itching.
3. Surgery of Midwifery: The vapour of chloroform, when inhaled for some time, produces a temporary inseasibility to prain. Inhaled in amall doses it produces pleasurable incbriation, followed by drowsiness; in larger doses it canses loss of voluntary motion, anspension of mental faculties, with slight contraction of the muscles and rigidity of the limbs; then if the inhalation is continued a complete relaxation of the voluntary muscles takea place,
but if carried too far it causea dangeroun symptoms of apncea or of ayncope, and the patient must be restored by artificial respirapatient must be restored by artiticial respirato persons suffering from cerehral disease to persons suffering from cerehral disease
or organic cardiae affection. Dr. Simpson, or organic cardiae affection. Dr. Simpson,
of Edinburgh, in 1847, began to employ the vapour as a means of producing anesthesia or insensibility, partial or complete, in certain aurgical operations and painful diseases, as well as in ordinary obstetric prsctice.
4. Law: By 24 and 25 Vict. c. 100 , to administer chloroform or anything sinilar, with the view of one's self committing, or aiding another in committing, an indictable offence, is felony.
chlör'-ot-form, r.t. [Cнlogoform, s.] To bring under the influence of chloroform; to prodnce anesthesia or unconsclousness in, by means of chloroform.
chlör- $\mathbf{0}-$ form'-ic, a. [Eng. chloroform; -ic.] Pertaining to, derived from, or produced by chloroform.
chlör- $\mathbf{o}-\mathbf{f o r m}-\overline{\mathbf{1}}$-zā'-tion, s. [Eng. chlonoJorm; -ization. $]$ The aggregate of anasthetic phenomena resulting from the inhalation of cbloroform.
 green, and $\mu \dot{\text { édas (melas), neut. } \mu \text { édav (melan) }=}$ ilack.]
Min. : The same as Caonstedtite (q.v.).
chlör-ŏm'-ĕt-ẽr, s. [Eng, chlon(ide); Gr. $\mu i \tau \rho o v($ metron $)=$ a measure. 1 An instrument for teating the decolourizing or bleaching prowers of banples of chloride of lime. Ure'a process consists in adding liquor of ammonia of a known strength, tinged with hitune, to aolution of a given weight of the chloride na-
der examiation until the whole of the chlorine is neutralized, which is known by tha ine is nentralized, which is known by tha
colour being destroyed. From the quantity of anmonia consumed the atrength of the aample is estimated.

A. Intrans. : To encounter.
B. Trans.: To give a shock to. (Turberville.)
ghöck (2), v.t. \& i. [Сноск, s.]
A. Transitive:

1. To fasten or stop with a wedge.

* 2. To heap up (?).
"And in the tavern in his caps doth roar,
Drayton: Aginoourt, p. 79. (Latham)
B. Intrans. : To flll up ; to fit into exactly. "The wood work thereof. © exactly chocketh into
çhock (3), v.t. [CuoKe.] (Sootch.) (Burns.)
 fhŏct-b-late, s. \& a. [Sp. \& Port., from
Mexican cacwitl $=$ cacao.] A. As substantive:

1. The ant of the cacro-tree. [Cacao.]
2. A paste or cake made from the roasted seratls of the Theobroma cacao
TThe roasted and crushed seeds of the cacao-nut tree are ground between two horizontal millstones, which are kept at a temperature of about $200^{\circ} \mathbf{F}$., by means of a atearnjacket. The niba pass down from the hopper into the shoo, which is shaken by a damsel ou the spladle of the runner so as to diseharge the nibs ioto the eye which leada them to the space between the stones. The heat and friction liberates the oil, which is one third of the Teight, and the cacao issues as a paste from the spout and is condreted to a necond and simular mill where the stones are similiarly heated but are closer set, so as to still farther reduce the paste. It is discharged from the secoud grinding in a liquild condition ond is collected in a pon, where it hardens into a
cake. To enable it to form an emulsion with water, it receives additional substances. Sugar, honey, molasseg, gum, gtarch, flour rice, and arrow-root are adapted for this purpose. Splces aud flavouring extracta are added for bome markete.
3. The drink made by diesolving chocolate in hoiling water
B. As adj. : Composed of, relating to, or of the colour of chocolste.

* chocolate-house, s. A house where chocolate was prepared and sold
ohooolate-mill, s. A mill in which the roasted and crushed aeeds of the cocos plant are ground between two horizontal milletone kept at a temperature of about $200^{\circ}$ F'ahr. This liberates the oil, which ta about onethird of the weight, leaving the cocos to issue as a paste from the apont in the machine.
chooolate-nut, s. The nut of the cacaotree. [Сhocolate, s.]
chooolate-root, s. The root of a plant, Geum canadense.
chocolate-tree, s. Theobroma cacao, from the seeds of which chocolate is made.
* chod-chod, s. [Heb. (kadkod).] A aparkling gem, probably a ruby. (N.E.D.) "Gemme nad parpur, nud ciooth with dyuerse nuerchandise. - Hyciffe: $E z e k, x \times v i L i=16$.
* çhöde, pret. of v. [Crine.]
chơd'-nĕf-fite, s. [Named after the digcoverer, Herr Chodnef, and suff. -ite (Min.).」 Ifin.: A minersl much resembling Chiolite, found in the Ilmen Mountains at Miask. Compos.: Fluorine, 564 ; atumlnum, 16.3 ; sodium, $27 \cdot 3$. Sp. gr., $2 \cdot 62-2 \cdot 77$.

## chcor-a-dō'-dil-a, s. [Ceeqadodia.]

 mŭß, chër-ó-pǒt'-a-mŭs, A, [Gr. 又oipos (choiros) $=$ a pig, snd пи́rapos (potamos) $=3$ river.]

Paloont.: An extiact genus of the order Pachydernata, or thick-skinned Mammalis, Pachydernata, or thick-skinned Mammalis, considered as forming a link
choer-ŏp'-Bǐs, s. [Gr. yüpos (choiros) $=\mathbf{a}$ pig, and a 4 ts (opsis) $=$ appearance.] [Liberian Hippopotamus.]

and ehocoumasion they were collected fith judgmeat ariac -bucon: Apaph
4. A number of things proposed or offered for selection or discrimination.
'A hraver chaice of danutiess spirits
5. The thing chosen or elected; selection, preference.
 6. That which would be chosen or preferred the best part of anything; the best.
. In the choice of our sepulchres bury thy dead
If A matter of choice: One In which there is freedom of cholce or election as to the course to be pursued or preferred.
"Thit was indeed mancely
To maks choice of: To choose ; to select on from two or more thinge offered.

Wisdom of whit herself approves makes chatce,
Nor ts lod captive by the common voice.

## B. As adjectivs

I. Of things:

1. Worthy of being chosen or preferred; of superior merit; excellent, select.
"Intill a ebaumber full chole chosen there way,",
"He was a mano of a choice apirit, only he was alway Irept very low, ..."-Buayan :The Pilgrim: Progrect
*2. Carefully chosen or selected; fit, ap propriate.
II. Of persons: Careful or diecriminating in choosing or preserving; difficult to please chary, frugal.
"He that is chotes of his tima, will aleo be chotice of Living.
I For the difference between choice and option, , ee Option

* choice-drawn, a. Selected with es pecial care.
"For who is he, whose ehin is but eurich'd
With one 2ypeariag hair. that will not follo

* çhoiçe' - fini, "çhoiçe' fùll, a. [Eng choice; -ful( $)$.]

1. Making frequent cholces; fickle, chaage able
"Hin choiceful sense with every change doth Bilt",
2. Offering a choice, varied.
p. "B8eer's choicefull pleoty."-syiverter: The Colonian
çolige'-lĕas, a. [Eog. choice; less.] Not having the right or power of choosing; not free.
cyinder is male, wor the round motuble of whion the of nny more inuorihle to that dend chofcelesd creature than the firat motion of It . . ."-Hammond.
 -çhois'-1̆̆, adv. [Eng. choice; -ly.]
3. By choice ; of free choice or will

To noche a chide that chodity cheos
Legends of Holy Rood (ed Morris), p. 218,
2. Finely, excellently, in a choice manner.
"It in certala it is chotcely good."-Watton: Angter 3. Carefully; with care used in the chotce.
"To Iriend will you lead a band of men,
y, from each conity soma.
Shakeap.' 2 Henry ${ }^{2}$. ili. 1.
çolçe'-nĕss, s. [Eng. choice; -neas.]

1. The quality of heing worthy of helng chosen; excellence, superiority.
"Carry in to the shade such ariculan, seedilings. on plant, ha are for theli chatcene
2. Carefulness, nicety, preciseness.
choir (pron. kwir), quire, * queer *queere, *queir, \& \& a. [Fr. choeur Sp. \& Ital. coro; Lat. chorus $=\mathrm{a}$ band of Sp. \& Ital. coro; Lat. chorud = a band of s band of singers.] [Chonus, Quire.]
A. As substantive:
I. Ord. Lang.: A number of singera [II. 1.]
"Had vanishd from his prospecte nod destres ;
Not by traustation to the heavenly chotr"
Technically: Wordsioorth; Exeursion, bk. H.
II. Technically:
3. Eccles: : The organised body of aingers in church aervices.

- The minor canms, choral vicars, and choristera, or other singers taken collectively are spoken of as the choir. The choral body is usually divided into two sets of voices, the one sitting on the north and the other on the aonth slde of the chancel, and are known by the reapective titles of Cantoria and Decan from their nesrness to the Cantor (or Pre centor) and to the Decanus (or Dean). In most cathedrals and collemiste chapels, th Deesnt side ta held to be the side nf honour, the best voices are placed there, and all the "verses" or soli parta, if not otherwiae directed are sung by that side, which is also considered the "tirst choir" (coro primo) In eight-part music. (Stainer \& Barrett.)

2. Eccl. Archit.: The part of the bullding in a cathedral or collegiste chapel set apart for the performance of the ordinary dally
service. The choir ls generally situated at the eastern end of the building, and in frequently

GROUND-PLAN OF Choia (peterbonouoh Cathedral).

A. As substantive:

Med.: One of two or threa diseases more or less akin to each other. They are-

1. British Cholera: A severs form of diarThees, somewhat resembling but quite distinet from Asiatic Cholera. [2.] It oecurs usually doring the aummer months, and is due for the most part to deleterious food or drink taken into the body exciting the purging, vomitiag, and cramps which charscterise the complaint. Chidren often succinab to this diseasa; adults rarely.
2. Asiatic or Malignant Cholera: A malignant disesse due to a specific poison which, when received into the human body through the air, Water, or in some other way, gives rias to the most alarming aymptoms and very frequently proves fatal to life. An attack of cholera is generaily marked by three stages, thongh these often succeed each ether so rapidiy as not to be easily defined. There is first a premoaitory diarrhoea stage, in which the atools soen become very copious, watery, and rice-coloured, there is also occusional romiting, with severe cramps in the abdomen sad legs, and great muscnlar weakness. This condition is succeeded, and often within a remarkably short period, by the second stage, which is one of collapge, and ia called the algid or cold stage. This is characterised by intense prostration, supprebston of urine, great thirat, feebleness of circulstion and respiration, with colduess and blueness of the skin, iciness of tha breath, and lose of voice. Should death not tske place at this the moat fatal period, the sufferer of the the pess into the third or reaction atage of the disease. This, though very frequently marked by a high atate of fever, with a ten-
dency to congestion of iuternal organa, as the brain, lungs, kidneys, \&c., ts a much more hopeful stage than that which has preceded it, and the chances of recovary ara very much increased. Asiatio Cholera is so called from having had tts homa, be to bueak, in the East, and more especiaily in India for centuries, though there is littis doubt that under other names it had bean previously epidemie is tha Uvited States and Great Britain. The nature of the disease was not fully recognised uatil the outbreak of 1831 occurred. similar epidemics in 1848-49, in 1853-54, and in 1865-66 have increased our knowiedge of the mode of propagreased of choleraie poison, and strict attention to the lawa of sanitation will do much if not all to prevent it findiag that hebitat which appeara necessary for its develoyment into epidemic sctivity.
-I Spasmodic Cholera is another name for Aaiatic Cholera. [No. 2.]
"The malady knowa by the name of apamodic cholera and had et known in lodin from the romotest periods,

chŏ1-ĕs'-tẽr-ice, a. [Fr. sholesterique.] Perw taining to or obtained from choleaterine.

## cholesteric acid, s.

Chem: An acid formed by treating cholear teline with nitric acid. It is in yellowishwhite crystals, alightiy solubie in watsr, but sbundantiy ao in boiling alcohol.
 [Fr. cholesterine, from Gr. xodry (chole) $=$ the bile, and $\sigma \tau \in \operatorname{cop}($ stear $)=$ fat.]
A. As substantive:

Chem.: $\mathrm{C}_{26} \mathrm{H}_{44} \mathrm{O}=\mathrm{C}_{26} \mathrm{H}_{48}(\mathrm{OH})$. $\quad \Delta$ monatomic aromatic alcohol, which occura in emall quantities in the bile, brain, and nerves. It forms the chief part of biliery calculi, obtained by boiling theee in aicohol. It crystallizes in colourleas pletee, which meit at $137^{\circ}$ and aublime at $200^{\circ}$. It exists naturally in most animai liquids in a atate of solution; slso in meny snimal soiids, as in the blood, the bile, the meconium, the brain and spinal cord. As an sbnormal product it occurs in the cryatalline form in the bile, biliary caiculi various dropeical effusions, the contents of cysts, pus, old tubercles, malignent tumours, the excrements, and axpectoration of phthisis. In the vegetabla kingdom it occurs in peas, begna, almoods, many seeds, sic. Choleaterine is iosolubie in water and solution of potash, is iosoluble in water and solution or potash, even when boiling; but boluble ln ather and
boiling alcohol, cryatsllizing on cooling. It is boiling alcohol, cryetsllizing on cooling. It is it is the chief constituent), by fioely powdering them, then boiling the powder in aicohol, and filtering when hot, when the cholesterina will deposit on cooling in peariy scales. The crystals thus obtained are uxually thicker than the natural plates. It is very apariagly soluble the cold aicohol and not at all in water.

## B. As adj.: (See the compound)

## cholesterine inflitration.

Med. : A form of degenerstion wbich occura for the most part in the liver, spleen, and heart, and which is eharacterised by tha deveart, sad which is eharacterised by tha development or inflitration into these organs of a certain peculiar fatty or lardaceous mintter
gaid by gome to be of the nature of cholesterine said by some to be of the nature of cholesterine,
by others to be of a starehy or nibuminous by others to be of a starehy or aibuminous
character. The terms lardaceong, albumenoid, and anyloid are used to express the same conditions.
chôl-ěs-trō, in compos, as a prefix. [From Eng., \&c. cholest(e)r(ine), with o convective.]
Chem.: Haviag Cholesterine as the less abundant chemical substance in its composttion.
chǒl-ĕs'-trò-phānc, 8. [From Eng., \&c. cholestro ( (.,v.): and Gr. фaivw (phainj$)=$ to make to appear.]

Chem.: $\mathrm{C}_{5} \mathrm{H}_{6} \mathrm{~N}_{2} \mathrm{O}_{3}$. A dinethyl-parabanio scid, oltained by the oxidation of caffeine, mod by digesting silver parabanate with methyiodide.
chol-e'-vạ, s. [From Gr. $\chi \omega \lambda \in v ́ \omega ~(c h o ̈ l e u ̄ ̄) ~=~$ to vecome lame.]
Entom.: A geuus of eoleoptera, family Silphida. Twenty-four British species are enumerated io Sharp's catalogue (1871).
chǒl'-i-amb, chol-i-am-bic, s. [Fr. choli-
 іацроs (iambos) $=$ an iambus.]
Poet.: A verse having an iambus io the fifth foot, and a spondee in the aikth or last. into the hry hot combirs were accordingly... tratuponod us as Essopian 1ables."-l.ewis: Cred. Eurly Reman

 Eng. suff. -ic.] Pertaining to, or obtained from bile.

## cholic acid, 8

Chem. : $\mathrm{C}_{24} \mathrm{H}_{40} \mathrm{O}_{5}$. Obtained by boiling the resinons mass preci itated by ether from an alcoholic solution of bile, with a dilute solntion of potash for several hours, and decomposing the potassium salt by HCl . Cholio acid crystallises in tetrahedra. It gives a purple-violet colour with sugar and suiphuric acid.
chŏ1'-inn-āte, s. [Cholin(ic); and suff. -ate (chem.) (q.v.).]
Chem.: A term for a combination of cholinio aeid with a salifiable base.
 dian, -tian = shan. -tion, -sion = shŭn; -fion, -sion = zhŭn. -cious, -tions, -sious = shŭs. -ble, -dio, \&c. $\sim$ bel, delo
chol－in＇Ia，a．［Gr．xodif（erobr）$=$ the bile．］ Pertaining to bile or obtained from it．

## cholinio aotd，s．

Chems：A distinct substance obtained by digesting bilin with dilnte hydrochlorio actd． It is insolnhle in water．
 （cholos）$=$ bile，and $\chi$ pwima（chroma）$=$ colour
The colonring matter of bile．［Bilinubin．］

#### Abstract

Paleont.: A genus of brachiopod mollueca, family Productidx. The shall is concaroconvex, with the hinge-line straight. The ventrail valve is convex, and the dorsal ene concave. All are foeail. In 1875 Tate estimated the known epecies at forty-seven, all mated the known opecies at forty-seven, sl. shŏn'-1-crite, s. $\quad$ Gr. xwueia (chorneia) $=\mathrm{a}$ fusion, and retrós (kritos) = a test; its fusibility distinguishing it from $\operatorname{com} \theta$, allied species.]

Min.: A massive, crystalline, granuiar, or compact minerai from Eiba and Finland. It is of a whitish coiour, sometimes with yeilowish or greyish spots. It is a lime pyroselerite. Hardnese, $25-3$; sp. gr., 291. (Dana.)

ohóop, "chóops, s. [A.S. heope, htope $=$ hip, the fruit of the dog-rose.] [Hirp, Choups.] The froit of Rosa canina. (Parts of Eng. \& Scotland.)
ohoop-rose, s. Rosa canina.
choop-tree, s. The same as Choop-roee (q.v.).
chóo'-pa, s. [A Malacca word.] The Malaoca name of a fruit, that of Pierardia dulcis, a sapindaceous tree.
chōoşe, "cheese, * çhese, "cheose, - çhess, * çhuse, v.t. \& i. (pt. t. * chese, * ches, " cheas," chure, "chus, chose; pa. par. * coren, *icoren, chosen). [A.S. ceosan, ciosan, O. Sax. kiosan, keosan ; O. Fris. kiasa; O. H Qer. ohiosan, chiusan ; Goth. kiusan - O. Icel kjosa; Sw. keza; Dut. kiezen; Ger. kiesen.]

## A. Transitive

I. Ordinary Language:

1. To take by preference one out of several thinge offered; to select.

2. To sccept when offered; not to reject.

* 3. To take, to adopt, to apply oneseif to. William his way to Scotland ches.

4. To elect, to wish; to prefer a certain course.
"Let us choan to us judgment; let us know among *5. To obtain.
" Ouch strengthe he him tho chos
That prince of al the world he wes." custel of Leue, p , 1,817 .

## II. Technically:

1. Serip. : To adopt or select for a apecial parpose or position. [Chosen.]
"He chose David algo his servant."-Parlm $1 \times x$ vili. 70
2. Theol.: To eiect for eternal happiness.
B. Intransitive:
3. To make one"s choice ; to select, elect, or prefer.
"Then may haf thi wille if thou to tore chese."-
Lancoutr, p. Hie.
4. To have the power or freedom of choice (gensrally with a negative, and meaning that the persen spoken of has no alternative).
"Knaves sbroad.
Who having by thetr own tmportuante suit
Convinced or supplifed them, they carnot choose
Eut they must hlab.
ITo choose: By or of choice.
"Be a lord to choowe."-Farguhar: Troin Ativale, iti. 2
I (1) Crabb thus distinguishes between to choose and to prefer: "'To choose is to prefer as the genus to the speciea; we aiways chaose in preferring, but we do not always prefer in choosing. To choose is to take one thing instead of another; to prefer is to take one thing before or rather than anether. We sometines choose frem the bare necessity of choosing; but we never prefer without making a positive and voluntsry choice. When we choose from a specilic motive, the acts of choosing and preJering differ in the nature of the motive. The former is absolute, the latter relative. We choose a thing for what it is, or what we esteem it to he of itscif; we prefer a thing for what it has, or what we suppose it has, auperior to nother. : We calculate and pruse in choosing; we declde in preferring; the judgment determines in making the choice; the will determints in giving the preference.

A wise prince is careful in the choice of his miniaters; but a weak prince has mostly favourites whom he prefers."
(2) He thus discriminates hetween to choose, to pick, and to select: "Choose is as in the former
case the generic ; the others are opectic terms pick and select are expresaly different modes of choosing. We alwaye choose when we pick and select; but we do not aiways pick and select when wo choose. To choose may be appiled to two or more tbings ; to pick and select can be used oniy for several things. . . To choose does not always apring from any particukar design or preference; to pick and setect signify to chooss with care.
(3) The difference betweeu to choose and to elect is thus stated: "Both these terme are employed in regard to persons appointed to an office; the former in a general, the latter in a particular sense. Choosing is either the act of particular sense. Choosing is either the act of a number; it is performed by the concurrence a number; it is performed by the concurrence
of many voices. A prince chooses his ministers; of many voices. A prince chooses his ministers; ment. A person is chosen to serve the office of sheriff; he is elected by the corperation to be mayor. Choosing is an act of suthority; it binde the person chosen; election is a voluntary act; the elected has the power of refusal. People are obliged to serve in some offles when they are chosen, although they wonld giadiy be exempt. The circumstanca of being elected is an honour after which they eagerly aspire . . ." (Crabb: Eng. Synon.)
çhōaşe, s. [Choose, v.] Choice.
çhōoşe'-a-ble, a. [Eng. choose; -able.] Fit or proper to be choseu.
çhōoşe'-a-ble-nĕss, s. [Eng. chooseable; -ness.] The quaity of being chooseable.
 ch. $x$ vii
çhōos'-ẽr, s. [Eng. choose; er.] One who chovses, or has the power or privilege of choosing.

Ham．I could interpret lxetween you and your love： if I could soe the pruppots dallying，Sp，：Hamlda，Hi， 2
II．Technically ：
1．Gr．Drama：The chorua was probably originally a company of dancers in a ring．lo later times a choric performance implied the singing or muaical recitation of a poetical composition，accompanied by appropriste dancing and gesticulation．As choral per formances were especially cultivated in th Dorian states，and psrticularly in sparta，the Dorian dialect came to be regarded as the ap－ propiate dialect for such compositions．Anion， a contemporary of Periander，first gave the horus a regular choral form．it consisted of about fifty men or youths，who danced
round the altar of Dionysus．From these round the altar of Dionysus．From these

[^125]tragedy. [Traoedy.] The exact oumber of the chorus in the times of the earlier tragic poets is uncertaln ; from Sophocles on wards the regular nuniber was fifteen. It was srranged in a guadrangular form, and entered the theatre by a passage to the right of the spectators in three lines. To guide them in thefr evolntions lines were marked npon the boards of the orcheatra. The functions of the chorus in the Greek tragedy were very inportant. it acted the part (1) of a dispss slonate and right-minded epectator, inculent ing the lessons of morality and resignation to the will of heaven, as taught in the piece being acted ; and (2) of a guide to explisin events supposed to happen in the intervals between the sets and scenes. In comedy the number of the chorus was twenty-four, coasisting hal of melea aud half of females.
2. Music: (1), (2), \& (3). The same as I. 1, (2), (3), \& (4).
(4) The name given to the mixture and compound stops in an organ. (Stainner \& Barrett.)

Christ, s. [ILat. Christus; Gr. Xpıatós (christos) $=$ anointed, and xpiw (chriō) $=$ to anoint.]
The Anointed One: The appellation given to Our Lord as His official title, and corresponding to the Hebrew Messiah (q.v.).
"And he mith unto them, Rut whom say ye that I
amp And Peter answereth and malth unto him, Thou am ${ }^{\text {a }}$ And Peter sinswereth and
art tbe Chrize."- Mark vili. 29 .
F Used in the plursl to signify persons who would pretend to be the triee Christ.
"For false Christs and falve propbels shall rise...."
- The two names, Jesus Christ, are not analogous to a modern Chriatian name and aur name; in reality the great Being so deaignated had but one personal appelistion-Jesua : Chriat being superadded at a later period to designate bis office, function, or mission. Jesue, Gr. ${ }^{1} \eta \sigma o u s$ (lessous), is the equivalent of the Heb. \%vilit or ywiti (Yehoshua), i.e., Jorhua, meaning Jehovah. Saviour, Deliverer, or Helper. [Jesus.] It was borne by the military leader in the wara of Canaan (Jobhus i.-xxiv., actually called Jesus in the authorised version
of Acte vil. 45, and Heb. iv. 8), by Jeaus aur named Justus, a fellow-labourer with Paul (Col. iv. H1), and by about a dozen of ather persons figuring in the pages of Josephue; in fsct the name seems to have been not uncommon among the Jews. But we learn from St. Matthew that in this particular case the appellation was given previous to birth by Divine anthority. ". . . thou shalt call his name Jesus, for he shall save his people from their bing. The year [Christian era], the month, and the day [Christans], whea the child Jeaus was born are matters of miore or lesa uncertainty, not having been recorded with precision at the time. The salient features, however, of the life thas begun were narrated by four evangelista [Evanoelists] who are believed by the immense majority of Who are believed by the immense majority of sccurscy and trustworthiness under the guid ance or inapirstion of the Spirit of God. [Ingriration.]
The circumstances herslding or attendant upon the birth of John, afterwards the Baptiat and the miraculous conception and nativity of Jesus, the last-named event at Bethlehem, are told at length by St. Luke (Luke i. ii.) ; while St. Mattbew relates the visit of the Magi, the alaughter of the infants at Bethiehem, and the flight of the holy family to Egypt (Mat. ii.).
Theseoccurrences took place while Angustue, the flrat Roman Emperor, was upon the throd (Luke ii. 1). Thirty years ister, under the reiga of Tiberiue, John, now grown to full manhood, appeared in the wilderness of Judea, as an ascetic and preacher of repentance, the necessity of which he urged on the ground that the kingdom of heaven was at hand Those who confessed their sins he baptized in the river Jordan, sad thus a new religious community arose, separated to e certain extent from the ordimery professors of Judaism (Mat. ii. 1-10, Luke iii. 1-14). Some suspected that he might be the "Christ" or "Messiah" of anclent prophecy, but he diaclaimed the hooour, indicating that he was but the fore runner of another who ehould baptize with the Holy Ghost and with fire, that is as with fire. (Mat. iil. I1, 12 ; Luke fii. 16 ; John 1. 20-23.)
Meanwhile Jesus, dow sbout thirty years of age, had come forth from the obscurity in which he had hitherto resided at Nazareth. (Luke ii. 51, iii. 23.) Heving sought and obtained haptism from John, with Divine recognition as the Son of God, and having over come temptation in the widerness, He with out further delay addressed Himself to His life-work in the world. (Matt. iii. 13-17, iv. 1-11; Luke 1ii. 21, 22, iv. 1-14.) He claimed to be the Messiah spoken of by holy men of to be the Messiah saroken of by holy men of
old (Dan. ix. 25, 20, \&c.), nay more, to be, in old (Dan. ix. 25,26 , se.), any more, to be, in
one sense, the suhordinate (Joho $x .29$ ), and in one sense, the subordinate (Joho x. 29), and in
another the equal of His Hieavenly Father (v. 30). His miaistry, whilst not ignoring repentance (Luke xiii. 3-5), was one chiefly of faith (John iii. 14-19)' and love (John xiui. 34; Matt. v. 43 -46). Twelve apostle (Matt. x. 1-6), and afterwards seventy other disciples, were chosen to aid him in his ministry (Luke x. l, \&e.), the former baptizing converts as they arose (Johoiv. 2). John the Baptist saw his own reputation pale away under the greater glory of his Divine successor, but never sllowed this to evoke jealousy within his breast (1att. iii. 11 ; Luke
iii. 15 ; John i. $15,27,29$, iii. 28-31), and when his faithfuiness in reproving sin, even in high plsces, led to his suffering a martyr's death (Matt. xiv. 3-12), his baptized followers, either at once or gradually, tranaferred themselves to Jebus (John L. $35-37$; Acts xix. 1-5).
The latter holy teacher thus left alone, continued Mis ministry, it is believed, for about three yeara in all, chiefly at Capernamm and other places near the lake of Ganlee (Matt. iv. 13 ; Luke vii. 1), as well as in other Matt. xvi. 13), in Perea beyond Jordan (Matt. xix. 1 ; Mark x. 1 ; Luke viii. 37), in Samaria (John iv. 1-42), beyond the Holy Land in Phenicfa (Mark vii. 24), and, chiefly on occasions of the great feativals, at Jerusalem, Which necessitated His visiting other parts of Judea (Matt. Xx. 29 ; John ii. 23 , vii. 1, 2, 10). He supported His claims to be the Nessiah by miracles of knowledge, i.e., prophecies (Matt. xx. 19, \&c.; Luke xix. 41-44) and miracles of power, auch as healing the sick (Matt. ix. 35, 4c.), nay, even raising the dead (Mark v. 22-

The chief priests and other dignitarie who held ewry in the Jewieh aypagoguee, wer tirred up neariy to madnees by jealousy o His auccees, and eagerly accepted the offer of an unworthy spostle, Judas Iscariot (i.e apparently of Kerioth in Judea) to betray his Lord. A manufactured charge of blas phemy led to the condemuation of Jeaus by is deadiy foe, the high priest, but as the per of ife sad deaih now rested not wit
 governor, Pontius Pilste, a charge of disafiec factured, as it was felt that the heathen Roman factured, as it was feit that the heathen Roman
would not attach any weight to the alleged blaspbemy. The procurator had discernment blaspbemy. The procurstor had discernment to eee clearly that what he was required to do
was to sanction judiciai murder, and for was to sanction judiciai murder, and for
some time refused to become partner in the some time refused to become partner in the Jewigh ruler'e guilt. But as the cry, "Crucify him," "crucify him," continsed to rise from the multitude, he resolved to avoid unpopnlarity st the expense of morai principie, and gave sentence that it should be as the Jew required. The crucifixion thersfore took place (Matt. xxvil.; Mark xv.; Luke xxili.; John zix.). Friday was the day when the nefariou deed was done, and three daye later, or early n sunday morning, newe was brought to the Apostles, and the Church generally, by certain women of their company who hed vieited the epulchre, that a resurrection had taken piace Matt. xxviii. ; Mark xvi. ; Luke xxiv. ; John xx., xxi.). At a aubsequent interview with their risen Lord He gave the Apostles add their auccessors a commission to make disciples of all nations, baptizing them in the name of the Fsther, and of the Son, and of the Holy Ghost (Matt. xxviil. 19, \&c.) ; and about forty daye after the crucifixion He led them out as far as Betiany and lifted up Hit hands and blessed them. "And it came to pass, while he blessed them, he was parted from them, and carried up into heaven " (Lake xxiv. $50,51$. ). He had predicted His cruel death, His reaurrection on the third day Matt. xx. 19), and His ascemaion (Johs Xx f), and had intimated that at a future period He would sgain return to the earth in glory
(Matt. xxvi. 64, \&c.) For the leading datea (Matt. xxvi. 64, \&c.) For the leading dates connected with the life of Chriat, bee Christ trines, and for the subsequent history of the Christian Church, see Chaistianity.
Christ-cross, * crisg-cross, "crintoross, s. Mirk of the cross, as cut, painted, (Lritten,

Christian architecture, s. The introduction of Christianity naturally had ita effect on the atyle of architecture adopted for religona buildings. Tha Roman Early Christian style eppeared first in basilicas and circular churchea. The former were, doultless, origirally built on the modal of the Roman basilicas [Basilucas], but the requirementa of the new religion aoon necesaitated various modifications in the original plan. The Coriatian baailicas were congtructed generslly with three aisles : the central ons broader than the others, the the central one broader than the others, the left or north heing reaerver for matimes and font for fenales. Sometimes we find fiveatalea. The hullding terminated in a aemicircular apse. The decorstions consiated of paintings and mosaics, used mainly in the aprae. The pillars were generslly of the Corinthish order. [Cominthian.] Symbols were largely introdnced. These were the cross, the monogram of Chriat, a lamb or a dove, as typifying the Holy Spirit, and a fioh, used as a ayinbol of Christ from the lettera of the Greek word ix $\chi$ vis ( ichthus) =a fish, forming the initiala of the titlea of our Lord, 'İqoûs Xpıotós $\Theta$ eôv vìos awtip (Iésous Christos, Theou huios, sōter) $=$ Jesua Christ, the Son of God, the Saviour. The roofing was of beams with flat panelling, The roofing was of beams with flat panelling, frequently gilt. The altar stood at the east end in front of the apse. The space ronud the Adjoining the entrance was generally a narrow spres callei the Narthex. [Narthex.] In the middle of a portico in front of the bnilding was a bowl for washing the hands. [CAN thabus.] A crypt was constructed under the altar for the reception of the bonea of the jatron-saint. The most magnificent specimen of Byzantine auchitecture is the Church of St Sophia at Constantinople, built oribinally by Conatantine, and relnilt after its destruction by fied by Justinian in the sixth certury. [Byzantine.] Russian church architecture was at first a deterioration of Byzantine Was at first a deteriotation of byzantine,
modned in the fifteenth century; ly the moditied int the fifteenth century, by the introduction of bulb-shaped comes, adopted from the Tatars. The the most faniliar to ns in religious architecture, is distingrished by the pointed arch, formed of two segments of a circla meeting in a point. [GuThic.] The Perpendicular and Flamboyant styles are deteriorations of the Gothic [Flimbovant, Perim:anicilabl, deriving their names from the form of the tracery, of the windows, and ornaments. The classic styles of architecture have loen compratisely rarely adoped in Paul which by it dome recalls st Peters a Rome, is an exaluple of the Renaissance, or revived Ruman style. In plan, English churches generally form a Latin cross, consisting of a nave, transeptr, and planacel-(see ing of a nave, transeptr, and chancel-(see these words) - their direction being amost
invarianly east and west. In a few isolated invariably east and west, na iew isolated
instances, such as St . Sepulchre's, at Caminstances, such as St. Sep
bridge, the plan is circular.

5. Christendom; the professors of the Christian religion.
6. The Chriatian religion; the doctrines and precepts taught by Christ.

- To taika a compreharaive view of Christ laoity, attention ahould be given to (1) it doctrines, (2) its government and diacipline and (3) its history from the time that it was introduced into the worid until Dow.
(I) The Doctrines of Christianity: Though the professors ni Christianity have acparated nito many sects, as have the Mohammedans, he Brahinsnists, and others, yet all but a mall minority are reaily at one with respect to certain great fundamental doetriaes. Christ tsns believe in sopreme Being-the one living and true God. The immense msjority hold that it is not inconsistent with mono theism to accept ths tenet that in the Disine Unity there is \& Triaity, the Father, the son and the Holy Spirit, to all of whom worshin of the highest kind can be paid. Jesus Chrint is identified by them with the second person of the Godhead, and is held to be at once God and Man. As God Ha existed from eternal aces, and was not first hrought into being when born at Bethlehem. They consider that He was miraculousiy conceived by tha Koly Ghost, and that his mother rensined the Virgio Mary after having hrought Lim into the world. The reason why He came to this earth is held to have been that He had been commissioned by H is Eternal Father to nnder take a mission of mercy to the earth. Another tenet of their faith represents man as having been created lanocent, but to have fallen, and now to be guilty and in need of a Saviour Christ is believed to have been that Divina

Saviour. His lifs on earth is regarded as having been perfect, so that He constitutes having been perfect, so that exemplar for all mankind. His death is theld to have been an stonsment for sins not held to hsve been an atonsment for sins not His own, and to hsve been so important that to Messianic prophscy, as with a finger pointed. Fsith in His Divins mission and work, and specially on the efficacy of. His death, are insisted on to put sinnars in posses sion of the benefits purchased by their Redeemer's death. The hiatoric fscta of His resurrsction and asceasion are pointed to as evidences of the sanction and acceptance of His work by His Heavenly Father, and implicit trust is expressed in His coming again agreeably to His promise to earth, and in His ultimstely becoming the Judgs of the world. At ths flasl assizs it is believed that those whose good deeds show that they have be lieved in Him, shall be rewarded hy eternal folicity, whist sverlasting misery aliall be in tore for those who have been faithlesa and wicked. The acceptancs of this creed by man in his fallen state, is heid to be impossible without Divine assistance, and it ia considered thst the Holy Ghost, if aolicited, will give the requisite spiritusl power to produce faith in the most unbelieving heart. The Scriptures of the Old sad New 'Cestaments are regarded as possessing inspirstion in a senae io which no other book has it, snd as being, therefore, in the highest degrea fitted to eniighten oquiring minds as to religious duty
(2) The government and discipline of Christianity: [For these see Church oovernment.]
(3) The history of Christianity: [For this aee Church historv.]
F. Christianity is part of the law of England, though certain statutes in its support, now egarded as persecuting, have either been Nlowed to fall into deauetude, or hsve beeb formally snoulled. Similar laws, making offences against Christianity punishable exiated in some of the Colonies, that no anch atatutes can exist in the United States.
chris-ti-an-ǐ-zā-tion, chris-tin-an-í-sa'-tion, s. [Eog.christianiz(e); -ation.] The act of converting to Clisistianity. (Chr. Obs.)

> Ad a million horrible echoes brake From the red-ribibed hollow behind the wood, And thundered up iuto heaven the Chrintied That munt have life for a blow."

Christ'-mas ( $t$ silent), "cristmes,* crister messe, " crystenmas, "chrystmas, cristemasse, s. \& a. [A.S. Crist $=$ Christ ; masse $=$ mass, festival.]
A. As substantive

1. The festival of the Nativity of Christ, oluserved by the Christian Church Yearly on the 25th Decsmber.

- Augustine considered the fast of Good Friday, and the festivals, Esater, Ascension, sund Whitsuntide, as the only hely dsys which had an A postolic origin snd the sanction of a general council. Cluriatoss be deemed to be of later origin and lesser suthority. When the first efforts wers made to fix the period of the year wher the advent took place, thert were, as wa learn from Clement of Atexandria, alvocates for the 20th May, and for the 20th or 2lst April. The Oriental Christians gener ally wera of opinion that woth the birth and baytism of Jesus took place on tha 6th of Jannary. Julian I., bishop of Rome from A.D. $337-352$, centended for the 25 th Decem ber, a view to which the Eastern Church uit mately came round, while the Church of the Weat sdopted from their brethrea in the East the view that the baptism was on the 6th of January. When the festival was st length piaced in December, it afforded s substitnte to the various nationa who had ohserved a festivai of rejoicing that the shortest day of the year had passed, hesides apanning over tha great interval between Whitauntide of oue year and Good Friday of the next. Coming to the Roman Christian cenverts in lieu of the saturnalia, to which they had been accustomed while yet they were heathens, its purity became aullied almost at the frat by revelry which had crept into it from this source. Similarly the Yule log, the mistletoe, \&c., smong ourselves, are relics of an older faith,

2. The season of Christmas, i.e., from Christmaa-eve to Old Christmas-day, or Twelfth-hight, Jsnuary 6th.
 +3 . The holly (Ilex aquifolium), or other dccorations for Christmas. (Stainer \& Barrett.)
B. As adj.: Pertaining to or in use at Christmas.
" Here was a consent,
(Knowing afore hand of our merriment)

#### Abstract

Christmas-carri, a An ornannented card, having on it a few words of Christmas mnch known prior to the decade 1870-1880 Christmas-cards during that period cams во much into pse as to infict prou postmen an amount of extra labour second only to that of Yalentine-day. Churistmas carol, \& 4 bong of praise sung at Christmas. Christmas-day, \& [Ceristmab, 1.] Christmas-ove, s. The eve of Christ-mas-day ; the night of December 24th.

\section*{Christmas-fiower, s.}

Botary: 1. Helleborus niger. [Ceaistmas-Rose.] 2. Enanthis hyemalis. - Christmas-herb, s.

Bol.: Helleborus niger. (Lytc.) Christmas-music, s. Music: 1. Cantatas, the words of which are sultable to Christmas. 2. Music playel by waits. [Warts.] (Stainer \& Barrett.)

## Christmas-rose, s.

Bot.: A plant, Helleborus niger, order Ranunculacex, so called from its flowering st Christmas; also calted Christmas-Rower (q.v.)
Christmas-tale, s. A tale, generally fiction, told at Christmas. It would origin. ally be done st the family gathering around the Yule log, but is now dons better in the Christmss numbers of the several popular periodicals.
Christmas-tide, s. The season of Christmas.
Christmas-tree, s. A smsll tree, generally a young fir, on the branches of which presents for children are hung at Christmas.
tohria-tó-1б́g'-1-cal, a. [Eng. christolog(y); -ical.] of or pertaining to Christology.
 Christ; $\lambda$ óyos ( $\operatorname{logos}$ ) $=$ a discourse, $\lambda i$ re $(l e g \overline{)})=$ to tell, to discourse.] A discourse concerning Christ, or the doctrines of the Christian Church.

The revier will fad In thls a athor an eminent excellence lin that wart of divinity which I make bold to call Christology. In digplaying the sreat hystery of french: on the Study of Word $\mathrm{C}_{1} \mathrm{~A}$ 132
chris'-tó-1ȳte, s. [Gr. Xpıozós (Christos) = Christ, snd $\lambda \bar{\nu} \omega(l u \bar{o})=$ to loose.] One of a sect of Christians in the sixth century, who held that, when Christ descended Into hell [Ilades]. He left both lis body and soul there, and rose with His Divine nature alone. (Ogilvie.)
*chris'-tom, a. [A mistake for chrisom (q.v.).]
chris-tŏph'-an-y. s. [Gr. X $\rho$ totós (Christos) =Christ, sad oaive (phoino) $=$ to bring to Hght, to maks to eppear.] An sppesrance of Christ, ased especially of His several appesrances to His disciples between His resurrection smd His ascension.

Christ'-t-phite, s. [From st. Christophe mine at Breitenbrunn, where it is found; and suff, -ite (Min.) (q.v.).]

Min. : A brilliant black blende, a variety of Bphalerite or Blende (q.v.). Sp. gr., 3.91-3.923.
chrǒ-ăs'-ta-çēs, s.pl. [Gr. xpón or xpoía (chroa or chroia) =colour, snd ńбrakos (astakos) $=8$ exa.] A class of pellucid gems, comprehending all those of variable coloura, as viewed in different lights. (Webster.)
chrö'ma-scōpe, s. [Gr. хрйда (chroma) = colour; $\sigma$ копе́ $\omega$ (skopeó)= to view, to cxamine. An Instrument to exhibit the three optical effects of colours : (l) The refraction of prisms and leuses; (2) The transmission of light through transparent media; (3) The reflection of speculums.
chrō'-mīte, s. [CERomuc.] Chromate of iron:
Min.: The same as Chromite (q.v.)

## Chromate of load:

1. Chem. : $\mathrm{PbCrO}_{4}$ A lasd salt of chromio acid. [Chromium.]
2. Min.: The same as Crocortr (q.v.)
3. Dyeing, dc. : The various chromates of lead are used to give yellow and red colours. Chromate of lead and copper:
Mins: The sams as Vauquelintre (q.v.). Chromate of potassium:
Chem, ec.: The potassium asit of chromte acid, much used, as is the bichromste, in calico-printing, snd for making piguments. Soluble chromates are detected by giving a yellow precipitats with plumbio acetate, a crimson red precipitate with srgentic nitrats, snd by forming green solutions of chromic chloride, $\mathrm{Cr}_{2} \mathrm{Cl}_{6}$, when boiled with alcohoi and hydrochloric acid. A dry chromate heated with NaCl snd strong $\mathrm{H}_{2} \mathrm{SO}_{4}$ gives off orange red vapours of chlorochromic scid Insoluble chromates fused with potassium nitrate yield $\mathrm{K}_{2} \mathrm{CrO}_{4}$ potassiom chromste.
ohrō-măt'-Ic, " chrō-măt'-1ck, $a$. [Fr. chromatique: Lat. chromaticus, from Gr. хрwиaтькos (chrómatikos) $=$ suited for colour $\chi \rho \hat{\omega} \mu a($ chröma $)=$ colour.]
4. Relating to colour, or colonra ; coloured. "These nctions often display themselves in chromatio pheaomenת of great spleadour."-Tyndall:
5. Pertaining to s scals of semitones io music; including notes not belonging to a diatonic scale. [Chromatio scale.]

## chromatic aberration, s.

Optics: (See extract).
"In the refracting telescopes. ${ }^{\text {and }}$ the dffirent re trangiblifty of the different colouind rays prementa an obstacle to the ox tausion of their power beyoud very mod rerractive inder is qreater, It follow, that one and the seme lena refracts violet rays to a focus nearer t its surfaes than red. It that paper be held in the teous for mean rays, or betweell the verticee of the red and viriet cones, these wil then form a disunct mangii the other iutermediate ray, will be difiused over circles of seusiblo inaguitude, and form coloured bor-
ders, rendering the image indiatinct and liazy. This ders, rendering the image indiatinct and hazy. This is called ehromatic aberration"-Encyclopadia Ho tropolita na ; Llght.

## chrematic chord, s.

Music: A chord which contains a note or notes foreign to dlatonic progressiou. (Stainer \& Barrett.)

## chromatic harmony, s.

Music: Harmony made up of chromatic chords. (Stainer \& Barrett.)
chromatio interval, s.
Music: An interval which is sugmented or diminished. (Stainer \& Barrott.)

## chrematic modulation, 3.

Music: Modulation in which, by neans of chromatic harmony, there is a pussing into an extreme key. (Stainer \& Barrett.)
chrematic printing, s. The art of printing in colours. [Lheomutype.] (For a drinting in colours. LChromurype. (For a description of the process, see Knight: Dict.
of Proctical Mechanics, i. 544 .)
chromatic scale, s.
Music: A scals which proceeds by semitones.
chromatle thermometer, s. When the edge of a rectangular plate of glass is spplied to a pioce of heated metal, or other substance having a temperature different from that of the glass, and exposed to a beam of polarised light, coloured fringes are developed. As the different tints depend on the different temperatures of the glass (which is supposed to be known), and that of the ohjeet to which it is applien, the colour of the central fringe affords a means of inferring approximately the temperature of the substance. ( $\mathrm{K}^{\mathrm{n}} \mathrm{night}$.)
chromatic type, $s$. Type made in parts, which are lnked of varions colours and separately impressed, so as to unite into a variegated whole.

* chrō-măt'-1-cạl, a. [Eng. chromatic; -al.] Chromatic.

Among sundry kinds of music that which ia cailed ohramaticat delyghteth, anlargeth, sod joveth the

ohrō'-ma-trōpe, chro'-m̆ॅ-trōpe, s. (Gr.
 turning, $\tau \rho \dot{\beta} \pi \omega($ trep $\overline{)})=$ to turn, to twist. An arrangement in a magic-lsntern similar in its effect to the kaleidoscope. The picture are produced by brillisnt designs buing painted upor two circular plasses, and the glasses being made to rotate in differeat directions.
chrō'-mátÿpe, s. [Gr. $\chi \rho \bar{\omega} \mu \Omega$ (chroma) $=$ colour; ; тіпоя (tupos) = type.]

Photog. : A process in which the chromic acid is deoxidized. There are several modes of getting photographs by the chromic salts preferably the bichromate of potash. (Also attrib.)
chrōm'-chlör-īte, s. [Gr. хрӥда (chróma) $=$ colour, and Eng. chlorite.]
Min.: A reddish-violet micaceous mineral from Texss; a vsriety of Penninite (q.v.).
chrōme, \& \& a. [Севомим.]

## chrome-alum, :

Chem.: $\mathrm{K}_{2} \mathrm{SO}_{4} \cdot \mathrm{Cr}_{2}\left(\mathrm{BO}_{4}\right)_{3}{ }_{24} \mathrm{H}_{2} \mathrm{O}$. It is crystallisable purple double asit of sulphate of chromium and sulphates of potassium, sodium or smmonium, having the formula of common alum, the alumina being replaced by sesquioxide of chromlum.
chrome-colour, s. Properiy, any colous prepared from the saits of chromium, but

generally applied to sny colour which, when dry, is of a soft powdery consistence, and may
chrome-green, a A pigment of a besutifnl dark-green colour, prepared from the oxide of chrominm.

## chrome-iton, s. [CHRomium.]

## chrome-ochre, s.

Min.: A clsyey msteriai, contalaing some oxide of chrome. It occurs of a bright-green shsde of colour. Compos. : Silica, $57.0-64-0$; alumina, $22^{\circ} 5-30.00$; oxide of chromium, $2.00-10.5$; sesquioxide of iron, $0.00-3.5$; water, $0.00-110$. (Dana.)
chrome-orange, s. A pigment of a dsrk-orange colour, prepared from the subchromste of lead.
chrome-red, so A pigment of a beautifol red colour; a basic red chromste.
chrome-yellow, s. A yellow pigment of various shades prepared from lead chromate. [Chromium.]
chrōme, v.t. [CGROME, z.]
Dyeing: To treat (as wool) with bichromste of potash
 (chroma) $=$ colonr; cisos (eidos) $=$ form, ap-
 same as Debuscore ( $q . v$. .).
thrō'-mic, a. [Kng. chrom(e); -ic.] Pertaluing to chrone, or prepared from it.

## chromic acid,

Chem.: Chrominm trioxide, $\mathrm{CrO}_{3}+\mathrm{H}_{2} \mathrm{O}$, substance obtained from chrominn, minch used by dyers and calico-printers for dyeing orange or red colours. It may be prepsired by addiag gradually from 120 to 180 parts, by volume, of pure coocentrated sulphnric acid to 100 parts of a cold satmated solution of bichromste of potash. The crystals of the trioxide separate as the solution cools. The mother liquor shonld be ponred off, and the crystals dried upon a tile; they may be purified by recrystallization from solution in water. With excess of sulphuric acld, chromic water. is a valuable reagent for dissolving the acid is a valuable reagent for dissolving the intercellular substance of plants; it is also much used in organic chemistry as s powerful oxidizing agent. Chronic acid is readily
dernmposed by organio matter, as dust, $\&$ e. decomposed by organio matter, as dnst, \&e.,
and must therefure be preserved in a welland must therefure be preserved in a wellshould be of a pale-yellow colour, is nsed for bardening and preserving nervous and mus cular tissues, de. It shonld be prepared when requirel. Chromic acid, $\mathrm{II}_{2} \mathrm{CrO}_{4}$, only exists in solution. It dyes wonl and silk yellow, but will not dye cotton. Chromic acid boiled In wine dyes wool a clear brown colour, if no colnring matter, arted upon by chlorine acid, bas been adlled to the wine.
chromic iron, chromic iron ore,s.
Min.: The same as Chromite (q.v.).

## chromic mica, $s$.

Min.: The same as Fuschite (q.v.)
 family $\mathbf{~ C h r o m i d e e ~ ( ~} \mathrm{G} . \mathrm{w}$ )
hröm'-ǐ-d $x_{0}$ s. pl. [From Mod. Lat. chromis

Ichthy. : A family of Plaryngognathons fiahes. They have fleshy lips, and the lateral line interrupted. They are found mostly in fresh water in the hotter parts of the world, thongh ooe species is in the Mediterranean.
 =colonr, and mépou (metron) $=$ a measure. $]$ An iostrument for determining the purity of water by its colourlessness. It consists of a glass tube of about a yard in length, closed at dish end by a cork, and resting upon a white by miaute alge, a white opracity often by fongoing growths; iron aalts are indicated by a peculiar ochry colour. (Knight.)
chrö'-mĭs, s. [Gr. $\chi \rho \bar{\omega} \mu a($ chröma $)=$ colour.] Ichthy: The type-genus of the family Cliromide (q.v.).

Bot.: An abnormal colouring of plants. It is called also Chromstism.
chro'-mite, \& [Eng. chrome, and enff. -ite (Min.).]
Min.: An lsometric mineral of a submetal110 Instre: colour between iron-black and brownish-binck, streak brown; opaque, and brittle. It is widely distributed in America
 4.321. Comp.: Protoxide of iroo, $18 \cdot 0-38 \cdot 95$ msgnesis, $0.0-18.13$; oxide of chromiom, $89.51-63 \cdot 38$; alumina, $0.0-19.84$; silica, $0.0-1060$. (Dana.)
 colour.]
Min. : A metallic tetrad element discovered by Vauqnelin in 1797; aymbol, Cr.; stomic weight, $52 \cdot 2 ; \mathrm{sp}$. gr., 6. The chiel ore of this metal is chrome-iron, $\mathrm{FeOCr}_{2} \mathrm{O}_{3}$, lound in the Shetland Islands, and s lead chromste $\mathrm{PbCrO}_{4}$. The metal is obtained by the action of sodium vapour on red-hot chrominm trichloride. . It forms hard grey cubic crystals, infinsible, insolublo in cooceotrated acids. Chromium forms with oxygen the following oxides:-CrO, $\mathrm{Cr}_{2} \mathrm{O}_{3}, \mathrm{Cr}_{3} \mathrm{O}_{4}, \mathrm{CrO}_{3}$. All compounda of cbromium are prepared from the chromates. Cbrome-iron ore is fused with carbooate of potassium and chslk, and the fused mass is treated with water, and a soluble yellow chromate of potassium, $\mathrm{K}_{2} \mathrm{CrO}_{4}$, is obtained; it crystallises in yellow rhombic snhydrons cryatals, isoraorphous with potassinm sulphate ; it dissolves in 2 parts of water at $16^{\circ}$; its solution is of a atrong yeliow colour, even when dilnte. Chromium dichro mate, or bichromate of potassium, $\mathrm{K}_{2} \mathrm{Cr}_{2} \mathrm{O}_{7}$, ia obtaioed by adding sulphuric scid to the chromate ; it crystallises red triclinic crystals it is used for making pigments. It dissolves in 10 parts of water st $16^{\circ}$. Lead chromste $\mathrm{PbCrO}_{4}$, a flae yellow precipitate, is obtained by adding s soinble tesd salt to a solution of potassinm chronate ; it is called chrome-yellow. By hesting it with saltivetre it is cooverted into basic red chromate, called orange-chrome or chrome-orange. Chrominm trioxids $\mathrm{CrO}_{3}$ is formed by adding excess of $\mathrm{H}_{2} \mathrm{SO}_{4}$ to potassium chromste; it forms soluble red needle crystals, which are reduced by organic matter to sesquiaxide of chromium. By beating to redness potassinm dichromate it is cooverted into nentral chromate sud sesquioxide of chromium, $\mathrm{Cr}_{2} \mathrm{O}_{3}$, which is a beautiful green powder, giving a green colour to glass and porcelain; it is nearly insoluble in acids. The pigment used to protuce a pink colour on earthenware is made by heating to redoess a nixture of thirty parts of peroxide of tin, ten of chalk, snd one of potassium chronate ; the pradnct is powdered sund washed with hydrochloric scid. The hydrated oxide can be obtained as a green lrecipitate by adding ammonia to one of its 8alts. Chromic chloride $\mathrm{Cr}_{2} \mathrm{Cl}_{6}$ and chromic ${ }^{\text {sal }}$ sulphste $\left.\mathrm{Cr}_{2} \mathrm{SO}_{4}\right)_{3}$ are obtained by dissolving sulphste $\left.\mathrm{Cr}_{2} \mathrm{sO}_{4}\right)^{3}$ are obtained by dissolving che hydrated oxide in the scid. The salts of chromium sesfuioxile exist in green and in
violet-red moditications. Potassium dichrom-violet-red molitications. Potassiumdichrom
ste is easily reduced by briling it with hydrochloric acid and aleohol to chrominm sesquichloride and chlorids potassium. Wheo sul phuric acid is used, chrome-alum, a donble sulphate of chromion and potassium, is obtained, which has a deep violet tint. Chromium monoxide chromous oxide, CrO, absorbs oxygen rapidy; it is only known in the form of hydrate $\mathrm{Cr}(\mathrm{OH})_{2}$. Chromium dichloride, $\mathrm{CrCl}_{2}$, is a powertnl deoxidizer. Chromium salts are casily detected by giving in both the inner and outer blowpipe-flame green beads with borax, by forming a yellow solnble salt when fused with sn alkali, which is converted Into a green solution by reduciag agents. Ammonia gives a green precipitate with the seaqui-salts. Potash and soda hydrates give a precipitate of $\mathrm{Cr}(\mathrm{OH})_{6}$, soluble in excess, reprecipitated on boiling. Amnooium anlphide precipitates the hydrated green sesquioxide of elıromium $\mathrm{Cr}_{2}(\mathrm{OH})_{5}$. Chromium can be detected in the presence of the other metals of this group, by fusing the preeipitate with $\mathrm{KNO}_{3}$, or platinum- foil, treating the fused mass with water, filtering, acidifying with acetic acid, and adding plumbic acetate, which precipitatcs yellow plombic chromate.
chrō'mō (1), in compos. [Gr. X ${ }^{\circ} \omega \bar{\mu} \mu a$ (chroma) =colonr.]
chromo-1ithograph, \& A jithograph printed in colours
chromo-lithograph, e. To prednce by chromo-lithography.
chromo-lithographer, \& $\Delta$ printer chromo-lithographs.
chromo-lithography, a. The art of printing chromo-lithographs.
(1) Hist.: Colour-printing was first used in Europe in illuminsting miasals and making plsying-carda, but it was not successfut till it was combined with lithography, in vented between A.D. I796 and 1800 by Alois Senefelder of Prague.
(2) Present Process: An outline-drawing in first trsced, then various stones are taket one for each colour, to which the drawing is tranaferred. Then the artist puts in the colours, with sosp, of the tints required. Next the slab is pat opon the press and dsmped fter which the oil colour is applied with eathern roiler; the parts which contain no drawing, being wet, reaist the ink, while the drawing itaelf, being oily, repels the wster while retaioing the cotour.
chromo-lithographio, a, Pertaining to, or executed in, chromo-lithography.
ohromo-oyclograph, s. A coloured pictrre produced by a ancceasion of wooden blocks, each bearing ita separate colour. [Ceromatic Printing.]
chrō'-mō (2), s. [See def.] A contrection of chromo-lithograph (q.v.).

## chromo-type, s.

1. Printing: A sheet printed in colours The modsa are various, but the usual plan le to prepare a block for each colour, or a form for each colour, and to place the psper upon each in succession, the exset place being preserved at each impression by means of register pins ors similsr device. [Chromatic Pbint ino; Chromo-lithography.]
2. A photographic picture produced in the nstnral colours. This was loog eought by Niepce de St. Victor, and he announced his success even with yellow, but no way has been discovered of flxing these heliochromio pictnres. (Knight.)

 nedther decidedly acute oor dially chronic. "- Wat
ohrŏn'-1-cal-ly̆, cd $v$. [Eng. chronical; -ly.] In a chronic manner; of long durstion; always. chrŏn'-i-cle, * cron-i-cle, * oron-y kylle. 8. [Formed as a dimin. from Mid Eng. cronique or cronike, used by Gower from O. Fr. cronique, pi. croniques $=$ chro nicles, snnals; from Low Lat. chronica $=$ a catalogue; from Gr. xpovicó (chronica) $=$ annals, neut. pl. of $\chi$ po 1 ккós (chronikos) $=$ per taining to time; $\chi \rho$ о́vos (chronos) $=$ time (Skeat.)]
L. Ordinary Language:
4. Literally:
(1) A register or history of events in regula order of time, a diary, snnals. It differs from a hiatory proper in that the events are get down in order of succession barely and simply withont any attempt at connection. colouring, br philosophic treatraent.
(2) A history; a narrative of events (generally in the plural).
5. Fig.: Anything which conveys or suggests the course of events in history.

- Every mouldering stone th a chronicle."-Irving.
II. Scriptare Canon (Pl.): A name applied to two books of the Canonical Old Testament which immediately follow 1 and 2 Kings. In the Hebrew Bible they form but a single com-
 = words of days, i.e, diaries or journals. The Septuagint translators were the first to divide the one volume into two, which they called

 menon deuteron) $=$ the first and the gecond of things left over, i.e., passed by or onitted by the writers of the books of Samuel and Kings. In the Vingate, Wycliffe, and the earlier printeil versions, they are termed 1 and 2 Paralipomenon (q.v.). Jerome calted the undivided book Chronicon, and the Vulgate Chronica or Chronicorum liber [Chaoncon], frola the former of which two appellations we derive the name Chronicles. To a certain extent the Chronicles are aupplementary to the books of Samuel and Kings, but in part they also travel over the same ground, the books of Kings, however, regarding events from the prophetic standpoint whilst the Chronicles do ao from the Levitical point of view. The traditionary opinion, both among Jews and Chriatians, regards Ezra as having been the author or compiler of the booka of Chronicles. If so, then a later hand must have added ch. iii. 19-24, where the descendants of Zerubbabel are enumerated spparentiy to the third generation. If, on the contrary, that passage was penned hy the writer of the other parts of the book, then the
composition of the volume itself mast be brought down to e.c. 330, if not to $300-$ nay there have been advocates for even 8 lowe late, viz., 270 or 260 . At even the earliest of these dates the Jewish commonwealth con sisted chiefly of the two tribes of Judah sod Benjamin, the ten tribee not having returned from captivity. In the booke of Chronicles consequently, the former ktngdom of Israe holds hat slight prominence, whilst that of Judah, to which the writer was passionately sttached and of which to a certain extent he was the epologist, is treated st length. He shows that Judah was prosperous when it followed Jehovah, and fell lote misery and decay whenever it rejected Him as ita king.
The writer of the books of Chronicles seems to copy or allude to Geaesis, Exodue, Num Gers, Joshua, Ruth, 1 and 2 Samuel, 1 bad 2 Kings, Ezra, and Nehemiah; between xi. 3 24 of the last-named of these books snd 1 Chrou. ix. $2-34$ there ias striking parallelism. Some of the numbers in Chronicies differ from those in Kings, possibly from errors o copyista, figures in the very nature of things being much more liable than words to undergo alteration. Where Kiugs and Chroniclea differ in thls respect, the numbers in the former books are to be preferred.
ohrớn'-1-cle, * cron-i-cle, * cron-y-cal, v.t. [Chronicle, s.] To record in a chronicle or in history; to register.

the systern. or many systernk, of chronology
out of the Espitian minonuments,

TI The following are the leading systems of chronology existing among the several nations of the world. Want of space forbids that the list should be exhanstive :-

1. Chinese end Jopaness Chronology: In these calculation is made by cycles of sixty years, each year of the cycle separatcly named.
2. Hindoo Chronology :
(1) Historical: No system is universal in India or exclusive. Two of the chief are the era of Salivahana (A.O. Tr), and that of Vicramaditya (в.c. 57).
(2) Astronomical: The Hindoos have four ages [YUGA]. We are now in the Kali Yuga, beginning about 3094 H.c.
3. Egyptian Chronology:
(1) Historical: Julius Africanus and Ensehius have preserved some fragments of a work by Manctho, an Egyptian priest, who lived in the time of Ptolemy Lagus, in the 3rd century a.c. In these frggmenta the successive rulers of Egypt, from the very first to nearly the time of Alexander the Great in the 4th
eentury b.c., are arranged in thirty or thirty one dynasties. Increasing importance has heen given to hia work, as it has been found that one after another of his atatemanta, once unsupported, have been confrmed by the hieroglyphiea of the monmmentas $A$ long period is, of course, requisita for 80 many dyn asties. Lane, Stuart Poole, and others Iarmel redece this by making eartain of the firs seventeen dynasties contemporaneeus, whilst Bunsen, Lepsiua, and their followera mak them succeasive, and contend for a lengthened chronelogy.
(2) Astronomical: The Egyptlans, moreever, ealculated by a tropical cycle of 1,500 , and a Sothic cycle of 1,460 Julian years. [Cvcle.]
4. Greek Chronology: In the time of Hero dotus, and subsequeatly in that of Thucydides, wie Greeks had ne chronelogy spanaing wide ne Greeks had ne chronelogy spanning wide
intervals of time. It was not till b.c. I94 that intervals of time. "It was not till B.c. I94 that Eratosthenes, the "father" of Greek chrono-
logy, begae to count by Olympiads, the firs logy, begae to count by Olympiads, the first
of which was dated from what we now ahould of Which was dated from what we now ahould
call b.c. 776 . He was followed by Apollodorus, call B.c. 776 . He was followed by Apollodorus,
B.c. $I 15$, Censorinus a.d. 238 , dc. There were other Greek methods of conputation than by Olympiads ; thus the era of the Seleucidit was b.c. 324.
5. Roman Chronology : The method of Roman reckoning was by the consulships, which, of course, conld give no indication of time ealess course, conld give no indication of time enless their order was carefully preserved, and even
then was clumsy. A nuch simpler and better then was clumsy. A nuch aimpler and better yhan was by calculating years from the buid follow, placed in what would now be called B.C. 753, while Cato preferred 752. It does not materially diminish the value of this date that Rome would aeem to bave come into existence earlier than that year. It is enough for chrobology that the date to be reckoned from is a flxed one
6. Jewish Chronology: Up till the 15th century the Jews followed the era of the Seleucidae [4]. Since then they have dated from the creation of the world, which they fix 3760 years and three months before the commencement of the Christian era,
7. Muhammadan Chronology: Dates are counted from the Hegira, i.e., the time of Muhammad's flyht from Necea to Medina, I6th or 15 th Jilly, A.D. 622 .
8. Christian Chronology: Since the gth century diates have legun to be reckonet from the birth of our Lord [Chaistlas Era] though the aystem did not become universal in Eurnpe till many centuries subsequently: The chief disadrantage of this method is that it requires a counting backward as well as forward; its advantage is that it evades dating the creation of inan and of the earth, though, of course, investigations have been made as to how many years B.c. these events, marmerly believed to have occurred almost at formerly believed to have occurred almost at
the sane time, took place. Halea bronght the same time, took place. Halea hronght
together 120 opinions on the subject, the extogether 120 opinions on the subject, the ex-
tremes varying by 3,268 years, whilst it has tremes varying by 3,268 years, whist it has
been affrmed inat even 300 diverae views on the subject exist. One great reason of the discrepancy is that the Hebrew, the Samaritan, and the Greek Pentateuchs all differ as to certain numbers in Genesis $v$. and elsewhere, ao that Archbishop Ussher, following the He brew, makes the creation B.C. 4004 , while Hales, preferting the Septuagint Greek, fixes the date at 5,411 .
9. Scientific Chronology: Wherever the occurreace of an eclipse of the sun or moon has been noted by an ancient or other historian in the annals of any year, which he accurately notes, astronomy will ultimately fix that eclip, we with unerring exactitude to the day. honr, minute, and second. The only uncer. tainty at pesent is that the value of certain tables, called Hansen's, by which the moon's notion is computed, has excited differences of opinion. Geology has proved foally and irreversibly that the world was in existence many millions of years before man came unon the scene, and that the two events must not be confounded by chronelogista. Occurrenees marking the soyersl atages in the earth's past marking the soversl atages in the earth's past
biatory, it has hitherto dated by geological periods, or suldivisions of them, not ky bis. toric time. It is only now beginning cautiously to feel its way to date in years a few events of the Post-Pliocene, or at furthest, of the Newer Pliocene perioda. [Glacial period.] The first appearance of man (a very recent geologieal event) it carries back further than bis-

## tory has as yet ventured to de. [Anmigurty

 of Man, Paleolithio, \&e.]chrŏn-ŏm'-Ø-tẽr, s. (Fr. chronomètre, from Gr, xpóvos (chronos) = tima, and $\mu$ étpov (metron) $=$ a measure.]

1. Horol. : An instrument for the exact mea anrement of time. This geners) meaning would include elocks, watchea of all kinds, clepay dras, and seme other derices, such as hour glasses and the graduated candles of the famous glasses and the graduated candles of the famous
King Alfred. The term is, however, applied King Alfred. Tha term is, however, applied
in a reatricted aense to those having sdjustments and compensationa for the fluctuationa of temperature. Chronometera are known as aliy's snd pocket. The rating of chronometers is usually conducted at government obacrvatories. The instrumeuts are sent from the ditferent watchnakers and received at atated jeriods. They remain the greater part of a year, their rates being noted daily by two persons. The best receive prize and are purchased for the navy ; otherg receive certificates of excellence; others are unrewarded. On their arrival in Jauuary, they are left to the ordinary atmospheric ternperature for some months ; their rates are taken under these months; their rates are taken under these
conditions. The apartment is then heated to conditions. The spartment is then heated a tropical temperature, and the rate taken. They are then llaced for a certain period in trays over the atove, and the rate taken. They are then placed in a refrigerating chamber cooled by a freezing mixture, and the rate taken under this artiticial arctic temperature. Their capacity to stand these variations constitutas their value, and their actual range of exposure may be estimated at $180^{\circ}$ - from the $+120^{\circ}$ of Aden and Fernando Po to the $-60^{\circ}$ of the Arctic regions when frozen in the pach of ice and watching through the long, long night. (Knight.)
2. Music: An instrument to indicate musical time; a metroaome.
"An instrument under the . ouame chronometer metit of time Two morisun lor the accurate memure the couductor, and The first suppliee the motion of aecond is used by tuuers of lossoats timents to "meanure the velocity of beats."-Encyclopradia Netropoitana.
chronometer-oscapement, s. An escapement inveated by Berthoud, and irmproved by Harriaon, Arnold, Earnahaw, and Dent It is the most perfect, delicate, and aatiafactory in its operation, of all the cscapements. It is also kept more carefully, at least in marine ehrononeters, as the gimbal-joint langing enahles it to maintain a constant josition relatively to the horizon, and it is carefully guarded from jars
chrŏn-ô-mĕt'-ric, chrŏn-ô-mĕt'-rí-cạl, a. [Fr. chronometrique.] Pertaining to a tsining to, or measured by, a chronometer ments ronnd the World, "-Darwin: Foyage Round the chronometric-governor, s. A device by which a time-measurer set to work at a prescribed and equable rate is made to regulate the motion of an engine. Invented by Wood, and improved by siemen.
chrơn-ŏm'-ět-ry̆, s. [Fr. chronometrie.] The art or sciance of the division and mesaurement of time. (Maunder.)
chrŏn'-о-scōpe, s. [Gr. хpóvos (chronos) $=$ time ; $\sigma$ кожє $\omega$ (shopeō) $=$ to aee, to examine.] 1. An instrument invented by Prof. Wheat atone in 1840 , to ascertain the velocity of $\mathrm{p}^{\mathrm{m}}$ jectiles by measuring small intervals of time yards from the gon, and the second about the game distance farther on. These are con nected by a fine insulated wire with the in strument, which is about 400 yarda in the rear of the ordnance. The instrument is ad justed on a plan similar to an electro-ballistic machine. When the alot is flred it cuts the wire in the first target, and then in like manner cuts the wire in the second target, the inatant each wire is severed being recorded by the instrument. The interval of time occupied ty the ball in passing from one target o the other furnishes the data for obtaining the initial velocity of the shot.
3. An instrument to measure the duration of luminous impressions upon the retioa (Webster.)
4. A metronoma. (Craig.)
 genit. xpoos (chroos) = colour ; ко́кко ( ( okk os) a kernel, and Lat. fem. pl, adj. saff. -acere.] Bot. : An order of microscopjeal unicellnlar planta, from salt and fresh water.
chrö-o-1ăp'-1-dw, s.pl. [From Mod, Lat. chroolep(us), the type; and Lat. fem. pl. adj. auff. -ide.]
Bot. : A family of Fungl or Algre, of whtch Chroolepus is the type.
chrö-ö-1ĕp'-oíd, a. (Frem Gr. xpés (chräs)

Bot. : Made up of small yellow scalea. ( $R$. Brown, 1874.)
chrō-ō-lĕp'-ŭs, s. [Gr. $\chi$ ри́s (chross) $=$ colour, and $\lambda e \pi i s($ lepis) =a rind, husk, shell.]
Bot.: A generic name applied to certatn byasoid strueturea fonud on rocks, bark of trees, \&c. Chroolepus aureum is composed of rigid opaque, ultimateiy brittle flaments, forming soft cashions of a yellowish coleur: or folvous odoratum, lichenicola are of orangs or folvous colour. Another geries of aprecies, C. ebenea, ac., are black. These piants have been regarded sometimea as Fungi and somespecies. The getula forms the type of the tamily Chroolepidx. Reproduction by hiciliated zoospores. (Grifith of Henfrey.)
 (Fr. chrysalide ; Lat. chrysallis; Gr. Xpvaadtis
(chrusallis) $=$ the gold-coloured abeath $f$ **ano (chrusallis) $=$ the gold-colonred aheath f $^{t}$ ana
butterflies, a chrysalia, from xpvais (chrusss) butterflies
$=$ gold.]
*A. As subst. : [Chrybalis]
B. As adJ. : Pertaining to or resembllag a chrysalis.
chry̆s-al-ǐ-di'-na, s. [Eeg. chrysalld; and Lat. neut. pl. adj. suff. -ina.l
Zool.: A Textulsrian Foraminifer, with a triaerial arrangement of chanbera and with large pores, and sometimes tubes, opening from chamber to chamber. Chrysalidina gradata is from the Cretaceous atrata of France. A dimorphous form, which is uniserial in its old state, lives in the Indias Oceau and Pamama Bay. (Grifith \& Benfrey.)
 Cbrvalio.
5. Nat. Hist. : The last stage through which mest insents prass before reaching their winged

or perfect atate. In this ataga the inaect is externally quiescent, but is the suhject of in ternal changes, the chief among which are the doelopment of winga and aexual organs. The case of the chrysulis varies greatly in the different ordera. [Cocoon.]
6. Fig.: Applied to the atate of man while in thia world: the aoul enclosed in the body being compared to the perfect insect enclosed in ita case.

Cracka tito sihning wingis. and bope ere deatt.
chry̌s-am'-ic, a. [Gr. xpvois (chrusos) =gold Eng. am- contr. for ammonia; and suft. ic.]

IThese vartous chemical terme comppounded with chrys- owe their derivation

Cate, fat, fare, amidst, whãt, fâll, father; wē| wĕt, hëre, camel, hẽr, thêre; pine, pit, sire, sir, marine; gō, pơt,

trom Gr, xpoois (chrusos) = gold, to the tact of their golden or rich yellow colour.
chrymamic sold, \&
Chem.: Tetranitro-chrysazin, or tetranitro-diaxy-anthraquinone, $\mathrm{C}_{14} \mathrm{H}_{2}\left(\mathrm{NO}_{2}\right)(\mathrm{OH})_{2} \mathrm{O}_{2}$ An acid obtained by heating aloes with strong nitric acid It crystallizes in golden-yellow scales. It is alightly solubis in water, and bas a bitter taste; its potassium salt resembies muraxide. It is converted by chloride of lime into chloro-picrin. With ammonia it forms chrysammate of ammonia, consiating of black adamantiue cryatala, and with potash, beantifui carmine-red powder calied chrysammate of potash.
chrys'am-ăde, s. [Gr. xpvós (chrusos) $=$ gold, and Eng. amide (q.v.).]

Chem.: The aame as tetra-amido-chrysazin, $\mathrm{C}_{14} \mathrm{H}_{2}\left(\mathrm{NH}_{2}\right)_{4}(\mathrm{OH})_{2} \mathrm{O}_{2}$. It is obtained by the sction of reducing agents on chrysamio aoid Chrysamide forma indigo-blue needle crystala having a metallic copper lustro.
chry̆s-ăm'-māte, s. [Gr. xpvaós (chrusos)= old ; amm-, contr. for ammonia; and snfi, -ate (Chem.).]

Chem. : A salt of ohrysamit acid.
Chrysammate of ammonia (Chem).: [Chrvsamic ACID].
Chrysammate of potash (Chem.): [Caryanmic CID].
chry̆s-a-niss-ǐo, a. [Gr. xpvoós (chrusos) $=$ gold, and Eng. anisic (q.v.).]

Chem.: Of golden hue, and having anisic acid in its compositioo.

## chrysanisio acid, s

Chem. : Dinitro - paramidobenzoic acld, $\mathrm{C}_{8} \mathrm{H}_{2}\left(\mathrm{NO}_{2}\right)_{2}\left(\mathrm{NH}_{2}\right) \mathrm{CO} \cdot \mathrm{OH}$. It is prepared by heating dinitro-anisic acid with aqueous am monia. It crystallizea in yellow needles, which melt at $259^{\circ}$. It ia a strong monohasic acld.
chrys-ăn'-thĕ-mŭm, s. [Gr. xpuaós (chrusos) $=$ gold, and ävecuov (anthemon) $=$ a flower.]
Bot.: A genus of herbaccoua or alightly shrubby plants, belonging to the corymhiferous gronp of the order Composity. The family is represented in the United Statea and Europe by the Ox-eye Daisy, levcanthermum, and in Eugland ly the Corn Marigold, C. Segetum.

CRRYSANTHEMUM (OX-EYE DAISY).

1. Floret of the ray. 2. Floret of the disk.

The development of the Chrysanthemum by cultivation has been extraordinary. Hundred of varietics are now raised in the gardena and conservatories of America and Eurape, and magnificent new ones annually appear. This development began in China and Japan.
chry̌g'-a-or, s. [Gr. xpucár (chrusos) = gold ; op (aor) =a aword.]
Zool.: A name given by De Montfort to a genus of Belemnites.
chry̆s-ä'gold; áop ( $a 0 \dot{r}$ ) = a sword.]
Zool. : A genus of Medusas belonging to the family Pelagidæ.
hryy's-a-zín, 8. [Gr. xpvoós (chrusos) $=$ gold ; ix (ite), and suff. in.)

Chens.: A chemical compound which crystallizes in red needlea, melting at $191^{\circ}$.
ohry̆s-Ø1-Ø-phăn'-tine, a. [Gr. xpvoós (chrusos) $=$ gold ; ideфavтevos (elephantinos) $=$ made or ivory èidas (elephas) = an elephant.] Made partly of gold and partly of fvory.

chry̌g'-ēne, : [Gr. גpvoós (chrusos) = gold.]
Chem, : ${\underset{6}{6}}_{\mathrm{C}_{6} \mathrm{H}_{8}-\mathrm{CH}}^{\|}{ }_{-1}$ or $\mathrm{C}_{18} \mathrm{H}_{12}$, an aromatic hydrocarbon, $\mathrm{C}_{18} \mathrm{H}_{19}$. It is obtained along with benzene by heating diphenyi in a aealed tube with hydrogen. Also obtained in the distillation of tar, pitch, de. Chrygene ia in aoluble in alcohol and ether, but cryetallises from boiling oil of turpeuting. It is a goiden yellow eolour when pare.
 golden.]

Chem. : An orange-coloured substance, $\mathrm{Si}_{4} \mathrm{H}_{4} \mathrm{O}_{3}$. (?) It is obtained by digesting cal cium sulicide with atrong hydrochlorio seid. It is insoluble in water, alcohol, and in nearly all solvente. Exposed to sunshtue it becomen lighter in colour, gives of hydrogen, and is converted into leukone, or silico-formic ecid, $\mathrm{H}-\mathrm{SiO} \cdot \mathrm{OH}$.
 chrysis, the typieal genus, and Lat. fen. pl. adj. sufi -ide.]

Entom.: A family of Hymenopterous in sects, distinguished hy being furnished with a tubuliferons ovipositor. They are all parasitic, and coloured with the richest metallic hues.
chry̆s-i-më'-ni-a, s. [Gr. xpvoós (chrusos) $=$ gold, and $\mu \dot{e} v \omega$ (menō) $=$ to remain (?).]

Bot. : A genus of Laurenciacea (Fiorideous Alga). Chrysimenia clavellasa is a rare sea weed, thres to twelve inches high, forming a feathery frond composed of a branched, tabular, long, not constricted or chambered, cellular structure, flled with a watery juice The spores are angular, and are contained in dense tufta, in ceramidia borne on the sides of the branchlets. The tetraspores are tripartite and immersed in the branchlets. (Griffith \& Henfrey.)
chrys'-in, s. [Gr. xpurós (chrusos) =gold, and Eng. suff. -in (Chem.).]

Chem. : A substance obtalned from the buds of species of Populus (Poplars). Chrysin when pare forms hright yellow shiniug plates which melt and sublime at $275^{\circ}$. Ferric chloride gives a violet colour with an alcoholic anlution of chrysin; it is insoluble in water. $1 t$ forms a yellow solntion with alkalies; on boiling this golution it is decomposed into phoroglucin acetic and benzoic acids, and methyl-pheny ketone.
chry̆s-ip'-tẽr-a, s. [Gr. xpvoós (chrusos) = gold, and rтє́pov (pleron) = a wing, a fin. $]$

Ichthy.: A genus of oval-boried fishes, be longing to the family Chretodontidx. They have large pectoral this.
chry̌s'-18, s. [Gr. xpvoós (chrusos) = gold.]
Entom. : The Gollen Wasp, or Ruby-tall fly a genus of Hymenoptera. They are magniti cently coloured with metallic hnes. They ar parasitic, depositing their eggs in the nests of the solitary Mason-hees or other Hymenop tera, on the larve of which their larve live. Chrysis ignita has the head, thorax, and legs of a rich blue or green, and the abdomen copper coloured. It is constantly in motion. It may be seen in summer on sunny walls poking into holes in quest of the nest of othe hymenopterous insects, of which its larta may make a prey.
ohry̌s-o-hăc'-trŏn, s. [Gr. גpuбós (chruвos) $=$ gold, and $\beta a x$ aоу (baktron) $=$ a staff, a stick.]

Bot. : A genus of liliaceons plants from the Anckland and Campbell lslanda, New Zea land. They have linear leaves, and racemose flowers (occasionally dieeclous) of a bright yellow colour. Chrysobactron Hookeri, pret.ty ilttle hog-plant, is cultivated in green houses in Britain. (Treas. of Bot.)
chryss-b-bă Lat. chrysobalan $(u s)=$ the type, and Lat. fem. pl. adj. suff. -aceoe.

Bot.: An order of dicotyledons, closely allied to Rosacer, and containing about twelve geners. They ars all trees or shrubs with alternats atipulate leaves, and several of
unem prodnce edibie fruits. They are claseed by Lindley in his "Rosal Alliance" betwren Calycanthacees and Fabaceex.
 = gold, and Badavos (balanos) $=$ an acorn, in reference to the yollow truit of some speoies.) Bot. : A genne of trees, the typical one of the order Chrysobalanacere, with eimple leaves, and racemes or panlcles of insignificant flowera. The frait of Chrysobalanus Icaco, the cocoa-plum, is eaten in the Weat Indien, as is another species, C.luteus, in Sierra Leone.
churys'-b-bĕr-y̆l, s. [Lat, chrysoberyllus, from Gr. \}puoós (chrusos) = gold, and $\beta$ jipvidos (bërullos) $=$ a beryl.] A green, greenish-white, or yellowiah-green orthorhombe mineral, of which there are two varietiea: (1) Ordinary Chrysoberyl, and (2) Alexandrita (q.v.).
 [Fr. chrysochlore, from Gr. $\chi$ pucos (chrusos) $=$

Entom.: A genus of Dipterous insects, belonging to the family Notacanthre. They are of a beautiful golden-green colonr. The larva live in cow-dung.
chry̆s-ot-chlör'-18s, s. [Gr. xpuás (chrusos) $=$ gold, and $\chi^{\lambda \omega \rho} \rho s$ (chたoros) $=$ green.]
Zool. : A genus of Talpidæ (Moles), the fur of whieh reflects most brilliant hues of green and gold. Chrysochloris aureus, or aurea, is the Golden Mole of Africa.
chry̆s'-б-chroŭs, a. [Gr. xpvaós (chrusos) $=$ gold, and xpws (chros), Ep. \& Ion. xpoós (chroos) $=$ the akin.]
Bot. : Having a yellow skin.
chry̌s-t-cól'-1a, * chrys-o-cholle, s. [Gr. хрусоко $1 \lambda \alpha$ (chrusokolla) $=$ gold solder; from Xpvaós $($ chrusos $)=$ gold, and кód入a $($ kolla $)=$ glue.]

Mineralogy:

## 1. A name of borax.

2. A silicate of protoxide of copper of a fine emeraid-green colour, apparently produced from the decomposition of copper ores, which it usually accompanics. It derives its name from the weak resinous lustre, and the peculiar transparency of the fractured edges. (l'uge.)
"Much Chrysocholle and also silver fire."-Sylvester Nagnaficence, 602 (Davies.)
chry̌s-ŏc'-ō-ma, s. [Gr. xpvós (chrus0s) = gold, and ком $\dot{\eta}(k o m e \bar{e})=$ hair.]
Bot.: A gemus of South African shrubs or undershrubs of the composite family, nearly allied to Linosyris, from which it differs in the hairs of its papprus being in a single series. About fifteen gpecies are enumerated. The leaves in most cases are linear in form and entire. The yellow nearly spherical flower-heads are about the size of a pea, and aingle on the ends of the branches. Chryso coma aurea is in coltivation, and is said to be a very common qieciea about Caje Town. Its leaves are linear, and about half an inch long. (Treas. of Bot.)
 $=$ gold, and корi $\nu \eta$ (koruné) =a club.]
Bot.: A curious genus of small annual Australian piants, helonging to the composite family. They are branched from the base, and seldom exceed three inches in height. The leavea are sinall, linesr, and covered with loose white wool ; but the most marked fenture in the plants is the arrangement of the ture in the piants is the arrangemant of the
flower-heada. These are disposed in short fower-headk. These are disposed in short yellow cluh-shaped spikes, and each flower-
head is almost hidden by a yellow bract and head is almost hidden by a yellow bract and
contains hut two florets. Five species are eontains hut two florets. Five species are
known; they nre chiefly fonnd in the western and southern parts of Australia.
chry̆s-ŏd'-ō-mŭs, s. [Gr. xpuбós (chrusos) $=$ gold, and $\delta \dot{\mu}$ os (domos) $=$ a houre, a huilding.]
Zool.: A genus of Mollnsca, the sbelis of which are large, and of a beautiful nrange colour. The hasal chamel is comparatively ahort, and the body whorl ventricose. Family, Muricide. It is now reduced to a auh-genus of Fusus.
charys-b-găs'-tẽr, s. [Gr. xpuás (chrusos) $=$ gold, and $\gamma \dot{\sigma} \sigma T \eta p$ (gaster) $=$ a atomach.]
Entom. : A genus of Dipterous insects, beionging to the famlly Syrphidæ. Chrysogaster splendens has the head and thorax green and
bin, bбy; pout, jowl; cat, çell, chorus, çin, bench; go, gem; thin, this; cin, ap; rexpect, Xenophon, exdgt. -Yig.

the abdomen purple－black，the sider greenish the antenne yellow．It is half an inch long． It occura in England．
 and yeuvaiw（gennaó）＝to produce．］
Chem．：An orange－coloured hydrocarbon， contained in crude anthracene．It melts at $290^{\circ}$ ，and is soluble in concentratod sulphuric acid．Traces of this substance give a yellow colour to colourless aromatic hydrocarbons．
＊chry̆s－ŏg＇－raph－y，\＆．［Gr．xpvoоүрaфia （chrusographio），from хpvás（chrusos）＝gold ；
 to write．］
1．The art of writing or llluminsting in lettera of gold．
2．A letter or other writing executed in lettere of gold．
abry＇s＇－ol－dine，s．［Gr．xpvois（chrusos）$=$ gold ；eidos（eidos）＝like，and Eng．suff．－ine ．
Chem．：Metadiamidazobenzene， $\mathrm{C}_{12} \mathrm{H}_{12} \mathrm{~N}_{4}$ or $\mathrm{C}_{6} \mathrm{H}_{6}-\mathrm{NNC}_{6} \mathrm{H}_{3}\left(\mathrm{NH}_{2}\right)_{2}$ ．The hydrochloride is sold commercially as chrysoidine．It is an orange－yellow colouring matter．Cbryaoidine s prepared by mixing a one per cent．solution of $s$ diazobenzens galt with a ten per cent solution of metadiamidabenzens；the reaulting blood－red precipitata is dissolved in boiling water，the solution is cooled to $50^{\circ}$ ，and pre－ cipitated with ammonis，and the erystallized from alcohol of 30 per cent．，then from boiling water．Chrysoidine forms golden needles， soluble in alcohol，melting at $1 i^{\circ}$ ．It is a baae from mono－acid salts which dissolve in base from mono－scid salts which dissolve in
water forming a yellow solution，which is water forming a yellow solution，which is
turned crimson by excess of acid．By the turned crimson by excess of acid．By the
action of tin and hydrochloric seid it is action of tio and hydrochloric acid it is
resolved into aniline $\mathrm{C}_{6} \mathrm{H}_{5} \mathrm{NH}_{2}$ and triamido－ resolved into aniline
benzene， $\mathrm{C}_{6} \mathrm{H}_{3}\left(\mathrm{NH}_{2}\right)_{3}$ ．
chry̆s－あ－lăp＇－І̌，a．［Gr．रpvaós（chrusos）$=$ gold，and $\lambda \in \pi i s$（lepis）$=$ a scale．］Resembling golden acales．

## chrysoleple acid，s．

Chem．：An acid obtained in beantiful golden－ yellow seales from the mother liquid and washings of chrysamic acid．It has been discovered to be the same as picric acid ［Carbazotic acia．］
ohry̆s＇－言－līte，s．［Fr．chrysolithe；Lat．cruso－ lithus；Gr．xpvaódeoos（chrusolithos），from xpuoús（chrusos）$=$ gold，and $\lambda i \theta o s$（lithos）$=\mathrm{a}$ stone．］

## Mineralogy：

1．A green－coloured orthorhombic mineral of a vitreons lustre，transjarent or translu－ cent．Hardoess，6－7；s1．gr．，3．33－3．5． Compos．：Silica， $3163-44^{\circ} 67$ ；protoxide of iron， $6.0-29.71$ ；mrotoxide of mangancse， $0-1.81$ ；magnestia， $3240-50.49$ ．It is gene－ rally divided into two classes ：－（1）Precious of a pale yellowish－green colour and trans－ parent，so as to be fit for jewelry．This is fonnd in the Levant．（2）Common：Dark yel－ lowish－green to olive，or bottle－glass green； common in basalt and lavas，at times in large masses，having a rectangular outline．The chrysolithus of Pliny was probably our topaz， and his topaz our chrysolite．It frequently changes colour，beconiug brownish or reddish－ brown through the oxidation of the iron． Uader the action of carbonated waters，the fron is carried of instead of being peroxidizel， and also some of the magoesia is remoyed at and asso some of the magoesia is removed at
the same time；and thins may come serpen－ the same time；and this msy come serpen－
tine and picrosmine，which often retain the crystalline form of chrysolite．

## 2．The same as Zircon（q．v．）．

3．The aame as Topaz（q．v．）．
4．A varisty of Tourinaline，also calle， 1 Brazilian Emerald or Peridot of Brazil．It is green and transparent．
5．The same as Apatite（q．v．）．
Iron chrysolite
Min．：The same sa Fayalite（q．v．）．
Iron manganese chrysolite：
Min：A mineral near Fayalite，but con－ taining besides protoxide of iron，zome prot－ oxide of mangazese and lime and a little magnesia，thus spproaching hyalosiderite． Coompos．：Silica， $29 \cdot 16$ ；slumima， $1 \cdot 56$ ；prot－ oxide of iron， 55.87 ；protoxide of manganese， 8.47 ；magneaia， 3.23 ；lime， $2 \cdot 29$ ．It occura In a gneissoid rock consisting partly of augite and garnet at Tuasberg in Sweden．（Dana．）

## Titaniderous chrysolite：

Min．：A massive reddish－brown miveral from the talcose echist of Pfunders，in the Tyrol，having eome resemblance to boltonite； $\mathbf{s p}$ ．gr．，9•25．It contains 3.5 to $5 \cdot 3$ of titanic scid，with 6 per cent．of protoxide of iron．
＊chry̆s－ŏ1＇－ó－g̀y̆，s．［Gr．xpvaós（chrusos）$=$ gold，money，and dóyos（logos）$=\mathrm{a}$ discour6e．］ A discourse or treatise on wealth．（Brande．）
chry̆s－ŏl＇－ö－phŭs，8．［Gr．xpuбós（chrusos） $=$ gold，and $\lambda$ ópos（lophos $)=$ a crest．］
Ornith．：The Walking Tyrants，a genus of birds belonging to the Tyrant Shrikes．Family， Laniadæ．They are natives of Brazil．
chry̌s－ŏ1＇－o－pŭs，s．［Gr．xpvaós（chrusos）$=$ gold，and domós（lopos）＝a piece，a slice．］
Entom．：A genus of Coleopterous ：asects， belonging to the family hisincophorn．
chry̆s－ö＇ma，s．［Gr．xpvós（chrusos）＝gold， and $\sigma \omega \bar{\mu} a$（soma）$=\mathrm{s}$ body．］
Bot．：A genus of North American com－ posite plants，considered by the suthors of the＂Flora of North America＂to be the same as that of the Golden Rod（Soli－ dago）．The specles are perennial plants， dago）．The species are perennial plants， With alternati lance－shaped entirs or serrated
leaves，aonietimes furuished with pellucid leaves，aonistimes fursished with pellucis
dots；sad they bear terminal corymbs of yel－ dots；and they bear terminal corymbs of yel six to eight flareta，one to thras of them being strap－ahsped．
＊chry̆ss－b－măg＇－nẹt，s．［Gr．крvaós（chrusos） $=$ gold，and Eng．magnet（q．v．）．］The load stone．（Addison．）
 （chrusomèlolonthion）＝s little golden beetie．］ Entom．：The typical genus of the family Chrysomelida（q．v．）．Sixteen species are British．
chry̆s－t－měl－1－dæ，s．pl．［Mod．Lat．chryso－ mell（a）；aud fem．pl．adj．suff．－idae．］
Entom．：A family of Coleopterous insects， tribe Cyclica．They have ovate，convex bodies；tarsi four－jointed ；antemne not cla－ vate；larva generally naked．They live on the leaves of plasts．Thirty－eight genera are enumerated by Sharp as British．These insects are often very brilliantly coloured green，purple，llue，browa，\＆c．，a commixture of colours being Jnet with even in the Eng－ lish species．
chry̆s＇－ठ－phāne，s．［Gr．xpvoós（chrusos）＝ gold，and \＄aiv（phuinö）＝to appear．］
Min．：A variety of seybertite，occurriag in reddish－brows to copper－red brittle foliated masses．Sp．gr．，3．148．The British Mnsemin Catalogue makes Chrysophane a aynonym of Clintonita（q．v．）
＊chry̆s－ö－phăn＇－1c，a．［Gr．хрvбós（chrusos） $=$ gold；paivm（phuino ）$=$ to appear ；sulf． －ic． 1 Appearing like or resembliug gold in coleur

## chrysophanic acid，s．

Chem．：Parietie acid，rheic acid．A modification of dioxymethylanthraquinone $\mathrm{C}_{15} \mathrm{H}_{10} \mathrm{O}_{4}=\mathrm{C}_{14} \mathrm{H}_{5} \cdot \mathrm{CH}_{3}(\mathrm{OH})_{2} \mathrm{O}_{2}$ ．Chysophanic acid occurs in the lichen Parmelia parietina， in senna leaves，and in rhubarb root，aod is extracted by ether， $1 t$ forms golden yellow prismatic crystals，which melt at $162^{\circ}$ ，and is reduced by zinc－dust to methyl－anthracene． It dissolves in alkalies，forming a red solution．
＂chry̆s－ǒph＇－il－īte，s．［Gr．хpuбós（chrusos） ＝gold，and фías（philos）$=$ a lover．］A lover of gold．（Lamb．）
chry̆s－ŏph＇－ôr－a，s．［Gr．xpveós（chrusos）$=$ gold ；popós（phoros）$=$ bearing；фépw（pherō） $=$ to bear．］
Entom．：A geaus of Coleopterons insects， belonging to the family Lamellicornes．The apecies are of most beantiful golden and green colours．
chry̆s＇－交－phry̆s，s．［Gr．Xpeá́s（chrusos）＝ gold，and oфpus（ophrus）$=$ the brow．］

Ichthy．：A genus of fishes belonging to the family Chetodontidæ，having bodies attenu－ sted at each end．
chry̆s＇－ot－phy̆ll，s．［From Gr．xpvaós（chrusos） $=$ gold，and $\phi \dot{\lambda} \lambda \lambda \frac{1}{}$（phullon）$=\mathbf{a}$ leaf．］A
golden colouring matter found in learo （Rossiter．）
chry̆s－ó－phy̌1＇－1ŭm，s．［Gr．хpvaós（chrusos） $=$ gold，and $\phi \dot{u} \lambda \lambda a \nu$（phullon）$=$ a lesf；in allu： sion to the golden colour on the under elde of the leaves．］
Bot．：A genns of Sapotaceas，concisting of trees with milky juice，slternate leaves with munerous tradeverae closely－aggregated ribs， and golden hairs on the under surface．The fruit of Chrysophyllum Cainito is $\ln$ the West Indles esteemed a delicacy nuder the dame of the Star－apple．
 gold，and ömos（opos）＝julce．］

Bot．：A genus of beautiful trees，natives of Madagascar．When the bark is cut they emit a yellow juice．
chry̌s＇－ó－präşe，＊cry̆s＇－t－pāse，＂oris＇－ о－pāçe，s．［Fr．chrysoprase；Gr．xpvod． $\pi \rho a \sigma o s($（chrusoprasos），trom xováos（chrusos）$=$ gold，and прáoov（prason）$=8$ leek，from the colour．］

Mineralogy ：
1．An spple－green variety of chalcedony， the colour due to the presence of oxide of nickel．
2．A varisty of beryl，of a pale yellowish－ grees colour．
＂The cryeopase the tenthe io tyght．＂－E．E．Aute
Pooms；Pearl， 1012
chrysoprase earth，s．
Min．：A variety of Plmelite（q．v．）．
chry̆s－ŏp＇－ra－sŭs，s．［Lat．］［CHR Ysoprabz．］ The tenth of the precious stones with which the walls of the New Jerusalem were to be adorned（Rev．xxi．20，A．V．）．Probably the Chrysoprase（q．v．），as it is rendergd in the Revisod Veraion．
chry̌s＇－ŏps，s．［Gr．хpuaós（chrusos）＝gold， sud ow（ops）＝the face．］
Entom．：A genus of Dipterous insects，be－ longing to the family Tabanide．Three species occur in this country，where they are knowe as clag－flies or gad－fies．They are all blood－suckers，and are exceedingly trouble－ some to cattle and horses in summer．
 gold，and ous（onsis）＝a face，sppearance．］
Bot．：A genus of annual or perennalal North American composite plants，the grester
portion of the species laving all thelr portion of the species llaving all their parts covered with villous or silky haira． Chrysopsis villosa，a plant with oblong halry lesves about sn inch and a hislf long，and numerous yellow flower－heads，half sn theh in diameter，is said to be one of the com－ monest plants on the prairies of the Saskst－ chawsn．C．graminifulia extends sonthwards chawsn．C．graminifota extends sonthwards close－pressed silvery hairs．（Treas．of Bot．）
chry̆s－ŏp＇ter－iss，s．［Gr．xpyбós（chrusos）＝ golid，and $\pi$ repis（pteris）$=$ a kind of fern．］
Rot．：A synonym of Phlebodium，a genus of ferrs，which includes Linnæus＇s Polypodium aureum，the apecifle sppellation seeroing to have snggested this generic name．
chry̆s－ŏp－tẽr－y̆x，s．［Gr．xpvaós（chrusos） $=$ gold，and $\pi \operatorname{req}^{\rho} \boldsymbol{\xi}($ pterux $)=\mathrm{a}$ wing．］
Ornith．：A genns of birda belonging to the sub－family Anjelinw，or Typical Chatterere， and fumily Ampelida，or Chatterers．
chry̆s－ōp＇－tĭl－ŭs，s．［Gr．Xpvais（chrusos）＝ gold，and $\pi$ ridov $(p t i l o n)=a$ wing or plume．］ Ornith．：A genus of birds belonging to the sulb－family Picine and family Pieidæ，or Wootpeckers．They are natives of tropical imerica
chry̌s＇－ò－quĭn－ōne，s．［Eng．chrys（ene），and quinone．］
Chem．： $\mathrm{C}_{18} \mathrm{H}_{10} \mathrm{O}_{2}$ ．It is obtained by the action of chremic acid on chrysene dissolved in acetic acid．It crystallizes in red needles melting at $235^{\circ}$ ．It dissolves in a solution of sodinm disulphite and the concentrated sola－ tinu deposits colourless crystals which are de－ composed by water with liberation of chryso－ quinone．The reactions of chrysoquinone resemble those of phenanthrenequinoue．It yielis when heated with soda－lime a hydro－ earbon $\mathrm{C}_{16} \mathrm{H}_{12}$ ．

[^127]chrys-or'rhō-ē, s. [Gr. xpoós (chrusos) $=$ gold; and pón (rhoe) $x$ a stream, a flowling, (rheo) $=$ to flow.)
Bot.: A genus of Chamelsaciaceex, consist. ing of a rigid shrub from the Swan river, with narrow terete leaves and terminal corymbe of 2 bright-yellow flower.

* chry̆ys'-t-spẽrm, s. [Gr. xpvaós (chrusos) $=$ goid, and $\sigma$ rippa (sperma) $=\mathrm{a}$ seed.] A means
ohry̆s-ठ-splē'-n̆̈-ŭm, s. [Gr.xpvoós (chrusos) $=$ gold, and $\sigma \pi \lambda \dot{\eta} \eta \eta$ (splènè) $=$ the spleen; in reterence to its supposed efficacy in diseases of the spleen.]
Bot.: Golden Saxifrage. A small genne of animportant herbaceous plants, belonging to the Saxifragacee, among which they are discriminated by their one-celled seed-vessel, and by being desititute of petals. Two species are indigenons to Britaln, and scareely differ from one another, except that one has the leaves opposite, the other alternate. The flowers, which are bright yellowish-green, appear in April and May, growing in Hast tufts at the eunmit of the stems. Chrysosplenium oppositifolium is the commoner species. C. atterni. folium is more abundant in the north. It was fornerly used as aslight tonic. (Lindley.) The genus is represented in varions parts of the world hy planta of similar hahit, none of which are worthy of cultivation.
 $=$ gold, and $\sigma \tau \dot{a} u{ }^{2}($ stachus $)=$ an ear or spike of corn.]
Bot. : $\boldsymbol{\Delta}$ genns of climbing fhrubs, belonging to the order Combretaceex. They sre natives of Brazil.
ohry̆s's'ot-tile, s. $\quad[G r . ~ x \rho v \sigma o ́ s ~(c h r u s o s)=$ gold, and rinos (tilos) $=$ fine hair.]
Min. : A delicately fibroua variety of Serpentine. Colour, greenish-white, green, olive rreen, yellow, and hrownish. Sp. gr., $2 \cdot 219$. It often coustitutes aeama in Serpentime. It includes most of the silky amisnthns of serpentine rocka. The original chrysotile was from Reichenatein. (Dana.)
ahry̆s-ō'-tǐs, s. [Gr. xpvoós (chrusos) = gold, and oùs (ouz), genit. むitos (otos) $=$ an ear.] Ornith.: A genus of South American parrots, having the face and ears yellow.
chry̌s-б-tŏx'-ŭm, s. [Gr. रpuvós (chrusos)= gold, and togov (toxon) = an arrow, a alhaft.] Entom.: a genus of Dipterons insecta.
ohry̆s-0.'-tŭs, s. [Gri. Xpuoós (chrusos) = gold, snd ouvs (ous), genit. $\dot{\omega}$ oos (otos) $=$ an ear.] Entom: : A genus of Dipterous insects, belonging to the family Tanyatoms.
ahrỳs'-б-tȳpe, s. [Gr. xpugós (chrusas)= gold, and $\tau$ inos (tupos) $=$ an impression.] Photography:

1. A proceas diacovered by Sir John Herschel, in which s aheet of paper is saturated with a solution of ammonio-citrate of iron dried in the dark. Exposed in a camera or printing-frame, the faint picture is developed by brushing over with a neutrbl solution of chloride of gold washed in water repeatedly fixed by a wesk solution of iodide of potassium and then finally washed and dried. ( $k$ ulight.) 2. A picture obtained by the proceas descrived in 1 .
 gold, and $\xi \dot{\nu} \lambda o v($ xulon $)=$ wood.]
Bot: : The name of a Sonth Bolivian tree, now refcrred to Howardia (q.y.). It deriveil its name from the yellow colour of its wood.
ohry̆s-täl'-1ō-tȳpe, s. [Eng. ohrystal $=$ cryatal, and type.]
Phot.: A name given to a kind of picture on s tranalucent material ; an opalotyle.
chry-stis-mebs, s. [Chalistias.] ( 0 . Scotch.)
chry̆s-ür'-ŭs, s. [Gr. $\quad$ povoós (chrusos) $=$ gold, and òvá (oura) $=$ a tail.]
Bot. : A genua of grasscs belonging to the tribe Festacex. Only one species ia de ecribed, Chrysurus cynosuroides, which is the Lamarckia aurea of some suthora. Thia hand-
some dwarf-habited annual grass is a native of the eouth of Europe and north of Africa, and is occasionally cultivated in botanical gsrdens.
chth ${ }^{\prime}$-nil-an. a. [Gr. Xosvios (chithonios) $=$ earthly.] Beionglng to the carth.
"The terreatrial Earth-mothar and her cehehomian
 Hyth, 1 , 280 .
chŭb, * chŭbbe, s. [Cf. Dsn. kobbe $=$ a neal; Sw. kubb $=$ a block, e log. (Skeat.)]
Ichthy.: A river fish, Leuciscus cephalus, belonging to the genus Leuciscus and family Cyprinidx. It is a coarse-fleshed fish, full of bones, very timid, end frequenting the deepest holes of rivers. It is slso callied a cheven or chevin.
*hub-cheeked, $a$. Having chubby or fst cheeks.

* chub-faced, $a$. Having a chubby or fat face. (Marston: Antonio's levenge, iv. 2.)
Chưbb, s. \& $a$. [From the name of the inventor and maker, a London lockamith.]
A. As subst. : The person referred to in the etymology.
B. As adj. : (See the coupounds),

Chubb-key, s. A key spccisilly intended for a Chubb-lock.
Chubb-Lock, s. A patent lock constructed on the tumbler system [TivazaEn], and having in sddition, a lever called \& detector, which is so fitted that if any one of the tumblers be raised higher than it should be the whole of the apparatus ia ixed immorsbly by a boit, thus completely preventing the picking of the lock.
${ }^{\text {© }}$ Chubbed, $a$. [Eng. chub; ed.] Chabby, chub-faced.

- chŭb'-běd-něss, s. [Eng. chubbed; -ness.] Chybbiness (q.v.).
¢hŭb'-bi-něss, s. [Eng. chubby; -ness.] The quslity or atate of being chublyy or chubfaced.
chŭb'-by̆, $a$. [Eug. chub; -y.] Fst and plump like s chub, eapecially said of the fsce.
* ¢hŭck (1), * çhŭk, v.i. \& t. [A variant of cluck (q.v.).]
I. Intransitive:

1. To cluck or make a noise like a hen when calling ber chickena together.
"He chukkith when hathath a corn S.-Rounde,
And to him renuen than his wies alie. 18
2. To langh in s suppressed or convalsive manner, to chuckle.
"But, bold-1ac'd Satyr, ptrain not orer hish,

II. Trans. : To call, as a hen ber chickena.
"Then crow ing clapped has whng th' appointed cail,
To chuck hib wives tobether in the hall
To chuck his wives vobetner ingien: cook \& Fox, 430 ,
¢̧hŭck (2), * ${ }^{\text {ghock, }}$ v.t. [Fr. choquer $=$ to sive a alock to : Dut. schokken $=$ to jolt, to shake ; schok $=$ a ahock, \& jolt.] [CHock, Sноск.]
3. To strike gently under the chin.
4. To throw with force, to fling.
"As if her hand hat chucked a mhlling."

* chuck-farthing, $\delta, \& a$.
I. As subst. : An old game in which money was thrown so as to fall into a hole prepared for the purpose. It is alluded to in "The Woman turned Bully," A.d. 1675. (Halliwell.)
 II. As adj. : Trifiling, pitiful.
 chuck-hole, 8 .

1. A deep hole in a waggon rut. (Webster.) 2. Chnck-farthing (q.v.).

+ çhŭck (3), v.t. [Снuck (3), s.]
Mech.: To place or hold in a chuck in turning.
chŭck (1), s. [a variant of chicken.]

1. The voice or call of a lien, the sound by which fowis are called together to be fed
"Ho made tha chuck tour or nve timee that people use to makik
*2. A term of endearnent.

${ }^{3}$ 3. Any slight noiee.
¢hŭcle (2), s. [Cuvck (2), v.]
2. A blight tap or blow under the chin.
3. $\Delta$ throw.
4. A marble ased in the game of taw. (Scotch.)
¢̧hŭck (3), s. [Probabiy connected with chuck (2), z
5. Mech.: An sppendage to slethe. Being screwed on to the nose of the mandrel, it ia masde to grasp the work to le turued. There are several varieties, such as the eccentric chuck which is designed for changing the centre of the work ; the elliptic or oval; the geometric, \&c. [Nose-Enoine.]
6. Naut.: $\Delta$ warping chuck is one in which hawsers or ropes run. Friction rollers prevent the wesring of the rope. It is used on the rail or other portion of s ship's side.
chuck-lathe, s. A lathe in which the work la held by a socket or
 grasping device uttached
 to the revolving mandrel of the head-stock. lt is used for turning ahort work, such aa cups, spools, balls, and a great variety of ornsmental and useful articlea.

## chuck-will's widow, s.

Ornith.: A species of Goatsucker, Caprimulgus carolinensis, a native of the Sonthern States of North America. The name is so attempt to reproduce the note of the bird.
"It wanted hut a few minutes of midnight, when anddenly the clear and diatinet volce to tree in the garden below the window where I was sitting, nnd garan bew yard from me It was exactly as if
only a few
human heing had apoken the worda. chuck- Widow.

chŭcl'-ět, s. [From the voice of the bird. A name given to the Blackbird, laland oi Hoy, Orkney.
"In winter-it has only a squeniling volce. 11 ke the word chuck, chuck, neveral times reperted, whence the Hoy uame."-Low: Fauna Oread., P . 58 .
¢hŭck'-1e. s. \& a. [A dimin. of Eng. cluuck (2), 8.]
I. A barn-door fowl.
"Though its no tike our barn-door ehuckies at 2. A chuckie-stane.
3. (Pl.) A game like chuck-farthing (q.v.) in which stones are used inatead of coins.
chuckie-stane, 8. A pebble such as children play at chuckies with.
"taned."-Scott: Rob Roy, eli. xiv.
¢hŭck'-le (le as ell), (i), v.t. \& i. [A frequent. form from chuck (1) v. (Malm): pro bably more immediately related to choke (Skeat).]

* A. Transitive

1. To call together as a hen her chickena
"iii chuckte item together."-Dryderh
2. To fondle.
he must chuckle you, and moan you."Dryden: Spanish Friar.
B. Intrans. : To laugh convulsively or in a suppressed and broken manner.

* çhŭck' ${ }^{\prime}$ 1e (2), v.t. [A frequent. form from chuck (2), v. (q.v.).] To throw together, to mix up. "She ch "chles tigether a whote covy of
perfumes."-Genteman fakeructed, p. 17
¢hŭck'-Ic, s. [Chuckle (1), v.] A sbort convulsive or suppreased langh
*huckle-chin, s. A double-chin.
 -dian, -tian = shan. -tion, -sion =shŭn; -tion, -sion = zhŭn. -cious, -tious, -sious =shŭs. -ble, kle, \&c. =bel, Irgl.

The de waps from wis chuckle chen

+ chnokle-head, s. A thick - headed fellow, a numskull.
"Is he not much handeomer and better hnllt than thii.
t chuckle-headed, a. Thick-headed, dull, atupid.
ghŭck'-líng, pr. par., a., \& s. [Cevekle, v.] A. \& B. As pr. par. \& particip. adj.: (See the verh).
C. As subst. : The act of making a chuckling nolse; a chuckle.
* chŭd, v.t. [Cod.] To champ, to bite.
"When she rides the horse chuds bis bit so cheer-

chŭd'-dèr, s. [Hind. chudur, e corruption of chadur $=$ a sheet.] In India, a sheet inade of silk, mualin, or cambric, thrown over the bead of Mussulman and sonse Hindoo women, and reaching to the ground. When they go into the street they generally wrap theniselves in it, ss they do also when golng to sleep. (Herklots \& Jaffur Shurreef.)
chŭd'-rēme, cŭd'-rēme, s. [lr. cudthrom $=a$ weight, a load.] An ancient designation of whst is called a stone weight.
 octo nale do Braseo, et Derchede mation et Chediber makle."-Chart. Sti. Andr. Craufurds onicers of state
* chû- ${ }^{\circ} \mathrm{t}$, *. [Chewer.] A kind of forcemeat.

As for chuets, which are 114 awian mincel meat, inpartly with cream. or almore or pintacho millik."一 Bucon: Natural Fistory.
" chuf, s. [Coof.] (Scotch.) (Maitland:

* $¢$ hŭff, * çhuffe, a. \& s. [Etym. doubtful; Lif. chub and Welsh cyff=astock, a stump.] [Choffe.]
A. As aulj.: Fat-faced, with fat or puffed out cheeks.
"Chuff: bouffe"-Putsgraze. fellow.
"That gaw a butcher, a butcberly chufo ladvedo. ."
* chuff-headed, $a$. Thick-headed, chuckbeaded.
'A great chuffheated Priest that stood hy, apake,
* ©hŭf'rér, s. [Eng. chuff; -er.] A chuff, a 'Herkyos now whit ehalle befslle Of thin fals chufer here."' Town iryet., p. 21a,
©hŭf'-fie, $a$. [Eng. chuff; -ie $=-y$.] Fatfaced: having a double chin.
chuffie-cheekit, $a$. Having full cheeks. (Seotch.)
chuffie-checks, s. pl. or sing.

1. Lit. (Pl.): Full cheeks.
2. Fig. (Bymetonomy): A iudicrous designation for a full-faced child.
© ©hưff $-\mathbf{1}-\mathbf{1} \mathbf{y}$, adv. [Eng. chuffy; -ly.] In a chulfy manner; mughly, surlily, clowniahly.
'çhŭff'-ǐ-něss, s. [Eng. chuffy; *ness.] The quality of baing chuffy; roughress, rudeness, clownishness.
"In mplte of the chumnezs of hls appearance."- Wias
dgroorth: Absentes, ch. $x$ vi (Davies.)
"chŭf'-fing, s. [Eng. chulf; -ing.] Rudehess, clownishness.
"That wase chuffinng and falle."
"chŭf'-fy̆, " chŭf' fie, a. [Eng. chu 1. Fat-faced. (Mainuraring.)
3. Rough, rude, clownish.
chuffy-bricks, s. Bricks which are pufled out by the escape of rarefled air or steam during burning.
Chăk (I), s. [A.S. cedce $=$ the cheek .] A disease, mentioned ln Rouli's "Cursing," MS., affecting the cheek or jaw.
"The chukis, that haldif the chaftly fra chowing, Oloss Complaint of Socel., p. 232

* chŭk (2), s. \& v. [Cнuck (1).]

The amme ertuinal masy he sbolved hy the ehureh and cundermined by the athite: Ahsolved or pardoned by -1. Church of England:
(1) Hist.: The foregoing designation is used in two aenses; first, a general one signifylng the Church regarded as continuous, which from the first triumph of Christianity till now, has been that of the English peopie, shi secondly, in a more specitic sense, the Protestant Church now cstablisbed to England as distinguished from the Church of Rome.
As carly as the 2ud century, Tertullian ease that those parts of Britain which were insccessible to the Romans had become subject to Christ. They recelved the gospel from Gaul and not from Rome. This Celtic Church was driven from E. and S. Eugland by the Saxons.

Cite, tăt, täre, amidst, whãt, fâll, father; wē, wĕt, hëre, camẹl, hẽr, thêre; pīne, pĭt, sïre, sir, marine; gō, pơt,

These invaders were gradually converted by Angustin and his companione sent from Rome for che parpose, and by the early part of the Tth centary, the seven kmgdoms of the heptarchy were all nomtnally Christian. In England, as elsewhere, the centuries between the
Tth and the 13 th were marked ly the growth and nltimate domiastion of the Papacy, and in 1218, King John, to the diegust of his enbjects, snirendered his crown to the Roman legate. But the submission was never complete, and certain Parliamentary meesures in civil power agadnst the encroachments of the Church, look as if they had been proposed at a much later period. In the same century, Wycltfe on the one hand, and Chaucer and the author of "Piers Plowman" on the other, inflicted heavy blows upon the Church'a reputation. Thoronghly alarmed in the 15 th century for its anpremacy, it became increasingly cruel in its treatment of "heretics," and in the 10th the Reformation came. In 1531, the royal supremacy, which was intended to supersede the papal one, was imposed on the eletgy by Heary YIII., and was made use of to produce other changes. In the same year Coverdale'a In 1549, the first ted to be read Crayer was published, and permiasion given to the clergy to marry. In the reign of Edward VI., A.D. 1547 to 1553 , more eweeping measures of reform were carried out under the anspices of foreigo rather than English Protestant leaders, but these were completely swept away in the great reaction in favour of Roman Catholicism which arose when Mary came to the throne. Thers io evidence that in 1553, when Queen Mary began to reign, the Protestants Were in a minority, but in 1558, when Queed Elizabeth came to the throne, they had become a majority, the fires of Smithfeld and other placee having produced an effect the exact opposite of that which they had been Intended to acconplish. The work of reformation was resumed under Queen Elizabeth, and in 1563 the thirty-nine articies becane, as they still contiane to le, the authoritative statement of the Church's creed. Two parties church: the came into antagoaism in the Church: the Puritans, who wished to conof Geneva and of Scotland of the churclies of Geneva and of Scotland; and an Anglican party, who were reluctant to break 60 comfrom 14th to 16th January, 1604, at Hampton Court, between the leaders on each side, failed to effect their reconciliation, and they went their separate ways. In 1611 was published the version of the Bihle which is now called the anthorised one, that which maintains its place at present, notwithstanding the issue of the revised version. The disputes between the Puritans and the Anglicans continned during and remaiader of the reign of Eizabeth, During the Civil War, which commenced in During it was a great object with the Parlia1640, it was a great object with the Parlia-
mentary party to obtaln asslatance from the mentary party to obtain asslatance from the three years, having risen in 1637 against an effort to force upon them a liturgy which they abhorred. An ecclesiastical, as well as a political, union was proposed by the Scotch, Who were then, as now, Presbyterian ; and in 1644, the Book of Common I'rayer was suppressed and the directory of public worship divines substituted in its room. A reaction against the new arrangements was not long in arising, and with the return of monarchy episcopacy was restored. In 1662 , the Act of Uniformity was passed, which compelled abont 2,000 clergymea, mostly Presbyterian in sentiment, to resign their bviags, and laid the foundation of modern Nonconformity. The Act is still in force. The effort of James II., in vielation of his coronation oath, to undo the reformation in the English Church, injured not it but himself, and the attempt has never been renewed on the part of
any subsequent sovereign. The evangelistic zeal of Whitfield, Wesley, and various other clergymen, in the 18th century, awoke the Church to new life, which did not paas away even when the followers of the two great preachers just named ceased to belong still the most numerous in the Establiahment, is, in large measure, the fruit of 18th century revival effort In the 19th, the movement has been in other directions. With 1833, just
after the passing of the first Reforin Biil, the came forth, and nlmety, in all, wers iasued within the next eight years. The ritnalistic Fithin the next elght years. The ritnalistic
party, at a later date, carried on the work which the tractarians had begun. In I860 the Essays and Reviews, and in 1862 a work by
Bishop Colenso on the Pentateuch, gave prominence to the opposite pole of thought, being whet theologians call etrongly rationalistic. Church Congresses, bringing the representatlvea of these three partice face to face, aoften their antagonlems, and fesr of common danger renders them more united than they ofherwise would be.
(2) In the United States: The first Church of England serviceain the American Colonies took place at Jamestown, Virgiaia, in 1606 , the holy communion beiag celebrated by the Rev. Robert Huat, neder an awning buspended hetween the trees. The Protestant Episcopal Church centinued to prevall in Virginia durieg the colonial period, and was also estallished in the Carolinas and Georgia, while in Marylaud the freedom of religien proclained by the Reman Catholic religion proclaimed by the Reman Catholic setticrs became an intolerance of Catholiclem
when the Englieh Church gained the ruling When the Englieh Church gained the ruling
power. In the Middle Colonles the Church power. In the Middle Colonlee the Church
was never established, and in New Lngland it was Litterly opposed, but mata ita way to aome exteot io that stronghoid of Puritanism, particularly in Connecticut. Aiter the Revolution the church in America was organized under bishope consecrated in England, theugh for a long time its growth was yery slow. Within the present century, however, the growth has been rapid, ita progresa becoming so marked in the larger states that the origiual assignment of a bighop to cach atate was teuad to be jaadequate, and new dioceses were formed within the limita of the states, New York, for instaece, now having beven. The church, though still now having beven. The church, though stin low in members as compared with the other de aominations, is in an active and promising coudition. la England and w
3. Church of Ireland, Irish Church: A popular name annctimes given, prior to 1871 , to
what was not an independent denomination, what was not an independent denomination, but was an integral part of the United Church of Eogland and Ireland. It constituted the When on Ist Chureh of the two conntries. ment, disestablishing and disendowing the portion of the United Church which was in Ireland, took effect, those affected wy the measure, rejecting the name proposed by the Government for the new organization, adopted that of the lrish Church or the Church of Ireland.
4. Church of Scotland:
(1) Hist.: The original Scottish Church seeme to have been that of the Culdeea, then in mediæval timea the Roman Catholic Church Was, to a certain extent, the national chnrch in Scotland, not merely as having withio its
pale at least by profession all the people, but pale at least by profession all the people, but ful sontlern aeighbour. The church resiated the claims to aujremacy over it put forth at one time by the Archlishop of York, at another hy the Archbishop of Canterbury; and, in 1176, in self-defence cast itself into thic arms of the Roman Pontiff. When the 16th century opencd, the royal power in Scotland with, a very powerful nobility. Wheu the With, a rery powertal nobility, Whel the Reformation otruggle began, the crown re-
mained adherent to the old faith, whilst the mained adherent to the old faith, whilst the nobility tended to adopt the new. From the
war of independence, Scotland had considered war of independence, Scothand had considered on the part of England by a close alliance with France, and when the Reformation begar there wers actusily French troops in Scotland. On these the Crown rested to resist the religious movement which had been begun, but the Protestant "Lords of the Congregation," who had taken up arms to defend their cause, applied for aid to Queen Elizabeth, who sent troope to aid them in expelling the French. By a treaty aigned on the 7th July, 1560, it was stipulated that both the French and the Enghish troops sheuld withdraw from scot lane. Scottiah Parliament abolished the papal juriediction, prohibited the celebration of the mase, and reacinded all the lawe made in favour of Reman Cathoilisism. The reformers
adopted what is now callcd Preabyterian

Church governmout, though certain ouperin. tendents were appointed, with the sanction of John Knox, the great Scottish reformer, whoee offices after a time were awept away. [CHunct offices after a time were awept away. [ChUnch
covernarnt, Presbyterianiske] The first Geveral Assembly was held on 20th December, 1560. When the victory over the Church of Rome was complete, the alliazce
between the nobility and the Protestant preachers which had effected the triumph, showed symptoms of dissolving, and a largo section of the former viewed with distrust, and even active hostility, what they regarded as the too democrstic measures which knox aimed at carrying ont. But one inestimable boon was gaimed ere they parted, the nniversal establishment of parish bohoole.
The semi-republican constitution of the Church, which becsme more marked after the office of superintendent had leen awept away, and the second book of disciplize puhlished (the latter event in 1578), created jealousy in the minde of regente and of sovereigne, and four or five generations of Stoart kings put forth long and determined efforts to transform Preshyterian into Episcopal government. The project cost the livee and libertiea of far more people than the short, sharp Reformation atruggle had done, and ended at last in failure. The Revolution aettlement of 1690, re-established Presbyterianism, and the General Assembly, which had been interrupted for neariy forty yeary, luegan again to sit and hae done so annually from that time till now. Prior to the umion with England in 1707, an Act of Security was pas6od, designed to pregerve the scoteh national church from being verthrown by southern votes.
In 1712, an Act of Parliament re-introduced patronage which had been swept away. The oreration of thia enactment was one main canse of three secessione: that of the Secesaion, preeminently so called, in 1733 ; the
Kelief in 1752 ; and, the greatest of all, that Kelief in 1752 ; and, the greatest of al
which crested the Free Church in 1843.
(2) Present State: The Church of Scolland claima about half the people as at lesst its nominal adherents. Besidea the "General Asaembly," it had in 1881 sixteen aynods, eigh four preswyteries, 1,500 churches incluting mission-rooms, and 1,660 ministers and yrobationers engaged in ministerin work. It hat missions in India, Africa, and elsewhere. In
1874 the Patronage Act of 1712 was repealed, and each congregation now elects its own pastor. Its chief rivals in Scotland are the Free Church and the United Preshyterians, the latter resulting from a union of the old Secession and Relief Churches.
6. Church of Rome: For this eee Roman Catholic Church
T Church and mice: A game of children said to be the aame with the Sow in the Kirk (q.v.).

Chureh in rotundo:
Arch.: A church which, like the Pantheon, quite circular.
B. As adj.: In any way pertaining or connected with the church.

church-history, 8. The history of any Church, but especially of the Chriatian Church.
T Church history naturally divides itself Christ to the time of Constantine. (2) Froun Constantine to Muhamunad (usually From Constantine to Muhammad (usually spelt ment of Mosheim nom others, to Charlemagne ; (3) From Muhanmad, or alternatively from (3) From Muhamma, or alternatively from
Charlemagne to the Reformation; (4) From Chirlenagne to the Reformation;
the Reformation to the present time.
Icriod 1. (From the advent of Jesus Christ, B.C. t, to the Conzersion to Christianity of the Emperor Constantine, A.D. 312, or to his establin ment of that faith as the state religion, in or diviled into three sul)-periods, (1) The ministry of Jesus: (2) That of His spostles ; and (3), That of the Christian fathers after the hast of the apostles had died.

The first sub-period has been already treated of. [Cnast.] Immediately after the ascen-
sions means were taken to fill up by election sion means were taken to fill up by election
the vacancy left in the apostolie college by the Therstacy and death of Judas (Acts i. 15-2b), be a proroised by Chrias (John xiv. 16, 17, and Xhi. i- 14 , \&e.), took place soon afterwards on of tongues (Acts ii.), and then the apostles were qualified to go forth snd carry into effect the Saviour's last clarge to make disciples of all nations. Under the preaching of Peterand the other apostles, thousanda were converted ard baptised, and such a spirit of love prevailed among the converts that a Christian an Ananias and ap, but ere long it produced an Ananias and Sapphirs, and we hear of it no more (Acts iv. 32-37, v. 1-11).
The same jeslousy which hed prompted the

Jowish rulers to eeek the death of our Lord, led to the persecation of His followers, sad Stephen, stoned to death for alleged blasphemy, was the A scattering of the Christians took place, Ahich resulted in the founding of other which resuited in the founding of other in Syria, where the disciples of Jesus for the first time received the name of Christians (Acts xi. 26.) [Ceristian.]
Previous to this, Peter, moved by a vision, had begun to preach to the Oistiles (Acts xi. 1-18), and not long afterwards Saul of Tarsus, once s better persecutor of the Christians but now a convert, was sent out as colleague to Barnabas, on a missionary journey chiefly through Asia Minor, and ultimstely became the spleodidly sacuessful spostle of the Gentiles (Acts xiii. 2, sc.). No complete coalesceoce ever took place between th8 Jewish and the Gentile elements in the early church. The Jews, with s few honour-
sble exceptiona, imbued with caste pride, stsble exceptiona, imbued with caste pride, st-
tempted to imposea Judaic yoke on theirGentile brethren, and not ultimately succeeding, many of them in the secood century withdrew from the church catholic, and formed the two sects of the Nazarenes and the Ebionitea, the former belief in the divinity of Christ Whilst Jerusalem stood the unconverted Jews lost no opportunity of peraecuting Christianity, hut their influence was to a large extent swept away by the partial destruction of Jernsalem fter in 70 A.D., and its totsl deatritetion century. Before the frehochab in the second century. Before the first of these events had taken plsce, persecution on the part of the at intervals doring the whole of the first period. The Roman persecutiuns are generslly called ten; but if only those which were universal be reckoned, they were fewer than thst number, whilgif those which were local be taken slso into sccount, they wers nore. After the last and severest of these-called Diocletisn's persecution, though its real inatigator was his son-in law Galerius-a convert of high rank, Constantine, was obtained, who became emperor in A.D. 312, and in 321 or earlie eatablished Christianity as the Stste religion.
Period 2. (From the Conversion of Constantine or his estabtishment of Christianity
as the state religion, to the rise of Mruhammad): Whilst sll along there had been a general agreement as to Christian doctrine, the several tenets had not been exactly defined. but when controversy regarding any one of them arose, it was for the first time precisely atated. The question whether our Lord was equal with the Father, sud truly and absolutely Divine, or whether, as Arius alleged, he was but the first of created beings, was settled hy the Conneil of Nice in 325 in favour of the rormer view, and though a long struggle between the Trinitarians and the Arians took place, and thougl aometimes one and sometimes the other party prevailed, the church Gltimately settled into belief in the Three-One God. [Arianism.] Other doctrines were settled by the decision of couneils. (For these see Covscil.) The fall of the Western empire in the fifth century almost dissolved the eivil power in Italy snd elsewhere, but the church was equal to the crisis, and was ultimately enabled to convert the barbarous nations to the Christian faith. In those ages of political confusion a od intellectual darkness, whilst as yet society was not fully reconstituted, primitive Christianity became considerally modified, sud finally in became collship of images was introduced into the church.

In A.D. 569 or 570 Muhammad was horn, and when ho sought for religious light, his mind revolted from the Arab and all other idolatry.
He was opposed also to the doctrines of the He was opposed also to the doctrines of the
Trinity, and of the Sonship of Christ, sgainst which his religion may be considered as a re action. [Mtinambadanism.] This second
period may he made to end with the first period may he made to end with the first with the Muhammadan era-the IIegira, 15th July, 622, - qreferably the former. Or it might be made to terminate with Charlemagne'a dodstion to the Papacy, or with the separation between the Fastern and the Western Churchea, for which see I'eriod 3 .

Period 3. (From the rise of Muhammadanism to the Reformation under Luther, the latter event dating from A.D. 1517): Whilst the Grceks. indulging their natural subtilty, took the lead io hair-splitting definitiona of doctrine, the mperial Romans were nore practically en-
gaged in hullding np a world-embracing eceloalastical power in lian of the secular empire which they had loet, and from the seventh to the thirteenth century the growth of the Pepacy was continuous. In 756 Pepin, having detested Astulphus, King of the Lombards, compelled him to give to the chnrch and the republic the exarchate of Ravenna and the Pentapolis. In 774 Charlemagne confirmed this cession and enlarged the territory given, temporal power. [Papacy.] In the eighth ceatury a schism took piace between the
Pstriarcha of Constanticople and Rome, Pstriarchs of Constantivople and Rome, and the separstion which still exists bo-
twean the Eastern and Western Churches began. During the early part of this third period the Eastern Church was sorely trampied down by the Muhsmmadans, and during the twelfth and thirteenth centuries the Weatern one cams into the confliet in hope of recover ing the holy sepulchrs, but the Christian success was only temporary. [Crusades. During the fourteenth century the Papacy attempting to put down evidently imminent revolt hy cruel persecution, and in the sixteenth the crisis of its fste came.
Period 4. (From the commencement of the Reformation under Luther, A.D. 1517, to the present time): For details ses Reformation, Protestantism, Roman Catholicism, de. Suffice it here to say that the Reformation struggle continued in one form or other during nesrly the whole of the sixteenth and seventesuth centuries. During the eighteenth all the churches which hsd been engaged in that arduous struggle slept, till rudely swakened by the French Revolution of 1789, while the nineteenth century has been mainly a reaction agsinst the irreligion of thst revolution and the crueities of the reign of terror. The Bible and the Trsct Societies, as well as the groat religions missionsry organikations, sprang into
lifs whils that revolutiun was working itself lifs whils thst revolution was working itself
out, and hsve constituted this century to a certain extent an era of missions. [Missions.]

çi-bär'-l-oŭs, a. [Jat. ctbarius = pertaining to food : cibus = food.] Pertaining to or useful for food, edible.

- Çi-ba'-tlon, s. [Fr, cibation, from Lat. cibus

Physe: A term for the taking of food; also sa alchemicsl term of various significatlou having rafereoce to that act.
cilb'-bǒ1s, çib'-bl, *clb-oule, s. [Fr. ciboule; Sp . cebolla, from Low Lat. cepula, cepola, dim. of cepa, coepe =sa onion.] A small variety of oslon, Allium Asculonicum.
"ciboules. or scallions, are alad of degenorato
ontons.
 poov (kiborion) =s drinking-cup made of the seed-vessel of the Egyptian bean. In Low Lat. slso an arched chamber supported by fonr columua. In Ital. ciborio; Fr. ciborre; Sp. cimborio.]

1. Arch.: An insulated erection open on each sids, with srches, and having a dome of uge form, like the bowl of a reversed cup, ugee form, like the bowl of s reversed cup,
carried or sapported by fons colunans, the carried or sapported by fons colunans, the
whole coyering the sltar. It lis now called a whole coyering the sltar. It is now called a baldacchino ( $\mathrm{q} . \mathrm{v)}$. ). The esrliest known instance of a ciborium sppears to have been one In the church of St. George at Thessalonica, supposed to have been in use abuut A.D. 325 . (Gwilt.)
2. Eccles.: The veasel in which the small hosts are consecrated at mass. From this losts are consecrated at mass. From this
vesael they are adniniatered to communicants, vesael they are administered to communicants,
and in those remaining are preserved in the tabernscle.
3. Cunch.: The glossy impression on the inaide of valves, to which the muscles of the animals have been attached.
 $=$ a little chest, from the form of the indu. silum.]

Botany:
I. A genus of Polypodiagous ferns. [Aonus scythicus, Barometz.]
2. A noble tree-fern from New Holland. (MreNicoll.)
"cl-bur, * chy-bur, \%. [Arab,]
Chem. : An old term for sulphur.
gi-cā'da, s. [Lat. cicula; Fr. cigale; Ital. cigala.] [Cicala.]

Entom. : A genus of Homopterous insects, tribe Cicadaris, sob-tribe stridulantia, or it may be made a fanily Cicadida. They have thres ocelli or sinple eyes, with the short sntenne in front. The tarsi are thres-jointed. The male has a drum or musical spparatus placed ins cavity on esch side of the abdomen, and concesled by scale-like plates. A muscle polls the drum in and sgain lets it out with the effect of prodncing \& sharp continnons sound. These insects are familiar In the south of Europe, in 1ndia, in Bermnde, the West Indies, the warmer parts of America, \&c. The Greeks, who considered the cicadas happy in having "voiceless wives," called the animal rérris (tettix). The observation that the female cicadas do not emit the shsrp continuous soum described is accurate. The Grassholpper and Cicada, though popalarly believed holpper and Cicada, though fropularly believed
the same, are not even of the same order. The the same, are not even of the same order. The
former belongy to the Orthoptera, the latter to the llomoptera. The former possesses mandibles, while the latter has a auctorial apparatus instead. The satenne of the former are very long, and those of the latter very short. The former finits its "voice" by night, the latter in the brightest sunshine. Many other differences hetween the two exist. Cicada hematodes, like the rest of the geana a laryy insect, occurs in the New Forest, in Hampshire. An American species of Cicadi, C. Septendecim, splvears only once in scventeen years, hence it is pupularly known as the years, hence it is pupularly known as the aeventecn-year locust. grashopper.
çic-a-där'-1-a, çic-a-där'-1-88, s.pl. [From Lat. cicada, and the neut, or the fem. pL of Lat. auf. -arius.]
Entom.: A trile of the sub-order Homoptera. Tbe tarsi are tbree-jointed, the snteuna rainute, and uabally terminsted by a bristle, snd the winga with many nervures or cells. lina, Membracidzor Membracina, Fulgoridæ, and Cicadidæ (q.v.).
çíc-a-děl'-lą, cǐ-cą-dčl-1ī'-na, s. pl, [A dinin. formation from Lat. cicada $=$ a graashopper.]
Entom. A Aamily of Homopteroas insects, better called Cercopidæ (q.v.). The nante was given because they resembts typical Cicadas, but are moch smaller.

Cli-căd'-1-der, pl. [From Lat. civada (q.v.) and fem, pl. sdj. snff. -ida.]

Entom.: The family of inscets of which the cicada is the type. The apecies, whirh are large insects with broad heads and hreasts sra fron the wariner psits of the world. Swainson made the fimily compreheosive enongh to include the frog-hoppers as well as the cicadas proper thut the former als now made a separste fanily, Cercopide now.
(q.v.).

* cǐ-cā'-1a, s. [Itel. cigala.] [Cicada.] Either a cicada or a grasshopper.
"At ove e dry ciocala nung."
çić-a-triçe, s. [Chcathix.]

Chem．： $\mathrm{C}_{11} \mathrm{H}_{8} \mathrm{~N}_{2} \mathrm{O}_{6}$ ．An acid formed by the action of nitric acid on cinchoninle aefd．It is easily solnble in dilute nitric acid．Its calcinm salt yields by dry diatilistion pyridine $\mathrm{C}_{8} \mathrm{H}_{8} \mathrm{~N}$ ．
Chin－cho＇－na，s．［Said to have been named in honour of the Countess de Chinchon，vice－ queen of Peru，who was cured of a fevar，in 1638，by the use of this remedy．］
1．Bot．：A genue of trees found oxdre

[^130]
known as Peruvian bark, Jesuit's bark, \&c. The Jesuita introduced it into Europe. There are many species of the genus.
2. Med.: The bark procared from the Cinchons-trees.

## oinchona bark, 8

Pharm.: The barks of several species of Cinchonacere are used in mediciue, or for the extraction of the alkaloids, quinine, cincbonine, se., which they contain. The following are the most important:-Chinchonae flaze Cortex Yellow Chiachona Bark, which oceurs as quills covered with a brown epidermis, mottled with whitish yellow lichens, and aiso in flat cinna-mon-coloured pieces. They break with a fibrons fracture and the escape of a powder. Yellow bark is rich in quinine, and 100 graius should yiedd not less than two grains of alkalnid. It is derived from C. Calisaya, which grows in the peculiar cloudy regions of the Andes. - C. pallidio Cortex, Pale Cinchone Bark, Irom C. condaminea. It aceurs always in quills, covered with crustaceots lichens, Its fractare is short and not fibrous. It contains chiefly cinchonine. Two hundred grains of the bark yield about one grain of alcaloid. -C. rubree Cortex, Red Cinchona Bark. The bark of $C$. succirubra. This species sppears to thrive in Indis. It occurs in fisttened, rough fibrous, dark-brown red pieces, which are covered with a lrown-red epidermis. It breaks with a red fibrons fracture. it contains about equal quantities of cinchonine and quinine, and 100 graius of the powdered bart should yield not less than one-and-half grains of alksloid. The yellow bark is used in the form of decoction, extract, infusion, and tincture. The pale bark is contained in Inctura Cinchone Composita and in Mistura Ferri Aromas tiox. The cinchona barks contain, besides the alkaloids, also certain acids having astringen properties, and are valuable as tomics in properties, snd are valuable campres in Medica.) For deapertics of (Garrolis Mrat Medica.) For propertics of the aikaloids ee Qunine and cinchorlis. cinciona barks rich in quisine generally contain much lime, and their solations are precipitated by sodium sulphate. Cinchona barks are exa mined as foilows: 100 grains of the yellow bark are raduced to powder, aod are thoroughly exhausted by boiling, maceration, snd percolation, with water scidulated with hydrochloric acid. The colouring matter is precipiated from the liquid hy adding plumbic acetate, the solntion being kept acid. It is then filtered, and to the filtrate caustic potash 8 sdded till the precinitate first formed by it redissolved. This solution is then sbaken with succeasive qusntities of ether, till a drop of the ether evaporated to dryness leaves no residue. The ether solutions are then evaporated to dryness, and the residue of alksloids is weigherl. In testing the pale and red barks use choloform instead of ether. When a bark containing quinine or cinchonine is heated in test-tube a characteristic red vapour is given off, condensing to a carming red liquid. It is also called Jesuit's bark and Peruvian bark.
cinchona bases, s. pl.
Chem.: Alkaloids contained in Cinchons bark. These can bo separeted from each other by sdding ether, which dissolves the quinine and amorphous alksloid, evsporating and dis solving in proof spirit acidnlated with onetwentieth of sulphuric acid, and adding alco-
nolic iodine, which precfustates the quinine as iodo-sulphate, which in dried at $100^{\circ}$. One part equals 0.565 of quinine. To the liquid sulphurous acid is added, neutralised with caustjc soda, and the alcohol expelled by evaporating on a water bath; on adding excess of soda the amorphous sikaloid is precipitatad. The part insoluble in ether is dissolved in 40 parts of water and a little sulphuric acid, the solutinn being faintly alkaline. A solution of Rochelle salt $\mathrm{KNaC}_{4} \mathrm{H}_{4} \mathrm{O}_{4}$ is then added, and it is allowed to stand for twelve hours. The cinchouldine is precipitated as tartarate, which is dried at $100^{\circ}$, and one part represents 0.804 of cinchoaidioe. To the filtrate iodide of potassium is added, which precinitates quipidine as hydrofdide One part dried at $100^{\circ}$ equais 0.718 of quinidine. To the filtrate caustic sods is added, which precipitates the caustic sods is added, which precipitates the
cinchonine, which is dried at $100^{\circ}$. (See Watts: Dict. of Chem.)
cin-chón-ä'-cě- $\infty$, s. pl. [Mod. Lat cin chon(a), and Lat fem. pl. adj. suff. -acece.]

Bot.: A large order of plants belonging to an sllianace called sfter it, Cinchonales. The calyx, which is simple, is superior, as is the corolla, which is tubular and of regular forn. The stamens, which are defnite in number arise from the corolla gll on the same lins and alternate with ita segments; the anthers are straight, bursting longitudinally. The ovary is interior. nusually two-celled, with few or many ineeds ; the fruitsplitting into two cocci, or inde hiscentand dry, or succulent. The leaves, which hiscentand dry, or succulent. The leaves, which are aimple, are opposite or verticilate, with
interpetionar atipules ; this last character disinterpetion atipules; this last character dis
tinguishing them from the Galigcear, to which tinguishing them from the Galiacear, to which
they are much akin. Lindley divides it ioto they are much akin. Lindey divides
two tribes: Coffece, in which the ovary hav two tribes: Caffec, in which the ovary have Cinchonece, in which it is many-seeded. (Sce these words.) In 1845, Lindley enamersted 269 genera, and estimated the known species at 2,500. Though none are British, yet they are so abundant in tropical countries as to constitute abont one twenty-seventh part of the flowering plants. Soine are trees, othere shrubs, and yet others herbaceous plants. Msoy are most valuable tonics, febrifuges emetics, and purratives. [Cinchona.] A few are poisenons, whilst, on the contrary, Coffee which belongs to this order, is highly nutritive Some have eatable fruits, and others are used in dyeing.
çin-chò-nā'-çeoŭs, a [Eng. cinchon(a) and suff. -aceaus.]

Bot. : Of, or pertaining to, Cinchona
¢̧̌n-chō'-nads, s. pl. [Mod. Lat. einchona, snd Eng., \&ic. suff. -ads. $]$

Bat.: The English rendering or equivalent of the term Cincbonacea (q.v.).
çin-chō'-nal, a. [Mod. Lat. cinchana, and Eng. suff. -al.]
Bot.: Pertaining to the alliance Cinchonales, os the Cinehonal alliance.
çın-chö-nà'lēs, s. pl. [Mod. Lat. cinchona, sud Class. Last. pl. Butl. -ales.]
Bat. : An alliance of epigynous cxogens with dichlamydeous monopetalous flowers and a minute embryo lying in a large quantity of albumen. Lincley includes under it the following orders: Vacciniacees, Columelliscea, Cinchonacex, Csprifoliacex, and Gsliacea (q.v.).
çin' ${ }^{\prime}$ chṑn-āte, s. [Eng. cinchon(a), and suff. -ate (Chem.) (q.v.).]

Chem. : A salt of cinchonic scid
čn-chō'-nĕ-we, s. pl. [Mod. Lat. cinchona and Class. Let. pll suff. eex.]

Bat.: A tribe of Cinchonaceæ (q.v.). It contains the families Hamelida, Isertida Hedyotidx, Cinchonidæ, aud Gardenide (q.v.).
ģin-chō'-ni-a, a. The same as Cinchonine.
çin-chơn'-ǐc, $a$. [Eng. cinchan( $\alpha$ ), sad suif -ic.] Of, or derived from, Cinchous (q.v.).

## cinchonic acid, $s$

Chem.: $\mathrm{C}_{11} \mathrm{H}_{14} \mathrm{O}_{9}$. An acid formed by treating cinchomeronic acid with sodiutn amalgan $\mathrm{C}_{11} \mathrm{II}_{8} \mathrm{~N}_{2} \mathrm{O}_{6}+6 \mathrm{H}+3 \mathrm{H}_{2} \mathrm{O}=2 \mathrm{NH}_{3}+\mathrm{C}_{11} \mathrm{H}_{14} \mathrm{O}_{9}$ t forms deliquescent white erystals.
çin-chŏn'-ǐ-çine, s. [Eng., \&c. cipchonic, and suff. -ine; or Mnd. Lat. cinchana; Gr.
indiv (eition) = figure, image, resemblance (\%) and Eng. aur. -ine.]
Chem.: $\mathrm{C}_{20} \mathrm{H}_{2} \mathrm{~N}_{2} \mathrm{O}$. An alkaloid obtained by heating acid aulnhate of cinchonidine for geveral hours to $130^{\circ}$. The base ts liberated by caustic soda, sad taken up by absolute ether; it forms a slightly yellow piscous mass, which melts at $50^{\circ}$. It gives no colour with chlorine and ammonia The hydrachlorate gives a wbite precinitate with hypachlorite or sodinm which diatincuishes it from cis it from cinchouine, and cinchonidne, which give no precipitate. It forms crystalline salts. It thens the plane of pelsirisation teeb
ç̆n-chŏn'-i-dio, s. pl. [Mod. Lat. einchona, and fem. pl. adj. snf. -idce.]

Bot. : A family of plants, tribe Cinchonese.
çın-chŏn'-1-dǐno, s. [Mod. Lat. einehona, and Gr. eidos (cidos) $=$ form, sppesrance. $]$
Chem.: $\mathrm{C}_{20} \mathrm{H}_{24} \mathrm{~N}_{2} \mathrm{O}$. An organic alkzloid found in Peruvian bark. It crystallises from slcohol in anhydrons needles, gives no fluorescence when pure, and no greeo colonration with chlorine snd ammonis. It differs from cinchonine by its turning the plame of polarisation powerfully towards the left.
çın'chōn-ĭn, ̧̧in'-chôn-ino, s. [Eng. cinchon( $a$ ) ; suff. -in, -ine (Chem.).]
Chem.: $\mathrm{C}_{20} \mathrm{H}_{24} \mathrm{~N}_{2} \mathrm{O}=$ cinchonia, $\mathrm{sn}^{2}$ or ganic alkaloid contained with quinine in Perovisn bark, especially im Cinchona con daminea. It is separsted from quiuine by its sulphate being more soluble. Cinchonins crystalllses in swall transparent four-sided prisms. It is sligbtly solcoble in water, but dissolves easily in hot alcohol. It melts at $165^{\circ}$. It is a powerful base, and forms arystaline salts with acids. It turns the plane of polaribation powerfully towards the right.
çin-cho-nin'-Ic, a. [Eng. cinchonin; -ic.]

## cinchoninic acid.s.

Chem. : $\mathrm{C}_{20} \mathrm{H}_{14} \mathrm{~N}_{2} \mathrm{O}_{4}$. A dibasicscid obtsincd hy the oxidation of cinchonine by nitrie scid. $\mathrm{S}_{\mathrm{p}} \mathrm{gr} ., 1 \cdot 4$. It is a white crystalline substance soluble in water; when treated with nitric acid it is converted into quinolicand cincbomeronic acids.
çin'-chon-işm, 3. [Eog. cinchon( $\alpha$ ), sad suff. -ism.]
Path.: The distarbed condition of the body caused by over-doses of cinchona.

The condition here called cinchoniom is marked by huzzing... in the ears,"-iryton: fiectures on the Principles and Practice of Physic, leet. \&o
çĭn-chŏv'-a-tine, s. [Mod. Lat. cinch(ona) ovat(1), and suff. -ine. The Cinclona ovsta species of the Cinchona genus.]
Chem.: Aricine, $\mathrm{C}_{23} \mathrm{H}_{26} \mathrm{~N}_{2} \mathrm{O}_{4}$, ocenrs with Cosconine in Cusco Cinchona bark, which gives off brown vapours when hested. Ari cine crystallizes in white prisms, which melt at $188^{\circ}$.
¢̌ㅡ-çın'-nŭs, s. [Lst. $=8$ carl.]
Bot.: A cyme developed in a curled manner.
¢̣̆n-clĭd'-ot-tŭs, s. [Gr, кiүкies (lingtlis) $=$ a lattice, and oious
(odnntos) $=\mathrm{s}$ tooth.

Bot.: A genus of Mosses, found floating in streams. Tribe, Evaginulati. the name is derived from the manner in which the eilia of Che peristone are united in het-like parcels. Cinclidotus foatimalaides grows 111
margin of lakes and rivers, or on stoues in the margin of lakes and
chanacl of streanls.
 fein. 1l. adj. sulf. -ince.]

Ornith. : The Dippera, s sub-family of dentiroshral birds, belonging to the family Merulidæ or' 'Turdidæ.
¢̣̆n'-clĭs ( $p$ l. çin'-oľ-dēş), s. [Gr. кíyкגьs (kinglitis) $=$ a lattice.]

Animal Physiol : Ons of the openings in the bodies of ses-anemones, probably serving to discharge the thread-cells or caidæ.

Ornith: A genus of birds, closely allied to the Shrikes, They are natives of Australia and the East ladies.
cin' tail or oneel.]

Ornith. : The type-genus of the sub-family Ciaclina (q.v.). They have a very etraight slender bill, with a notched lip; winga rounded, of moderate length ; a very short rounded; of moderate exength; a tail ; sid large exceedingly strong feet. vell tail; and large exceedingly strong feet. One species (C. aquaticus), the Common Dipper or Water-ouzel, occara io Britsin. It is rather more than aeven inches long, with the upper parts ashy-brown, tha breast pure white, the belly rusty, the bill blackish. It is found thronghout Europe and part of Aaia It breeds, anong other places, in England, making a mossy nest ten or twelve laches in diameter by seven or eight deep, snd plsces it in a cavity in a moss-covered rock near the mountaill atreams, which it frequents and into which it dips and dives.
 Lat. cinctus = girt, girdled, and planula (q.v.). 1

Biol. : The collared embryo of a apooge.
çl̃c'-tō-plăn-ụ-lar, $a$. [Eng., \&c., cinctoplanul(a); -ar.] hesembling a collared infuplanul(a); -ar.] Resembling a collare

1. Ordinary Language:
2. Lit.: A belt, a girdle; aonething worn ronnd the body, to fasten or confine the dress,

Such is her soveroifu mien: her dress,
A vest, With woilen cincture tied,
*2. Fig.: An inclosure, a ring-fence.
"The court and prison being within the cincture of
II. Arch.: The ring, list, or fillet st the top and botton of a colmm, which divides the shaft of the column from its capital and base. (Guilt.)
Ģ̌̌nc-türe, v.t. [Cincture, s.] To surround, with a girdle; to gird, to encircle.
On high the palms their grace ful folliage sprosd,
Cinctired with rooes the mangolis tower
Hemans : Sodern Grecece
çýnc-türed, a. [Cincture, v.] Having s cincture or girdle; girded. (Sir W. Scott.)
pĭn'děr, * çyn-dir, "̧yn-dyr, *syn-der, *syn dyr, s. \& a. [A.S. sinder, synder; Icel. sindr; Sw. sinuler $=$ slag, drass; Dut. sintels $=$ cinters; Dan. siniler, sinner $=\mathbf{a}$ apark of ignited iron; Ger. sinter $=$ dross of roun, scale; Icel. sindra $=$ to glow, to throw out suarks. Not from Fr. cendre, though thla word has affected the spelling.
A. As substentire:

1. Ordinary Ietnguage
2. Literolly
(1) The residue of coal after combustion, in which tire is extinct.
Pary. .isndyr of the smythys 9 yre
. Caruma."-Prompl.
Snint James's square was a receptacle for all the Offal and cindert. Sor all the dearl cats and deat dogs of
(2) A small piece of conal which has ceased
to flame, but still retaina heat.
*2. Figuratively:
(1) The ashes of the deari

Beanty, truth, and rarity
Grace 1 n all simpticlty.
Here enclosed in cinders liso."
(2) Spirits or wine used to fortify mineral watera. (Slang.)
II, Metallurgy:

1. The alags or dross produced in the processes of iron manufacture. (Ure.)
2. A scale thrown off in forging metal. (Webster.)
3. (Pl.) Coke.
B. As adj. : (See the componods)

## cinder-bed, .

Geol, : bed of oyster shells, of the species. Ostrea distorta, fonnd in the Middle Purbeck series, so named from its loose atructure. It.s. thickness is : yout twelve feet.
cinder-cone, s. A conical formation dae
to successive deposition of fine volcmoio
mattera, as ash, scorim, de.

## oinder-dust,

Metal: Slag from a refining furnace.

## cinder-fall, 8

Metal.: The inclined plane on which the melted slag fron s blast-furnace descends (Weale.)

## oinder-fine, 8.

Metal. : The ciader from the re-hesting urnace.

## cinder-trame, $s$.

Engin.: A framework of wire, \&c., lo a chimees, or in front of the tubes of a loco. motive, to prevent the eacape of ciodera.

## cinder-hole,s.

Metal.: The front plate of the hearth of a Germso reflinery-forge

## cinder-hooks, 3.

Netal. : A hook for drawing off slag.

## cinder-notch, 8.

Metal.: A notcb in the upper part of a dam of a blast-furnsee through which the melted slag escapes. (Weale.)
cinder-path, B. A pathway composed of, or covered with, cinders, esp. one for foot or cycle races.
cinder-sifter, s. A perforated ahovel or aieve for sifting cinders.
cinder-tip, s. A hesp of cinders; a place where cinders sre tipped or ehot.
cinder-tab, s, An iron truck for the reception of the melted alag after the latter has flowed from a blast-furnace over the has fowed fron a

* cinder-wench, * cinder-woman, s. A womsn whoas occupation it is to rake over ashes for the purpose of picking ont the cinders.
oinder-wool, s. [Mineral-COTTON.]
CYin-dèr-él'-la, s. [From ille heroine of the fairy tale.] An informal dsnce which lreaks up at midnight. Also called Cinderella dance.
"çǐn'-dèr-ǐng, * çĭn'-drǐng, $a$. [CNDEE, 8.] Reducing to a cinder; uiterly consuming.
çǐn'-dèr-oŭs, * çĭn'-droŭs, a. [Eng. cinder; -ous.] Resembling, or composed of, cinders.
"Or of a cortain shariv and cindrous humor.", se
çin'-dèr-y̆, a. [Eng. cinder; y.] Pertaining to, or resembling, ciaders; consisting of ciaders.
çĭn-ĕ-fäć-tion, s. [Fr., frolll Lat. cinefartio, from cinis $=$ aslies, and factio $=$ a making, facio $=$ to make.] The act or process of re. ducing to ashes, cineration. (Crabb.)
çĭn-ě-măt'-ío, çin-ĕ-măt'-i-cal, \&c. [Kinematic, \&c.]
çn-ĕñ-chy̆-ma, s. [From Gr. кıvéw (kineó) $=$ to set in motion; éरxuma (engchuma) $=$ infusion; iv (en) $=$ in; and $\chi$ éco (cheó) $=$ to pour.]

Bot. Thysiol. : A kind of tissue consisting of irregularly branching aud anastomosing vessels. They are largest in plants having milky juice, and smallest in those which have transparent juice. It is called also Laticiferour Tissue (q.v.).
 $t$ connective, anil suff. ous ] Pertaining to, or composed of, cinenchyma; laticiferous.
çin-èr- $\overline{\boldsymbol{a}}^{\prime}$-çeoŭs, a. [Lat. cineruceus, from cinis $=$ ashes.] Like ashes, ash-coloured, ash-like.
çin-èr-är'-1 a, s. (Lat. cinerarius, from cinis $=$ ashes. The genus is so called from the ash-coloured down covering the surfaces of the leaves.]
Bot.: A genus of plants akin to Senecio, or according to Sir Joseph Hooker, ranked under it as a sub-genus. Ioudon enumerstes thirtyone apecies cultivated in English gardens, but there'are endless varieties produced by seed.

They are all of various shades of red or btom with or without white markings.
ciัn'-är-\%-Ty̆; a [Lat. cinerarius = pertaln ing to ashes; cinis $=$ ashes.] Pertainiag to or containiag, ashes.
cinerary urn, s. An orn or vessel nsed by the anclents to preserve the ashes of the dead; a sepulchral urn.

* gin-ẽr-ä'-tion, s. [Fr. cinération, from Let. nis (genit. cineris) $=$ ashes.]
Old Chem. : The act or process of reducing to ashes, incineration.
 ashy-gray.)
Anat.: The gray matter of the brain and apinsl chord.
çin-é-rĕ-al, a. [ELg., \&c. cinere(a); -ah.] Pertaining or consisting of cinerea (q.v.).
Clin-ðr'-a-oŭs, a. [Lat. cinereus, from dinis (genit. cineris) $=$ ashes.] Ash-like; of tho colour of ashes; ashy-grey.J
"The hair is rad at the tips, cinerwous benesth."-
çin-êr-ĕá-ģ̌nt, a. [Lat. cinerescens, pr. par. of cineresco $=$ to turn to ashes.]

Physical Science: Becoming grey, approachiag to a grey colour. (R. Brown, 1874.)
çin-ör-i'-tious, a. [Lat. cineritius, cinericius, from cinis (genit. cineris) = ashes.] Haviog the form, state, quality, or colour of ashes : ciaereous.
*Broken and burnt rocka, rainz of bulldings, and cinth Candour, il. 22e.
Cineritious substance of the nervous system : Anat.: A grey aubstance constituting with s white one tbe chief msterial of the nervous syatem. In the brain it is called alao the cortical aubstance, while the white is denominated the medullary one. (Quain: Anat.)

- çın-ĕr'- $\mathbf{n}-\mathbf{l e ̆ n t}$, a. [Formed from Lat. cinio (genit. cineris) $=$ ashes, on the analogy of rirulent, \&c.] Full of aahes. (Bailey.)
çin- $\overline{\mathbf{e}}^{\prime}$-til-ca, s. pl. [Gr. кıйтıкos (kinalikos) $=$ pertainiug to motion, from kıvéw (kine $)=$ to move.)
Med.: Diseases affecting the muscles, and characterised by irregulsr action of the muscles, or muscular fibres, conmonly deno minated spasm. The third order in the clase Neurotica of Good. Also agents thst affect the voluntary or involuntary motions. (Dunglison.)
Çín-ga-1ē'şe, a. \& s. [Fr. cingalais.] A. As adj.: Of or belonging to Ceylon. B. As subst.: A native or inhabitant of Ceylon.
¢Y'í'gle, s. [Lat. cingulum.] [SURCINoLr]
J, A girdle worn by sailora. (Smyth: Sailore Word-Bnok.)
- 2. A girth for a horse.
çin' ${ }^{\prime}$ gụ-lŭm, 8. [Lat. $=$ a girdle, from cingo $=$ to gird, to surround.
J. Med. : A cincture, a girdle. The part of the body situate below the ribs, to which the girdle is applied ; the waist. (Dunglison.)

2. Zool. : The neek of a tooth, or that conatriction which sepsrates the crown from the fang. The term is also used for tha transverse series of long bands in the armour of the Armsdillo, de. (Craig.)
çin-r-flŏn'-1-dæ, s. pl. LLat. ciniflo (gentt cinifonis), and fem. pl. suft. -ide.]

Ehtom.: A fanily of Arachnids.
*çin'-1-f̄y, "çin'-ĕ-fȳ, r.t. [Lat cinis = ashes, snd facio (pass, for) $=$ to make.] To reduce to ashes, to incinerate.
çink, a. [Cinque.]
çink-foyle, s. [Cinque-FOIL.]
çin'-na, s. [Gr. кaiw (kaī) $=$ to heat.]
Bot.: A genus of American grasses, allied to Agrositis: order, Graminacex. So called from ita heating qualitiea. (Craig.)
çin'-na-bar, s.\& a. [Fr. cinabre; Ital. cinabro Sp, \& Port. Cinabrio; Ger. zinnober, from Lat
oinnabaris; Gr. revvaßapus (kinnabaris), from Pers. qinbar; Hlnd. shangarf.]
A. As substantivs:

1. Min. : A rhombohedrai mineral, generally of adamantine lustre, though in friable varieties dull. Colours : cochineal red, browoish red, snd lead grey, etreak acerlet. A nstive mercuric sulphide. HgS. It has refraction snd circular polsrisstion. There are two varieties.
(1) Ordinary cinnsbar, crystallised, masaive or earthy.
(2) Hepatic cinnabar. An impure cinnebar of a liver-brown colonr and submetalic lustre. Doua.) Cinnabar is found in Spsin, in Aus tria, In Chins and Japan, in California, In Peru, \&c.
2. Comm.: Red sulphnret of mercury nsed as a piginent; vermilion. It is prepared artificially by triturating mercury and sulphur together, and heating the black sulphide Hgs antil it sublimes.
3. Bot. \& Med. : The red resinous juice of s ree, Calamus rotang, \& nstive of the East Indies, formerly calicd Dragon's blood, and ased as an aatringent
B. As autjective:
I. Conaisting more or less of the gnbstanca described under $\mathbf{A}$.
4. Bot. ec. : Coloured like it ; acarlet with a slight mixture of orangs.
cinnabar moth, s. Callimorpha Jin cobece.
cı̆n-na-bar'-ic, $\alpha$. [Eng. cinnabar; -ic.] Pertaining to, or consistiog of, cinuahar ; cinnabarine.
oin'ma-bar-ine, a. [Fr. cinabarin.] Pertaining to or containing cionabar.
gin'-ma-mäte, s. [Eng. cinnom(ic), and suff. -ate (Chem.) (q.v.).] [Cinnamic acid.]
¢'n'-na-meīn, s. [Eog. cinnam(on), and suff. ine (Chem.) (q.v.).]
Chem. : $\mathrm{C}_{7} \mathrm{H}_{7} \mathrm{C}_{9} \mathrm{H}_{7} \mathrm{O}_{2}$. Benzyi cinnamate occurs in Peru and Tolu bslssms, the produce of apecies of Myroxylum growing in South America Also prepared by heating sodinm cinnamste with beazyl ehlorids.
gin'ma-mēne, s, [Eng. cinnam(on), snd aff. -ene (Chem.).
$\underset{\text { lene }}{\text { Chem. : }} \mathrm{C}_{8} \mathrm{C}_{8} \mathrm{H}_{8}$ or $\mathrm{C}_{6} \mathrm{II}_{5}-\mathrm{CH}=\mathrm{CH}_{2}$. Styro-pheoyl-ethylene. An aromatic hydrocarbon, obtained by diatiling cinnamic acid with baryta; also by passing the vapour of xylene or a mixture of benzens vapour and ethsne throngh a red-hot tube; alao by distililing bquid atorax and carbonate of sodium with water; synthetically by heating acetyisne $\mathrm{C}_{2} \mathrm{H}_{2}$ in a glass tube over mercury to the oftening point of the glass, fonr mols. of cetylens being condeosed into ons mol. of cinnamens. Cinnamene is a colonrless oil. $3 \mathrm{p} . \mathrm{gr}, 0.924$. 1 t boils at $145^{\circ}$. When heated $0200^{\circ}$ in a aealed tube it ls converted into s White trensparent refractive solid called metacinnamene or metastyroleoe, which when distilied yields liquid cinnsmene. By the sction of hydriodic acid cinnamene is chiefly converted into octane, $\mathrm{C}_{8} \mathrm{H}_{18}$. When cirnamane is sgitated with a concentrated solution of iodina in potassium todide, and the liquid is then diluted with water, cryatals of iodlde of cinnamene separate ont. When cinnamene is oxidized with an alkaline aolution of potas. gium permanganate, it yields benzoic and carbonic acids.
¢̣̆n-n̆m'-1o, a. [Eog. cinnam(on), snd suff. -ic.] of or pertaining to cinoamon; derivel from cinosmon.

## cinnamio acid, s.

Chem.: Phenyl scrylic acid. Cinnamomic acid, $\mathrm{C}_{8} \mathrm{H}_{8} \mathrm{O}_{2}$ or $\mathrm{C}_{6} \mathrm{H}_{5}-\mathrm{CH}=\mathrm{CH}-\mathrm{CO} \cdot \mathrm{OII}$. A monatomic aromatic acid, obtainsd by the oxidation of cinnamon oil; it occurs in Peru and Tolu balsams. It unites directly with hypoclorous acid, HClO, forming $\mathrm{C}_{\mathrm{a}} \mathrm{H}_{5}-\mathrm{CHCl}-\mathrm{CH}(\mathrm{OH})-\mathrm{CO} \cdot \mathrm{OH}$, phenyl-chtor hastic scid. It can bes extracted by boiling thess resins with milk of lime and filtering White hot, snd decomposing the calcium cinnamate with hydrochloric seid. It has been formed by heating benzoic sldehyde in cioas veasela with acetyl chloride. It forms amall crystala, which melt at $129^{\circ}$, and boil at $293^{\circ}$. Fused with potash, it yields potas
sium asits of benzoio and scetio acids, with ovolution of bydrogen. It is slightly soluble in water and soluble in alcohol. It forms salts callod cinnamates.

## cinnamio aldehyde, s.

Chem.: $\mathrm{C}_{9} \mathrm{H}_{7} \mathrm{OH}$. An aromstio aldehyde found io the volatile oils of cinnamon and casais, which sre obtained from the gonus Cinnamoroum, orderLanracex. The aldehyde is aepatated as a crystallios compound with acid potassium sulphito. It is a colourtes oil, boiling at $248^{\circ}$, which readily oxilise into cinnamic scid. 'When heated with nitric acid it yielda benzoic acid and benzoyi hydride $\mathrm{C}_{6} \mathrm{H}_{5} \cdot \mathrm{CO} \cdot \mathrm{H}$. By the action of chromic acid it is converted into benzote and acetic acids.
ç̌n'-na-mide, s. [Eng. cinn(amon), or cinna(myl), and amide.]
Chem. : $\mathrm{C}_{9} \mathrm{H}_{7} \mathrm{O} \cdot \mathrm{H}_{2} \cdot \mathrm{~N}$. A white cryatalline substance, melting at $141^{-5^{\circ}}$. It is obtained by treating cinnamyl chloride with concentrated squeous ammonis, washing with water, and recrystalizing from boiling water.
ç̌n-na-mot-děn'-drŏn, s. [Gr. xivvauov (kinnamon), кivapor (kinamon) $=$ cinnamon

Bot.: A genus of plants, doubtfully referred by Liddley to the order Pittosporacer. Cinnamodendron axillare, a Brazilian tree, is aro matic. Its bark, which is a tonic and antiscorbutic, is prescribed in low fevers, and is made into garglea used when the tonsils are feable.
çin-na-mō'-míc, $a$. [Eng. cinnamon; Lst. cinnainomum; and Eng. suff. -ic.] Pertaining to cinaamon, cinnamic.
cinnamomio acid, s. [Cinnamo.]
çin-na-mö'-mŭm, s. [Gr. кıvváншноv (kinnатӧmon), кьудцшноу (kinamömon) $=$ cioua mon.]

1. Bot.: A genus of plsnts, order Lanraceæ. They have hermaphrodite flowers, with the abortive atamena spparently perfect with fourcelled anthers. The leaves, which sre three ribbed, or triple-ribbed, ars ovargreen, often

approaching each other in paire. Another product of the genus Cinoamomnio is Cassiaвавк (q.v.). Cinnamonum Culilawan yiclds Culitawsn bark. Cinnamon proper is from Cinnamomum zeylanicum. $C$. nitidum has ajmilar properties, that of Suita Fe from Neetandro cinnamomoides, and that of the isle of France from Oreodaphne cupularis. All are of the Laurel order. [Cinnamon, Cassia.]
2. Palaont.: Two species of Cinnamomum are said to exist in the Miocens.
¢̣̆n'-nạ-mồn, s.\& a. [Gr.кivvauov(kinnamon).
 cinnamum, from s Phoenjc. word equivalent to Heb. קֹ, (qinnamon), construct atste (qinneman).」
A. As subst.: An aromatic substance consisting of the bark of a tree or trees. [Cinna. momdm, Cinnamon Bark.] The Phcenicians, the Arabe, or both, imported the genuioe cinoamon into Palestine remotely from Ceylon or the Eastern Arehipelago, but probably from some mercantils port much nearer at hand. It is represented, however, as growing in at least ons Jewiah garden (Song of Solomon, iv. 14), unless, indeed, the whole deacrintion be figurative. It was one of the ingredients in the holy anointing oil, which Moaes was
commanded to make for the snointing of the tabernacle and ite furniture (Exod. xxx. $2:-$ 29). It was used also for the perfume of lueda (Prov. vii. J7). It is mentioned as an article of merchandise also in the mystic Babylon (Rev. xviii. 13).

Wild cinnamon: The genus Cinnamodendron (q.v.).
B. As adj.: Bright browu, mixed with yellow and red

## cinnamon baric, $:$

Pharm. : Cinnamomi Cortax. The inner bark of shoots from the truncated stocks of Cinna momum zeylanicum, order Lauraceæ. It it imported from Coylon. It occure in closely rolled, brittie, bright-brown quills having a sromstic odour sod warm astringent taste. It is used to prepare Aqua cinnamomi, Tinctur cinnamomi, and Pulvis cinnamomi compositus, conmound cinnsmon powder Cinnamon a stimulant, aromstic, carminative, snd is use ful in cases of diarrioes

## cinnamon oll, s.

Pharm. : Cinnamomi oleum. An essential ofl distilled from cinusmon bark. It ls of a bright yeliow colour, which gradually darkeos. It consists chiefly of cinnamic aldehyde (q.v.) When exposed to the air, it gradually sbaorla oxygen aod forms a resin and cinnsmic scid.

## cinnamon root, *cinnamom roote,

Bot.: The book-name given by Gerard to Inula Conyza.

## cinnamon sedge, s.

Bot. : An endogedoua plant, Acorus calamus.

## cinnamon-stone, $s$.

Min. : A mineral of cinnamon-red colour, a variety of garuet. The finest specimens are bronght from Ceylon. Dana considere it is aub-varigty of Garoet, ranking it under hi Lime-alumina Garoet, or Grossularite (q.v.).
cinnamon water, s. Aqua cinnamomi a medicinal drink prepared by distilling twent onnces of cinnamon with two gallona of wate till one gallon boils over.
gĭn-nạ-mŏn'-i-trile, s. [Eng. cinnamo(n), and nitril.]
Chem. : $\mathrm{C}_{9} \mathrm{H}_{7}{ }^{\prime \prime \prime}$ N. A substance, boiling at at $255^{\circ}$, solulle in alcohol. It is obtaiced by the sction of PCIg on cionsmide
¢̧ın'-na-my̆l, çin'-nạ-mule, s. [Eog cinnamon; Gr. кivapow (linnamon) $=$ cinnи mon, and ừ $\lambda \dot{\prime}(h u \bar{e})=\ldots$ matter.]
Chem. : $\mathrm{C}_{9} \mathrm{H}_{7} \mathrm{O}^{\circ}$. An aromatic monatomu radical.

## cinnamyl chloride, $s$

Chem.: $\mathrm{C}_{9} \mathrm{H}_{7} \mathrm{O} \cdot \mathrm{Cl}$. Obtained by the action of pentachloride of phosphorus, $\mathrm{PCl}_{5}$, ou cinvamic acid. It is a heavy oil, boiling as $262^{\circ}$. Heated with cinnamate of sodium, it yields cinnamic anlyydride
cinnamyl hydride, 8
Chem.: $\mathrm{C}_{9} \mathrm{H}_{7} \mathrm{O} \cdot \mathrm{Jl}$. [Cinnamic aldehyde.]
Çĭn'-ny̆l, s. \& a. [Gr. кívaquo (kinnanon), àの $\ddot{v} \lambda \eta(h u l \bar{e})=$ matter as a principle of being.]

Chem.: C $\mathbf{C I I I}_{9}$. A monstomic aromatjo bydrocarbon radical.

## cinnyl cinnamate, s.

Chem. : Styracin, $\mathrm{C}_{9} \mathrm{II}_{9} \mathrm{C}_{9} \mathrm{H}_{7} \mathrm{O}_{2}$. It is coo tained in liquid storax, which exudea from Styrax calamita, a shrub growing in Asi* Minor. Distilled with potash it yields ciony! Minor. Distined and cinnamic acid.
gǐn-ny̆1-íc, a. [Eng. cianyl; -ic.] Psrtalu iog to, or derived from cinaly (q.v.).

## oinnyllc alcohol, s.

Chem. : $\mathrm{C}_{9} \mathrm{II}_{9} \mathrm{OHI}$. Cinuyi hydrate, cinnamic alcoliol, styryl sleoliol, styrone. $\mathbf{A}$ namic alcoliol, styryl sleohol, styrona. A monatomic aromatic alcohol, obtained by heating cinnyl cinoamate withcausticakalies. It crystallizes in afit silky ncedles, melts st $35^{\circ}$, and is aoluble in water. By oxidiziog
agents it is converted into cinamic sldehyde and cionamic acid.
çĭn'-ny̆r-ĭd, s. [Cinvvaide] Any bird of the family Cinnyrida.
çin-ny̆r ${ }^{\prime}-\mathbf{i}-\mathbf{d} æ$, s. pl. [Lat. cinnyris, thes ty pe, a a fem. pl. adj. suff. -ider.]
Ornith.: A lapsed synonym of Nectariniidæ (q.v.), contaioing the Sun-birds.
gin'-nyr-is, s. [Etym, uncertain.]
Ornith: The Sun-bird, a genue of birds, the typical one of the farily Cinnyrida.

## gín'-t-pẽr, s. [Cinnabar.]

I know yoa have aralike.

Cinoper.
Ben Jonson : Alch L. a
cinque, * gink, esink, s. \& a. [Fr. cinq; 0. Fr. cincue; ital. cinque; Prov. cinc; Sp \& Port. cinco, frora Lat. quinque $=$ five.
A. As substantive:

1. Ord. Lang.: The number five; a groap of five treated as one.
2. Nusic ( $P$ l. cinques): The name given by change-ringers to changes on eleven bells probably from the fact that five pairs of belis change phacea in order of ringing in each suc cessive change. (Grave's Dich. Music.)

-     * Cinque and quater: One who has entared his fiftieth year.

* To set all on cinque and sice: A phrase probabiy $=$ to be fearless or desperate.
"(Mastim] for their carelembesa of life, setting all
B. As adj.: The fifth.
cinque cento, $8, \& a$. [1tal.]
A. As substantive:

Arch. : Literally 500, but uaed as a contraction for 1,500 , the century in which the reviva of aucient architecture took place in italy The term is appiled to distinguiah the atyle of architecture which then arose in that country. In France the atyle, as introdaced there, is called Style Francuis premier and Renaisance; and in England, the Revival and Elizabethad. (Gwilt.)
B. As adj. : Pertaining to or constructed in the style degcribed in A.
"What is siven the atadent as naxt to Raphnel'e
cinque-foil, * cynk-foly, s. [O. Fr. inque $=$ ave, and foil: Fr. feuille: Lat. folium $=$ leaf.

1. Botany:
(1) The colomon name of plants of the genus Potentilla, order Rosacere, also callerl Fivefinger, from the resemblance of its leaves to the fingers of the hand.
(2) Onobrachis sativa. (Aubrey, Wilts.)
2. Arch. : An ornament used in the Middle Pointed style of architecture. It
consists of five cusyidated divisiona or curved pendants inscribed in a pointed arch, or in a circular ring, spplied to winThe cinque-foil, when inscribed in a circle, formsa rosette of five ermsal leaves having $\operatorname{an}$ opes neving an open
 space in the middie,
the leaves being formed by the open apaces, honnded by the solids or cusps.
3. Her. : This plant, as e charge, answers to the five sensed of man, and denotes that the bearer conquers his affections and appetites. (Crabb.)

- March cinque-foil: A modern book-name for a plant, Comarim palustre.
$\dagger$ cinque-foiled, a. [Eog. cinque-foil; ed.

Arch.: Furnished with cinque-foila.

* cinque-outposts, s. pl. The five sensea.

I whe fallen soundly asleep:, the cincue-ourparts

cinque-pace, s. A kind of dance (called also Galltara), the steps of which were regulated by the number five. Aiso translated five-paces. Sir John Davies thus deacribes it-

Who was the oumher of the music"e feet,

## cinque-port, * sink-pors, s.

1. (Of the form cinque-port): A kind of fish ing-aet having five entrances.
2. (Pl.): Ports, as the latter half of the desig
nation implies, "fiva" in number, and deemed the five most important ports on the Southern Coast fscing France. At first there were really Coast five, viz., Dover, Sandwieh, Rombey, Hastings, and Hythe. Two have fince been Hastings, and Hythe. Two have aince been
added, viz, Winchelsea and Rye, and the "Cinque"-ports at present number seven Formerly the king's ordinary writ did not run within them, but legal cases arising were tried at least in the first justance, in the local courts. There lay an appeal from them to the Lord Warden in his court of Shepway, and thence again to the King's Bench. (Bluckstore: Comment., bk. ifi., ch. 8.) They have Lord Warden, but his power is now abridged the 18 \& 19 Vict. c. 48 , altered by the 20 \& 21 Viet. $c$. I, and other acts, having swept the old jurisdiction away. (Wharton)

A. Ordinary Language:
I. Literally:

1. In the came sense as B. 1
*2. A charscter of any kiod used in writIng or in printing.
*3. ( $n \mathrm{n}$ pl.) : Shorthand

II. Figuratively:
2. A person of no worth or moment.
"II the people be somewhat in the election. yon translation."-Bacon

* 2. Worthlessness, sham, noreality.

Mine were the very cipher of © functioa."
B. Techrically

1. Math. : A mark or cheracter (0) which of itself posseases no value, but when placed after any number increases ita value tenfold.

In decimal fractions the placing of a elpher before a number decreases its value in the asme proportion.
"The etipher of ituolf timpllee a privation of niae ith in the conmmon arithmetick, it zerress to to left on each of their values by ten; and io decimal arizhme thicik to lossen the value of eneh equre to the right of
2. Engraving: A combinstion or interweaving of two or more letters, especially the initials of a name; a monogram.
3. Corresp: A secret or occult code or alphabet used in carrying on correspondence between two parties when it is important tha the cootents should be aninteliigible to any third person into whose handa it might ecel dentally come, and who did not possess the key.
of This paper was sispod in copher by the erren ehlots
4. Astrol.: An occult sign or flgure.

5. Music: The sounding of a note on an organ or wind instrument, by an escape of been touched by the player
cipher-key, s. A key which enables the hoider to read writings in cipher.
gi' $^{\prime}-\mathrm{phèr}, ~ v i \mathrm{i}$ \& $t$. [Cipher, s.]

## A. Intransitive

1. Ord. Lang.: To practice arithmetic; to work out sums.
"We have long drawn our supply of roofing-olatee from sacb quarriter, echool. boye ciphered oo theme ${ }^{\text {Elivat }} 40$.
2. Music: Ueed of an organ or harmonlum, when through some defect the wind escapes and sompds through aoy note without that note having been touched by the player.

B, Transitive:

1. Lit.: To write in cipher or secret cheacters.
2. Figuratively :
(1) To designate, to cheracterize, to deplet "The face of either ciphered efther'e hoart","
(2) To decipher, to interpret.
"To ctpher what is writ in learned bookn.",
-cil'-phêr-hood, s. [Eng. cipher; -hool.] The quality or state of being only a cipher; nothingness.
"Therefore God to confute him, and bring hime to

©i'-phẽr-ǐig, pr. par., a., \& s. [CIPHER, t.]
A. \& B. As pr. par. \& particip. adj.: (Sec the verb).
C. As substantive
3. Elementary arithmetic ; the act or aclence of doing sams.
4. The act or art of writing in cipher.
 (Ital. cipollino $=$ a small onion; Lat. cepola $=$ a small onion, a clive, dimin. of cepa $=a n$ onion.]
Min. : An italian marble, a variety of ralcite, containing a sliglit admixture of quarts and oxide of iron. Its colour is white wifh pale greenish shadings, and is so called be cause its veins, like those of different strata, one iying upon snother. it coes not stane well.
 [1.). cipe $=$ an onion.] Aterm occurring only in the supornd.
olpper-nut, 8. Bunium flesuоsum.

¢ำ'-pŭs, s. [Lat.
CXPPOB.
a post.]
Arch.: A enall low coiumn, sometime without a base or capital, and most frequently

bearing an inacription. Among the ancients the cippas was used for various purposes; when placed on a rood it indicatad the distance of places ; on other occasions, cippi were enployed as memorials of remarkable events, as iandmarks, and for bearing sepuichral epitaphs. (Gwilt.)
 "The clastre of cipre tree my lemmans to ma", is.
 prus, s. [CYPRus, Crape.] A thin, transparent stuff, supposed to resemble modern crape. Both black and whita wers made, but the black was most common, and was used as now for mourning.

## " Lawn an whito as driven anow, <br> Cypres black as oer was crow'; Tale, iv. 8.

T The following passage refers to its trsnsparency. (Nares.)

## "A cypren, not obosom,

Encikepa: Twoelth Itight, in. 1.

- çirc (1), a [Circua.] A prehiatoric atone circle.

## "Otras of the same zort are atill to be reen in Corn.

- cĩco (2), s. [Choroh.]
çĩ'-ca., prep. [Lat. = about.] Uoed to denote an approximation in a date. It la generally contracted to $c$.
cir'-ca-da, s. [Lat. circus.]
Old Eccies, Law: A tributa anciently paid to the bishop or archdeacon for viaiting the churches. (Tomlin: Law Dictionary.)
cir-çæ'-a, s. [Lat. Circeus $=$ pertaining to Circe, a fabulons oachantress.]
Botany:

1. Sing.: A genus of plants, order Onagracex. Calyx-tube ovoid, with a twoparted limb. Petals obcordate, stameas two, ovary 1-2 celled, atyle filiform, etigma canitate two-lesved. Fruit ovoid or pyriforin, 1-2 celled, indehiscent, covered with hooked bristles. Slender erect herbs. Two species are British, Circcea lutetiana (the Enchanter's Nightshade), and alpina.
2. Pl.: A tribe of Onagracee, of which Circera is the type. [Circena.]
 falcon that moves round in a circle, and ăeros (aetos) $=$ an eagle.]
Ornith. : A genus of the Aquilinæ, or Eagles, belonging to the family Falconida. Circaitus cheela is common in Lower Bengal, where it frequerts the margins of tanks to feed upon the frogs which there abound at certain seasons of the year. The type-species is C. aquila, a European form, sometimes known as Aquilla brachydactytus.
cǐr'-car, s. [Mahratta, Hind., \&c. sürkar $=$ the government.] (Anglo-Indian.)
Geog. (Pl, Circars): The name formerly given to the Northern Circars, flve districts in the Madras preaidency. They were Chicacole, Rujahmunduy, Elloro, Condapilly, and Guntoor. The Northern Circars were obtained by the French in 1753, and were taken hy Clive the French in 1753, and were taken by clive
in 1759 . (For other meanings of Circar see Simkar.)

A. As adj. : Pertaining to Circassia.
B. As subst.: A native of Circassia.
fïr-căs'-si-ĕnne, s. [Fr.] A light kind of cashmere. (Knight.)
Çir'-çē, s. [The mythic daughter of Helios (the Sun) and Perscis, who lived in the island of Fa and was reputed to poasesa powers of enchantment, by means of which ahe first charmed her victima, and then changed them
into beasts.] I. Mythol. : The fabulous creature described In the etymology.

Thil give thea back to dsy and Ctroe's shores.
Tbere, plous, on my cold romainge ettend."
2. Zoology
(1) A genus of molluses, family Cyprioide.
is thiok, and is often boulptared with diverging striz. The hinge teeth are 8-3, the lateral ones obscure, the palliai line entire. Itrangea from eight to fifty fathoms. There sre forty recent species from Australia, Indla, the Canaries, snd Britain.
(2) A aynonym of Trachynema (q.v.)
3. Astron. : An asteroid, the thirty-fourth found, discovered April 6th, 1855.
Çïr-̧̧è'-qn, a. [Lat. circous.] Pertaining to Ciree; magic, noxious.
 Circe, and fem. pl. bnet. -idce, -ada.]
Zool.: An old name for a family of Trachomedusx, dow known as Trachynemidx (q.y.).
çir-çĕ1'-11-ŭm, s. [From Lat. circellus $=\mathrm{a}$ small ring.]
Zool.: A genus of Coleopterous insecta. Fsmily, Lameilicornes.
çir-çăn'-sĭ-al, t çir-çĕn'-sǐ-qn, a. [Lat. circensis = pertaining to the circus : ludi circenses $=$ the games in the Circus Maximus at Rome.] Pertaining to the Circus Maximus, or to the games practised in the Roman Amphitheatre
çir-çi'-n®e, s. pl. [From Gr. кіркоs (kirkos) $=$ a kind of falcon which fliea in wheels or circles. Probably Accipiter Nisus, the Sparrowhawk. This is not the Circus of modern ornithologista.]
Ornith: : A sub-family of Falconidæ, contsining the Harriers. [Cracts.]
¢īr'-cĭn-al, a. [Fr. circinal; Lat. circinus; Gr. кipкivos (kirkinos) $=$ a circle. $]$
Bot. : An epithet spplied to leaves of plants rolled op is a spiral manner downwards, the tip being in the centre; uaed in reference to follation or lsating, as in ferns. (Gray.)

* çir'-çin-äte, v.t. [Tat. circinatus, pa. par. of circino $=$ to make ronnd ; Gr. кipкctos (kirkinos) $=$ a circle. $] \quad$ To form into a circle, to make a circle round, to encircle, to encompass.
çix'-çín-ãte, a. [Lat. circinatus, pa. par. of circino $=$ to make round.]

1. Ord. Lang.: Round, in a circle; encircled.
2. Bot.: The same as Circinal (q.v.).
"The manner in whleh the young leares are arranged within the leat. had is called folsation or verrantioni. ina The vernation.inco of tho forns sad cyends

* çir-çin- $\overline{\mathbf{a}}$-tion, s. [Lat. circinatio, from circinus = a circle, a pair of compasses.] An orbicular motion, a turning round, a measuring with the compasses. (Bailey.)
çĩr'-çí-nŭs, s. [Lat. = a circle, a pair of comAstron.: The Compasses, a constellation near the South Pole, lying between Norma and Musca Australis.
çir'-cle, * çer'-cle, *ser'-cle, s. [A.S. circol, circul; Fr. \& Prov. cevcle, sercle; Sy. \& Port. circulo, from Lat. circulus, dimin. of circus = a circle ; Gr. кіркоs (kirkos) = a circle, 3 ring.]
A. Ordinary Language:
I. Literally:

1. In the same sease as B. 1.
2. A ring, a round figure or mark.
"And eft with water which bhe kept,
Gower, IL. 284
3. A round body, a globe, orb, or aphere. "It is ho that sitteth upon the circle of the earth.* - haiah x1. 2
*4. A ring, a circlet.
 *3. A coronet or band worn round the helmet.
"He carfo awaye with myght and nssyne
The cirole that att uppon bis orown."
The cirole that ast uppon his crown.".
4. A compass, a circuit, an enclosure.
"A great magician obscared in the efrcle of the
foreat - Shakesp. As Yous Liks it, v. 7. A district, a territory.

I Circles of the Holy Roman Empire: Such provinces and principalities as had a right to
be present at the diets. Thoy were tan, in number
8. A number of persons utanding or seated in a ring.

9. An assembly genarally.
10. Any seriss ending as it begins, and perpetually repeated; a cycle, a auccession.
"There be frutt trees in hot oonntrios, which havo
bloocomm and young fritt and young fruit and ripe fruit almost all the year, succeeding ono ano ther plante and hot countrite ${ }^{2}-8 a 00$.
II. Figuratively:

1. A ophere of acquaintance; alass or division of society.
"In private society he [Mr. Canning] was amiable and attractive, though, excopt for a very fom yenrs of bls early youth he ravely irequeuted the ofrolen of

* 2. Circumlocution; indirectness of language.

## In eircle, or oblique, or hemiven the tre

## B. Teohnically

1. Geometry:
(1) A plane figure deflned by a curved line called its circumference, every point in which is equally distant from a certain point within the circle, called its centre. [Centre.] A atraight line drawn from the centre of a circle to ita circumference is called a radius, and a atraight line drawo through the centre and terminated both ways by the circumference is called the diameter of a circle. The space enclosed within the circumference is called the area of the circle. The circumference of a circle is to its diameter as about $3 \cdot 14159$ to 1. For the quadrature of the circle see Quadratuae.

* (2) The curved line defining such figure; the circumference.

2. Logic: $\Delta n$ inconclusive and deceptive line of argument, in which two or more statements are brought forward to prove each other, i.e. the first pronosition is assumed as proved by that which follows it, and the aecond agsin is assumed from that which precedes it.
3. Astron.: An instrument of observation, the limb of which ia graduated to $360^{\circ}$ and forms a complete circle. There are aeveral kinds : a mural circle, one affixed to a wall ; a transit circle, one fitted with a telescope on an axis, and mounted in the plane of the meridian; a refecting circle, onc working by reflection, as a scxtant ; a repeating circle, one repeating the angle several times continnously along the limb. (See these words, and also Altitude. Azimuth, Chacumperentor.)
4. Archoeol. : The name given to one of the megalithic remains, as at Stonehenge, Avebury, and other places. (Gwilt.)
5. Vehicles: The fftic wheel of a carriage.

I (1) Circle of altitude:
Astron. : A circle parallel to the horison, laviug its pole in the zenith.
(2) Circle of curvature: That circle the curvature of which is equal to that of any enrvo vature of which is equal point. Called also the Circle of equi-curvature.
(3) Circles of declination: Great circles intersecting each other in the poles of the world.
(4) Circles of excursion: Circles parallel to the celiptic, and at such a distance from it (usually $10^{\circ}$ ), as that the excursions of the planets towards the poles of the ecliptic may within them
(5) Circle of illumination: A circle passing through the centre of a planet perpendicular to a line drawn from the aun to the regpective
body. This is supposed to scparate the illubody. This is supposed to scparate the illumined part from the unillumined, whicb it does nearly.
(6) Circles of latituds :
(a) Astron. : A great circle perpendicular to the plane of the ecliptic, passing threugh ito poles.
(b) Spherical projection: A small clrcle of the sphere whose plane is perpendicular to the axis.
(7) Circles nf longitude: Lesser elrcles paraliei to the ecliptic, diminishing as they recede from it.
(8) Circle of perpetual apparition: One of the lesser circles parallel to the equstor, described by any point of the sphere touching the northern point of the horizon, and carried
ebout with the diurnal motion. All the stars -rithin this circle never set.
(9) Circle of perpetual occultation: A lesser circle parallei the equator, and containing all those etars which never appear in our hemisphere. The stars situated hetween the circles of perpetual apparition and perpetual oecultation alternately rise and set at certain times.
(10) Circle of the sphere: A circle upon the corface of the sphere, called a great circle when its plane passes through the centre of the sphere ; in all other casea a amall circie.

A great circle of a aphere is one whose centre coincides with that of the sphere, snd which therefore divides the sphere into two equal parts.
(11) Circle of Willis: An anastomosis between the prinary trunks of the arteries of the brain, to eqnalize and carry on the circulation of blood in the brsin when an obatruc tion to one of the main trinks occurs. It encloses a space somewhat of an oval figure, within which are found the optic nerves, the tuber cinereum, the infundibulnm, the corpors maber cineream, the infundibulum, tha corpora mammillaria, sou the interpeduncular spsce. 10, p. 294 .)
(12) Astronomical Circle

Astron. Instrum. : The Dame given to any one of the instruments designed to be nsed for measuring angles of altitude or zenith dis tance. Mural cibcle, Transit circle, Altitude, and Azimuth instrument.]
(13) Diurnal Circles: Supposed to he de ecribed by the several stars and other points in the heavens in their apparent diurnal rota thon ronnd the earth.
(14) Horary Circles (Dialling): The ines on diala which show the hours.
(15) Polar Circles: Immovable circles, parsl lel to the equator, and at a distance from the poles equal to the greateat declination of the ecliptic.
(16) Reflecting Circle: [Sextant.]
(17) Reveating Circle: [Repeatina.]
(18) Transit Circle: [Transit.]

If Crabb brings into compariaon the words acircle, a sphere, an orb, and a globe. With out alverting further to his views, it msy be simply added that a circle, mathematically simply added that a circle mathematically
viewed, is a plane figure ; while a sphere, an viewed, is a plane figure; While a sphere, an
orb, and a globe are solidg. It is, we think, orb, and a globe are solids. It is, we think,
from arbitrary usage snd not for a deeper from arbitrary usage sid not for a deeper
reason that we gipak of the circle of oness friends, and the sphere of one'a activity

## circle-iron, s.

1. A hollow punch for cutting planchets wada, wafers, and circular blanks.
2. The fifth wheel of a carriage; the iron circle between the fore-axle and the hody.

* circle-learning, s. An encyclopædia (Trench: English Past and Present, p. 81.)
circle-like, * cerclelyk, $a$. Like or resembling a circle : mound, circular.

Cercletyk shappe is thont perite figure".
Oceleve: De Heg. Princ.,
§ir'cle, "çer-clen, ser-kle, v.t. \& i [Fr. circuler ; Lat. circulo, from circulus $=$ a circle.]

* ¢ïrc'-lẽr, a. [Eng. circl(e);-er.]

1. Lit.: One who goes or moves round in a circle.
" Neptune circler of the earth." ${ }^{\text {Chapman }: \text { Homer'; niad, xiil }}$
2. Fig.: A poor or inferior poet; either from hin strolling about as a wandering minstrel, or for the same feason as their name was given to the Cyclic poets. [Cvelic.]

Nor so begin. as did that eircler late,
B. Jonoon: Art of Poetry.
çirc'-lĕt, s. [Eng. circ(le); dim. suff. -let.]
†1. A little circle or ring as of gold, jewels etc.

2. A round hody, an orb.

gir'-cle-wişe, adr. [Eng. circle; wise] In a circle. (D.G. Rossetti : Blessal Damozel.)
çire'-lıing, pr. par. or a. [Cirgee, v.]
A. As pr. par.: In senses corresponding to those of the verb
R. As adj. : Haring the form of a circle; circular, encircling, surrounding.
"Whose towering frant the ctrcling realm commands."
owper: Transtations of the Latin Pooms of

* clrcling-boy, s. A species of roarer, who in some way drew a man into a snare to cheat or rob him. (Nates.) [Roaming-bovs.]
"One Val Cutting, that helps Jordan to ranr, a cir
cling.boy."-Ben Jonson: Bartholomewo Fatr, vv, 2 .
-çir-cuat, a. [Lat. circuitus.] Encircled, surrounded.
* cĩr'-cūe, v.t. [Lat. circueo or circumeo $=$ to go round; circum $=$ around, about; eo $=$ to go.] To make a circuit of, to visit.
"He then vyegted and circued his lande in miluit tryng iustyces to all person. -rasyan, i. is
girc'-uít, * eyre'-ute, s. [Fr. \& Prov. circuit Ital., Sp., \& Port. circuito, from Lat. circuitus, from circuen or circumeo $=$ to 20 aronnd, from circum $=$ around, and $\epsilon 0=$ to go.]

## A. Ordinary Language:

I. Literally

1. The act of revolving or moving round anything.
round the carried along with hinn hathis perionical circuit
2. The place enclosed in a circle; an encloaure.
"A woody mountann, whose high top was plaln, 3. Space, extent, circumference.
"This towne is grete inc cyrcute and of small de

* 4. That which encirclea anything; a ring, a crown
' Uotil the golden ctrenio on my head
Do calm the fury of this maxdbraind fiaw.",

5. The act of visiting certain places for the purpose of inspection. [B. 1. (1).]
6. A number of scattered churches or con gregations mioistered to and successivelyvisited by one clergyman. (American.)
I Circuit-rider: A clergyman who perfurms ouch duty, which occurs only in eparsely settled diatricts.
I Divinity-circuit: Bookbinding: A flexible cover, generally of leather, which project beyond and folds over the edges of a Bible or other book, thus protecting it from wear.
*II. Fig.: Circumlocution.
(nas by long circuit of dedaction it may he that oven ail trath out of any trath may he concloded,)..
B. Technically
7. Lav:
(1) The periodical visitations of the circuit jndges, both State and national.
(2) The district or section of the conntry thue viaited

* (3) A longer course of proceedings than to actually necessary for the recovery of anything sued for

2. Path.: The period or course of a disecse. (Dunglison.)
3. Elect.: A continuons alectrical communlcation between the poles of a battery. In telegraphy the wires and instruments forming the road for the passage of the current. At its extremities are the terminals, where it john the instrument. A metallic circuit is when e return wire is used inatesc of the earth. A short circuil is one having as little resistance as possible; nothing but the apparstus and as posiribe; nothing but the ayparstus and the wire used to connect it with the battery.
To short circuit a battery is to connect its pole hy a wire. A local circuit includes only the apparstus in the office. (Knight.)
I Voltaic or Galzanic Circuit or Ctrcle: A continuous electrical communication between the two poles of a battery ; an srrangement of voltaic elements, or couples, with proper conductors, hy which a continuous current of electricity is eatablished.

## circuit-breaker, 8

Telegraphy: An instrument which periodically interrupts an electric current. (Kinigh.)

## circuit-closer, s.

Telegraphy: A device by which an electrical circuit is closed; usually a key, as the telegraph key. In fire-alarms and msny sutomatic telegraphs it consists of a plain metsllic diak, with insulated apacea on the rim or edge. (Knight.)

## Circuit Comrt,

Law: A conrt to which the judges make etated viaits.
T The United States ia divided into nioo circnita, one for each justice of the Supreme Court. Two juatice are appolnted to each circuit, Who, with the Supreme Court juetice for that circuit, conetitute a Circnit Court of Appeals. In the various Statee the formation and functlons of the Circuit Conrts are varied, being regulated hy the rtatutea of each Stata maintaining auch courts.

## oircuit judge, s.

Lav: A judge or justice of a Cirenit Court, whether State or national.

* gǐrc'-uĭt, v. i. \& t. [Circuit, s.]
A. Intrans.: To move in a circle, to revolve, to pass round.
"The cordlal cup . . . quilok efreuiting."-J. Phulph B. Trans. : To go or trsvel round, to visit periodically for parpoaes of inspection.
"Geryon, haviog circuited the alr."-T. Wartom
' çirc-uĭt-ëer', v.i. [Circuiteer, s.] To go on circuit.
- çãrc-uít-ëer', * çir-cuit-er, 8. [Eng. circuit; eer, eer.]

1. Ord. Lang.: One who travels or goes round on a circle or circuit.
"Like your fellow rircuiteer the sua, You travel the round of the earth, and behold all the iniquities undet he beavena, - Pepe.
2. Law: One who goes on circuit
© çirc-uǐt-ëer'ing, pr. par., a., \&s. [CDcuiteer, $v$.]
A. As pr. par. : (See the verb).
B. As adj.: Going round on circuit.
"The hig-wigg'd circuitecring Judgea" $\begin{aligned} & \text { Colman: Poet. Fagaries, p. 12s }\end{aligned}$
C. As subst. : The act or practice of going on circuit.
"Now to returo to his londship, and his oircuitom

* çirc-u-1'-tion, s. [Lat circuitio, circumitio, from circumeo $=$ to go round : circum $=$ round, eo =to go.]

1. Lit.: The act of going round or compassing.

*(2) Revolving, moving tn a ctrcle, succesive, reeurring.
"From whence the innumerahle race of things
(8) Cyelic ; pertatning to or connected with cycle of events.
"Had Virgil been a circular poet, and cloeely ad Dido:"一Dennis.
*2. Fig. : Perfect, complete.
Your wisdoin is not circular:"
Masinger: Emperor of the East, iji 2
II. Technically:
2. Comm. Diplomacy: Addressed in Iden tical terms to a circla or number of jersons. [Cincillar-letter.]
3. Jogic: Returning to the same point arguing in a circla ; inconclusive, incomplete.
"One of Cartes's Arst prinelples of reasoning, after
to safely huild upon; for he is for proviog the belng of our faculties from the being of a God."-Baker Refections on Learning
B. As subst. : A letter or communication addressed in identical terms to a circle or number of persons.
"The Government loudiy proclaims to Europe reforma for Poland. It Informa the various courts of them by diplomatic circulara, .."一kdweards: Polish
circalar-arc, s. Any part of the circumference of it circle.
ciroular-bolt, s. A macbine employed by the lace-manufaturers in Nottingham in making net. (Knight.)

## oircular buildings, s. pt.

Arch. : Such as are built on a circular plan. When the interior is also circular, the build ing is called a rotunda. (Gwilt.)

## circular canon, $s$

Music: A canon closing in the key one semitone above that in which it commences Twelve repetitions of it wonld take it through all the known keys. (Stainer \& Barrett.)
circular crystals, s. pl. This term has een applied to the atattened group of radiat ing, crystalline needlea formed by many salts
and other crystalline substances. (Mieroyruphic Dict.)
olroniar ille, \& A circular saw or serrated disk, adanted to run on spindle or mandril, snd used in cutting theoteeth of cogwbeels. (Knight.)

## oircalar head, s

Arch. : The arch or bow of a door or window.
oiroulax instruments, s. pl. Astronomical, nauticai, or surveying tnatruments, which are graduated to $360^{\circ}$, that is, around the whole circle. (Knight.)

## cironlar iron-clad, s.

Naut.: An tron-clad war vesaei of circular form. The origiual anggestion of auch a type of vessel was made by Mr. E. J. Reed, formeriy constructor of the Britiah navy, hut the first actually built was by direction of the Russian Admiral, Popoff, and it was called in consequedce a Popoffika.
ciroular-letter, $s$.
I. Banking : A letter of credit addressed to aeveral banksrs in other conntries in favour of a certain person named therein.

It never was known that elrcular letters
By hamble companions were sent to their bettern."
2. Comm. © Diplomacy: A circular.
ciroular lines, s. pl.
Math. : Lines of sines, tangeuts, secants, te.
oiroular-loom, s. A loom in which a shnttle moves in a circular race, and continuoualy in one direction, through warps arranged in a cirele. (Knight.)
ciroular-micrometer, s. An amular form of the micrometer first suggested by Boscovich in 1740, and afterwards revtved by Olbers in 1798. (Knight.)
ciroular muscle or oiroular fibres (of Santorini).

Anat.: A meries of circular involuntary mnscular fibres wholly surronnding the membranous portion of the urethrs.
orroular-note, 8. The same as Ciroularletter (q.v.).
oircular numbers, s. pl.
Arith.: Those numbers all tbe powers of whieh terminate in the same digita as the numbers themselves. Thus all the powers of 5 terminata io 5 .
ciroular parts, s. pl. Five parts of a right-angled or a quadrsntal spherical triangle ; they are the legx, the complement of the hypothennae, and the complements of the two oblique angles. (Craig.)

## circular polarization, 8.

Phys.: In the undulatory theory of light a aupposed eircular rotation of the particles of ether in certain media, when a pencil of plane polarized light is allowed to pasis through these media. (Craig.)
ctroular roofs, s. pl.
Arch. : Such as have the horizontal aections circular.

## circular-sailing, s.

Nout. : The act or system of sailiug on the arc of a great circle.
circular-saw, s. [SAw.]
ciroular-shears, 8. A shears for sheetmetal, consisting of two circular blades on parsilel pins. (Knight.)
ofrcular-shuttle box-loom, s.
loom having a box with a nnmber of shuttles, loom having a box with a number of shuttles, and having means for actuating it so as to
bring any one of the ahuttles into operation bring any one of the shuttles into operation
as required hy the pattern. (Knight.)

## circnlar sinus,

Anct. : A ring.like sinus plaeed superficially round the pituitary hody in the dura mater of the brain, forming a commnnieation between the two cavernous ainuses. It is alao called a Coronary sinus.
circular or oylindro-oylindric work, ${ }^{\text {s. }}$

Arch.: A tern applied to any work which is formed by the intersection of two cylinders whose axes are not in the same direction. The line formed by the intersec-
tion of the surraces is termed, by matho. maticians, a line of double curvature. (Gwill.)
gir-cu-luar'-1-ty, s. [Low Lat. ciroularitas, from circularis $=$ round, from circulus $=\mathrm{E}$ circle.]

1. Ordinary Language
2. The quality or state of belug circular.

* 2. That which ta circular.
"The heavens have no diversity or difference, hut implicity of parts, and equilformity lut motion, continually succeeding each other; oo that, from what polnt soever we compute the account
anto the whole e clreularity."-Brown.
*II. Logic: Reasoning in a circle; incomplete or inconcluaive reasoning.
gire'-p̣-lar-1y̆, adv. [Eng. circular; -ly.]

1. In form of a circle.
2. With a circular or revolving motion.
3. By circular reasoning; indirectly, in a ctrcle.
"To argue creutarly."-Baxter: Int. Baph., p. 8s.

* ${ }^{\text {girro'-ụ-lạr-nĕss, s. [Eng. circular; -ness.] }}$ The quality of being circular, roundness, circularity.
"In forme $\cdots \dot{\text { it doth }}$ pretend to some circular
* ̣irc'-n-lar-y, a. [Eng. circular; -y.] Circufar, ending in itself, inconeluatve.
"Which rule must serve for the better noderstanding of that, Wish Damancene hath, touching crose to God such things na belong to manhood, and to man Hoch hes properly ooncera the daty of Chirist Jenue"Hooker: Ecce. Pol, v., is.
çiro'-g-lāte, v.i. \& t. [Lat. circulatus, pa. par. of circulo $=$ to move in a circle.]
A. Intransitive:
I. Ordinary Language:
* I. Lit. : To move in a circle, to revolve, to move round and return to the ame point.

2. Fig.: To be apread about, to move from place to place, or from person to person, or from hand to hand.
"As the minte of calumny are perpetually at wort, sine to time, grow current amoug the party, und odr culate through the whole hingdom."-Addtoon.
II. Technically:
I. Metal. : To chase to beat nut
3. Anat.: To traverse the artaries and vein of the body. [Ciaculation.]
B. Transitive:
L. Ordinary Language :
4. Literally:
(1) To cause to move from place to place, to pnt into eireulation.
"In the Clvi1 War the money speot on huth sides

* (2) To travel or move round.
"May $\frac{1}{n o t}$ cozelude for eertaiu that this man hath been in the mon, Rhere hls hend hath been intori2. Fig.: To spread abroad, to disseminate.
"This puinted sentence was fant circtulated thruggh
town rid country nud was soon the watchword of the own rind country, ned was sonit the watchword of the ${ }^{*}$ II. Metul. : To beat out, to chase.
- For the difference hetween to circulate and to sprectel, see Spread, $x$.
$\dagger$ çĩro-p-lāte, s. [Circluate, v.]
Arith.: A circulating decimal is aometimen so called. (Buchanan.)
¢̧irc'-u-lā-tĭng, pr. par., a., \& 8. [CiвctLate, $v$.
A. As pr. par.: (See the verb).
B. As adjective:

1. Ord. Lang.: Moving in a cirele, returning to itself, revolving.
2. Fincace: Current, passing from haud to hand, constituting currency.
C. A.s suchist.: The act of passing or the state of being passed from hand to hand or from prerson to person ; circulatiou.
oirculating-decimal, $s$. A decimal which cannot be expressed with perfect exact ness in figures, and when to approximate to accuracy the decimal is taken to many places, it is found that the same series of figures if repeated again and again cul infinitum. The figures thus repeated are called the period of the circulating decimnl. Thus ${ }^{2}$ of $1=$ 222222, \&e. of which the period is 2 , and $\frac{1}{4}$ of $1=-142857142857142857$, \&c., of which the period is 142857.

## - A chreulating derimal that

circulating library, s. A library the booke contained in which are circulated by loan amongst the subscribers. The first catablished in Englad was at Salisbury by Samuel Fancourt, a dissenting minister, but it was not euccessful. The first in London was ia 1748. The Astor Library io New York, the Boston Public Lihrary, and the Philadelphia sod Mercaotile Llbrariea io Philadelphia, are among the largest io this country.
circulating medium, 2. The mediam of exchanges or of sale and parchase, whether it be gold, silver, paper, or any other article. The term, which is tsed by all economical writars as synonymons with curreacy, came into common use in the last decade of the eighteenth century. [Medium.]
${ }^{4}$ cireulating medium is more comprehensive than he trim money, nit 18 the method of exchangen, or
michases, and sately whether it good or sliver coin.
circulating-pump, s. The cold-knater pump, by which condensation water is drawn from the sea, river, or well, and driven through the casing of a surface condenser. (Knight.)
girc-n-lä'-tion, 8. [Fr.circulation; Lat.cir culatio, from circulatus, pa. par. of circulo $=$ to move io a circle ; circulus $=$ a circle.]
A. Ordinary Language :

1. Literally
2. Motion in a circle, or to such a course that tite meviag body returns to the place whence it started ; especially used of the cir culation of the blood. [B. 1 (2).]
3. The act or process of spreadiog or causing to pass from hand to hand or from persoo to jerson. [B. 3.]
4. The state of being circulated or passed from persou to persoo or from hand to hand [B. 3.
5. The exteat to which anythiag is circu lated
"To increase the eirculation of money, at least in II
II. Figuratively

- 1. A seriea, e succession.
thou seest st to delyy us the hlessing of pence
keep us in a circulution of miseriue."-hing Charles.
* 2. A reciprocal interchange of meaning.
"The true doctrinee of astronomy appe

3. The act or proccss of dissemioating or preading abroad
B. Technically
4. Anat., Animal PhysioL, \&fo: A movement of the blood throughont the human body. (For details sce (2).)
(1) Hist.: The Spanish physician and theoogian, Michael Servetus, Whose eud was so trazic, gained in 1553 some glimtoering perception of the lesser or pulmonary circulation of the blood. Cæsalpinms in 1569 made a further advance towards the truth, but it was reserved for the immortal Harvey actually to make the great discovery, which he applroached 101615 and published with many details in 1628.
(2) Physiol.: The pronelling force in the circulation of the blood ia that of the heart, which is s hollow muscular orran placed in the centre of the sangriferous systeu. arta, blood then driven by the heart into the sorta, and then circolated through the body by a set of vessels
called arterics, which ramify into smaller and called arterics, which ramify into smaller and
smaller tubes. [ARTERIEs.] On reaching the extremities of the arteries it is driven through excessively fine tubes called, from their hairlike tenuity, capillarles. These, constituting the conaecting channels between the arteries and the veios, afford it a passage in to the latter vessels, by which it is couducted back to the beart. The heart is divided internally into four cavitieg, two at ita base called auriclea, and two at its body and apex called ventricles. The right is the venous side of the heart. it The right is sericle the venoos blaed from receivea into its suricle the venoas biood from every part of the body by the superior and inferior vens cava and coronary vein. In passing from the arteries to the velns the blood had lost its red culor and acquired a dark hae; it is therefore discharged by the right euricle into the right ventricle, and thence transmitted along the palmonary srtery and its branches to the capillaries of the lungs, to be again brought in contact with the oxygen of the air. Returniog
to the left aoricle it is immediately discharged into the left ventricte, theace to the aorta, to be propelled through the body as before. The current of the blood through the body ja general ie cailed the greater or systemic circulation: that to and from the langs the lesser or pulmonary circulation. (Quain, ecc.) lesser or pulmonary circulation. of buain, or There is a circulation in the ioferior animsts. For en example see that under No. 2.
5. Veg. Physiol.: The circulation of plant 6 is not clcaely analogous to that in onimals. Formerty it was believed that there was oo ascendiag curreat of sap in spriag, and a descending one in antumn. It is now found that both an asceading and a descendiog current coexist and wheo need arices these are supplemented by horizontal currents passing between me tisaes The ascending current enters the the lis, it is arbitted to certain to lesves, whers fluences which fit it for the nutrition of the plant. The descending carries it thence in an elaborsted coodition back to the root. (Thomé, Brown, \&c.) [Cvclosis, Rotation, \&.c.]
"The outrient fald. however formed, is distribated throughout the teatures of the plant, or animal, by vital or physical forces, or by the junction of both Crreulation. Io wanta this function is very simple and is formed withont the apency of a propelling orzan; but in the greatest number of animals such an organ, 'a heart. is the maininstrument in the distri-
hution of the blood. In animals then there is a true circulation. the sudd eetting oat froue and returning
 circulata or rotate, within the interior of cells as in Chara and Vallisneria, the fluid of the cell not com ap from the spoagioles in an ascending current and to descend is snother set of vessele. Bot in many almple animalo. some entozon for example, and 101 l guntica, there is ao good evidence of the imbining the fuld in which they live,"一Todd A Bowman: Physioh Anat. vol L. introd., pp. 23, 24.
6. Finance: Currency, circulating coin notes, \&e. Ia its early 6tages commerce was carried on by a direct exchange of articles which were reciprocally wanted, and in this form it is usually called "barter or sontennes sexeme" Ao intermediate merchandise was hen introdnced called " mones" and transac ions in wiel mot is used are uot coll ions in which money is used are not caluc barter" out sales. - en anmice is exchanged for money, instead of an equivalent, has beel well called by J. B. Say a demi-exchange. And the conveniences of this method of couductin commerce so greatly preponderate over thos of direct exchange or barter, that commerce is now glinost entirely resolved into thes demi-exchanges or sales. And this is the proper ineaning of the word circulation. Bar ter or exchange is where two services of any kind are exchanged directly. Sale or demi exchange, or circulation is when any service is exchanced for some intermediate merchan dise which will ensble its owner to obtai dise, which wilu emable ics owner to obta time. (Macleod: Dict. of Pol. Econ.)

- 2. Circumlocntion, excesaive attention to details.
"And therefore, without circunatances to tho point."
$\dagger$ 3. Details, minutiæ.

T (1) Crabb thus distinguishes between cireumstance and a situation: "Circemstanco a to situation as a part to a whole; many cir cumstances constitute a situation; a situation is an aggregate of circumstances. A peraon said to be in circumstances of atimenes who has an abundance of everything essential for his comfort; he is in easy sitaction when nothing exists to create uneasiness. Circumstance respects that which externally affecte us ; situation is employed both for the outward circumatances and the inward feelinga. The onccess of any undertaking deprenda greatly the particular situation of a person's mind will give a cast to his words or actions. Circum stances are critical, a situation is dangerous."
